CERTIFICATION

I, Kristen DiScenza, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the Redevelopment Project located at 738 Grand Street, Brooklyn, NY, (NYC VCP Site No. 14CVCP202K OER Project No. 13EH-N414K). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

Kristen DiScenza 12/9/13 
Qualified Environmental Professional Date Signature

EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

Site Location and Current Usage

The Site is located at 738 Grand Street in the Williamsburg section of Brooklyn, New York, and is identified as Block 2789 and Lot 10 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 2,500-square feet and is bounded by Grand Street and Block 2783 Lot 39 (mixed use residential and commercial building) to the north, Block 2789 Lot 39 (multi-story residential building) to the south, Block 2789 Lot 11 (multi-story residential building) to the east, and Block 2789 Lot 4 (multi-story commercial/office building) to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is developed with a single story commercial building with office space for two businesses.

Summary of Proposed Redevelopment Plan

The proposed future use of the Site will consist of redeveloping the lot with a 6-story mixed use building with a total of 10 units. The building will cover the entire lot and includes a full cellar, which will be utilized for retail space, storage, bicycle storage, and utility rooms. The cellar will have both elevator and stair access. The first floor will be utilized for retail space, residential access to units above, and a rear concrete capped outdoor terrace. The basement level and foundation will require excavation of the entire Site to a total depth of approximately 11 feet below grade with additional excavation to approximately 15 feet below grade for the elevator pit. Layout of the proposed site development is presented in Figure 3. The current zoning designation is C4-4A/C2-4. The proposed use is consistent with existing zoning for the property.

Summary of Past Uses of Site and Areas of Concern

A Phase I was completed by Singer Environmental Group, LTD. in May 2013. A history dating back to the 1900's was established. According to Sanborn History maps and NYC Oasis information, the lot was vacant in the 1900's and utilized for storage in 1910. The current single

story building was erected in 1920, and is listed as a carpenters shop in the 1940's. From 1950 to 1990 the building was utilized for manufacturing.

Based upon reconnaissance of the subject site and surrounding properties, interviews and review of historical records and regulatory agency databases, Singer Environmental Group, LTD. identified the following environmental concerns:

- Fuel oil applications were filed with the Department of Buildings.
- The subject property is listed on the Little "E" Database with a Hazmat/noise designation.

The AOCs identified for this Site include:

1. Historic fill layer is present at the Site from grade to depths as great as 5 feet below grade.

Summary of the Work Performed under the Remedial Investigation

EBC performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed three soil borings across the entire project Site, and collected six soil samples and one duplicate soil sample for chemical analysis from the soil borings to evaluate soil quality; and
3. Installed three soil vapor probes around Site perimeter and collected three samples for chemical analysis.

Summary of Environmental Findings

1. Elevation of the property is approximately 48 feet.
2. Depth to bedrock is at the Site is greater than 100 feet.
3. The stratigraphy of the Site, from the surface down, consists of 5 feet of historic fill underlain by a native silty sand and clay.
4. Soil/fill samples collected during the RI showed that pesticides and PCBs were not detected in any soil sample. Two VOCs were detected above Unrestricted Use SCOS in two shallow and one deep soil samples obtained. Methylene chloride (a common laboratory contaminant) was detected at a maximum concentration of 470 µg/Kg and

naphthalene was detected in the shallow sample at a concentration of 17,000 $\mu\text{g}/\text{Kg}$. Eleven SVOCs including benz(a)anthracene (82,000 $\mu\text{g}/\text{Kg}$), benzo(a)pyrene (68,000 $\mu\text{g}/\text{Kg}$), benzo(b)fluoranthene (95,000 $\mu\text{g}/\text{Kg}$), chrysene (79,000 $\mu\text{g}/\text{Kg}$), fluoranthene (270,000 $\mu\text{g}/\text{Kg}$), indeno(1,2,3-cd)pyrene (max. of 29,000 $\mu\text{g}/\text{Kg}$), naphthalene (max. of 110,000 $\mu\text{g}/\text{Kg}$), phenanthrene (370,000 $\mu\text{g}/\text{Kg}$) and pyrene (220,000 $\mu\text{g}/\text{Kg}$) were detected above their respective Track 2 Restricted Residential Use SCOs in one shallow soil sample (boring location B1) indicating a hotspot area. The boring log from this location indicated that the fill layer extended to 5 ftbg. Six metals, including barium (max. of 455 mg/Kg), chromium (max. of 33.7 mg/Kg), lead (max. of 4,130 mg/Kg), mercury (max. of 0.82 mg/Kg), nickel (max. of 564 mg/Kg) and zinc (max. of 145 mg/Kg) exceeded Unrestricted Use SCOs in all three shallow soil samples and one deep soil sample. Of these metals, lead, mercury, and nickel also exceeded Restricted Residential Use SCOs. Only one metal, chromium, was detected in the deep soil sample. Overall, the findings were consistent with observations for historical fill sites in areas throughout NYC except for an SVOC hotspot around boring location B1.

5. Several attempts were made to install groundwater wells. Refusal was encountered in all locations at depths of 6 feet to 32 feet below grade. Groundwater wells will be installed after demolition of existing building and prior to new development.
6. Soil vapor samples collected during the RI indicated chlorinated compounds at low concentrations and petroleum VOCs at moderate concentrations. Concentrations of petroleum-related VOCs (BTEX) ranged from 239.5 $\mu\text{g}/\text{m}^3$ to 422.1 $\mu\text{g}/\text{m}^3$. Overall, the highest reported concentrations were for xylene (m&p) (183 $\mu\text{g}/\text{m}^3$) and acetone (120 $\mu\text{g}/\text{m}^3$). Benzene was identified at a maximum concentration of 42.8 $\mu\text{g}/\text{m}^3$. Tetrachloroethylene (PCE) and carbon tetrachloride were detected in all three soil vapor samples at maximum concentrations of 22 $\mu\text{g}/\text{m}^3$ and 0.629 $\mu\text{g}/\text{m}^3$, respectively. Trichloroethene (TCE) and 1,1,1-trichloroethane were not detected in any of the three samples. PCE and carbon tetrachloride were detected in soil vapor samples at concentrations below the monitoring level ranges established within the New York State Department of Health (NYSDOH) Final Guidance on Soil Vapor Intrusion (October 2006) values (AGVs).

REMEDIAL INVESTIGATION REPORT

1.0 SITE BACKGROUND

Rainwood LLC has applied to enroll in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a 0.06-acre Site located at 738 Grand Street in the Williamsburg section of Brooklyn, New York. Residential use is proposed for the property. The RI work was performed between September 20, 2013, and September 25, 2013. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

1.1 Site Location and Current Usage

The Site is located at 738 Grand Street in the Williamsburg section of Brooklyn, New York, and is identified as Block 2789 and Lot 10 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 2,500-square feet and is bounded by Grand Street and Block 2783 Lot 39 (mixed use residential and commercial building) to the north, Block 2789 Lot 39 (multi-story residential building) to the south, Block 2789 Lot 11 (multi-story residential building) to the east, and Block 2789 Lot 4 (multi-story commercial/office building) to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is developed with a single story commercial building with office space for two businesses.

1.2 Proposed Redevelopment Plan

The proposed future use of the Site will consist of redeveloping the lot with a 6-story mixed use building with a total of 10 residential units. The building will cover the entire lot and includes a full cellar, which will be utilized for retail space, storage, bicycle storage, and utility rooms. The cellar will have both elevator and stair access. The first floor will be utilized for retail space, residential access to units above, and a rear concrete capped outdoor terrace built over the cellar below. Skylights from the cellar will penetrate the rear of the terrace. The basement level and foundation will require excavation of the entire Site to a total depth of approximately 11 feet below grade with additional excavation to approximately 15 feet below grade for the elevator pit.

