SIMS (Sign Information Management System) Database. Last Updated March 30, 2018

**Definition of the Data:** The Parking Regulations application on the DOT website draws information from the New York City Department of Transportation's sign database, SIMS. SIMS is an operational database that assists DOT in managing the Agency's inventory of over one million traffic signs in New York City. The database keeps track of the description, location and installation dates for DOT signs. As DOT installs new signs and replaces old or missing signs, this information is entered into SIMS. The present system was released in June 2017 and is currently the only comprehensive resource for signs and sign regulations that exists.

**Limitations:** The information shown on this display was prepared by the New York City Department of Transportation. The information is intended to provide users with parking regulations on signs posted at given locations on the block.
