CERTIFICATION

I, Gavin Zollo, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the Vacant Commercial Property Site, (OER Project No. 12EH-A271K). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

<u>Gavin Zollo</u>	<u>5/16/12</u>	
Qualified Environmental Professional	Date	Signature

EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

Site Location and Current Usage

The Site is located at 1465 Rockaway Parkway in the Canarsie section in Brooklyn, New York and is identified as Block 8185 and Lot 24 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 2,539-square feet and is bounded by single-story commercial building to the north, a single-story commercial building to the south, a two-story masonry building to the east and Rockaway Parkway to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is a vacant commercial lot.

Summary of Proposed Redevelopment Plan

The proposed use of the Site will consist of a three-story steel and masonry building with a full cellar. The proposed building will occupy 100% of the site and will be a mixed use building consisting of both commercial and residential space. The layout of the proposed site development is presented in Appendix C. The site is zoned for commercial and residential usage.

The first floor of the building will be utilized as a household appliance store. The second and third floors will be utilized as residential space. The cellar will be utilized as storage space and will exist 12 feet below grade. Groundwater at the site is at approximately 19 feet below grade. Therefore, the excavation required to erect the proposed building should not reach or disturb the groundwater beneath the site.

Summary of Past Uses of Site and Areas of Concern

A review of ownership records indicates that Conklin Homes LLC is the current owner of the Site. The Site is listed in historical maps as a retail/commercial storefront since 1907. The Site is currently vacant, undeveloped land.

The AOC identified for the Site by OER following a review of the Phase I ESA conducted by EnviroTrac include:

1. Historic fill throughout the property.

Summary of the Work Performed under the Remedial Investigation

EnviroTrac, on behalf of Conklin Homes LLC, performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed three (3) soil borings across the entire project Site, and collected six (6) soil samples for chemical analysis from the soil borings to evaluate soil quality;
3. Installed three (3) temporary groundwater monitoring wells throughout the Site to establish groundwater flow and collected three (3) groundwater samples for chemical analysis to evaluate groundwater quality;
4. Installed three (3) soil vapor probes around Site perimeter and collected three (3) samples for chemical analysis.

Summary of Environmental Findings

1. Elevation of the Site is approximately 19 feet above mean sea level.
2. Depth to groundwater is approximately 19 feet below grade at the Site.
3. Groundwater flow is assumed to the southeast beneath the Site.
4. Depth to bedrock is unknown at the Site.
5. The stratigraphy of the Site, from the surface down, consists of approximately 5 feet of historic fill underlain by at least 20 feet of fine to coarse sands intermixed with trace gravel.
6. Soil/fill samples collected during the RI showed no PCBs or VOCs at detectable concentrations. Two SVOCs were detected within the shallow samples collected from the historic fill layer at concentrations above their Restricted Residential SCOs. These SVOCs are both PAH compounds and their concentrations and distribution indicate that they are associated with historic fill material observed in shallow

- samples. Four metals exceeded UUSCOs in shallow soil samples, and of these, lead (max of 617 ppm) and mercury (max of 1.46 ppm), also exceeded RRSCOs. The pesticide 4,4,4-DDT was detected in one shallow soil sample at a concentration above its UUSCO, but well below its RRSCO. No SVOCs, pesticides, or metals were detected above Unrestricted Use SCOs within any of the deep soil samples collected at the Site. Overall, the findings were consistent with observations for other historical fill sites in Brooklyn. Gross contamination was not encountered in the field or detected by laboratory analysis.
7. Groundwater samples collected during the RI did not show any detectable concentrations of PCBs, SVOCs, or Pesticides. The only VOC identified in groundwater was chloroform, which was identified below its GQS. Dissolved manganese and sodium were detected above their respective NYSDEC GQS. The RI indicates that groundwater is not impacted by site conditions and did not reveal any sources of contaminants onsite. Gross contamination was not encountered in the field or detected by laboratory analysis.
 8. Soil vapor samples collected during the RI showed petroleum and chlorinated VOCs at generally low concentrations. PCE was identified in all samples at a maximum concentration of 22.8 ug/m³. The results for PCE are below the monitoring level range of the State DOH soil vapor guidance matrix. No chlorinated or petroleum-related VOCs were detected within any of the soil samples collected at the Site and these low levels suggest an offsite origin.

REMEDIAL INVESTIGATION REPORT

1.0 SITE BACKGROUND

Conklin Homes LLC (Conklin) has retained EnviroTrac Ltd to investigate and remediate an 0.06-acre site located at 1465 Rockaway Parkway in the Canarsie section of Brooklyn, New York. Mixed commercial and residential use is proposed for the Site. The RI work was performed on April 18, 2012. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

1.1 SITE LOCATION AND CURRENT USAGE

The Site is located at 1465 Rockaway Parkway in the Canarsie section in Brooklyn, New York and is identified as Block 8185 and Lot 24 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 2,539-square feet and is bounded by single-story commercial building to the north, a single-story commercial building to the south, a two-story masonry building to the east and Rockaway Parkway to the west. A map of the Site boundary is shown in Figure 2. Currently, the Site is a vacant commercial lot.

1.2 PROPOSED REVELOPMENT PLAN

The proposed use of the Site will consist of a three-story steel and masonry building with a full cellar. The proposed building will occupy 100% of the Site and will be a mixed used building consisting of both commercial and residential space. The layout of the proposed Site development is presented in Appendix C. The Site is zoned for commercial and residential usage.

The first floor of the building will be utilized as a household appliance store. The second and third floors will be utilized as residential space. The cellar will be utilized as storage space and will exist 12 feet below grade. Groundwater at the Site is at approximately 19 feet below grade. Therefore, the excavation required to erect the proposed building should not reach or disturb the groundwater beneath the Site.

1.3 DESCRIPTION OF SURROUNDING PROPERTY

The Site is situated in a mainly commercial area consisting of retail storefronts and food establishments along both sides of Rockaway Parkway. The adjacent property to the north is occupied by VIP Electronics & Appliance Inc (a retail electronics store). The adjacent property to the east is occupied by VIP Pro Audio Inc (a retail audio/video store). The adjacent property to the south is occupied by a McDonald's restaurant. The surrounding properties to the west across Rockaway Parkway are occupied, from south to north by, S & D Female (a retail clothing store), I-Max (a retail clothing store) and Rodeo Drive Jewelry (a retail jewelry store).

Refer to Figure 2 for the surrounding land usage.

2.0 SITE HISTORY

2.1 PAST USES AND OWNERSHIP

A review of ownership records indicates that Conklin Homes LLC is the current owner of the Site. The Property is listed in historical maps as a retail/commercial storefront since 1907. The Site is currently vacant, undeveloped land.

2.2 PREVIOUS INVESTIGATIONS

To the best of EnviroTrac's knowledge, the only previous investigation associated with the Site is the Phase I ESA prepared by EnviroTrac on February 29, 2012. The Phase I ESA indicated that one (1) recognized environmental condition (REC) existed for the Site. The REC was noted for the Property's inclusion on the OER's "Little e" database for air quality, exhaust stack location limits and hazardous materials.

2.3 SITE INSPECTION

A site inspection occurred on February 14, 2012 as part of the Phase I ESA. Visual observations were made of the Site, adjoining sites as viewed from the Site and the surrounding area during the site inspection. The Site was determined to be a vacant lot approximately 25 feet wide by 100 feet long in a mainly commercial area in the Canarsie neighborhood of Brooklyn, New York.

2.4 AREAS OF CONCERN

The AOC identified for the Site by OER following a review of the Phase I ESA conducted by EnviroTrac include:

1. Historic fill throughout the property.

The Phase I ESA is presented in Appendix A.

3.0 PROJECT MANAGEMENT

3.1 PROJECT ORGANIZATION

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Gavin Zollo of EnviroTrac Ltd.

3.2 HEALTH AND SAFETY

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

3.3 MATERIALS MANAGEMENT

All material encountered during the RI was managed in accordance with applicable laws and regulations.

4.0 REMEDIAL INVESTIGATION ACTIVITIES

EnviroTrac, on behalf of Conklin Homes LLC, performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed three (3) soil borings across the entire project Site, and collected six (6) soil samples for chemical analysis from the soil borings to evaluate soil quality;
3. Installed three (3) temporary groundwater monitoring wells throughout the Site to establish groundwater flow and collected three (3) groundwater samples for chemical analysis to evaluate groundwater quality;
4. Installed three (3) soil vapor probes around Site perimeter and collected three (3) samples for chemical analysis.

4.1 BORINGS AND MONITORING WELLS

Drilling and Soil Logging

On April 18, 2012, Associated Environmental Services, Ltd (Associated), under the supervision of EnviroTrac Hydrogeologist Michael Alliegro, advanced a total of six (6) investigative borings (three [3] soil/groundwater borings and three [3] soil vapor borings) at the Site. The soil/groundwater borings were advanced to a depth of 25 feet below grade and the soil vapor borings were advanced to a depth of 13 feet below grade using a direct-push Geoprobe unit.

Boring logs prepared by the Environmental Professional, based on field documentation provided by the on-site hydrogeologist, are attached in Appendix B. A map showing the location of soil borings and temporary monitoring wells is shown in Figure 3.

Groundwater Monitoring Well Construction

Each of the soil borings was subsequently converted into temporary groundwater monitoring wells via the installation of new, one-inch diameter PVC well screen and riser into the open borehole. The annulus around the well screen was filled with clean, number two silica sand.

Monitoring well locations are shown in Figure 3.

Survey

Based on the size of the Property and limited number of borings a survey was not conducted for the purposes of this investigation.

Water Level Measurement

Water levels were determined during boring installations based on soil conditions.

Water level data is included in Appendix B.

4.2 SAMPLE COLLECTION AND CHEMICAL ANALYSIS

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil, groundwater and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

Soil Sampling

Soil samples were collected continuously to 25 feet below grade with a Geoprobe macrocore sampler in five-foot increments using new, disposable acetate sleeves. Each sample was screened for organic vapors with a photo-ionization detector (PID) and evaluated for visual and olfactory indications of environmental impacts, which were not encountered. The soil from 0 - 2 feet below grade and 12 – 14 feet below grade was collected from each boring location for laboratory analysis.

A total of six (6) soil samples were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths, is reported in Tables 1 through 5. Figure 3 shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

Groundwater Sampling

One (1) groundwater sample was collected from each well with a piston-lift pump and dedicated Teflon tubing. Sampling was conducted in accordance with NYSDEC Draft DER-10 Technical Guidance for Site Investigation and Remediation, dated December 2002, and Sampling Guidelines and Protocols, dated March 1991. Following sample collection the boreholes were backfilled with the soil cuttings.

A total of three (3) groundwater samples were collected for chemical analysis during this RI. Groundwater sample collection data is reported in Tables 6 through 10. Figure 3 shows the location of groundwater sampling. Laboratories and analytical methods are shown below.

Soil Vapor Sampling

Three (3) soil vapor points were installed using the Geoprobe. Disposable soil vapor collection points, manufactured by Geoprobe, were installed. The annulus around and just above the vapor point was filled with clean, number two silica sand. A bentonite grout was then be utilized to fill and seal the boring.

As part of the soil vapor evaluation, a tracer gas was used in accordance with NYSDOH protocols to serve as a quality assurance/quality control (QA/QC) device to verify the integrity of the soil vapor point seal. Helium was used as the tracer gas and a box served to keep it in contact with the probe during testing. A portable monitoring device was used to analyze a sample of soil vapor for the tracer prior to sampling. At the conclusion of the sampling round, tracer monitoring was performed a second time to confirm the integrity of the probe seals. Air samples were collected in Summa canisters which had been certified clean by the laboratory.

A total of three (3) soil vapor probes were installed and three (3) soil vapor samples were collected for chemical analysis during this RI. Soil vapor sampling locations are shown in Figure 3. Soil vapor sample collection data is reported in Table 11. Soil vapor sampling logs are included in Appendix B. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006.*

Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

Factor	Description
Quality Assurance Officer	The chemical analytical quality assurance is directed by Ms. Phyllis Shiller of Phoenix Environmental Laboratories, Inc.
Chemical Analytical Laboratory	Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and was Phoenix Environmental Laboratories, Inc.
Chemical Analytical Methods	<p>Soil analytical methods:</p> <ul style="list-style-type: none"> • TAL Metals by EPA Method 6010C (rev. 2007); • VOCs by EPA Method 8260C (rev. 2006); • SVOCs by EPA Method 8270D (rev. 2007); • Pesticides by EPA Method 8081B (rev. 2000); • PCBs by EPA Method 8082A (rev. 2000); <p>Groundwater analytical methods:</p> <ul style="list-style-type: none"> • TAL Metals by EPA Method 6010C (rev. 2007); • VOCs by EPA Method 8260C (rev. 2006); • SVOCs by EPA Method 8270D (rev. 2007); • Pesticides by EPA Method 8081B (rev. 2000); • PCBs by EPA Method 8082A (rev. 2000); <p>Soil vapor analytical methods:</p> <ul style="list-style-type: none"> • VOCs by TO-15 VOC parameters.

Results of Chemical Analyses

Laboratory data for soil, groundwater and soil vapor are summarized in Tables 1 through 5, 6 through 10 and 11, respectively. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Appendix D.

5.0 ENVIRONMENTAL EVALUATION

5.1 GEOLOGICAL AND HYDROGEOLOGICAL CONDITIONS

Stratigraphy

The stratigraphy of the Site, from the surface down, consists of approximately 5 feet of historic fill underlain by at least 20 feet of fine to coarse sands intermixed with trace gravel.

Hydrogeology

Water level data for all monitor wells is included in Appendix B. The average depth to groundwater is approximately 19 feet below grade.

5.2 SOIL CHEMISTRY

Soil/fill samples collected during the RI showed no PCBs or VOCs at detectable concentrations. Two SVOCs were detected within the shallow samples collected from the historic fill layer at concentrations above their Restricted Residential SCOs. These SVOCs are both PAH compounds and their concentrations and distribution indicate that they are associated with historic fill material observed in shallow samples. Four metals exceeded UUSCOs in shallow soil samples, and of these, lead (max of 617 ppm) and mercury (max of 1.46 ppm), also exceeded RRSCOs. The pesticide 4,4,4-DDT was detected in one shallow soil sample at a concentration above its UUSCO, but well below its RRSCO. No SVOCs, pesticides, or metals were detected above Unrestricted Use SCOs within any of the deep soil samples collected at the Site. Overall, the findings were consistent with observations for other historical fill sites in Brooklyn. Gross contamination was not encountered in the field or detected by laboratory analysis. Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site. A summary table of data for chemical analyses performed on soil samples is included in Tables 1 through 5.