Layout of the proposed site development is presented in Figure 3. The current zoning designation is C4-4A/C2-4. The proposed use is consistent with existing zoning for the property.

1.3 Description of Surrounding Property

The area surrounding the Site consists of a mix of residential and vacant properties. Figure 4 shows the surrounding land usage of the adjacent properties listed below as well as additional properties located up to 500 feet away from the Site. No hospitals, schools or daycare facilities are located within a 250 ft radius of the Site.

Surrounding Property Usage

Direction	Property Description
North – Opposite side of Grand Street	<u>Block 2783, Lot 39</u> (737 Grand Street) – Developed with multi-story mixed commercial and residential buildings.
South – Adjacent property	<u>Block 2789, Lot 39</u> (177 Maujer Street) – Developed with a multi-story residential building.
East – Adjacent property	<u>Block 2789, Lot 11</u> (740 Grand Street) – Developed with a multi-story residential building.
West – Adjacent property	<u>Block 2789, Lot 4</u> (262 Graham Avenue) – Developed with a multi-story commercial building.

2.0 SITE HISTORY

2.1 Past Uses and Ownership

A Phase I was completed by Singer Environmental Group, LTD. in May 2013. A history dating back to the 1900's was established. According to Sanborn History maps and NYC Oasis information, the lot was vacant in the 1900's and utilized for storage in 1910. The current single story building was erected in 1920, and is listed as a carpenters shop in the 1940's. From 1950 to 1990 the building was utilized for manufacturing.

Based upon reconnaissance of the subject site and surrounding properties, interviews and review of historical records and regulatory agency databases, Singer Environmental Group, LTD. identified the following environmental concerns:

- Fuel oil applications were filed with the Department of Buildings.
- The subject property is listed on the Little "E" Database with Hazardous Materials and Noise Attenuation "E" designation.

2.2 Previous Investigations

EBC has not been made aware of any previous subsurface investigations conducted at the Site.

2.3 Site Inspection

Mr. Shemon Singer, a representative of Singer Environmental Group, performed a site inspection on May 7, 2013. The reconnaissance included a visual inspection of the Site, the sidewalk immediately in front of the Site, and the exterior of adjacent properties. At the time of the inspection, the Site consisted of a single story commercial building currently utilized for office space.

2.4 Areas of Concern

The AOCs identified for this Site include:

1. Historic fill layer is present at the Site from grade to depths as great as 5 feet below grade.

A copy of the Phase I Report is presented in Attachment A.

3.0 PROJECT MANAGEMENT

3.1 Project Organization

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Kristen DiScenza.

3.2 Health and Safety

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

3.3 Materials Management

All material encountered during the RI was managed in accordance with applicable laws and regulations.

4.0 REMEDIAL INVESTIGATION ACTIVITIES

EBC performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed three soil borings across the entire project Site, and collected six soil samples and one duplicate soil sample for chemical analysis from the soil borings to evaluate soil quality; and
3. Several attempts were made to install groundwater wells. Refusal was encountered in all locations at depths of 6 feet to 32 feet below grade.
4. Installed three soil vapor probes across the Site and collected three samples for chemical analysis.

4.1 Geophysical Investigation

A geophysical investigation was not performed as a part of this assessment.

4.2 Borings and Monitoring Wells

Drilling and Soil Logging

On September 20, 2013, three soil borings (B1 through B3) were performed in the approximate locations shown on Figure 5. The three soil boring locations were chosen to gain representative soil quality information across the Site. For each of the three soil borings, soil samples were collected continuously from grade to a final depth of 15 feet below existing grade using a five-foot steel macro-core sampler with acetate liners and Geoprobe direct-push equipment. Soil recovered from each of the soil borings was field screened for the presence of VOCs with a photo-ionization detector (PID) and visually inspected for evidence of contamination. No PID readings above background concentrations were obtained from any of the soil borings.

One soil sample was retained from each boring representing the interval 0 to 2 feet below grade and one soil sample was retained from each soil boring representing the interval 11 to 13 feet below grade.

Soil boring details are provided in Table 1. Boring logs were prepared by a Qualified Environmental Professional and are attached in Attachment B.

4.3 Sample Collection and Chemical Analysis

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

Soil Sampling

Seven soil samples (two from each boring and one duplicate) were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths, is reported in Tables 2 through 5. Figure 5 shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

The seven soil samples were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted for analysis to Phoenix Environmental Laboratories (Phoenix) of 587 East Middle Turnpike, Manchester, CT 06040, a New York State ELAP certified environmental laboratory (ELAP Certification No. 11301). All soil samples were analyzed for the presence of volatile organic compounds (VOCs) by EPA Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, pesticides/PCBs by EPA Methods 8081/8082 and target analyte list (TAL) metals.

Groundwater Sampling

Groundwater samples were not obtained during this investigation due to refusal encountered throughout the Site. Several attempts were made to collect groundwater samples across the Site, drilling activities were terminated at depths ranging from 6ft to 32ft feet below grade. The groundwater table is anticipated to be approximately 40 feet below grade at this location.

Soil Vapor Sampling

Three soil vapor probes were installed and three soil vapor samples were collected for chemical analysis during this RI. Soil vapor sampling locations are shown in Figure 5. Soil vapor sample collection data is reported in Table 6. Soil vapor sampling logs are included in Attachment C. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006*.

The three soil vapor implants were installed using Geoprobe™ equipment and tooling. The vapor implants that were installed were the Geoprobe™ Model AT86 series, which are constructed of a 6-inch length of double woven stainless steel wire. The implants were installed to a depth of 12 feet below grade at all locations. Each implant was attached to ¼ inch polyethylene tubing which extended approximately 18 inches beyond that needed to reach the surface. The tubing was capped with a ¼ inch plastic end to prevent the infiltration of foreign particles into the tube. Coarse sand was placed around the vapor implant to a height of approximately 1 foot above the bottom of the implant. The remainder of the borehole was sealed with a bentonite slurry to the surface.

Soil vapor sampling for the four implants installed on September 20, 2013, was conducted on September 25, 2013. Prior to sampling, each sampling location was tested to ensure a proper surface seal had been obtained. In accordance with NYSDOH guidance (NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York, February 2005), a tracer gas (helium) was used as a quality assurance/quality control device to verify the integrity of the sampling point seal prior to collecting the samples. Prior to testing and collecting samples, the surface immediately surrounding the polyethylene tubing of the vapor implant was sealed using a 1 foot ft by 1 ft square sheet of 2 mil HDPE plastic firmly adhered to a wetted layer of granular bentonite. The seal was then tested by enriching the air space above the seal with a tracer gas (helium) while continuously monitoring air drawn from the implant with a helium detector (Dielectric Model MGD-2002, Multi-Gas Detector) for a minimum of 15 minutes. The tracer gas test procedure was employed at all three soil vapor sampling locations. No surface seal leaks were observed at any of the locations.

Following verification that the surface seal was tight, one to three volumes (i.e., the volume of the sample probe and tube) of air was purged from the implant using a calibrated vacuum pump. After purging, a 6-liter Summa® canister, fitted with a 2-hour flow regulator, was attached to the surface tube of each of the three vapor implants. Prior to initiating sample collection, sample identification, canister number, date and start time were recorded on tags attached to each canister and in a bound field note book. Sampling then proceeded by fully opening the flow control valve on each canister in turn. Immediately after opening the flow control valve on a canister, the initial vacuum (inches of mercury) was recorded in the field book and on the sample tag. When the vacuum level in the canister was between 5 and 8 inches of mercury (approx 2 hours), the flow controller valve was closed, and the final vacuum recorded in the field notebook and on the sample tag.

