

1 in 8 Women will be Diagnosed with Breast Cancer.

A Mammogram is the best method to detect breast cancer early and save your life. If you are a woman 40 years or older, you should get a **mammogram** every year.

New York City public hospitals and health centers offer **mammograms** at little or no cost.*

Call 311 or visit **nyc.gov/hhc** to find the public hospital or health center near you.

*If you have insurance, your insurance will be billed. You are responsible for paying any co-payments. **Mammograms** are provided based on the provider's clinical assessment.

Breast screening examinations and mammograms are available at these HHC facilities:*