Figure 3 shows the location of the soil borings.

5.3 GROUNDWATER CHEMISTRY

Groundwater samples collected during the RI did not show any detectable concentrations of PCBs, SVOCs, or Pesticides. The only VOC identified in groundwater was chloroform, which was identified below its GQS. Dissolved manganese and sodium were detected above their respective NYSDEC GQS. The RI indicates that groundwater is not impacted by site conditions and did not reveal any sources of contaminants onsite. Gross contamination was not encountered in the field or detected by laboratory analysis. Data collected during the RI is sufficient to delineate the distribution of contaminants in groundwater at the Site. A summary table of data for chemical analyses performed on groundwater samples is included in Tables 6 through 10. Exceedences of applicable groundwater standards are shown. Figure 3 shows the location of the temporary groundwater monitoring wells.

5.4 SOIL VAPOR CHEMISTRY

Soil vapor samples collected during the RI showed petroleum and chlorinated VOCs at generally low concentrations. PCE was identified in all samples at a maximum concentration of 22.8 ug/m³. The results for PCE are below the monitoring level range of the State DOH soil vapor guidance matrix. No chlorinated or petroleum-related VOCs were detected within any of the soil samples collected at the Site and these low levels suggest an offsite origin. Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in Table 11. Figure 3 shows the location of the temporary soil vapor points.

5.5 IMPEDIMENTS TO REMEDIAL ACTION

There are no known impediments to remedial action at the Site.

Environmental Professional Statement:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Gavin Zollo
Site Assessor/Environmental Professional

1.2 Findings and Conclusions Summary

These independent conclusions represent our professional opinions based on information and data available to us during the course of this assessment. Factual information regarding operations and conditions at the Subject Property provided by the user or their representatives was assumed to be correct and complete. The conclusions and professional opinions presented are based on the data provided and observations and conditions that existed at the Subject Property on the date of the onsite inspection.

The following table provides a summary of the notable findings for the Property.

FINDINGS AND CONCLUSIONS SUMMARY						
Report Section	Further Action?	De Minimis Condition	Recognized Environmental Condition (REC)	Historical REC	ASTM Non-Scope Condition	Description
3.5	Physical Setting Sources	No				
4.0	Client Provided Information	Yes	(1)			According to the Client, the Property is listed as an "E" Designated site.
5.1.1 & 5.1.2	Federal Database Findings	No				
5.1.3 & 5.1.4	State and Local Database Findings	Yes	(1)			According to the state and local databases, the Property is listed as an "E" Designated site.
5.1.5 through 5.1.11	Local Environmental Records	Yes	(1)			According to the New York City Department of Buildings, the Property is listed as an "E" Designated site.
5.3	Historical Records Sources	No				
6.2	Hazardous Substance Use, Storage and Disposal	No				
6.3	Underground Storage Tanks	No				
6.4	Above ground Storage Tanks	No				
6.5	Polychlorinated Biphenyls (PCBs)	No				
6.6	Unidentified Substance Containers	No				
6.7	Non-hazardous Liquid/Solid Waste	No				
6.8	Wastewater	No				
6.9	Waste Pits, Ponds and Lagoons	No				
6.10	Sumps	No				
6.11	Septic Systems	No				
6.12	Stormwater Management System	No				
6.13	Wells	No				
6.14	Other	No				
7.0	Interviews	No				
8.1	Asbestos-Containing Material (ACM)	No				
8.2	Radon	No				
8.3	Lead in Drinking Water	No				
8.4	Lead-Based Paint (LBP)	No				
8.5	Mold Screening	No				

We have performed a Phase I Environmental Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of 17 1465 Rockaway Parkway, Brooklyn, New York. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed one (1) *recognized environmental condition* in connection with the Property:

1. Based on interviews with Property ownership, a review of state and local databases and a review of the New York City (NYC) Buildings Department records, the Property is currently listed as an “E” Designated site on NYC zoning maps and the City Environmental Quality Review (CEQR) Environmental Designations list. The NYC Office of Environmental Remediation (OER), the governing body regarding “E” Designated sites, states that “an E-Designation is a NYC zoning map designation that indicates the presence of an environmental requirement pertaining to potential Hazardous Materials Contamination, Window/Wall Noise Attenuation, or Air Quality impacts on a particular tax lot. E-Designations are established on the Zoning Map by the Department of City Planning (DCP) and City Council as a part of a zoning change/action.” Further investigation as well as engineering controls in any future construction is required in order to satisfy the requirements of the OER.

1.3 Significant Data Gap Summary

The following is a summary of significant data gaps, if any, identified in this report.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		Description
3.5	Current Uses of Adjoining Properties	No <i>significant data gap</i> identified.
4.2	Environmental Liens or Activity and Use Limitations (AULs)	No <i>significant data gap</i> identified.
5.1	Standard Environmental Records	No <i>significant data gap</i> exists.
5.2	Physical Setting Sources	No <i>significant data gap</i> identified.
5.3	Historical Records Sources	No <i>significant data gap</i> identified.
6.1	Methodology and Limiting Conditions	No <i>significant data gap</i> identified.
7.0	Interviews	No <i>significant data gap</i> identified.

2.0 INTRODUCTION

EnviroTrac Ltd. (EnviroTrac) was retained by Conklin Homes LLC to perform a Phase I Environmental Site Assessment (ESA) for the property located at 1465 Rockaway Parkway, Brooklyn, New York, 11236 (Property). The property is located in the City of New York in Kings County. The location of the Property is shown on **Figure 1**.

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* and certain potential environmental conditions outside the scope of *ASTM Standard Practice E 1527-05* in connection with the Property at the time of the site reconnaissance. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in general accordance with the *ASTM Standard Practice E 1527-05*, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to *ASTM Standard Practice E 1527-05* are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the Property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.
- Usage of the Property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.
- Observations and interviews regarding current Property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, non-hazardous solid wastes and wastewater.
- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties to the Property.
- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the Property.

The scope of the assessment also included consideration of the following environmental issues or conditions that are beyond the scope of *ASTM Standard Practice E 1527-05*:

- Mold Screening to report the findings of a baseline survey of readily observable mold and conditions conducive to mold on the Property identified by limited interview, document review and physical observation, and to provide an opinion on whether an identified condition warrants further action. The scope of work for the Mold Screening was intended to be consistent with *ASTM Standard Practice E 2418-06: Standard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process*.

The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to two knowledgeable persons from Property management or engineering staff. The document review was limited to only those relevant documents made readily available to EnviroTrac in a timely manner. The physical observations were limited to certain Heating, Ventilation and Air Conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, EnviroTrac observed the HVAC equipment room(s) and readily accessible mechanical rooms and, in buildings with package units in the ceiling, at least one unit per floor. Also, unless noted otherwise, EnviroTrac observed readily accessible areas of the basement (or lowest level), the top floor, the roof (including any penthouse areas) and at least one mid-level floor (if applicable). For multi-story buildings, the total number of floors observed (inclusive of those already mentioned) was intended to be up to 10 percent of the total number of floors (if readily accessible). For hotel and multifamily buildings, EnviroTrac targeted the lowest and highest levels and roof as described above and up to 10 percent of units, including one per floor if readily accessible. The Mold Screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The Mold Screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the Mold Screening as authorized, and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the Property.

- Visual observation of suspect ACM, consisting of providing an opinion on the condition of suspect ACM on the Property based upon visual observation during the site reconnaissance.
- Radon document review, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the Property.
- Lead in drinking water data review, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the Property meets or exceeds drinking water standards for lead.
- Visual observation of lead-based paint (LBP), consisting of providing an opinion on the potential for LBP based on the construction date of buildings on the Property and visual observation of the condition of suspect LBP.

- Wetlands document review, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the Property is identified as having a wetland.
- Flood plain document review, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the Property is identified as being located within a flood plain.

2.3 Significant Assumption

Any assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the Property.

2.4 Limitations and Exceptions

EnviroTrac has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products at the Property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E 1527-05 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* - A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any Property.
- *Not Exhaustive* - A Phase I ESA is not an exhaustive investigation of the Property and environmental conditions on such Property.
- *Past Uses of the Property* - Phase I requirements only require review of standard historical sources at five-year intervals. Therefore, past uses of Property at less than five-year intervals may not be discovered.

Users of this report may refer to *ASTM Standard Practice E 1527-05* for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not

be used for demolition, renovation, or other Property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

EnviroTrac makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, EnviroTrac is not responsible for consequences or conditions arising from facts not fully disclosed to EnviroTrac during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by EnviroTrac's observations or other credible referenced sources reviewed during the assessment. EnviroTrac shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

EnviroTrac used reasonable efforts to identify evidence of above ground and underground storage tanks and ancillary equipment on the Property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records, and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials, and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial

disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of EnviroTrac.

EnviroTrac is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the Property in this report, represent a comprehensive definition or precise delineation of Property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The *Environmental Professional* Statement is intended to document EnviroTrac's opinion that an individual meeting the qualifications of an *Environmental Professional* was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in *ASTM Standard Practice E 1527-05* and the scope of work for this assessment.

Per *ASTM Standard Practice E 1527-05, Section 6, User Responsibilities*, the Client of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the Property. Failure by the Client to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). EnviroTrac makes no representations or warranties regarding a Client's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the *ASTM Standard Practice E 1527-05*, this report is presumed to be valid for a six-month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge, and (5) environmental liens search. Reports older than one year may not meet the *ASTM Standard Practice 1527-05* and therefore, the entire report must be updated to reflect current conditions and Property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (Client Reliance)

This report is for the use and benefit of, and may be relied upon by, Conklin Homes LLC (Client), and any of its affiliates, and third parties authorized in writing by Client and EnviroTrac, including the lender(s) in connection with a secured financing of the Property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the Property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of EnviroTrac, is at the sole risk and expense of such third party.

EnviroTrac makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied. Unless otherwise agreed upon in writing by EnviroTrac and a third party, EnviroTrac's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of \$100,000.

3.0 SITE DESCRIPTION

The following sections discuss the current and past uses of the Property and surrounding properties.

3.1 Location and Legal Description

The Property address is 1465 Rockaway Parkway, Brooklyn, New York 11236 (hereinafter referred to as the “Property”) and is located in Kings County. The site is identified on the Topographic Location Map provided as **Figure 1**. An Aerial Site Vicinity Map is provided as **Figure 2**. Photograph documentation is included in **Appendix A**. The Property consists of one tax parcel and is identified on NYCityMap, a GIS website operated by the City of New York, as Borough of Brooklyn, Block 8185 and Lot 24. According to NYCityMap, the parcel is 2,539 square feet (sq. ft.). Pedestrian access to the Property is available from Rockaway Parkway to the west.

3.2 Surrounding Area General Characteristics

The Property is situated along Rockaway Parkway in a commercial and residential area in Brooklyn, New York. The adjacent property to the north is occupied by VIP Electronics & Appliance Inc. The adjacent property to the east is occupied by VIP Pro Audio Inc. The adjacent property to the south is occupied by a McDonald’s restaurant. The surrounding property to the west across Rockaway Parkway is occupied by, from south to north, S & D Female (a retail clothing store), I-Max (a retail clothing store) and Rodeo Drive Jewelry (a jewelry store). A detailed listing of adjoining properties is provided in **Section 3.5**.

3.3 Current Use of the Property

The Property encompasses 2,539 sq. ft. of land and is currently a vacant lot. According to NYCityMap and the NYC Department of Finance website, the Property is currently owned by Conklin Homes LLC. The previously existing two-story commercial building was demolished in September of 2011. Conklin Homes LLC plans to construct one (1) approximately 5,000 sq. ft., three-story, mixed use building on the Property.

3.4 Description of Property Improvements

The following table provides general descriptions of the Property improvements.

PROPERTY IMPROVEMENTS	
Size of Property (approximate)	2,539 sq. ft.
General Topography of Property	Essentially level.
Adjoining and/or Access/Egress Roads	Rockaway Parkway.
Paved or Concrete Areas (including parking)	None.
Unimproved Areas	All areas of the Property are currently unimproved.
Landscaped Areas	No landscaped areas exist on the Property.
Surface Water	No surface water bodies are located on the Property.
Potable Water Source	Not applicable.
Sanitary Sewer Utility	Not applicable.
Storm Sewer Utility	Not applicable.
Electrical Utility	Not applicable.
Natural Gas Utility	Not applicable.
Current Occupancy Status	Vacant.
General Building Description	No building currently exists on the Property.
Number of Floors	Not applicable.
Total Square Feet of Space (approximate)	Not applicable.
Construction Completion Date (approximate year)	Not applicable.
Construction Type	Not applicable.
Interior Finishes Description	Not applicable.
Exterior Finishes Description	Not applicable.
Heating & Cooling System Type	Not applicable.

3.5 Physical Setting Sources

EnviroTrac researched the physical setting of the property, including topography, geology, hydrology and floodplains. Findings are discussed in the following sections.

3.5.1 Topography

As specified in ASTM Standard Practice E 1527-05 § 8.2.3., the United States Geological Survey (USGS) 7.5-minute topographic map (Coney Island Quadrangle), showing the Property location, was obtained and reviewed. According to the topographic map, the Property is approximately 19 feet above mean sea level (MSL). No potential sources of adverse environmental impact to the Property were indicated on the topographic map. A copy of a portion of the USGS topographic map that includes the Property is included as **Figure 1**.

3.5.2 Geology

According to the *Geological Map of New York* (New York State Museum and Science Service 1970), the Property and surrounding areas are underlain by sediments of the Magothy formation, Upper Cretaceous in age. Predominant sediment types include clay, silt, sand, and gravel.

3.5.3 Hydrology

Depth to groundwater at the site is unknown. No surface water bodies are located on the subject property or adjacent properties. While groundwater depth is unknown, given local surface topography groundwater flow in the vicinity of the subject property is most likely to the southeast, toward Jamaica Bay. No site-specific groundwater data was available for this report.

3.5.4 FEMA Flood Plain Map

The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) showing the area where the Property is located (3604970219F) was reviewed. Based on the map and regional knowledge, EnviroTrac does not consider flooding to be a *recognized environmental condition* for the Property. A copy of the flood plain map is included in **Appendix D**.

3.6 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

Directions from Property	Address	Occupant's Name	Current Use
North	1463 Rockaway Parkway	VIP Electronics & Appliance Inc	Retail electronics store
East	215 Conklin Street	VIP Pro Audio Inc	Retail electronics store
South	1467 Rockaway Parkway	McDonald's	Restaurant
West	1466, 1464, 1460 Rockaway Parkway	S & D Female, I-Max, Rodeo Drive Jewelry, respectively	Retail clothing store, retail clothing store, jewelry store, respectively

Please refer to **Appendix C** for adjoining property information supplied in the Toxics Targeting federal, state and local database searches.