The soil gas Sample identification, date, start time, start vacuum, end time and end vacuum were recorded on tags attached to each canister and on a sample log sheet (Attachment C). Samples were submitted to Phoenix for laboratory analysis of VOCs EPA Method TO-15.

Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

Factor	Description
Quality Assurance Officer	The chemical analytical quality assurance is directed by Phoenix Environmental Laboratories
Chemical Analytical Laboratory	Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and was Phoenix Environmental Laboratories
Chemical Analytical Methods	Soil analytical methods: <ul style="list-style-type: none"> • TAL Metals by EPA Method 6010C (rev. 2007); • VOCs by EPA Method 8260C (rev. 2006); • SVOCs by EPA Method 8270D (rev. 2007); • Pesticides by EPA Method 8081B (rev. 2000); • PCBs by EPA Method 8082A (rev. 2000); Soil vapor analytical methods: <ul style="list-style-type: none"> • VOCs by TO-15 VOC parameters..

Results of Chemical Analyses

Laboratory data for soil, groundwater, and soil vapor are summarized in Tables 2 through 6. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Attachment D.

5.0 ENVIRONMENTAL EVALUATION

5.1 Geological and Hydrogeological Conditions

Stratigraphy

Subsurface soil at the Site consisted of historic fill, which was primarily comprised of asphalt, brick, concrete, gravel, wood and other debris in a brown silty-sand matrix. The layer of historic fill extended to a depth ranging from ground surface to approximately 5 feet below grade. Native soil consisting of a brown/gray silty sand and clays is present below the historic fill layer.

5.2 Soil Chemistry

Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site. A summary table of data for chemical analyses performed on soil samples is included in Tables 2 through 5. Results were compared to NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCOs) and Restricted Residential Soil Cleanup Objectives (RRSCOs) as presented in 6NYCRR Part 375-6.8 and CP51. A copy of the laboratory report is provided in Attachment D. Figure 5 shows the location and posts the values for soil/fill that exceeds UUSCOs and RRSCOs.

Soil/fill samples collected during the RI showed that pesticides and PCBs were not detected in any soil sample. Two VOCs were detected above Unrestricted Use SCOS in two shallow and one deep soil samples obtained. Methylene chloride (a common laboratory contaminant) was detected at a maximum concentration of 470 µg/Kg and naphthalene was detected in the shallow sample at a concentration of 17,000 µg/Kg. Eleven SVOCs including benz(a)anthracene (82,000 µg/Kg), benzo(a)pyrene (68,000 µg/Kg), benzo(b)fluoranthene (95,000 µg/Kg), chrysene (79,000 µg/Kg), fluoranthene (270,000 µg/Kg), indeno(1,2,3-cd)pyrene (max. of 29,000 µg/Kg), naphthalene (max. of 110,000 µg/Kg), phenanthrene (370,000 µg/Kg) and pyrene (220,000 µg/Kg) were detected above their respective Track 2 Restricted Residential Use SCOs in one shallow soil sample (boring location B1) indicating a hotspot area. The boring log from this location indicated that the fill layer extended to 5 ftbg. Six metals, including barium (max. of 455 mg/Kg), chromium (max. of 33.7 mg/Kg), lead (max. of 4,130 mg/Kg), mercury (max. of 0.82 mg/Kg), nickel (max. of 564 mg/Kg) and zinc (max. of 145 mg/Kg) exceeded Unrestricted Use

SCOs in all three shallow soil samples and one deep soil sample. Of these metals, lead, mercury, and nickel also exceeded Restricted Residential Use SCOs. Only one metal, chromium, was detected in the deep soil sample. Overall, the findings were consistent with observations for historical fill sites in areas throughout NYC except for an SVOC hotspot around boring location B1.

5.3 Soil Vapor Chemistry

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in Table 6.

Figure 7 shows the location and posts the values for soil vapor samples with detected concentrations.

Soil vapor samples collected during the RI indicated chlorinated compounds at low concentrations and petroleum VOCs at moderate concentrations. Concentrations of petroleum-related VOCs (BTEX) ranged from 239.5 $\mu\text{g}/\text{m}^3$ to 422.1 $\mu\text{g}/\text{m}^3$. Overall, the highest reported concentrations were for xylene (m&p) (183 $\mu\text{g}/\text{m}^3$) and acetone (120 $\mu\text{g}/\text{m}^3$). Benzene was identified at a maximum concentration of 42.8 $\mu\text{g}/\text{m}^3$. Tetrachloroethylene (PCE) and carbon tetrachloride were detected in all three soil vapor samples at maximum concentrations of 22 $\mu\text{g}/\text{m}^3$ and 0.629 $\mu\text{g}/\text{m}^3$, respectively. Trichloroethene (TCE) and 1,1,1-trichloroethane were not detected in any of the three samples. PCE and carbon tetrachloride were detected in soil vapor samples at concentrations below the monitoring level ranges established within the New York State Department of Health (NYSDOH) Final Guidance on Soil Vapor Intrusion (October 2006) values (AGVs).

5.4 Prior Activity

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected at this site.

5.5 Impediments to Remedial Action

There are no known impediments to remedial action at this property.

Notes:

NA No guidance value or standard available

(a) Final Guidance for Evaluating Soil Vapor Intrusion in the State of New York, October 2006, New York State Department of Health.

(b) NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York, February 2005, Summary of Background Levels for Selected Compounds (NYSDOH Database, Outdoor values)

Value detected above NYSDOH Air Guidance Value of 5 $\mu\text{g}/\text{m}^3$, which according to Soil Vapor/Indoor Air Matrix 1 would require at a minimum, mitigation.

EXECUTIVE SUMMARY

Scope

Singer Environmental Group (SEG) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations set forth by SEG for the property located at 738 Grand Street, Brooklyn, NY (the "Property").

The Phase I Environmental Site Assessment is designed to provide the Client with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the property. This assessment was conducted utilizing generally accepted ESA industry standards in accordance with ASTM E 1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

Site Description

According to the NYC Department of Buildings (DOB), this property is known as 738 Grand Street with a block and lot of 2789, 10. The DOB has a zoning of "factory/industrial" building use. According to NYC Oasis Information, the zoning is C4-4A. The Property is situated on a rectangular shaped parcel of land comprised of 2,500 sq. Ft. The parcel of land is situated in a residential/commercial area of Brooklyn consisting of commercial/office type land use. The Property is a one story commercial building containing two offices.

Site History

According to NYC Oasis information, this building was built in 1920. According to Sanborn History Maps, the subject property is depicted as vacant in the 1900's, storage in the 1910's, carpenters shop in the 1940's, flat (manufacturing) from the 1950's to the 1990's.

History of Surrounding Areas

According to Sanborn History Maps, the property located to the north is depicted as stores from the 1900's to the 1990's, the property located to the south is depicted as residential from the 1900's to the 1990's, the property located to the west is depicted as stores from the 1900's to the 1950's, parking from the 1960's to the 1990's, the property located to the east is depicted as Carriage & Wagon Repository in the 1900's, Public Market in the 1910's and Flat (Manufacturing) from the 1940's to the 1990's.

Asbestos Containing Material (ACM), Lead Based Paint (LBP), Mold

SEG conducted limited visual asbestos containing material (ACM), lead-based paint (LBP) hazard and mold survey as part of this assessment. No lead based paint or mold hazards was noted during this inspection. SEG did not observe any visible and/or friable ACM during this inspection. The building will be demolished. **Prior to demolition a comprehensive asbestos survey should be conducted.**

Heating System, Above/Underground Storage Tanks

SEG observed gas fired overhead heaters. No aboveground storage tanks, indications of an underground storage tank, vent or fill was noted. Fuel oil applications were filed with the Department of Buildings. **Information/documentation should be provided for the status of this tank (eg, aboveground, underground, abandoned, removed). If no information is available, a GPR (Ground Penetrating Radar) should be conducted to determine the presence of any underground storage tanks.**

Polychlorinated Biphenyls (PCBs)

SEG did not observe any transformers during this inspection.

