

Overview

In an effort to assist New York City Office of Environmental Remediation's (OER) cleanup program enrollees, OER has created the NYC Green Team. The Green Team is available to assist NYC VCP and E-Designation enrollees in the acquisition of permits from city agencies that are required for activities conducted during the investigation and remedial phases of brownfield redevelopment projects. Enrollees of the NYC VCP or the E-Designation program must identify and obtain all necessary permits, including those required by City agencies. If unforeseen impediments or delays arise in obtaining City permits required during the investigative and remedial phases of the project, OER's Green Team is available to assist enrollees. The OER Green Team member can serve as a liaison between OER and the following City agencies: the Department of Environmental Protection (DEP), the Department of Buildings (DOB), the Department of Transportation (DOT), the Department of Sanitation (DSNY), the Business Integrity Commission (BIC), the Fire Department (FDNY), and the Board of Standards and Appeals (BSA). Enrollees are encouraged to contact their project manager to obtain assistance from the Green Team.

The OER Green Team member can serve as a liaison between OER and the following City agencies: the Department of Environmental Protection (DEP), the Department of Buildings (DOB), the Department of Transportation (DOT), the Department of Sanitation (DSNY), the Business Integrity Commission (BIC), the Fire Department (FDNY), and the Board of Standards and Appeals (BSA).