4.0 CLIENT PROVIDED INFORMATION

The following section summarizes information (if any) provided by Conklin Homes, LLC (Client) with regard to the Phase I ESA. Documentation may be found in **Appendix B** or where referenced in this report.

4.1 Title Records

The Client did not provide EnviroTrac with a copy of a chain of title report.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

The Client has no knowledge of any environmental liens against the Property that are filed or recorded under federal, state or local law. However, the Property is “E” Designated as referenced in applicable sections of the report.

4.3 Specialized Knowledge

No persons with specialized knowledge were supplied by the Client.

4.4 Significant Valuation Reduction for Environmental Issues

No information regarding a significant valuation reduction for environmental issues associated with the Property was provided by the Client.

4.5 Owner, Property Manager and Occupant Information

The Property is owned by Conklin Homes LLC of Brooklyn, New York. Conklin Homes LLC plans to construct one (1) three-story, mixed use building on the Property.

4.6 Reason for Performing Phase I ESA

According to the Client, the reason for conducting this ESA was part of due diligence related to a NYC OER “E” Designation for the Property. EnviroTrac considers the listing of the Property as an “E” Designated site to represent a *recognized environmental condition* at the Property. Further investigation as well as engineering controls in any future construction is required in order to satisfy the requirements of the OER.

4.7 Other Client Provided Documents

Per the *ASTM Standard Practice E 1527-05*, EnviroTrac requested information from the Property owner and operators. No other information was provided for this assessment.

5.0 RECORDS REVIEW

EnviroTrac reviewed environmental records and historical environmental reports pertinent to the property, as described in the following sections.

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by Toxics Targeting of Ithaca, New York, was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the Property. EnviroTrac also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the Property based on the partial street address, city, or zip code. Any unmappable site that was identified by EnviroTrac as a being within the approximate minimum search distance from the Property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. The complete regulatory agency database report may be found in **Appendix C**. The following is a summary of the findings of the database review.

SUMMARY OF FEDERAL, STATE AND LOCAL DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Property Listed?	# Sites Listed
Federal National Priority List (NPL)	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0
Federal CERCLIS Non- NFRAP Sites	½ mile	No	0
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action (CORRACTS) Facilities	1 mile	No	0
Federal RCRA non-CORRACTS Treatment, Storage, and Disposal (TSD) Facilities	½ mile	No	0
Federal RCRA Hazardous Waste Generators & Transporters	1/8 mile	No	2
Federal Emergency Response Notification System (ERNS) List	Property	No	0
US Brownfields	½ mile	No	0
New York City (NYC) Environmental Quality Review Requirements ("E") Sites	Property	Yes	6
New York State (NYS) Inactive Hazardous Waste Disposal Site Registry	1 mile	No	0
NYS Inactive Hazardous Waste Disposal Site Registry Qualifying	1 mile	No	0

SUMMARY OF FEDERAL, STATE AND LOCAL DATABASE FINDINGS			
Regulatory Database	Approximate Minimum Search Distance	Property Listed?	# Sites Listed
New York State Department of Environmental Conservation (NYSDEC) Solid Waste Facilities/Landfills	½ mile	No	0
NYS Major Oil Storage Facilities	1/8 mile	No	0
Local and State Petroleum Bulk Storage (PBS) Facilities	1/8 mile	No	8
NYSDEC Active Tank Failures	½ mile	No	0
NYSDEC Active Tank Test Failures	½ mile	No	1
NYSDEC Active Spills – Unknown/Other Causes	½ mile	No	4
NYSDEC Active Spills – Misc. Causes	½ mile	No	0
NYSDEC Closed Tank Failures	½ mile	No	2
NYSDEC Closed Tank Test Failures	½ mile	No	8
NYSDEC Closed Spills – Unknown/Other Causes	½ mile	No	24
NYSDEC Closed Spills – Misc. Causes	½ mile	No	7
NYS Chemical Bulk Storage Sites	1/8 mile	No	0
Historic Utility Facilities	1/8 mile	No	0
1934 NYC Municipal Waste Landfills	½ mile	No	0
Hazardous Substance Waste Disposal Sites	½ mile	No	0
Toxic Release Inventory (TRI) Sites	1/8 mile	No	0
Permit Compliance System (PCS) Toxic Wastewater Discharges	1/8 mile	No	0
Air Discharges	1/8 mile	No	1
Civil and Administrative Enforcement Docket Facilities	1/8 mile	No	0

5.1.1 Federal Agency Database Findings

The Property does not appear on the federal agency databases reviewed for the purpose of this assessment.

5.1.2 Federal Agency Database Findings – Surrounding Properties

Two (2) RCRA Hazardous Waste Generators and Transporters are listed within the ASTM search distance from the Property. Based on the information supplied in the database report, the distance, anticipated direction of groundwater flow, current regulatory status, and/or the absence of reported releases, indicates that none of the surrounding properties represent a *recognized environmental condition* to the Property.

5.1.3 State and Local Database Findings

The Property appears once on the state and local agency databases reviewed for the purpose of this assessment. The state and local agency listing is summarized below:

**Block: 8185 Lot: 24
1465 Rockaway Parkway**

Databases Listing the Property:

NYC Environmental Quality Review Requirements (“E”) Sites

The Property, CEQR Number 09DCP052K, is noted on the state and local database as an “E” Designated Site. The database lists air quality (#2 fuel oil or natural gas for heating), exhaust stack location limitations and hazardous materials Phase I and Phase II testing protocol as the “E” Designation descriptions for the Property.

Based on a review of the state and local agency database, EnviroTrac considers the database listing of the Property as an “E” Designated Site to represent a *recognized environmental condition* at the Property. Further investigation as well as engineering controls in any future construction is required in order to satisfy the requirements of the OER.

5.1.4 State and Local Database Findings - Surrounding Properties

Five (5) NYC Environmental Quality Review Requirements (“E”) Sites, eight (8) Local and State Petroleum Bulk Storage Facilities, five (5) active status NYSDEC Spills, (41) closed status NYSDEC Spills and one (1) Air Discharge Site are listed with-in the ASTM-specified search distances. Based on the information supplied in the database report, the distance, anticipated direction of groundwater flow, current regulatory status, and/or the absence of reported releases, indicates that none of the surrounding properties represent a *recognized environmental condition* to the Property.

5.1.5 Local Environmental Records Sources

NYCityMap, NYC Department of Buildings, NYC Department of Finance

EnviroTrac utilized NYCityMap, the NYC Department of Buildings and NYC Department of Finance websites to research local records maintained by the City of New York regarding the Property. The NYC Buildings Department Property Profile indicates that the Property is listed as

“E” Designated for hazmat and air. Copies of the local environmental records documents reviewed are provided in **Appendix F**.

Based on a review of the local environmental records sources, EnviroTrac considers the NYC Buildings Department listing of the Property as an “E” Designated Site to represent a *recognized environmental condition* at the Property. Further investigation as well as engineering controls in any future construction is required in order to satisfy the requirements of the OER.

Fire Department City of New York (FDNY)

EnviroTrac submitted a Record Search Request to the FDNY on February 14, 2012 requesting all records pertaining to fuel storage at the Property. According to the FDNY, no records were found on file for the Property. Copies of the FDNY Records Search Request documents are provided in **Appendix F**.

5.1.6 Aerial Photographs

EnviroTrac reviewed available aerial photographs of the Property and surrounding areas provided by HistoricAerials.com. The following are descriptions and interpretations from the aerial photograph review. Aerial photographs reviewed are provided in **Appendix E**.

AERIAL PHOTOGRAPH SUMMARY		
Year	Scale	Comments
1954	1"= 128'	Property: Appears to be developed as commercial/retail. Surrounding Area: Surrounding properties generally appear to be developed as commercial/retail.
1966	1"= 128'	Property: Appears generally the same as 1954. Surrounding Area: Appears generally the same as 1954.
1980	1"= 128'	Property: Appears generally the same as 1966. Surrounding Area: Appears generally the same as 1966.
2004	1"= 128'	Property: Appears generally the same as 1980. Surrounding Area: Appears generally the same as 1980.
2006	1"= 128'	Property: Appears generally the same as 2004. Surrounding Area: Appears generally the same as 2004.

No historic water bodies or evidence of backfilling, dumping and/or stockpiling were identified in the historical aerial photographs.

5.1.7 Fire Insurance Maps

Historical Sanborn® Fire Insurance Maps were evaluated to obtain past use information for the Property and surrounding area. Property uses that may have environmental significance, as well

as significant use changes to the Property and surrounding properties, are noted in the following table. Copies of the maps are provided in **Appendix E**.

FIRE INSURANCE MAP SUMMARY		
Year	Comments	
	Property	Surrounding Area
1895	Not depicted.	Northern and eastern properties of the map are not depicted. Sparse residential development appears south and east.
1907	Listed as two-story store.	Generally residential and retail.
1928	A one-story addition appears to exist to the rear of the existing building.	Additional urban development appears to have occurred in all directions.
1950	Unchanged from 1928.	Additional urban development appears to have occurred in all directions. The adjacent property to the south is noted as a clothing manufacturer.
1967	Unchanged from 1950.	Dense urban development appears in all directions. The adjacent property to the north is noted as a dry cleaner. The adjacent property to the south now appears to have been subdivided into two (2) stores.
1969	Unchanged from 1967.	Generally unchanged from 1967.
1977	Unchanged from 1969.	Generally unchanged from 1969.
1979	Unchanged from 1977.	Generally unchanged from 1977.
1980	Unchanged from 1979.	Generally unchanged from 1979.
1981	Unchanged from 1980.	Generally unchanged from 1980.
1983	Unchanged from 1981.	Generally unchanged from 1981.
1986	Unchanged from 1983.	Generally unchanged from 1983.
1987	Unchanged from 1986.	Generally unchanged from 1986.
1989	Unchanged from 1987.	Generally unchanged from 1987.
1991	Unchanged from 1989.	Generally unchanged from 1989.
1992	Unchanged from 1991.	Generally unchanged from 1991.
1993	Unchanged from 1992.	Generally unchanged from 1992.
1994	Unchanged from 1993.	Generally unchanged from 1993.
1995	Unchanged from 1994.	Generally unchanged from 1994.
1996	Unchanged from 1995.	Generally unchanged from 1995.
2001	Unchanged from 1996.	Generally unchanged from 1996.
2002	Unchanged from 2001.	Generally unchanged from 2001.
2003	Unchanged from 2002.	Generally unchanged from 2002.
2004	Unchanged from 2003.	Generally unchanged from 2003.
2005	Unchanged from 2004.	Generally unchanged from 2004.
2006	Unchanged from 2005.	Generally unchanged from 2005.
2007	Unchanged from 2006.	Generally unchanged from 2006.

5.1.8 Property Tax Files

EnviroTrac reviewed files on the NYC Department of Finances website. None of the files reviewed indicated *recognized environmental conditions* at the Property. Copies of the Department of Finance documents reviewed are provided in **Appendix F**.

5.1.9 Recorded Land Title Records

The acquisition of land title records was not part of the scope of work for this assessment.

5.1.10 City Directories

No City Directory research was conducted for this Phase I ESA.

5.1.11 Zoning/Land Use Records

According to NYCityMap, the Property land use is list as commercial and office use. The NYC Buildings Department Property Profile indicates that the Property is listed as “E” Designated for hazmat and air.

Based on a review of the NYCityMap and NYC Building Department files, EnviroTrac considers the NYC Buildings Department listing of the Property as an “E” Designated Site to represent a *recognized environmental condition* at the Property. Further investigation as well as engineering controls in any future construction is required in order to satisfy the requirements of the OER.

5.2 Historical Records Sources Summary

Following the review of historic aerial photographs and historical Sanborn® Fire Insurance maps, EnviroTrac was able to establish a history of the Property beginning in 1907, when the Property was a two-story storefront. The Property building is currently a vacant lot.

ASTM requires a review of the Property back to the obvious first developed use or back to 1940. A history of the Property has been established to 1907. As such, the requirements of *ASTM Standard Practice E 1527-05 § 8.3.2.1 § 8.3.2.2* have been satisfied and, as stated in *ASTM Standard Practice E 1527-05 § 8.3.2.3*, the historical research is considered complete.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

On February 14, 2012, Gavin Zollo, EnviroTrac Site Assessor, conducted a site visit and area reconnaissance. During the reconnaissance, EnviroTrac was accompanied by Mr. Sam Manshary, the Property owner. Visual observations were made of the Property and improvements, adjoining sites as viewed from the Property and the surrounding area during the trip to and from the Property. Photograph documentation of the site visit and area reconnaissance is included in **Appendix A**.

Portions of the Property were observed along the perimeter and in a general grid pattern in safely accessible areas. Weather conditions during the site visit consisted of cloudy skies and temperatures in the 40°F range.

6.2 Hazardous Substance Use, Storage, and Disposal

No evidence of the generation, use, storage or disposal of hazardous materials was identified during the site inspection.

6.3 Underground Storage Tanks (USTs)

No visible evidence of USTs, such as fill ports or vent pipes were observed by EnviroTrac during the site inspection.

6.4 Above Ground Storage Tanks (ASTs)

No ASTs were identified by EnviroTrac during the site inspection.

6.5 Other Petroleum Storage

No evidence of other petroleum storage was identified by EnviroTrac during the site inspection.

6.6 Polychlorinated Biphenyls (PCBs)

No evidence of PCBs were identified by EnviroTrac during the site inspection.

6.7 Unidentified Substance Containers

EnviroTrac did not observe the presence of unidentified substance containers.

6.8 Wastewater

The lot is currently vacant; therefore no wastewater is generated at the Property.

6.9 Waste Pits, Ponds and Lagoons

EnviroTrac did not observe any waste pits, ponds and/or lagoons on the Property at the time of the site inspection.

6.10 Sumps

EnviroTrac did not observe any sumps on the Property at the time of the site inspection.

6.11 Septic Systems

EnviroTrac did not observe any evidence of a septic system at the time of the site inspection.

6.12 Storm Water Management Systems

EnviroTrac did not observe any evidence of a storm water management system at the time of the site inspection.

6.13 Wells

No irrigation or potable water wells were identified by or reported to EnviroTrac.

6.14 Debris and Dumping

Various debris consistent with demolition activities, i.e. concrete, bricks, wood and piping, were noted throughout the Property. No evidence indicating an environmental concern was noted in these areas.