Site Observations

First Floor

Offices - Concrete floor, ceiling tile, sheetrock, Overhead Heaters-Gas Fired. Gas, electric and water meters.

STATE AND FEDERAL DATABASE SUMMARY TABLE			
Regulatory Database	Approximate Minimum Search Distance	Subject Property Listed	Off-site Listings within search distance
Federal NPL (National Priority List) Sites	1.0 Mile	No	0
Federal Delisted NPL Sites	1.0 Mile	No	0
Federal CERCLIS Sites	0.5 Mile	No	0
Federal CERCLIS NFRAP Sites	0.5 Mile	No	0
Federal RCRA CORRACTS Sites	1.0 Mile	No	1
Federal RCRA Non-CORRACTS TSD Sites	0.5 Mile	No	0
Federal RCRA Generators Sites	.250 Mile	No	1
State NY SHWS (State Hazardous Waste) Sites	1.0 Mile	No	5
State Solid Waste Facility/Landfill	0.5 Mile	No	2
NY LTANKS (Leaking Underground Storage Tanks)	0.5 Mile	No	31
NY Underground Storage Tanks	.250 Mile	No	20
NY Spills	.125 Mile	No	10

“E” (Environmental) Designation

This site is an “E” (Environmental) Designated site with the NYC Department of City Planning for “Hazmat”.

Due to the fact that plans are being filed with the NYC Department of Buildings to obtain work permits, it is required by the NYC Department of Planning that a Phase I Environmental Site Assessment and a Phase II Sampling Workplan be submitted to the NYC DEP for approval before any permit will be issued.

This site is an “E” (Environmental) Designated Property with the NYC Department of City Planning for “Noise”

This “E” Designation will have to be complied with prior to obtaining work permits, however, this is not an environmental concern.

ASSESSMENT SUMMARY TABLE

Assessment Component	Section(S)	Recommended Actions	Estimated Cost
Historical Review	3.0	See Below	N/A
Current Occupants/Operations	2.2	No Further Action	N/A
Hazardous Substances/Petroleum Products	5.3.1	No Further Action	N/A
Drains, Sumps & Storm Water Dry Wells	5.3.5	No Further Action	N/A
Storage Tanks	5.3.6	If no documentation is available, a Probe (eg, GPR, Magnetometer) should be conducted to determine the presence of any underground storage tanks	\$1000-1500
PCB's	5.3.3	No Further Action	N/A
Regulatory Agency/Database Review	7.0	Phase II Subsurface Investigation	\$20,000-25,000
Asbestos Containing Materials	5.3.10	Conduct a comprehensive asbestos survey prior to demolition/renovation	\$500-1000
Lead-Based Paint	5.3.12	No Further Action	N/A
Lead In Drinking Water	5.3.8	No Further Action	N/A
Radon	5.3.11	No Further Action	N/A
Mold	5.3.13	No Further Action	N/A
Wetlands	4.4	No Further Action	N/A

CONCLUSIONS

SEG has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of 738 Grand Street, BROOKLYN, NY, the Property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property except for the following:

- Fuel oil applications were filed with the Department of Buildings.
- SEG did not observe any visible and/or friable ACM during this inspection.
- This site is an “E” (Environmental) Designated Property with the NYC Department of City Planning for “Noise”
- This site is an “E” (Environmental) Designated site with the NYC Department of City Planning for “Hazmat”.

RECOMMENDATIONS

Based on the findings of this ESA, SEG recommends the following:

- Information/documentation should be provided for the status of this tank (eg, aboveground, underground, abandoned, removed). If no documentation is available, a GPR (Ground Penetrating Radar) should be conducted to determine the presence of any underground storage tanks.
- Prior to demolition/renovation, a comprehensive asbestos survey should be conducted.
- The “E” Designation for Noise will have to be complied with prior to obtaining work permits, however, this is not an environmental concern.
- Due to the fact that plans are being filed with the NYC Department of Buildings to obtain work permits, it is required by the NYC Department of Planning that a Phase I Environmental Site Assessment and a Phase II Sampling Workplan be submitted to the NYC DEP for approval before any permit will be issued.

1.0 INTRODUCTION

Singer Environmental Group (SEG) was retained to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 738 Grand Street, BROOKLYN, NY 11211 (the Property). The protocol used for this assessment is in general conformance with ASTM E 1527-05, *Standard Practice for Environmental Site Assessments: Phase 1 Environmental Site Assessment Process*.

On May 7, 2013, Shemon Singer, a representative of SEG, conducted a site reconnaissance to assess the possible presence of petroleum products and hazardous materials at the Property. SEG's investigation included review of reconnaissance of adjacent properties, background research, and review of available local, state, and federal regulatory records regarding the presence of petroleum products and/or hazardous materials at the Property.

SEG contracted Environmental Data Resources (EDR) of Southport, Connecticut to perform a computer database search for local, state, and Federal regulatory records pertaining to environmental concerns for the Property and properties in the vicinity of the Property (see Section 7.0).

1.1 PURPOSE

The purposes of this Phase I Environmental Site Assessment ("ESA") are: To identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-05) in connection with the Property. SEG understands that the findings of this study will be used by the Client to evaluate a pending financial transaction in connection with the Property.

1.2 SCOPE OF SERVICES

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E 1527-05. SEG warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

No other warranties are implied or expressed.

1.3 ASSUMPTIONS

There is a possibility that even with the proper application of these methodologies there may exist on the Property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. SEG believes that the information obtained from the record review and the interviews concerning the site is reliable. However, SEG cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide the Client with information relating to the Property.

1.4 LIMITATIONS AND EXCEPTIONS

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM 1527-05.

1.5 USER PROVIDED INFORMATION

Pursuant to ASTM E 1527-2005, the following site information was requested from the Client (User of this report), by SEG.

Item	Provided by User	Not Provided by user	Discussed Below	Does Not Apply
2.1.1 Environmental Pre-Survey Questionnaire		X		
2.1.2 Title Records		X		
2.1.3 Environmental Liens or Activity and Use Limitation		X		
2.1.4 Specialized Knowledge		X		
2.1.5 Valuation Reduction for Environmental Issues		X		
2.1.6 Identification of Key Site Manager		X		
2.1.7 Reason For Performing Phase I	Yes, See Section 1.1			
2.1.8 Prior Environmental Reports		X		
2.1.9 Other		X		

1.6 INTERVIEWS

No one was available on-site for an interview.

Regulatory Officials

A FOIL Request was submitted to the NYS Department of Environmental Conservation (NYS DEC), NYC Department of Health (DOH) and the NYC Department of Environmental Protection (DEP)

1.7 SPECIAL TERMS AND CONDITIONS

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the client. No subsurface exploratory drilling or sampling was done under the scope of this work. Unless specifically stated otherwise in the report, no chemical analyses have been performed during the course of this ESA.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

SEG, their principals and employees are indemnified for any future changes or conditions of deterioration in or on the subject property. Inasmuch as each has made not guarantees of the premises, expressed or implied in connection with this report, any liability which each may have shall be limited to the fee for the inspection of the property.

1.8 USE RELIANCE

SEG, in evaluating a request for an extension of credit (the "Mortgage Loan") to be secured by the property may rely upon this report. This information also may be used by any actual or prospective purchaser, transferee, assignee, or servicer of the Mortgage Loan, any actual or prospective investor (including agent or advisor) in any securities evidencing a beneficial interest in or backed by the Mortgage Loan, any rating agency actually or prospectively rating any such securities, any indenture trustee, and any institutional provider(s) from time to time of any liquidity facility or credit support for such financing. In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, or prospectus in connection with a securitization or transaction involving the Mortgage Loan and/or such securities. This report has no other purpose and should not be relied upon by any other person or entity.

2.0 SITE DESCRIPTION

2.1 PROPERTY LOCATION AND JURISDICTION

The address of the Property is 738 Grand Street, BROOKLYN, NY. The Property is located in a residential/commercial area of BROOKLYN. According to the NYC Department of Buildings, the block and lot numbers are 2789, 10. The legal description is reproduced below:

According to the NYC Department of Buildings (DOB), this property is known as 738 Grand Street with a block and lot of 2789, 10. The DOB has a zoning of “factory/industrial” building use. According to NYC Oasis Information, the zoning is C4-4A. NYC Oasis records a lot area of 2,500 sq. ft., lot frontage 25 feet, lot depth 100 feet and a building gross area of 2,400 Sq. Ft. This property is located on Grand Street with cross streets of Graham Avenue and Humboldt Street.

According to NYC Oasis Information, the Property is currently owned by Anniciello Anthony.

2.2 PROPERTY DESCRIPTION AND IMPROVEMENTS

The Property consists of a rectangular shaped parcel 2,500. in size. The Property is designed for commercial/office purposes. Currently, the Property is developed with 1 structure that was constructed in 1920. The structure at the Property is 1 stories in height and comprise a total of 2,400 square feet of building space. The site contains offices.

3.0 HISTORICAL USE INFORMATION

3.1 SITE HISTORY

According to NYC Oasis information, this building was built in 1920. According to Sanborn History Maps, the subject property is depicted as vacant in the 1900’s, storage in the 1910’s, carpenters shop in the 1940’s, flat (manufacturing) from the 1950’s to the 1990’s.

4.0 ENVIRONMENTAL SETTING

4.1 TOPOGRAPHY

The United States Geological Survey (USGS), Brooklyn Quadrangle 7.5-Minute series topographic map was reviewed for this ESA. This map was published by the USGS in 1966 and was photorevised in 1995. A review of the USGS 7.5 Minute Topography map was conducted. Based on the topographical gradients, the groundwater flow is assumed to be in a southeasterly direction.

4.2 SOILS

Soil types in the area are generally loamy sand, silt loam, sandy loam and fine sandy loam.

4.3 GEOLOGY

There are no predominant geological surface features on the subject property. The elevation of the property is 39 feet above sea level.

4.4 HYDROLOGY

The nearest surface water in the vicinity of the Property is the English Kills. No settling ponds, lagoons, surface impoundments, wetlands or natural catchbasins were observed at the Property during this investigation.

4.5 FLOOD ZONE INFORMATION

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. The Property is located in Flood Zone X. Zone X are the flood insurance rate zones that correspond to areas outside the 1-percent annual chance floodplain, areas of 1-percent annual chance sheet flow flooding where average depths are less than 1 foot, areas of 1-percent annual chance stream flooding where the contributing drainage area is less than 1 square mile, or areas protected from the 1-percent annual chance flood by levees. No Base Flood Elevations or depths are shown within this zone. Insurance purchase is not required in these zones.

4.6 OIL AND GAS EXPLORATION

The on-site reconnaissance addressed oil and gas exploration at the Property. According to the NYS Department of Conservation, Division of Oil, Gas no operating or abandoned oil or gas wells are on or adjacent to the Property.

5.0 SITE RECONNAISSANCE

5.1 METHODOLOGY AND LIMITING CONDITIONS

The Property was inspected by Shemon Singer on May 7, 2013. The weather at the time of the site visit was hazy, 71 degrees. SEG accessed the first floor offices.

5.2 GENERAL SITE CHARACTERISTICS

5.2.1 SOLID WASTE DISPOSAL

Solid waste generated at this building is handled by Private Sanitation.

5.2.2 SURFACE WATER DRAINAGE

There are no surface water bodies or streams on the subject property.

5.2.3 WELLS AND CISTERNS

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

5.2.4 WASTEWATER

No indications of industrial wastewater disposal or treatment facilities were observed during the onsite reconnaissance.

5.2.5 ADDITIONAL SITE OBSERVATIONS

No additional relevant general Site characteristics were observed.

5.3 POTENTIAL ENVIRONMENTAL CONDITIONS

5.3.1 HAZARDOUS MATERIALS AND PETROLEUM PRODUCTS USED OR STORED AT THE SITE

No evidence of the use of hazardous materials or wastes was observed on the Property.

5.3.1.1 UNLABELED CONTAINERS AND DRUMS

No unlabeled containers or drums were observed during the Site reconnaissance.

5.3.1.2 DISPOSAL LOCATIONS OF REGULATED/ HAZARDOUS WASTE

No obvious indications of hazardous waste generator, storage or disposal were observed on the property or were indicated during interview.

5.3.2 EVIDENCE OF RELEASES

No obvious indications of hazardous material or petroleum product releases, such as stained areas or stressed vegetation, was observed during the site reconnaissance or reported during interviews. **See conclusions and recommendations.**

5.3.3 POLYCHLORINATED BIPHENYLS (PCBS)

An inspection was conducted at the subject property and in the immediate vicinity for the presence of any underground, surface or suspended transformers and visible power supply sources. Oil-containing transformers are known to frequently contain PCBs (Polychlorinated biphenyl's). PCBs are contained in older transformers and other electrical equipment and have the potential for serious health risks. The level of PCB content in such transformers and electrical equipment is regulated by the U.S. Environmental Protection Agency, Regulations 40 CFR Part 761. Upon visual inspection, **NO** suspended transformers power supply sources were identified. Contact with Con Edison has nevertheless been made to determine definitely if any equipment owned and/or maintained by Con Edison located on or in the immediate vicinity of the subject property contain PCB's.

Older transformers and other electrical equipment could contain polychlorinated biphenyls (PCBs) at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are five categories into which electrical equipment can be classified:

- Less than 50 parts per million (PPM) of PCBs – *“Non-PCB” transformer*
- 50 ppm-500 ppm – *“PCB-Contaminated” electrical equipment*
- Greater than 500 ppm – *“PCB” transformer*

5.3.4 LANDFILLS

No evidence of on-site landfilling was observed or reported during the site reconnaissance.

5.3.5 PITS, PONDS, LAGOONS, SUMPS, AND CATCH BASINS

No evidence of on-site pits, ponds or lagoons was observed or reported during the site reconnaissance. No evidence of sumps or catch basins, other than used for storm water removal, was observed or reported during the site reconnaissance.

5.3.6 ON-SITE ASTS AND USTS

SEG observed gas fired overhead heaters. No aboveground storage tanks, indications of an underground storage tank, vent or fill was noted. Fuel oil applications were filed with the Department of Buildings. **Information/documentation should be provided for the status of this tank (eg, aboveground, underground, abandoned, removed). If no information is available, a GPR (Ground Penetrating Radar) should be conducted to determine the presence of any underground storage tanks.**

5.3.7 RADIOLOGICAL HAZARDS

No radiological substances or equipment was observed or reported stored on the Property.

5.3.8 LEAD IN DRINKING WATER

Lead has historically been used in pipes, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, the USEPA banned the use of lead at concentrations exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing such as lead solder, brass, bronze, and other lead containing alloys. The USEPA Action Level for lead in public drinking water supplies is 0.015 parts per million (ppm) or 0.015 milligrams per liter (mg/L).