Based on the results of the site inspection, the construction debris located on the Property does not constitute a *recognized environmental condition* at the Property.

6.15 Other

EnviroTrac did not observe any other environmental conditions at the Property during the site inspection.

7.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the Property:

Role	Name	Title/Company	Interview Type
Owner	Mr. Sam Manshary	Owner/Conklin Homes LLC	In Person/Email/Phone
Owner	Mr. Mike Manshary	Owner/Conklin Homes LLC	In Person

Mr. Sam Manshary accompanied EnviroTrac on the site inspection and completed the pre-survey questionnaire. Mr. Mike Manshary answered questions related to the current and historic use of the subject property. Pertinent information from the interview and the pre-survey questionnaire is discussed in applicable sections of this report. A copy of the pre-survey questionnaire is provided in **Appendix B**.

8.0 NON-SCOPE CONSIDERATIONS

Non-scope considerations are included in the ASTM E 1527 Phase I standard to help assess business environmental risk. In addition to those previously discussed, EnviroTrac conducted limited surveys for suspect asbestos containing materials (ACM), potential radon exposure, use of lead-based paints (LBP), lead in drinking water, wetlands and mold. The findings are discussed in the following sections.

8.1 Asbestos-Containing Material (ACM)

EnviroTrac conducted a limited visual survey for the presence of suspect asbestos-containing materials (ACM) at the Property. The Property is currently vacant and the previous building was demolished in September 2011. As such, EnviroTrac does not consider ACM to represent a *recognized environmental condition* at the Property.

8.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The United States Environmental Protection Agency (USEPA) guidance action level for annual residential exposure to radon is 4.0 Pico curies per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

The EPA maintains a database of radon test results on a local and county level (<http://www.epa.gov/radon/zonemap.html>). According to the EPA website, the Property is located within Zone 3, indicating a low potential for elevated indoor radon levels (**Appendix D**). Zone 3 counties, including Kings County, have predicted average indoor radon screening levels of less than 2 pCi/L. Radon does not appear to represent a concern for the Property, and no additional investigations are recommended at this time. Radon gas sampling was not conducted for this ESA.

8.3 Lead in Drinking Water

The Property is vacant and therefore not currently provided potable water. No New York City Drinking Water Supply and Quality Report was reviewed for the Property.

8.4 Lead-Based Paint (LBP)

EnviroTrac conducted a limited visual survey for the presence of suspect lead-based paint (LBP) at the Property. The Property is currently vacant and the previous building was demolished in September 2011. As such, EnviroTrac does not consider LBP to represent a *recognized environmental condition* at the Property.

8.5 Wetlands

According to the United States Fish and Wildlife Service, National Wetland Inventory (NWI) Mapper (<http://www.fws.gov/wetlands/Data/Mapper.html>), no designated wetland areas were identified on the Property. According to the NWI Mapper, no wetlands are located within 0.5 mile of the subject property. A copy of the wetland map is presented in **Appendix D**.

No formal investigation for the presence of wetlands on or near the Property was conducted by EnviroTrac or requested by the Client.

8.6 Mold Screening

EnviroTrac conducted a limited visual assessment for mold at the Property. No mold growth was evident during the site inspection. The Property is currently vacant and the previous building was demolished in September 2011. As such, EnviroTrac does not consider mold to represent a *recognized environmental condition* at the Property.

8.7 Additional Client Requested Conditions

No additional Client Requested Conditions were evaluated for this Phase I ESA.

4A.	To the best of your knowledge, has the Property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		✓		
4B.	To the best of your knowledge, has any Adjoining Property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		✓		
5A.	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Property?		✓		
5B.	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Property?		✓		

PRE-SURVEY QUESTIONNAIRE

QUESTION		OWNER/OCCUPANT			COMMENTS
		Yes	No	U-NR	
6A.	Are there currently any industrial Drums (typically 55-gallon) or sacks of chemicals located on the Property?		✓		
6B.	To the best of your knowledge, have there been previously any industrial Drums (typically 55-gallon) or sacks of chemicals located on the Property?		✓		
7A.	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Property?		✓		
7B.	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Property?		✓		
8A.	Has Fill Dirt been brought onto the Property which originated from a contaminated site?		✓		
8B.	Has Fill Dirt been brought onto the Property which is of an unknown origin?		✓		
9A.	Are there currently any Pits, Ponds or Lagoons located on the Property in connection with waste treatment or waste disposal?		✓		
9B.	To the best of your knowledge, have there been previously any Pits, Ponds or Lagoons located on the Property in connection with waste treatment or waste disposal?		✓		
10A.	Is there currently, any stained soil on the Property?		✓		
10B.	To the best of your knowledge, has there been previously any stained soil on the Property?		✓		
11A.	Are there currently any registered or unregistered storage tanks (above or underground) located on the Property?		✓		
11B.	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Property?		✓		
12A.	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Property or adjacent to any structure located on the Property?		✓		
12B.	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Property or adjacent to any structure located on the Property?		✓		
13A.	Are there currently any flooring, drains, or walls located at the Property that are stained by substances other than water or are emitting foul odors?		✓		

PRE-SURVEY QUESTIONNAIRE

QUESTION		OWNER/OCCUPANT			COMMENTS
		Yes	No	U-NR	
13B.	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Property that are stained by substances other than water or are emitting foul odors?		✓		
14A.	If the Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?		✓		
14B.	If the Property is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?		✓		
15.	Are there any Environmental Liens or governmental notification relating to past or current violations of environmental laws with respect to the Property or any facility located on the Property?		✓		
16A.	Has the owner or occupant of the Property been informed of the past existence of Hazardous Substances or Petroleum Products with respect to the Property or any facility located on the Property?		✓		
16B.	Has the owner or occupant of the Property been informed of the current existence of Hazardous Substances or Petroleum Products with respect to the Property or any facility located on the Property?		✓		
16C.	Has the owner or occupant of the Property been informed of the past existence of environmental violations with respect to the Property or any facility located on the Property?		✓		
17.	Have there been any Environmental Site Assessments of the Property that indicated the presence of Hazardous Substances or Petroleum Products on, or contamination of, the Property or recommended further assessment of the Property?		✓		
18.	Are there any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any Hazardous Substance or Petroleum Products involving the Property?		✓		
19A.	Does the Property discharge waste water on or adjacent to the Property, other than storm water, into a storm water sewer system?		✓		
19B.	Does the Property discharge waste water on or adjacent to the Property, other than storm water, or into a sanitary system?		✓		
20.	Have any Hazardous Substances or Petroleum Products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Property?		✓		

PRE-SURVEY QUESTIONNAIRE

QUESTION		OWNER/OCCUPANT			COMMENTS
		Yes	No	U-NR	
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		✓		
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Property?		✓		
23.	Has there ever been any ACM testing conducted on the Property?		✓		
24.	Is there an Asbestos Operations and Maintenance (O&M) Program in place at the Property?		✓		
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Property?		✓		
26.	Has there ever been LBP testing conducted on the Property?		✓		
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Property?		✓		
28.	Has the water at the Property ever been tested for lead?		✓		
29.	Has Radon testing ever been conducted at the Property?		✓		
30.	Are there any other Operations and Maintenance (O&M) Programs in place that we should be made aware of?		✓		
31.	Is the Property or any portion of the Property located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?		✓		
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.		✓		
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?		✓		
34.	Is there a Mold Operations and Maintenance (O&M) Program in place at the Property?		✓		
35.	Is the HVAC system inspected at least annually?		✓		
36.	Have identified HVAC problems been corrected in a timely manner?		✓		

PRE-SURVEY QUESTIONNAIRE

QUESTION		OWNER/OCCUPANT			COMMENTS
		Yes	No	U-NR	
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?		✓		
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?		✓		
39.	Has there ever been any sort of Indoor Air Quality or Mold Testing conducted in the building(s)?		✓		
40.	Summarize historical Property use (when was the Property developed with the current improvements, what modifications have taken place, what was the Property used for prior to it's current use)		✓

TOXICS TARGETING

PHASE I

ENVIRONMENTAL DATABASE REPORT

**1465 ROCKAWAY PKWY
BROOKLYN, NY 11236**

FEBRUARY 14, 2012

LIMITED WARRANTY AND DISCLAIMER OF LIABILITY

Who is Covered

This limited warranty is extended by Toxics Targeting, Inc. only to the original purchaser of the accompanying Environmental Report ("Report"). It may not be assigned to any other person.

What is Warranted

Toxics Targeting, Inc. warrants that it uses reasonable care to accurately transcribe the information contained in this Report from the sources from which it is obtained. This limited warranty is in lieu of all other express warranties which might otherwise arise with respect to the Report. No one is authorized to change or add to this limited warranty.

What We Will Do

If during the warranty period there is shown to be a material error in the transcription of the information contained in this Report from the sources from which it was obtained, Toxics Targeting, Inc. shall refund to the original purchaser the full purchase price paid for the Report. The remedy stated above is the exclusive remedy extended to the Purchaser by Toxics Targeting, Inc. for any failure of the Report to conform with this Warranty, or otherwise for breach of this Warranty or any other warranty, whether expressed or implied.

What We Won't Cover

Toxics Targeting, Inc. has not and can not verify the accuracy, correctness or completion of the information contained in this Report. Information is obtained from government agencies, site owners, and other sources, and errors are common in such information. Because Toxics Targeting, Inc. can not control the accuracy of the information contained in this Report, or the uses which may be made of the information, TOXICS TARGETING, INC. DISCLAIMS LIABILITY TO ANYONE FOR ANY EVENTS ARISING OUT OF THE USE OF THE INFORMATION. TOXICS TARGETING, INC. SHALL NOT BE LIABLE FOR ANY DAMAGE CAUSED BY THIS REPORT, WHETHER DIRECT OR INDIRECT, AND WHETHER OR NOT TOXICS TARGETING, INC. HAS BEEN ADVISED OF OR HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES. TOXICS TARGETING, INC. EXPRESSLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

Period of Warranty

The period of warranty coverage is ninety days from the date of purchase of this Report. There shall be no warranty after the period of coverage. ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR USE SHALL HAVE NO GREATER DURATION THAN THE PERIOD OF WARRANTY STATED HERE, AND SHALL TERMINATE AUTOMATICALLY UPON THE EXPIRATION OF SUCH PERIOD. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you.

PLEASE REFER TO PAGES ONE AND FIVE FOR A DESCRIPTION OF SOME OF THE LIMITATIONS OF THIS ENVIRONMENTAL REPORT.

Section Three: Appendices

- *USEPA ERNS Check*
- *Unmappable Sites*
- *Hazardous Waste Codes*
- *Information Source Guide*

Introduction

Toxics Targeting has combined environmental database searches, extensive regulatory analysis and sophisticated mapping techniques to produce your *Environmental Report*. It checks for the presence of 25 categories of government-reported toxic sites and provides detailed, up-to-date information on each identified site. The findings of your report are presented in an easy-to-understand format that:

1. ***Maps*** the approximate locations of selected government-reported toxic sites identified on or near a specified target address.
2. ***Estimates*** the distance and direction between the target address and each identified toxic site.
3. ***Reports*** air and water permit non-compliance and other regulatory violations.
4. ***Profiles*** some aspects of the usage, manufacture, storage, handling, transport or disposal of toxic chemicals at individual sites.
5. ***Summarizes*** some potential health effect information and drinking water standards for selected chemicals reported at individual sites.

The Three Sections Of Your Report

The first section highlights your report's findings by summarizing identified sites according to: **a)** distance intervals, **b)** direction, **c)** proximity to the target address and **d)** individual site categories. In addition, the locations of all identified toxic sites are illustrated on individual maps for each radius search distance used in your report. A close-up map illustrates the locations of all identified toxic sites, at the shortest radius search distance used in your report. Finally, a map of tax parcels and a table of selected information about those parcels are included.

The second section of your report contains *Toxic Site Profiles* that provide detailed information on each identified toxic site. The information in each *Toxic Site Profile* varies according to its source. Some toxic site categories have extensive information and some have limited information. All the information is updated on a regular basis.

The third section of the report contains appendices that identify: **1)** on-site spills reported to the national Emergency Response Notification System (ERNS), **2)** various toxic sites that cannot be mapped due to incomplete or erroneous addresses or other mapping problems, **3)** codes that characterize hazardous wastes reported at various facilities, **4)** methods used to map toxic sites identified in your report and **5)** information sources used in your report.

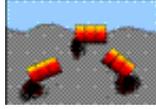

How to Use Your Report

- Check Table One to see the number of identified sites by distance intervals.
- Check Table Two to see identified sites sorted by direction.
- Check Table Three to see identified sites ranked by proximity to the target address.
- Check Table Four to see identified sites sorted by site categories.
- Use Table Five to get info for the subject parcel and every parcel found on the Tax Parcel Map
- Refer to the various maps to see the locations of identified toxic sites. Refer to the *Toxic Site Profile* and *Appendix* sections for additional information.

Toxic Site Databases Analyzed In Your Report

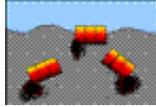

Search Radius

One-Mile

1) ***National Priority List for Federal Superfund Cleanup***: a listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program.

Half-Mile

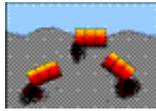

2) ***Delisted National Priority List Sites***: a listing of NPL sites that have been removed from the National Priority List.

One-Mile

3) ***New York Inactive Hazardous Waste Disposal Site Registry***: a state listing of sites that can pose environmental or public health hazards requiring investigation or clean up.

One-Mile

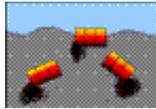

4) ***New York Inactive Hazardous Waste Disposal Site Registry Qualifying***: a state listing of sites that qualify for possible inclusion to the NYDEC Inactive Haz. Waste Disposal Site Registry.

One-Mile

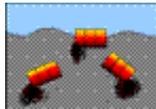

5) ***RCRA Corrective Action Activity (CORRACTS)***: waste facilities with RCRA corrective action activity reported by the USEPA.

Half-Mile

6) ***CERCLIS*** (Comprehensive Environmental Response, Compensation and Liability Information System): a federal listing of Non-NFRAP sites that can pose environmental or public health hazards requiring investigation or clean up.

Half-Mile

7) ***CERCLIS NFRAP***: a federal listing of CERCLIS sites that have no further remedial action planned.

Half-Mile

8) ***New York State Brownfield Cleanup Sites***: a listing of sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Half-Mile

9) ***New York Solid Waste Facilities Registry***: active and inactive landfills, incinerators, transfer stations or other solid waste management facilities.

Half-Mile

10) ***New York City 1934 Solid Waste Sites***: a listing of solid waste disposal sites operated by New York City municipal authorities circa 1934.