The New York City Department of Environmental Protection Water Supply Division provides potable water to the building. Potable drinking water used in the system is obtained from groundwater wells and various lakes and reservoirs located in the Upstate New York area (Croton Reservoir). Based upon information supplied from the USEPA's Safe Drinking Water Information System (SDWIS), there is no indication that lead in drinking water is a concern at the subject property. In accordance with the scope of work for this assessment, SEG did not conduct lead-in – drinking water sampling at the subject property.

5.3.9 ASBESTOS-CONTAINING MATERIALS (ACM)

Asbestos is a term used to describe a group of six naturally occurring crystalline fiber minerals. Asbestos has excellent thermal stability, a high degree of tensile strength, and has been used extensively in the textile, insulation, and building industries, particularly as a component in fireproofing, decorative coatings, insulation materials, and as reinforcement for plaster binders in building products. Asbestos-containing building materials are generally classified as friable or non-friable. Friable ACM are those which can be crumbled, pulverized, or reduced to powder by hand pressure, or by normal use or maintenance can be expected to emit asbestos fibers into the air. Non-friable ACM is a potential concern if it is damaged by maintenance work, demolition or other activities, at which time it may be considered friable.

It should be noted that the limited visual screening survey conducted under the scope of work for this assessment does not constitute a full asbestos inspection, in which all areas of the building would have been thoroughly surveyed and sampled.

SEG did not observe any visible and/or friable ACM.

Please note: NO core samples were taken during this inspection, in the event of change in present status, eg, demolition, alteration, modification, all materials should be tested and verified free of any ACM.

5.3.10 RADON

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into five Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all five zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. This property is located in Zone 3.

Review of the EPA Map of Radon Zones places the Property in Zone 3, where average predicted radon levels are less than 2.0 pCi/L below the EPA action level of 4.0 pCi/L.

5.3.11 LEAD-BASED PAINT

Use of lead in household paint was banned by the US Environmental Protection Agency (EPA) effective January 1, 1978. The EPA and the US Department of Housing and Urban Development (HUD) consider lead based paint as containing a lead concentration equal to or greater than 1.0 milligram per square centimeter (mg/cm²) or 0.5% lead by weight, as defined by Title X of the 1992 Housing and Community Development Act.

Paint samples were **NOT** taken for lead content. However, in older buildings it is likely that lead based paint was used within the multi-layered painted surfaces. (Lead based paint was banned in 1978). Lead paint can be hazardous if digested, especially by small children.

SEG observed that the painted surfaces inside the building were in good condition, free of obvious chipping, flaking or peeling.

Lead violations, if any, should show up on the Title Report.

Please note: NO core samples were taken during this inspection, in the event of change in present status, eg, demolition, alteration, modification, all materials should be tested and verified free of any Lead Based Paint.

5.3.12 MOLD

Molds are a class of fungi, and have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common location of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth.

As part of this assessment, SEG performed a limited visual inspection for the conspicuous presence of mold. SEG observed the accessible areas at the subject property for the presence of conspicuous mold or observed water intrusion or accumulation. This evaluation did not include a review of pipe chases or areas behind enclosed walls and ceilings. **SEG did not observe conspicuous visual or olfactory indications of the presence of mold, nor did SEG observe obvious indications of significant water damage inside the building.**

Mold violations, if any, should show up on the Title Report.

6.0 CURRENT USE OF ADJOINING PROPERTIES

During the vicinity reconnaissance, SEG observed the following land use on properties in the immediate vicinity of the Property.

6.1 CURRENT USE

Current Use	
North	Areas immediately adjacent to the north of the property included the following: Residential/Stores
South	Areas immediately adjacent to the south of the property included the following: Residential
West	Areas immediately adjacent to the west of the property included the following: Bank
East	Areas immediately adjacent to the east of the property included the following: Residential/Stores

6.2 HISTORICAL USE

Historical Use	
North	According to Sanborn History Maps, the property located to the north is depicted as stores from the 1900's to the 1990's.
South	According to Sanborn History Maps, the property located to the south is depicted as residential from the 1900's to the 1990's.
West	According to Sanborn History Maps, the property located to the west is depicted as stores from the 1900's to the 1950's, parking from the 1960's to the 1990's.
East	According to Sanborn History Maps, the property located to the east is depicted as Carriage & Wagon Repository in the 1900's, Public Market in the 1910's and Flat (Manufacturing) from the 1940's to the 1990's.

7.0 RECORDS REVIEW

7.1 STANDARD ENVIRONMENTAL RECORD SOURCES

7.1.1 STATE AND FEDERAL REGULATORY REVIEW

Information from standard Federal and state environmental record sources was provided through Environmental Data Resources (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address ambiguities. The demographic and geographic information available provides assistance in identifying and managing risk. The accuracy of the geocoded locations is approximately +/-300 feet.

In some cases, location information supplied by the database provider is insufficient to allow geocoded facility locations. These facilities are listed under the unmappables section within the EDR report. A review of the unmappable facilities indicated that none of these facilities are within the ASTM minimum search distance from the Property.

Regulatory information from the following database sources regarding possible recognized environmental conditions, within the ASTM minimum search distance from the Property, was reviewed. Specific facilities are discussed below if determined likely that a potential recognized environmental condition has resulted at the Property from the listed facilities. Please refer to Appendix C-1 for a complete listing.

Federal NPL

The National Priorities List (NPL) is the Environmental Protection Agency (EPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.

No NPL sites are located within one mile of the Property.

Federal CERCLIS List

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of sites that the EPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

No CERCLIS sites are listed within one-half mile of the Property.

Federal CERCLIS NFRAP Sites List

The CERCLIS No Further Remedial Action Planned (NFRAP) List is a compilation of to human health or the environment, under the CERCLA framework.

No CERCLIS NFRAP sites are listed within ½ mile of the Property.

Federal Resource Conservation and Recovery Act (RCRA) CORRACTS TSD Facilities List

The EPA Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Treatment, Storage and Disposal (TSD) database is a compilation by the EPA of reporting facilities that treat, store or dispose of hazardous waste. The CORRACTS database is the EPA's list of treatment storage or disposal facilities subject to corrective action under RCRA.

No RCRA CORRACTS TSD facilities are listed within one mile of the Property.

Federal Resource Conservation and Recovery Act (RCRA) CORRACTS Facilities List

The RCRA CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

1 (RCRA) CORRACTS sites are listed within one-half mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

Federal RCRA Generator List

The RCRA program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Generators database is a compilation by the EPA of reporting facilities that generate hazardous waste.

1 Sm. RCRA Generator facilities are listed within ¼ mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

Federal Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported release of oil or hazardous substances.

No ERNS sites were listed on the Property or on the adjacent properties.

State Priority List

The database maintains a State Priority List (SPL) of sites considered to be actually or potentially contaminated and presenting a possible threat to human health and the environment.

No SPL sites are listed within one mile of the Property.

State CERCLIS-Equivalent List

The database maintains a State CERCLIS-equivalent list (SCL) of sites under investigation that could be actually or potentially contaminated and presenting a possible threat to human health and the environment.

No SCL sites are listed within one-half mile of the Property.

Solid Waste/Landfill Facilities (SWLF)

A database of SWLF is listed.

2 SWLF facilities are listed within one-half mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

Inactive Hazardous Waste Disposal Sites in New York State (SHWS)

A database of SHWS is listed.

5 SHWS facilities are listed within one-half mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

State Leaking Underground Storage Tank List (LUST)

The NYS DEC compiles lists of all leaks of hazardous substances from underground storage tanks.

31 LUST sites are listed within one-half mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

State Underground Storage Tank List (UST)

The NYS DEC compiles lists of all underground storage tanks located ¼ mile of the subject property.

20 UST sites are listed within one-quarter mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

NY Spills Database

The NYS DEC compiles lists of all spills reported ¼ mile of the subject property.

10 NY Spill sites are listed within one-quarter mile of the Property.

- Based upon the review of available information, the above listed facilities are not anticipated to directly impact the Property and no further investigation is warranted.

7.1.2 LOCAL REGULATORY REVIEW

7.1.2.1 BUILDING DEPARTMENT

Electronic records from the city Building Department were reviewed for evidence indicating the developmental history of the Property, and for the presence of documentation relative to underground storage tanks.

7.1.2.2 OTHER AGENCIES

FOIL Requests were submitted to the NYS DEC, NYC DEP and NYC DOH, to date no response has been received, when a response is received an addendum will follow.

8.0 FINDINGS AND CONCLUSIONS

8.1 FINDINGS

8.1.1 ON-SITE ENVIRONMENTAL CONDITIONS

- Fuel oil applications were filed with the Department of Buildings.
- SEG did not observe any visible and/or friable ACM during this inspection.
- This site is an “E” (Environmental) Designated Property with the NYC Department of City Planning for “Noise”
- This site is an “E” (Environmental) Designated site with the NYC Department of City Planning for “Hazmat”.

8.1.3 OFF-SITE ENVIRONMENTAL CONDITIONS

No offsite environmental conditions were identified that were considered likely to impact the Property.

8.1.3 PREVIOUSLY RESOLVED ENVIRONMENTAL CONDITIONS

No historical recognized environmental conditions were identified in connection with the Property during the course of this assessment.

8.1.4 *DE MINIMIS* ENVIRONMENTAL CONDITIONS

No *de minimis* environmental conditions were identified in connection with the Property during the course of this assessment.

8.2 CONCLUSIONS

SEG has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-2005 of 738 Grand Street, BROOKLYN, NY, the Property. Any exceptions to or deletions from this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property except for the following:

- Fuel oil applications were filed with the Department of Buildings.
- SEG did not observe any visible and/or friable ACM during this inspection.
- This site is an “E” (Environmental) Designated Property with the NYC Department of City Planning for “Noise”
- This site is an “E” (Environmental) Designated site with the NYC Department of City Planning for “Hazmat”.

8.3 RECOMMENDATIONS

Based on the findings of this ESA, SEG recommends the following:

- Information/documentation should be provided for the status of this tank (eg, aboveground, underground, abandoned, removed). If no documentation is available, a GPR (Ground Penetrating Radar) should be conducted to determine the presence of any underground storage tanks.
- Prior to demolition/renovation, a comprehensive asbestos survey should be conducted.
- The “E” Designation for Noise will have to be complied with prior to obtaining work permits, however, this is not an environmental concern.
- Due to the fact that plans are being filed with the NYC Department of Buildings to obtain work permits, it is required by the NYC Department of Planning that a Phase I Environmental Site Assessment and a Phase II Sampling Workplan be submitted to the NYC DEP for approval before any permit will be issued.

8.4 DEVIATIONS

This Phase I ESA substantially complies with the scope of services and ASTM 1527-05.

Subscribers to our Property Reports service can link directly to title documents in ACRIS!

To link to ACRIS documents you will need to do the following *once per session*:

- Click on the "See it" link for one of the documents below. This *will open a new window* and take you to an ACRIS info page on the NYC DoF website.
- On the ACRIS info page, find the link titled "Begin using ACRIS" and click it. This *will open another new window*. Minimize this window but do not close it. This keeps an ACRIS session running on your computer.
- In the original PropertyShark.com window, you can now click on any of the "See it" links for any NYC property and be taken directly to the corresponding ACRIS document.

Records go back to about 1966. See the different types of [NYC title documents!](#)

Sales & Value

D1 Valuation Model

Hide

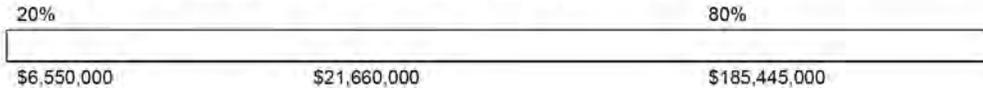

Our database has 8 properties that meet the following criteria:

[Browse more recently sold properties in the neighborhood!](#)

- Sold within the last 6 months
- In the 11211 zip code
- Property classes similar to Factory - Light Manufacturing
- Sale price over \$25,000

Price

The median price of these properties is \$21,660,000 (half of these properties sold for higher prices, half sold for lower prices). 20% of the properties sold for \$6,550,000 or less, and 20% sold for \$185,445,000 or more.

Subscribe and Get More!

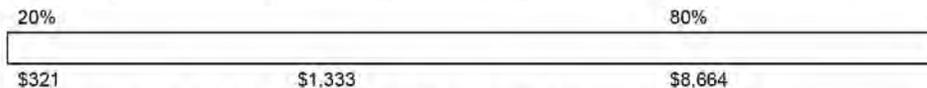

If you subscribe to Comparables you'll get to see:

- The entire list of properties
- Sale date & price, square footage, and price per square foot for each property
- Our quick-and-dirty value calculation

[Click here](#) to learn more and subscribe.

Price per Square Foot

The median price per square foot of these properties is \$1,333 (half of these properties sold for higher prices, half sold for lower prices). 20% of the properties sold for \$321 or less, and 20% sold for \$8,664 or more.

At the median price per square foot of \$1,333, this property (2,400 square feet) would be \$3,200,000.

Here is a sample of the 8 properties following the criteria defined above:

Address	Sale Price	Sale Date	\$ per Sq. Ft.	Total Sq. Ft.
97 Wythe Ave	\$10,000,000	12/27/2012	\$1,333	7,500
77 N 13 St	\$31,750,000	12/31/2012	\$1,642	19,325
119 N 1 St	\$800,000	10/25/2012	\$516	1,550
172-176 N 10 St	\$6,550,000	12/6/2012	\$388	16,875
304-310 N 7 St	\$9,450,000	5/31/2012	\$321	29,400

D2 Property Income and Expenses

Hide

Owners of income-producing properties that have an actual assessed value of more than \$40,000 are required to file annual Real Property Income and Expense (RPIE) statements with the Department of Finance(DOF). The DOF uses the information from these statements, or data from comparables, to estimate the market value of a property for tax purposes.

Type	Rental	Reporting period	from: 01/01/2009 to: 12/31/2009
Property	Building		
Lot SF	2,500	Commercial SF	2,400
		Total SF	2,400

The most recent income/expense data provided by DOF was released in February 2011.

Property Tax

E1 Property Tax

Hide

The following values are from the latest assessment roll and give information about the fiscal years 2012/2013 and 2013/2014. The City's fiscal year runs from July 1 to June 30.

Market Value

The property tax assessment process starts when the city's assessors estimate a property's market value, based upon the available information. The assessors use three approaches to value the property: sales, cost, and income. The *market value* is generally defined as what the property would sell for in a competitive and open market.

	2012/2013		2013/2014	
Land market value		\$125,000		\$125,000
Building market value	+	\$114,000	+	\$128,290
Market value	=	\$239,000	=	\$253,290

Assessed Value

Assessed value is a calculation of the property value for tax purposes. It usually represents a percentage of the market value and is subject to limits on annual increases. Sometimes the city will exempt part of the assessed value from taxation, as an incentive to make improvements to an existing structure or to build on a vacant lot. There are also several [tax reductions programs](#) for residential properties that may apply and may lower the property's tax bill.