Half-Mile

11) ***New York and Federal Hazardous Waste Treatment, Storage or Disposal Facilities:*** sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following database:

- ***RCRA violations:*** waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

Half-Mile

12) ***Toxic Spills: active and inactive or closed*** spills reported to state environmental authorities, including *remediated* and *unremediated* leaking underground storage tanks. This database includes the following categories:

- Tank Failures
- Tank Test Failures
- Unknown Spill Cause or Other Spill Causes
- Miscellaneous Spill Causes

Eighth-Mile

13) ***New York State Major Oil Storage Facilities:*** sites with more than a 400,000 gallon capacity for storing petroleum products.

Eighth-Mile

14) ***New York State Petroleum Bulk Storage Facilities:*** sites with more than an 1,100 gallon capacity for storing petroleum products.

Eighth-Mile

15) ***New York City Fire Dept Tank Data:*** tank data from 1997.

Eighth-Mile

16) ***New York and Federal Hazardous Waste Generators and Transporters:*** sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRA). Also includes the following database:

- ***RCRA violations:*** waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

Eighth-Mile

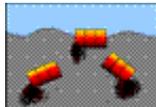

17) ***New York Chemical Bulk Storage Facilities:*** sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size

Eighth-Mile

18) ***Historic New York City Utility Sites (1890's to 1940's):*** power generating stations, manufactured gas plants, gas storage facilities, maintenance yards and other gas and electric utility sites.

Half-Mile

19) ***New York Hazardous Substance Disposal Site Draft Study:*** a state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites were not eligible for state clean up funding programs.

Eighth-Mile

20) ***Federal Toxic Release Inventory Facilities:*** discharges of selected toxic chemicals to air, land, water or treatment facilities.

Eighth-Mile

21) ***Federal Air Discharges:*** air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies.

Eighth-Mile

22) ***Federal Permit Compliance System Toxic Wastewater Discharges:*** permitted toxic wastewater discharges.

Eighth-Mile

23) ***Federal Civil and Administrative Enforcement Docket:*** judiciary cases filed on behalf of the U. S. Environmental Protection Agency by the Department of Justice.

On-site only
(250 ft)

24) ***New York City Environmental Quality Review (CEQR) – E Designation Sites:*** parcels assigned a special environmental (“E”) designation under the CEQR process. E designation requires specific protocols that must be followed.

Property only

25) ***ERNS: Federal Emergency Response Notification System Spills:*** a listing of federally reported spills.

Limitations Of The Information In Your Report

The information presented in your *Environmental Report* has been obtained from various local, state and federal government agencies. Please be aware that: **1)** additional information on individual sites may be available, **2)** newly discovered sites are continually reported and **3)** all map locations are approximate. As a result, this report is intended to be the **FIRST STEP** in the process of identifying and evaluating possible environmental threats to specific properties and can only serve as a guide for conducting on-site visits or additional, more detailed toxic hazard research.

Toxics Targeting tries to ensure that the information in your report is presented accurately and with minimal alteration. Systematic changes are made to correct obvious address errors in order to allow sites to be mapped. Any address changes that are made are noted in the map information section at the top of each corresponding *Toxic Site Profile*. Some information that has been withheld by government authorities remains included in Toxic Site Profiles and is identified as archival information. Since the information presented in your report is not edited, please be aware that it can contain reporting errors or typographical mistakes made by the site owners/operators or government agencies that produced the information. Also please be aware of some other limitations of the information in your report:

- The digital map used by *Toxics Targeting* is the same one used by the U. S. Census or local authorities in New York City. While the map is generally accurate, no map is perfect. In addition, *Toxics Targeting's* mapping methods estimate where toxic site addresses are located if the address is not specifically designated. **FOR THESE REASONS, ALL MAP LOCATIONS OF ADDRESSES AND REPORTED TOXIC SITES SHOULD BE CONSIDERED APPROXIMATE AND SHOULD BE VERIFIED BY ON-SITE VISITS;**
- **UNDISCOVERED, UNREPORTED OR UNMAPPABLE TOXIC SITES MIGHT NOT BE IDENTIFIED BY THIS REPORT'S CHECK OF 25 TOXIC SITE CATEGORIES. TOXIC SITES REPORTED IN OTHER GOVERNMENT DATABASES MIGHT ALSO EXIST. FOR THESE REASONS, YOUR REPORT MIGHT NOT IDENTIFY ALL THE TOXIC SITES THAT EXIST IN THE AREA IT SEARCHES;**
- The appendix of your report contains a listing of sites that could not be mapped due to incomplete or erroneous address information or other mapping problems. This listing includes unmappable toxic sites in the zip codes searched for the report as well as toxic sites without zip codes reported in the same county. **IF YOU WOULD LIKE INFORMATION ON ANY OF THE LISTED SITES, PLEASE CONTACT *TOXICS TARGETING* AND REFER TO THE SITE ID NUMBER.**
- New York State Department of Environmental Conservation Remediation Site Borders are approximate and may not align with tax parcel boundaries mapped by local authorities or the digital map used by the US Census Bureau. As a result, Remediation Site Borders may overlap parcels that do not involve site remediation activities. Selected parcels also can involve multiple Remediation Site Borders. Refer to individual site profiles for more information. Sites without profiles include potential new sites or sites that have not yet been publicly listed by DEC.
- Some toxic sites identified in your report may be classified as **known hazards**. Most of the toxic sites identified in your report involve **potential hazards** related to the on-site use, manufacture, handling, storage, transport or disposal of toxic chemicals. Some of the toxic sites identified in your report may be the addresses of parties responsible for toxic sites located elsewhere. **YOU SHOULD ONLY CONCLUDE THAT TOXIC HAZARDS ACTUALLY EXIST AT A SPECIFIC SITE WHEN GOVERNMENT AUTHORITIES MAKE THAT DETERMINATION OR WHEN THAT CONCLUSION IS FULLY DOCUMENTED BY THE FINDINGS OF AN APPROPRIATE SITE INVESTIGATION UNDERTAKEN BY LICENSED PROFESSIONALS;**

- Compass directions and distances are approximate. Compass directions are calculated from the subject property address to the mapped location of each identified toxic site. The compass direction does not necessarily refer to the closest property boundary of an identified toxic site. The compass direction also can vary substantially for toxic sites that are located very close to the subject property address.
- The information presented in your report is a summary of the information that *Toxics Targeting* obtains from government agencies on reported toxic sites. **YOU MAY BE ABLE TO OBTAIN ADDITIONAL INFORMATION ABOUT REPORTED SITES WITH THE FREEDOM OF INFORMATION REQUEST FORM LETTERS THAT ARE PROVIDED ON THE INSIDE OF THE BACK COVER.**

Section Two: Toxic Site Profiles

The heading of each *Toxic Site Profile* refers to the site's map location and details:

- The facility name, address, city, state, and zip code.
- Any changes that were made to a site's address in order to map its location.
- The site mapping method that was used (see *How Sites are Located*, at the end of this section for more information).

Toxic Site Profiles summarize information provided by site owners or operators and government agencies regarding various toxic chemical activities reported at each site, such as:

- Whether chemicals were stored, produced, transported, discharged or disposed of.
- The name of chemicals and their Chemical Abstract Series (CAS) numbers.
- The amount of chemicals and the units (gallons/pounds) the chemical was measured in.
- Whether the site or storage tanks at the site are currently active or inactive.
- Special codes used by government agencies to regulate hazardous waste activities at some sites, or a complete description of the codes follows the profiles section.

For selected individual chemicals reported at various toxic sites, some potential health effect summary information appears below the site profile. Each potential health effect summary identifies chemicals by name and by Chemical Abstract Series (CAS) Number. An "x" under each potential health effect heading indicates positive toxicity testing results reported by the National Institute of Occupational Safety and Health's Registry of Toxic Effects of Chemical Substances (RTECS). Some chemicals (mostly appearing in profiles of Hazardous Waste facilities), are reported as mixtures, and RTECS health effect information is only available for individual chemicals. In addition, RTECS only provides information on approximately 100,000 common chemicals. Consequently, the absence of potential health effect summary information for a particular chemical identified in a Toxic Site Profile does not necessarily mean that the chemical does not pose potential health effects.

The Maximum Contaminant Level (MCL) in drinking water allowed for selected chemicals is also noted. In most cases, the only applicable MCL has been set by the New York State Department of Health (NYSDOH). Where NYSDOH has not set an MCL, the federal standard, if one exists, is listed and is marked by an asterisk.

Presented below are column headings that describe the health effect definitions used in RTECS and applicable New York State and federal drinking water standards. Reference sources for information presented in this section are also provided.

ACUTE TOX: **Acute Toxicity:** Short-term exposure to this chemical can cause lethal and non-lethal toxicity effects not included in the following four categories.

TUMOR TOX: **Tumorigenic Toxicity:** The chemical can cause an increase in the incidence of tumors.

MUTAG TOX: **Mutagenic Toxicity:** The chemical can cause genetic alterations that are passed from one generation to the next.

REPRO TOX: **Reproductive Toxicity:** May signify one of the following effects: maternal effects, paternal effects, effects on fertility, effects on the embryo or fetus, specific developmental abnormalities, tumorigenic effects, or effects on the newborn (only positive reproductive effects data for mammalian species are referenced).

IRRIT TOX: **Primary Irritant:** The chemical can cause eye or skin irritation.

MCL: **Drinking Water Standard - Maximum Contaminant Level (MCL)** listed under Drinking Water Supplies, 10 NYCRR Part 5, Subparts 1.51(f),(g), and (h) for NYDOH MCL's and under the Safe Drinking Water Act, 40 CFR 141, Subparts B and G, (* indicates value for total trihalomethanes) for federal MCL's.

Reference Source for Toxicity Information: Registry of Toxic Effects of Chemical Substances (RTECS), NIOSH (on-line database); For further information, contact: NIOSH, 4676 Columbia Parkway, Cincinnati, OH, 45226, 800/35-NIOSH.

Reference Source for Drinking Water Standards: New York State Department of Health, Bureau of Toxic Substances Assessment, 2 University Place, Room 240, Albany, NY 12203, 518/458-6373.

U.S. Environmental Protection Agency, Office of Drinking Water, 401 M St SW, Mailstop WH-556, Washington, DC, 20460, 202/260-5700.

Inactive Hazardous Waste Disposal Site Classifications:

- 1 -- Causing or presenting an imminent danger of causing irreversible or irreparable damage to the public health or the environment -- immediate action required;
- 2 -- Significant threat to the public health or environment -- action required;
- 3 -- Does not Present a significant threat to the environment or public health -- action may be deferred;
- 4 -- Site properly closed --requires continued management;
- 5 -- Site properly closed, no evidence of present or potential adverse impact -- no further action required;
- 2a -- This temporary classification has been assigned to sites where there is inadequate data to assign them to the five classifications specified by law;
- A -- Work underway and not yet complete;
- P -- Potential Site;
- D₁, 2, 3 -- Delisted Site (1: hazardous waste not found; 2: remediated; 3: consolidated site or site incorrectly listed);
- C -- Remediation Complete (formerly D2).

NO NATIONAL PRIORITIES LIST (NPL) SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS

NO INACTIVE HAZ WASTE DISPOSAL REGISTRY OR REGISTRY-QUALIFYING SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS

NO RCRA CORRECTIVE ACTION SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS

NO CERCLIS SUPERFUND SITES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

NO SOLID WASTE FACILITIES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

NO HAZARDOUS WASTE TREATMENT/STORAGE/DISPOSERS IDENTIFIED WITHIN THE 1/2 MILE SEARCH RADIUS

HAZARDOUS MATERIAL SPILLS INTRODUCTION

The Hazardous Material Spills in this section are divided into eight spill cause groupings. These include:

Active Spills Section: Spills with incomplete paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

- 1) Tank Failures
- 2) Tank Test Failures
- 3) Unknown Spill Cause or Other Spill Cause Hazardous Spills
- 4) Miscellaneous Spill Causes: Equipment Failure, Human Error, Tank Overfill, Deliberate Spill, Traffic Accidents, Housekeeping, Abandoned Drum, and Vandalism.

Closed Status Spills Section: Spills with completed paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

- 5) Tank Failures
- 6) Tank Test Failures
- 7) Unknown Spill Cause or Other Spill Cause Hazardous Spills
- 8) Miscellaneous Spill Causes: Equipment Failure, Human Error, Tank Overfill, Deliberate Spill, Traffic Accidents, Housekeeping, Abandoned Drum, and Vandalism.

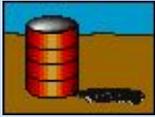

All spills within each spill cause category are presented in order of proximity to the subject site address.

Please note that spills reported within 0.25 mile (or one-eighth mile in New York City) are mapped and profiled.

Between 0.25 mile (or one-eighth mile in New York City) and 0.5 mile, only the following spills are mapped and profiled:

- * Tank Failures;
- * Tank Test Failures;
- * Unknown Spill Cause or Other Spill Cause;
- * Spills greater than 100 units of quantity; and
- * Spills reported in the NYSDEC Fall 1998 MTBE Survey.

A table at the end of each section presents a listing of reported Miscellaneous Spills with less than 100 units located between 0.25 mile (or one-eighth mile in Manhattan) and 0.5 mile. These spills are neither mapped nor profiled.

NO ACTIVE TANK FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

ACTIVE TANK TEST FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

Please Note: * - Compass directions can vary substantially for sites located very close to the subject property address.

Caller Remarks:

CALLER ON SITE DOING A TANK UPGRADE AND FOUND CONTAMINTED SOIL

ORIGINAL SPILL ASSIGNED TO O'DOWD.

DEC Investigator Remarks:

3/13/2003: REASSIGNED FROM ROMMEL TO VOUGHT.

12/7/2004: Assigned to Dave Harrington in Central Office. (Rommel)

12/17/2004: Sent letter to Getty Properties indicating change in project management. Requested an investigative work plan (installation of four monitoring wells) and copies of the last four quarterly monitoring reports. (Harrington)

1/19/2005: Sent letter to Getty Properties approving the SI work plan. (Harrington)

3/24/2005: Project transferred to Vought - Region 2. (Harrington)

08/31/2005 - Feng - Project transferred from Vought to Feng.

11/1/2005 - Feng - Quarterly Monitoring Report, 1/2005-3/2005. 7 monitoring wells onsite, W-7 was not accessible due to ice. Groundwater flows to south at the depth of 16.19' to 17.53'. W-1, 877.3 BTEX. W-2, 0.97 BTEX. W-3 and W-4 below MDL. W-5, 6.89 BTEX. W-6, 8,260 BTEX and 136 MTBE.

4/10/2006 - Feng - database updated - 4/7/2006 emailed to Paul Lindell and Paul Hatcher for localized treatment for this site. (RJF)

5/17/2006 - Feng - Quarterly Monitoring Report, 2/2006 - 4/2006. The site is an active Getty gasoline service station. As of sampling on 3/23/2006, groundwater flows to south at the depth of 15.85' to 17.88' below grade. 10 monitoring wells onsite. 2 monitoring wells downgradient to pump island and existing USTs detected for BTEX. W-1, 3,917 ppb BTEX. W-6, 18,511 ppb BTEX. Other wells are all BDL. 12 EFR events projected for 2006. (RJF)

2/22/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 1/16/2007. Active Getty gasoline service station. Groundwater sampled and gauged 12/22/2006. 10 monitoring wells. DTW 15.24' to 17.26' bg. Flows southerly. No LNAPL. W-6, 12,728 ppb BTEX. (RJF)

6/28/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 4/2007. Groundwater sampled 3/22/2007. 10 monitoring wells. DTW 15.74' to 17.72' bg. Flows to south. NO LNAPL. W-6, 9,811.5 ppb BTEX. (RJF)

9/27/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 6/2007, 7/2007. Groundwater sampled 6/25/2007. 10 monitoring wells were sampled. DTW 15.7' to 17.65' bg. Flows to south. No LNAPL. W-6, 8,869.2 ppb BTEX. Other wells are BDL. (RJF)

3/19/2008 - Feng - eDoc Quarterly Monitoring Report 4Q2007. (RJF)

3/24/2008 - Feng - Quarterly Monitoring Report, 10/2007 - 12/2007, 1/2008. Active Getty gasoline service station. Groundwater was gauged and sampled 12/18/2007. 10 monitoring wells. DTW 15.9' to 17.91' bg. Flows to south. No LNAPL. BTEX range ND to 5,810 ppb (W-6). MTBE range ND to 0.31 ppb. (RJF)

9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Water table drops. Expand the map, contour next quarter. Need downgradient wells. (RJF)

1/6/2009 - Getty Properties portfolio meeting with Tyree and Delta. Work plan for delineation 3/2009. (RJF)

5/8/2009 - Quarterly Monitoring Report, 9/2008 - 11/2008, 12/2008, by Tyree. Active Getty gasoline service station. Groundwater was gauged and sampled 11/5/2008. 10 monitoring wells. NO LNAPL. DTW 16.21' to 18.16' bg. Flows to south. BTEX range ND to 932 ppb (W-1). MTBE range ND to 1 ppb. EVFR was conducted on W-6 on 11/10/2008, a total of 450 gallons of petroleum/water mixture was removed. (RJF)

12/1/2009 - Reviewed Investigation Work Plan, dated 7/17/2009, pdf by Tyree. Tyree proposes to install 6 soil borings around the site, soil samples will be collected, but no groundwater. email to Jen Kotch and require to collect groundwater sample from proposed B-12. (RJF)

12/11/2009 - approval letter to Getty Properties. DEC requires groundwater sample to be collected from B-12. Report within 90 days, 3/2009.

7/12/2010 - Reviewed Subsurface Investigation Report and NO Further Action Request, dated 5/28/2010, by Tyree. Tyree summarize the site history:

-10/1998 to 11/1998, 3 (4,000 gallon) gasoline USTs were upgrade. 1 (1,000-gallon #2 fuel oil and 1 (550-gallon) waste oil USTs were removed. Endpoint samples SW-1 to SW-1 in 3 (4,000-gallon) gasoline USTs were MDL. FO-1 in fuel oil tank area and B-1 W/O in the waste tank area show some SVOCs. No sampling depth.

- 9/2000, soil borings SB-1 to SB-9 were installed. SB-2 and SB-7 show high VOCs in soil. SB-2 (16-20'), 209,988 ug/kg BTEX. SB-7 (12-16'), 1,797 ug/kg BTEX. SB-7 (16-20'), 156,145 ug/kg BTEX. High MTBE also show in the groundwater. unit in ug/L. SB-1, 862 BTEX, 16,800 MTBE. SB-2, 1,458 BTEX, 4,330 MTBE. SB-3, 131 BTEX, 20,400 MTBE. SB-4, 30 BTEX, 1,530 MTBE. SB-5, 8 BTEX, 135 MTBE. SB-7, 903 BTEX, 21,100 MTBE. SB-8, MDL BTEX, 529 MTBE.

- 1/2001, monitoring wells W-1 to W-4 were installed. 11/2002, W-5 was installed. 11/2003, W-6 and W-7 were installed. 4/2005, W-8 to W-10 were installed.

- 2/2010, quarterly monitoring. W-1, 3,918 ug/L BTEX. W-6, 2,523 ug/L BTEX. Other wells are MDL/low.

-2/2010, soil borings B-10 to B-15 were were installed. B-10 (15-20') were SB-2 was located, 68,669 ug/kg BTEX. B-11 (15-20') where SB-7 was located, 345,270 ug/kg BTEX.

Tyree requests spill closure based on: 1) groundwater impacts is not migrating offsite thereby not posing a threat to any potential receptors; 2) soil sampling of 2/2010 is consistent with the one done in 9/2000; 3) no downgradient impacts as W-4 and W-7 and B-13 do not indicate any impacts.

7/13/2010 - Email comments/questions to Tyree. 1) how do define the site being delineated as W-4 and W-7 are not downgradient according to their contour map; 2) the soil impacts are still there indicates the impacts are not being remediated; 3) no remediation history. Will talk more in the meeting.

CALLER DOING SITE WORK FOUND CONTAMINATED SOIL.

DEC Investigator Remarks:

12/01/2000 THREE FOOT OF PRODUCT IN THE MONITORING WELL ON THE SIDEWALK DOWNGRADIENT FROM THE STATION.

5/14/2003 TIPPLE UPDATING/ CALLED CONSULTANT, DR.MONROE REQUESTED UPDATE ON PROPOSED SYSTEM. SYSTEM NOT INSTALLED FOSTER REALTY/ MIRIAM ADZADELLI PLANNING TO REMOVE TANKS/ EXPLAINED TO THE DR. THAT THE TANKS MUST BE REGISTERED FOR REMOVAL 1 MONTH PRIOR TO THE REMOVAL AND DEC NEEDS TO BE ON SITE DURING KEY POINTS OF THIS WORK.

12/9/03 MT//TRANSFERRED FROM TIPPLE TO ROMMEL

1/8/04 Reassigned from Rommel to Foley.

1/13/04 Spoke with Mr. Khanna. Tank removal to be scheduled dependent upon contracts. Mr. Khanna indicated he would try to finalize contracts. Corrective Action Plan from 2000 indicates soil contamination with total BTEX from ND(BH-1,2,3, all 16-18'bgs) to 91083ppb(BH-6,12-16'bgs)No MTBE detected in soil.Total BTEX in GW ranges from ND(MW-3,5) to 16600ppb. MTBE ranged from ND(MW-3,5) to 62000ppb. DTW 15-16'bgs. Source not yet removed. Free product detected in 2000.(KMF)

3/31/06 Spoke to Charles Nalbhone (917-346-8976). He stated Citygas will be upgrading tanks. He was inquiring whether a Remedial Plan has been submitted.

6/30/06 DEC lead transferred from K. Foley to J.A. Maisonave. - JAM

7/5/06: Spoke to Charles Nalbhone, private consultant with CJN Consulting. He stated that The old tanks will be removed and new tanks installed for a new fueling station and convenience store. Citygas may lease the property to Sunoco. He will contact the property owners for an update and if I don't hear from him I will call Citygas directly - JAM

11/17/06 Spoke to Charles Nalbhone. He said that the tanks have been removed by Tyree. He is no longer working on the site. - JAM

9/11/07 Called Mr. Charles Nalbhone. I have not heard anything about this site in some time. He told me a new gas station is operating at this site. Mr. Suman Khanna is still the owner of the property. Contacted Mr. Khanna (Cell # 347-249-7767). He said the site is leased to Wheatley? Petroleum. PBS registration states the contact is Joseph Machia (phone # 516-933-0700). Mr. Khanna will send me the report from when the tanks were replaced in Mar 2007. -JAM

9/28/07 Received a call from Walter Berninger from Berninger Environmental (phone # 631-589-6521) He is working for Northland Marketing who is the parent company of Foster Petroleum, LLC. Foster Petroleum is leasing the site. Mr. Berninger has a tank closure report dated October 16, 2006, when tanks were upgraded. He will forward that to me along with some groundwater data collected from existing wells. - JAM

4/20/09 Reviewed a Tank Closure Report submitted by Berninger Environmental, Inc. dated October 16, 2006. The closure report states that a total of thirteen USTs were removed from the site; One 4,000-gallon diesel tank, Ten 550-gallon gasoline tanks, One 550-gallon fuel oil tank, and One 550-gallon waste oil tank. The tanks were removed between July 19 and 21, 2006. On September 5, 2006, Berninger visited the site to inspect the former tank grave and collect end-point soil samples. At the time, all the tank graves, except for the fuel oil tank, were backfilled. The tank graves were then re-excavated and on September 14, 2009, a total of 13 end-point soil samples were collected. Since the tank graves were backfilled, Berninger states that, "the samples may not be representative of actual sidewall and bottom samples." Samples were also not collected from the waste oil tank grave. Several soil samples showed VOC and SVOC contamination. Two monitoring wells were located and Berninger recommends accessing these wells to collect groundwater samples.

A monitoring report was submitted by Berninger dated July 2007. On July 23, 2007, wells MW-1 and MW-2 were sampled and analyzed for BTEX plus MTBE. No floating product was observed and MW-2 showed minor detections of BTEX.

A second monitoring report was submitted by Berninger dated October 2007. On October 22, 2007, wells MW-1, MW-2 and MW-3 were sampled and analyzed for BTEX plus MTBE. No floating product was observed and results from MW-2 showed total BTEX concentration of 3,080ug/L. This was the last report submitted by Berninger. - JAM

On 4/10/09 I spoke with Walter Berninger from Berninger Env. He said he was not aware of an open spill case. Joe Macchia is listed as the owner of the PBS registration. I spoke to Joe Macchia on April 20, 2009. He said he signed the lease agreement with 9702-9706 Foster Ave., LLC on April 23, 2004. He said he did not operate the previous tanks. I informed him that there are discrepancies in the PBS registration that need to be fixed. The number of tanks, the closure status and product information

from the PBS registration do not match Berninger's closure report. Mr. Macchia said he will correct the registration. - JAM

4/24/09 Spoke to Suman Khanna (347) 269-7767. I will send a Stipulation Agreement to 9702-9706 Foster Ave., LLC. - JAM

4/28/09 Stipulation Agreement with Corrective Action Plan sent via Certified mail to 9702-9706 Foster Avenue, LLC, attn. Suman Khanna. I also faxed a copy to Mr. Khanna. The signed Stip is due back at the DEC by May 12, 2009. - JAM

4/30/09 Spoke to Miriam Azadalli (Office: (718) 349-0555) who is the property owner and will be signing the Stip. She will be requesting an extension to the first deliverable in the CAP. - JAM

5/11/09 Received an email from Howard Stave (email: Renhow@aol.com) notifying the DEC that Foster Petroleum, LLC will be signing the Stipulation Agreement. I sent an ammended copy of the Stipulation Agreement to:

Mr. Joseph Macchia
Foster Petroleum, LLC
556 Central Avenue
Bethpage, NY 11714

The signed Stipulation Agreement must be returned to the DEC by May 26, 2009. Stip and cover letter uploaded to eDOcs. - JAM

5/28/09 Stip signed by Joseph Macchia on 5/20/09. Received back at DEC office and sent to Lou Oliva for signature on 5/28/09. - JAM

6/1/09 Stipulation Agreement signed by Suzanne Mattei, Regional Director, Region 2 on May 29, 2009, which marks the effective date of this agreement (Legal Case No. R2-20090529-328).

According to the CAP, an Investigation Work Plan is due within 15 days of the effective date, June 15, 2009. The executed Stip is uploaded to eDOcs. - JAM

6/25/09 On June 4, 2009, DEC received a letter from Berninger Environmental. The letter states that several groundwater monitoring events were performed on 3 existing monitoring wells; however, the data was not submitted. Berninger requests that they submit the available monitoring data to the DEC for review and propose further work, if necessary.

I sent an email to Walter Berninger today and copied Joseph Macchia, Jr. The email states: "It has been three weeks since you submitted the letter dated June 4, 2009. You have not yet provided me with any groundwater data for the above referenced site. The DEC requests that a report be submitted within two weeks from today, which includes a summary of all past groundwater monitoring data as well as a proposed investigation work plan to fully characterize current soil and groundwater conditions." - JAM

8/6/09 Reviewed an Investigation Work Plan submitted by Berninger Env. Inc. dated July 27, 2009. Berninger proposes drilling 5 soil borings and installing 2 monitoring wells at the site. They propped collecting one soil and one GW sample from each boring location and to install the wells withouth collecting soil samples from those 2 locations.

I sent a letter approving the work plan, with the following recommendations:

1. Soil should be continuously screened to the water table using a PID. Two soil samples should be collected from each boring for laboratory analysis; one sample from the interval with the highest PID reading and the other sample from the interval directly above the water table.
2. All soil and groundwater samples should be analyzed for the TAGM 4046 list of petroleum related VOCs and SVOCs.

Justin Halpin will notify me when the work is scheduled. This work plan and my approval letter are uploaded to eDocs. - JAM

12/14/11: This spill case transferred from J. Maisonave to J. Kolleeny. - JK

 2 tanks on property this one is the school tank -

DEC Investigator Remarks:
 Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"

3/11/2003 - Sangesland spoke with John Leddy of Protest. 5,000 gal tank is being removed from under the parking lot of this church. Mr. Leddy had a concern that the water level in this area is high and clean endpoint samples may be difficult to obtain.

Sangesland directed Protest to excavate out as much contaminated soil as possible, and then obtain sidewall end point samples. Vac out the liquid from the excavation (a couple of times) in an effort to draw back into the excavation any liquid contamination which may have moved away.

Based on endpoint sample results and groundwater sample results, additional work may be required at the site.

6/15/05 - Haggerty - I spoke with Pro-Test Enterprises, they sent me all the documentation from the case.

6/21/05 - Haggerty - Based on the Spill Closure Report sent by ProTest, the decision was made to close out the spill. The contamination from the site was satisfactorily contained and disposed of.

Sangesland sent a TTF letter to:

Facility Manager

River Manor Care Center

630 East 104th St

Brooklyn, NY 11236.

2/09/04. J.Krimgold spoke to Empire Fuel (Dave Stern @ 718-627-5100). They are in a contract with River Manor to repair lines and tank. More details - Keny (Empire Fuel). Should call me back.

Left message for Mr. Bilardy (River Manor).

2/11/04. J.Krimgold spoke to Ken (Empire Fuel). USA tank will excavate the top of the tank, isolate lines and retest. Ken should call me back with an update on 2/23/04.

2/19/04. Ken from Empire Fuel called and informed that after isolation of piping tank was retested and failed the test. They pumped out the tank and the facility is currently running on gas. They are planning to repair the tank and USA Tank will perform the site assessment. YK.

2/19/04. Contaminated soil letter has been sent to RUDY BILARDI (River Manor Care Center). YK.

6/9/04. J.Krimgold spoke to Mr. Bilardy. He stated that they have

a signed contract with Empire Fuel to remediate the site. He

should fax to me a letter report with investigation summary

today. Subcontractor USA Environ.

6/9/04 J.Krimgold spoke to Ken Reed (Empire) @ (516)643-4910. He stated that a subcontractor USA Environmental performed a site investigation and will submit the report in 2-3 days.

11/01/04. J.Krimgold spoke to Ken Reed and requested the status of this site. Mr. Reed tolled that he was sure that an investigation report has been sent to DEC 2-3 month ago. He will check with USA Env. and get back to me.

11/16/04. The Department has reviewed the report dated July 12, 2004 submitted by ICET (201-933-2121) regarding abovementioned site. Based on the information provided, the petroleum release which was on this site has been satisfactorily cleaned up. NFA letter.

DEC Investigator Remarks: DEC INVESTIGATOR REMARKS NOT AVAILABLE FOR THIS SPILL ACCORDING TO THE LAST UPDATE.

The following DEC Investigator Remarks were available prior to 1/1/2002:

ALSO SAYS NO MSDS. SOFS FILM TAPE COLD APPLICATION, SOLVENT CUT BACK. PRIVATE CONTRACTORS TO REMOVE. FD. WILL OVERPACK. SEEPING OUT FROM SEAL AND HAS NOT REACHED GROUND. NYC PARKS DEPT WILL HIRE CONTRACTOR TO REMOVE OVER PACHED DRUM. OFFICER PERRETTO (COORDINATOR) WILL NOTIFY ME WHEN CONTRACTOR SCHEDULED TO REMOVE.

4/29/99 - Saccacio - DEP Hazmat (Baldwin) determined that the material was a petroleum distillate. He was able to get the material to flash in the field but could not tell me if it was a fire hazard. He somehow felt that this was virgin material of that drum and he thought it must still belong to the Navy. Called Officer Perretti and he stated that the drums were picked up. He said he would call me back and give me the details. Spill closed. Officer Perretti said the ABC tank company picked up the drum on 4/23/99. Called ABC and Mark Salamack said that Stanly Baldwin from the DEP hired them to remove the drum.

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "M TIBBE"
 NOTICED STAIN TWO WEEKS AGO. STAINING MOSTLY ON DIRT BUT SOME ON CONCRETE IN DRIVEWAY. SMELLS LIKE OIL.

10/2/2000 SITE VISIT. OIL IS COMING FROM OLD HEATING OIL TANK UNDER DRIVEWAY. APPEARS THAT WATER IS GETTING INTO TANK AND DISPLACING OIL. OIL IS COMING OUT VENT. HOMEOWNERS SON (CALLER) WAS DIRECTED TO HAVE THE TANK EMPTIED AND THE SOIL REMOVED.

Letter sent to owners on 12/20/00 investigate spill and remove or close tank.

8/15/05 - Haggerty - reviewed faxes from Larell Malcomb (917)-678-5984, property owner, confirming tank was closed out and soil was removed. No mention of post-excavation soil samples
 ----requires additional info

11/22/05, SA: Issuing a letter to the owner.

02/08/2006: Reviewd the faxed copies (4 pages) of documents sent on Aug 04, 2005. The 550 gal tank was closed in place and filled up with clean sand. All material and sludge's were pumped out properly. Removed petroleum contaminated soil from the site. All work have been performed as per direction of DEC personnel who visited the site on 10/02/2000 . The spill closed. (Sadique)

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT"
 Engelhardt responded. Arrived at 20:00. Barely detectable hydrocarbon odor in basement. Mrs. Gravesande had windows open for a couple of hours, claims smell dissipated. Also ran water as per FD instructions to flush lines. Checked around outside - no odors from DWS manholes or from catch basins. Checked GIS - did not find any past spills in immediate area. Closed due to lack of confirmed spill.

Caller Remarks:

all to containment, vac truck en rte.Line test performed, line detector was tested and was never tightened after causing leak

DEC Investigator Remarks:

06/08/11-Hiralkumar Patel.

12:37 PM:- left message for Mike.

12:41 PM:- spoke with Dominick (718-324-5110) at the station. he mentioned that tank system test was performed about a week ago. they found some oil in an observation well in tank field area. Tyree has been notified and they are waiting for vacuum truck.

12:48 PM:- spoke with Mike. he mentioned that oil found in tank top sump and not inside any observation well (as Dominick mentioned). oil found in sump on top of tank holding premium gas. Tyree crew is responding for cleanup. asked Mike to call back with more info about exact location of spill and cause of the spill.

PBS #: 2-146137

2:26 PM:- received message from Mike. he mentioned that tank tester did not tighten a leak detector on a submersible pump and it was dripping. leak has stopped. oil was contained inside the tank top sump. no impact to subsurface.

based on submitted information, case closed.

How Toxic Site Locations Are Mapped

Toxics Targeting maps toxic site locations on a digital version of the U. S. Census map or those used by local authorities using addresses and map coordinates provided by site owners/operators or government agencies. In order to allow site locations to be verified independently, the information used to map each site is presented in the first section of each Toxic Site Profile, along with a description of the mapping technique used and any address corrections that were made in order to locate toxic sites with incomplete or inadequate site location information. The mapping process is explained below.

Map Identification Number: 12

Site Name: Acme World Manufacturing, Inc.

Site Address: 55 Main Street

Anytown, NY 11797

MAP LOCATION INFORMATION

Site location mapped by:

Address Matching

1) Most toxic sites are mapped by matching addresses provided by site owners/operators or government agencies with locations on a digital version of the street or parcel map. These site locations are identified with the method used to map them.

Note: Some sites have an address match location and a map coordinate location. Both locations are mapped because they can be equally correct.

or Map Coordinate

2) Some toxic sites are located using map coordinates provided by site owners/operators or government agencies. These site locations are identified "map coordinate." Map coordinates for Toxic Wastewater Discharges, Toxic Release Inventory sites and Major Oil Storage Facilities should be considered suspect.

or Manual Mapping

or Site Visit

3) Incomplete addresses or map coordinates require some site locations to be determined by commercial street maps (manual mapping), site visits, map coordinates from other databases and address location services. Application of any of these methods is identified accordingly.

ADDRESS CHANGE INFORMATION

Revised Street: NO CHANGE

Revised zip code: NO CHANGE

4) Site addresses are sometimes corrected to eliminate obvious errors that prevent sites from being mapped. All address corrections are noted here.

Information Source Guide

Toxics Targeting's Environmental Reports contain government and other information compiled on 21 categories of reported known or potential toxic sites. Each toxic site database is described below with information detailing a) the source of the information, b) the date when each database is covered to and c) when *Toxics Targeting* obtained the information..

1) **National Priority List for Federal Superfund Cleanup**: Toxic sites nominated for cleanup under the Federal Superfund program. Annual compilation of special two-page detailed profiles of NPL sites. Also includes delisted NPL sites. ASTM required.* Fannie Mae required.** Source: U. S. Environmental Protection Agency.¹
Data attributes updated from: 1/13/2012. Data obtained by Toxics Targeting: 1/13/2012.
New Facilities updated through: 1/13/2012. Data obtained by Toxics Targeting: 1/13/2012.

2) **Inactive Hazardous Waste Disposal Site Registry**: New York State database that maintains information and aids decision making regarding the investigation and cleanup of toxic sites. The Registry's data includes two-page profiles noting site name, ID number, description, classification, cleanup status, types of cleanup, owner information, types and quantities of contaminants, and assessment of health and environmental problems. Also included are sites that qualify for possible inclusion on the Registry. These Registry Qualifying sites may or may not be on the Site Registry. ASTM required.* Fannie Mae required.** Source: New York State Department of Environmental Conservation.²
Data attributes updated through: 12/23/2011. Data obtained by Toxics Targeting: 12/23/2011.
New Facilities updated to: 12/23/2011. Data obtained by Toxics Targeting: 12/23/2011.

3) **Corrective Action Activity (CORRACTS)**: U. S. Environmental Protection Agency database of hazardous facilities regulated pursuant to the Resource Conservation and Recovery Act (RCRA). ASTM required.* Fannie Mae required.** Source: U. S. Environmental Protection Agency¹
Data attributes updated through: 11/9/2011. Data obtained by Toxics Targeting: 12/14/2011.
New facilities updated through: 11/9/2011. Data obtained by Toxics Targeting: 12/14/2011.

4) **CERCLIS**: Toxic sites listed in the Federal Comprehensive Environmental Response, Compensation and Liability Information System. Includes Active and No Further Remedial Action Planned (NFRAP) sites. ASTM required.* Fannie Mae required.** Source: U. S. Environmental Protection Agency.¹
Data attributes updated through: 1/9/2008. Data obtained by Toxics Targeting: 3/12/2008.
New Facilities updated through: 1/9/2008. Data obtained by Toxics Targeting: 3/12/2008.

5) **Brownfield Programs**: NYS programs for sites that are abandoned, idled or under-used industrial and/or commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination. ASTM required.* Source: New York State Department of Environmental Conservation.²
Data attributes updated through: 12/23/2011. Data obtained by Toxics Targeting: 12/23/2011.
New Facilities updated to: 12/23/2011. Data obtained by Toxics Targeting: 12/23/2011.

Updated through: 4/8/2009.

Data obtained by Toxics Targeting: 7/21/2009.

* American Society of Testing Materials: Standard Practice on Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527-05).

** Fannie Mae's Part X Environmental Hazards Management Procedures specify 1.0 mile searches for "any state or Federal list of hazardous waste sites (e.g. CERCLIS, HWDMS etc.)." Searches for the property and adjacent properties are specified for "chemical manufacturing plants," "obvious high risk neighbors engaging in storing or transporting hazardous waste, chemicals or substances" and "...any documented or visible evidence of dangerous waste handling... (e.g. stressed vegetation, stained soil, open or leaking containers, foul fumes or smells, oily ponds, etc." Searches for property and adjacent properties can include sites up to a quarter mile away (W. Hayward, Director, Multi-Family Business Planning and Control, Fannie Mae, personal communication, 5/94).

Last updated on Tuesday, March 3rd, 2009.

You are here: [EPA Home](#) | [Air](#) | [Indoor Air Quality](#) | [Radon](#) | [EPA Map of Radon Zones](#) | New York

EPA Map of Radon Zones

New York

The purpose of this map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones. All homes should be tested regardless of geographic location. Important points to note:

- **All homes should test for radon**, regardless of geographic location or zone designation
- There are many thousands of individual homes with elevated radon levels in Zone 2 and 3. Elevated levels can be found in Zone 2 and Zone 3 counties.
- All users of the map should carefully review the map documentation for information on within-county variations in radon potential and supplement the map with locally available information before making any decisions.
- **The map is not to be used in lieu of testing during real estate transactions.**

IMPORTANT: EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area. Contact your state radon coordinator ([Click Here](#)) to see if your state has more detailed information available. If you have questions about radon in water [Click Here](#).

PDF version of the National Map (PDF, 1 page, 405KB)

The Map was developed using five factors to determine radon potential: indoor radon measurements; geology; aerial radioactivity; soil permeability; and, foundation type. Radon potential assessment is based on geologic provinces. Radon Index Matrix is the quantitative assessment of radon potential. Confidence Index Matrix shows the quantity and quality of the data used to assess radon potential. Geologic Provinces were adapted to county boundaries for the Map of Radon Zones.

Sections 307 and 309 of the Indoor Radon Abatement Act of 1988 (IRAA) directed EPA to list and identify areas of the U.S. with the potential for elevated indoor radon levels. EPA's Map of Radon Zones assigns each of the 3,141 counties in the U.S. to one of three zones based on radon potential:

	Zone 1 counties have a predicted average indoor radon screening level greater than 4 pCi/L (pico curies per liter) (red zones)	Highest Potential
	Zone 2 counties have a predicted average indoor radon screening level between 2 and 4 pCi/L (orange zones)	Moderate Potential

Scale: 1/8"=1'-0"

CONKLIN AVENUE
(60" WIDE STREET)

ZONING INFORMATION

1465 ROCKAWAY PARKWAY BROOKLYN NY
BLOCK: 8185
LOT: 24
ZONING DISTRICT: R5D OVERLAY C1-3
ZONING MAP: 23c
MIXED USE BUILDING : COMMERCIAL- HOUSEHOLD APPLIANCE STORE - M - PRC B, USE GROUP 6
RESIDENTIAL - 2 FAMILIES - R-3 USE GROUP 2

SIGNS
32-60 SIGN REGULATIONS
NO SIGNAGE UNDER THIS APPLICATION.

BULK REGULATIONS FOR MIXED BUILDINGS IN COMMERCIAL DISTRICTS

35-10 GENERAL PROVISIONS
THE PORTIONS OF A MIXED BUILDING USED FOR RESIDENTIAL USE ARE SUBJECT TO THE BULK REGULATIONS SET FORTH IN ARTICLE II, CHAPTER 3, AND THE PORTIONS OF A MIXED BUILDING USED FOR COMMERCIAL OR COMMUNITY FACILITY USE ARE SUBJECT TO THE BULK REGULATIONS SET FORTH IN ARTICLE III, CHAPTER 3. SPECIAL PROVISIONS APPLYING TO MIXED BUILDINGS ARE SET FORTH IN SECTION 35-20, 35-30 35-40 35-50 35-60 INCLUSIVE.

35-21 GENERAL PROVISIONS
IN C1 DISTRICT, THE BULK REGULATIONS APPLICABLE TO RESIDENTIAL BUILDINGS SET FORTH IN ARTICLE II, CHAPTER 3, SHALL APPLY TO ALL RESIDENTIAL PORTIONS OF MIXED BUILDINGS IN ACCORDANCE WITH THE PROVISIONS AND MODIFICATIONS SET FORTH IN THE REMAINING SECTIONS OF THIS CHAPTER.

35-22 RESIDENTIAL BULK REGULATIONS IN C1 DISTRICT WHOSE BULK IS GOVERNED BY SURROUNDING RESIDENCE DISTRICT
IN C1-3 DISTRICT, THE BULK REGULATIONS FOR THE RESIDENCE DISTRICT WITHIN WHICH SUCH COMMERCIAL DISTRICT IS MAPPED APPLY TO RESIDENTIAL PORTIONS OF MIXED BUILDINGS.

35-31 MAXIMUM FLOOR AREA RATIO FOR MIXED BUILDINGS
THE MAXIMUM FLOOR AREA RATIO PERMITTED FOR A COMMERCIAL OR COMMUNITY FACILITY USE SHALL BE AS SET FORTH IN ARTICLE III, CHAPTER 3, AND THE MAXIMUM FLOOR AREA RATIO PERMITTED FOR A RESIDENTIAL USE SHALL BE AS SET FORTH IN ARTICLE II, CHAPTER 3, PROVIDED THE TOTAL OF ALL SUCH FLOOR AREA RATIOS DOES NOT EXCEED THE GREATEST FLOOR AREA RATIO PERMITTED FOR ANY SUCH USE ON THE ZONING LOT.

33-121 C1-3 WITH BULK GOVERNED BY RESIDENCE DISTRICT BULK REGULATIONS
COMMERCIAL USE MAXIMUM FLOOR AREA RATIO : 2.00

LOT AREA PER SURVEY = 2,539.33 SF (SEE DWG Z-002)
MAXIMUM COMMERCIAL USE FLOOR AREA = 2,539.33 SF x 2.00 = 5,078.66 SF
PROPOSED COMMERCIAL USE FLOOR AREA = 2,533.69 SF < 5,078.66 SF
SEE Z102 DWGS

COMPLIES.

23-141(b)
FOR INTERIOR LOTS IN R5D DISTRICT
MAXIMUM LOT COVERAGE = 60%
OPEN SPACE = 40%
MAXIMUM FLOOR AREA RATIO = 2.00

LOT AREA PER SURVEY = 2,539.33 SF (SEE DWG Z-002)
PROPOSED RESIDENTIAL USE LOT COVERAGE = 1,521.50 SF (SEE DWG Z-002) < 2,539.33 SF X 60% = 1,523.60 SF
PROPOSED RESIDENTIAL USE OPEN SPACE = 2,539.33 - 1,521.50 = 1,017.83 SF > 2,539.33 SF X 40% = 1,015.73
TOTAL PROPOSED RESIDENTIAL USE FLOOR AREA = 2,509.76 SF (SEE DWG Z-002) < 5,078.66 SF

COMPLIES.

TOTAL PROPOSED FLOOR AREA
= 2,533.69 SF (COMMERCIAL) + 2,509.76 SF (RESIDENTIAL)
= 5,043.44 SF < 5,078.66 SF
SEE Z102 DWGS

COMPLIES.

12-10 FLOOR AREA - NOT INCLUDED IN FLOOR AREA
(1) CELLAR
(5) FLOOR SPACE OPEN TERRACE THAT NOT MORE THAN 50 % OF THE PERIMETER OF SUCH TERRACE IS ENCLOSED AND PROVIDED THAT A PARAPET NOT HIGHER THAN 3'-8", PROPOSED TERRACE ARE ARE NOT ENCLOSED ALL TERRACE PARAPET IS 3'-6"
PROPOSED LENGTH OF THE FRONT TERRACE AT 3RD FLOOR = (24.71 + 14.17) X 2 = 77.76 SF
OPEN PARAMETER = 20.71 + 13.33 + 6.0 = 40.04
40.04 / 77.76 = 51.50% OPEN
(8) FLOOR SPACE USED FOR MECHANICAL EQUIPMENT, SUCH EXCLUSION SHALL BE LIMITED TO 50 SF FOR THE 1ST DWELLING UNIT, AN ADDITIONAL 30 SF FOR THE SECOND DWELLING UNIT.

TOTAL PROPOSE MECHANICAL AREA = 38.64 SF < 80SF

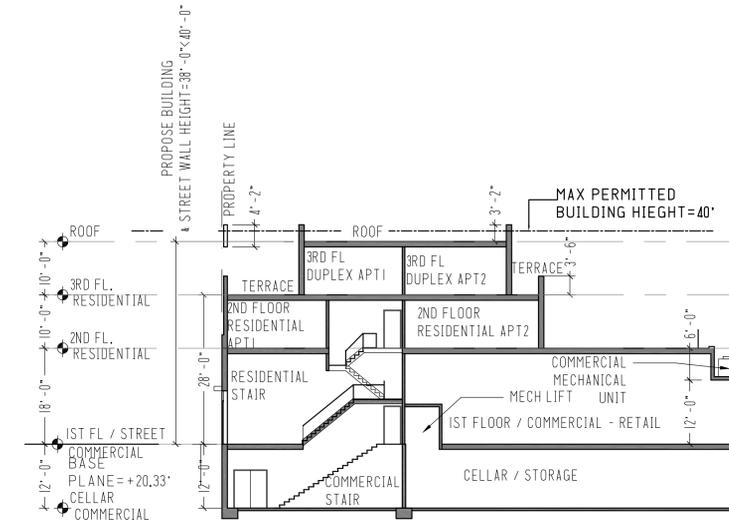

COMPLIES.

35-34 LOCATION OF OPEN SPACE FOR MIXED BUILDINGS

THE OPEN SPACE REQUIRED FOR THE RESIDENTIAL PORTION OF A MIXED BUILDING UNDER THE PROVISIONS OF SECTION 35-33 MAY BE AT A LEVEL HIGHER THAN 23 FEET ABOVE CURB LEVEL. SUCH OPEN SPACE MAY BE PROVIDED AT GROUND FLOOR LEVEL OR UPON THE ROOF OF THE NON-RESIDENTIAL PORTION OF SUCH MIXED BUILDING, PROVIDED THAT THE LEVEL OF ANY OPEN SPACE MAY NOT BE HIGHER THAN 2 1/2' BELOW THE SILL LEVEL OF ANY LEGALLY REQUIRED WINDOW OPENING ON SUCH ROOF AREA, IN THE RESIDENTIAL PORTION OF SUCH MIXED BUILDING.

PROPOSED RESIDENTIAL OPEN SPACE IS ON THE ROOF OF COMMERCIAL PORTION AND 2 1/2' BELOW THE SILL LEVEL OF LEGALLY REQUIRED WINDOW.

COMPLIES.

1 ZONING SECTION
Scale: 1/16"=1'-0"

35-40 APPLICABILITY OF DENSITY REGULATIONS TO MIXED BUILDINGS

THE MAXIMUM NUMBER OF DWELLING UNITS OR ROOMING UNITS ON A ZONING LOT CONTAINING A MIXED BUILDING SHALL EQUAL THE MAXIMUM RESIDENTIAL FLOOR AREA PERMITTED FOR THE ZONING LOT DETERMINED IN ACCORDANCE WITH THE PROVISIONS SET FORTH IN SECTION 35-30 DIVIDED BY THE APPLICABLE FACTOR IN SECTION 23-20.

23-22 MAXIMUM NUMBER OF DWELLING UNITS

IN R5D DISTRICT, THE MAXIMUM NUMBER OF DWELLING UNITS EQUALS THE MAXIMUM RESIDENTIAL FLOOR AREA PERMITTED ON THE ZONING LOT DIVIDED BY 760. FRACTIONS EQUAL TO OR GREATER THAN THREE-QUARTER RESULTING FROM THIS CALCULATION SHALL BE CONSIDERED TO BE ONE DWELLING UNIT.

MAXIMUM RESIDENTIAL FLOOR AREA PERMITTED ON ZONING LOT = 2,539.33 SF x 2.00 = 5,078.66 SF

MAXIMUM NUMBER OF DWELLING UNITS PERMITTED = 5,078.66 / 760 = 7 DWELLING UNITS PERMITTED.
MAXIMUM RESIDENTIAL FLOOR AREA AFTER DEDUCTING PROPOSE COMMERCIAL AREA = 2544.97 / 760 = 3. DWELLING UNITS PERMITTED

NUMBER OF PROPOSED DWELLING UNITS = 2 < 3

COMPLIES

23-23(a) MINIMUM SIZE OF DWELLING UNITS
IN R5D DISTRICT, EACH DWELLING UNIT SHALL CONTAIN AT LEAST 300 SF OF FLOOR AREA

PROPOSE MINIMUM DWELLING UNIT SIZE = 1,168 SF > 300 SF

COMPLIES

23-32 MINIMUM LOT AREA OR LOT WIDTH FOR RESIDENCES
IN R5D DISTRICTS, TWO FAMILY ON A ZONING LOT
MINIMUM LOT AREA = 2,375 SF
PROPOSE LOT AREA = 2,539.33 SF > 2,375 SF

MINIMUM LOT WIDTH = 25'
PROPOSE LOT WIDTH = 25'-5 1/2" AND 24'-10 1/2" IN FRONT

23-33(c) SPECIAL PROVISIONS FOR DEVELOPMENT OF EXISTING SMALL LOTS
IF DEVELOPED AS A TWO-FAMILY RESIDENCE, MEETS THE APPLICABLE DENSITY REQUIREMENT OF THE ZONING DISTRICT IN WHICH SUCH ZONING LOT IS LOCATED.

MAXIMUM NUMBER OF DWELLING UNITS PERMITTED = 5,078.66 / 760 = 7 DWELLING UNITS PERMITTED.
PROPOSE 2 UNITS < 7 UNITS

COMPLIES

YARD

23-45(b)(2) MINIMUM REQUIRED FRONT YARDS IN R5D
NO DEEPER THAN THE DEEPEST ADJACENT FRONT YARD AND NO SHALLOWER THAN THE SHALLOWEST ADJACENT FRONT YARD.

ADJACENT BUILDING FRONT YARD = 0
PROPOSE RESIDENTIAL PORTION OF FRONT YARD = 0

23-451
PLANTING REQUIREMENT
A MINIMUM PERCENTAGE OF THE AREA OF THE FRONT YARD SHALL BE PLANTED

THERE IS NO FRONT YARD, THEREFOR NO PLANT IS PROVIDE

35-51 MODIFICATION OF FRONT YARD REQUIREMENTS
NO FRONT YARD SHALL BE REQUIRED

COMPLIES

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

Units^ = All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

Parameter	Result	RL	Units ^	Date	Time	By	Reference
-----------	--------	----	---------	------	------	----	-----------

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

3 = This parameter exceeds laboratory specified limits.

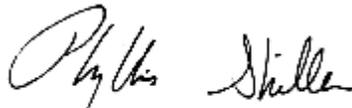

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

Units^ = All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

I = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

IP = This parameter is pending certification by NY NELAC for this matrix.

IO = This parameter is not certified by NY NELAC for this matrix.

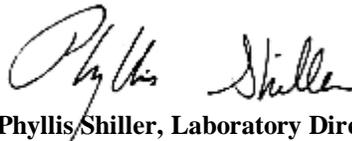

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

Units^ = All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

I = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

IP = This parameter is pending certification by NY NELAC for this matrix.

IO = This parameter is not certified by NY NELAC for this matrix.

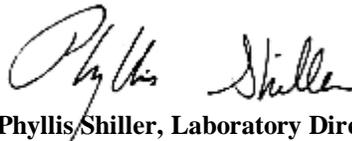

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

Units^ = All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

-----------	--------	----	---------	------	------	----	-----------

I = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

IP = This parameter is pending certification by NY NELAC for this matrix.

IO = This parameter is not certified by NY NELAC for this matrix.

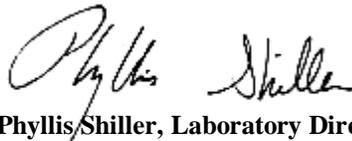

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

Units^ = All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

Parameter	Result	RL	Units	Date	Time	By	Reference
-----------	--------	----	-------	------	------	----	-----------

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

3 = This parameter exceeds laboratory specified limits.

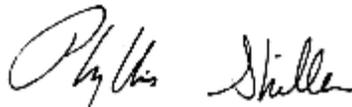

Comments:

* The surrogate failed method criteria due to sample matrix interference for the semivolatile analysis. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1P = This parameter is pending certification by NY NELAC for this matrix.
1O = This parameter is not certified by NY NELAC for this matrix.
3 = This parameter exceeds laboratory specified limits.

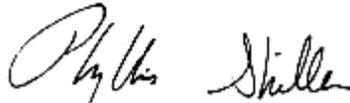

Comments:

* The surrogate failed method criteria due to sample matrix interference for the semivolatile analysis. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

Parameter	Result	RL	Units	Date	Time	By	Reference
-----------	--------	----	-------	------	------	----	-----------

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

3 = This parameter exceeds laboratory specified limits.

Comments:

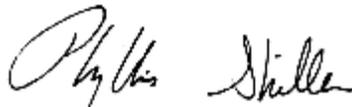

* For PCB and Pesticides, due to matrix interference from non target compounds in the sample an elevated RL was reported.

* The surrogate failed method criteria due to sample matrix interference for the semivolatile analysis. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

This report must not be reproduced except in full as defined by the attached chain of custody.

Parameter	Result	RL	Units	Date	Time	By	Reference
-----------	--------	----	-------	------	------	----	-----------

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

3 = This parameter exceeds laboratory specified limits.

Comments:

* For PCB and Pesticides, due to matrix interference from non target compounds in the sample an elevated RL was reported.

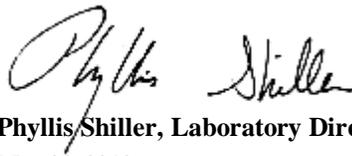

* The surrogate failed method criteria due to sample matrix interference for the semivolatile analysis. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

**Poor surrogate recovery was observed for volatiles due to matrix interference. Sample was analyzed twice with similar results.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

This report must not be reproduced except in full as defined by the attached chain of custody.

Shannon,

We will not need the samples run for hex chrome. Sorry for any confusion.

Thank you,

Gavin

Subject: 1465 ROCKAWAY PKWY

Gavin,

We received samples on Friday for this project and I noticed on the C.O.C. you have CR+6 written over where the bottles are listed. Did you need Hexcr reported along with the other analysis on the waters? Please note that Hexcr is a 24 hr hold time and it would be past hold if you do want it analyzed. Please confirm. Thank you.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

RPD - Relative Percent Difference

LCS - Laboratory Control Sample

LCSD - Laboratory Control Sample Duplicate

MS - Matrix Spike

MS Dup - Matrix Spike Duplicate

NC - No Criteria