	2012/2013		2013/2014	
Land assessed value		\$56,250		\$56,250
Building assessed value	+	\$51,300	+	\$57,731
Net assessed value	=	\$107,550	=	\$113,981

Assessed value	=	\$107,550	=	\$113,981
Exemptions granted by city	-	\$0	-	\$0
Net assessed value	=	\$107,550	=	\$113,981

Transitional Value

While the city's assessors have noted the rapid appreciation of property in New York City, the state understands that it would be burdensome for property taxes to rise too fast. Therefore, increases in the *assessed value* are phased in over a number of years. This introduces the *transitional assessed value*, which is a limit on the portion of the assessed value introduced into the tax base. When the *assessed value* is phased in, sometimes the *exemptions* are as well.

	2012/2013	2013/2014
Transitional land value	\$39,600	\$46,800
Transitional building value	+ \$33,249	+ \$40,286
Transitional value	= \$72,849	= \$87,086
Transitional exemption value	- \$0	- \$0
Transitional net value	= \$72,849	= \$87,086

Taxable Value

The *taxable value*, for 2012/2013, is the smaller of the city's *net assessed value* and the *transitional net assessed value*.

Taxable value	= \$72,849
---------------	------------

Share

Property Tax

Base tax is an estimate of what an owner **not** benefiting from tax exemptions would pay and is determined by multiplying the assessed value by the *tax rate*. *Current tax* is calculated by multiplying the taxable value by the tax rate.

For a very small number of properties owner-related exemptions (for which we currently don't have information) apply, and so the values given below may be slightly different from the official ones. In addition to exemptions, the city also grants *tax abatements* to some properties. An *abatement* is simply a discount which is subtracted directly from the current tax. This results in the *property tax*, the amount the current owner pays.

Tax description	Assessed/taxable value 12/13	Tax rate 12/13	Tax amount 12/13
Base tax	\$72,849	* 10.2880%	= \$7,494.00
Current tax	\$72,849	* 10.2880%	= \$7,494.00
Total abatements		-	\$0.00
Property tax			= \$7,494.71

Tax description	Assessed/taxable value 13/14	Tax rate 13/14	Tax amount 13/14
Base tax	\$87,086	* 10.2880%	= \$8,959.41
Current tax	\$87,086	* 10.2880%	= \$8,959.41
Total abatements		-	\$0.00
Property tax			= \$8,959.41

For more information please visit New York City's [property tax section](#). Also, you can view this property's assessment, tax bill and account statements [here](#).

5.00 - 6.00	

E2 Exemptions and Tax Abatements

Hide

Both the City and State of New York offer property tax reductions through exemptions and abatements for residential property, commercial constructions, and properties used by governmental, industrial, and not-for-profit organizations. Exemptions provide tax relief by reducing a property's assessed value, and abatements reduce taxes by applying credits to the amount of tax due.

The information in this section presents a summary of the granted amounts and other related values of the benefit programs. This data comes from NYC Department of Housing Preservation and Development (HPD) and the Department of Finance, departments which administer the [J-51 Program](#) and the [421a Program](#).

Unfortunately, we have no information about whether any exemptions or abatements currently apply to this property.

E3 Tentative Values

Hide

Every year in January, the NYC Department of Finance Commissioner publishes the tentative property assessment roll for the current fiscal year. All properties are valued by law according to their condition on the taxable status date of January 5th. Owners who believe that the Department of Finance has used incorrect information to determine their market value may [file forms](#) providing corrections. After Finance verifies the complaints, the agency will make any corrections before the final assessment roll is published on May 25. The final roll will also include changes, based on the decisions made by the New York City Tax Commission, an independent City agency, as well as new information Finance gathers about abatements, exemptions and other adjustments. In June, Finance will use the final roll and new tax rates adopted by the City Council to generate property tax bills for the fiscal year beginning July 1st.

Development & Use

F1 Zoning and Building Class

Hide

Click on the map to expand!

* Land Use: **Factory - Light Manufacturing (F5)**

As you can see in our legend, we show many building classes on our maps! Still, we are not showing the entire list. If you have questions or would like to know more about the different types of building classes, [Click Here!](#)

The *building class* specifies how a property is used or what type of building is present on that property. Building classes range from A to Z (excluding X.) There are at most 10 different sub-classes within each building class (ranging from 0 to 10.) These building classes cover all property uses from residential and commercial to government buildings and parks.

Building class

Factory - Light Manufacturing (F5)

Legend

Residential:	Civic Use:
Residential, 1 Fam	Places of Public Assembly (Indoor) And Cultural
Residential, 2 Fam	Outdoor Recreation Facilities & Cemeteries
Walkups	Churches
Condos	Schools
Elevator	City Buildings
	Health & Social Care
Commercial:	Other:
Store + Apts, Lofts	Vacant Lots
Small Businesses	Miscus
Theatres & Hotels	Unknown
Offices	
Industrial	
Transportation Facilities	

New York City is divided into three basic zoning districts: residential (R), commercial (C) and manufacturing (M). These basic zoning districts are subdivided by the intensity of use. Development is governed by the use, bulk, and parking

Find out how large it can be. But the most important is the Floor Area Ratio, building in square feet to the size of the lot in square feet. For example, if the FAR is 4, then then you can't build a building larger than 8,000 square feet.

$$2,500 \times 4 = 10,000$$

The building on this lot is smaller than the maximum set by the FAR. Thus it may be possible to add to the building (either more floors or an extension) or it may be possible to sell the "air rights" to a developer who owns a nearby lot. (Note: other factors may limit what you can do.)

Click on the map to expand!
* Unused buildable square feet: 7,600

Maximum usable floor area		10,000
Usable floor area	-	2,400
Unused buildable square feet ("air rights")	=	7,600

Opportunity by Parcel:

Violations

G1 Housing Preservation and Development Violations

Hide

When excessive violations are present, this can adversely affect the support given by The NYC Department of Housing Preservation and Development (HPD). These violations can result in building-wide inspections, fees, and the requirement of extensive repair work to correct underlying conditions. In some cases, outstanding violations may result in a lien being placed on the property. It is also substantially more difficult to mortgage a building with extensive violations.

On this color-coded map, view all properties with open violations that have been left uncorrected.

Legend

■ Uncorrected Violation(s)

Share

Click on the map to expand!

Please note: the NYC HPD is the only authoritative source for information on housing violations. Please consult the [HPD web site](#) for up-to-date violations.

PropertyShark obtains its records from HPD and updates them monthly.

G2 ECB Violations

Hide

There are eleven city agencies that administer the City's quality-of-life laws and issue Notices of Violation (NOVs) for alleged violations. The ECB is a separate and independent agency that hears challenges to those NOVs. The agencies that issue the most violations for real estate are:

- Department of Buildings (DOB)
- Department of Environmental Protection (DEP)
- Fire Department
- Landmarks Preservation Commission (LPC)
- Department of Sanitation

PropertyShark obtains its ECB NOV records from the DOB and updates them nightly. Records go back to 1988

No records found.

For more information about the ECB and the types of NOVs that it handles, visit its [home page](#).

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PFIZER INC	13 BARTLETT ST	SSW 1/2 - 1 (0.818 mi.)	171	547

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
GRAND CLEANERS	765 GRAND ST	E 0 - 1/8 (0.049 mi.)	B12	31

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 03/21/2013 has revealed that there are 5 SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 01/07/2013 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 04/05/2013 has revealed that there are 31

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 04/05/2013 has revealed that there are 10 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 32 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

E DESIGNATION: Lots designation with an ?E? on the Zoning Maps of the City of New York for potential hazardous material contamination, air and/or noise quality impacts.

A review of the E DESIGNATION list, as provided by EDR, and dated 03/20/2013 has revealed that there are 29 E DESIGNATION sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within

EXECUTIVE SUMMARY

approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SCHOLES ST. STATION	SCHOLES ST 7 BOGART STS	ESE 1/4 - 1/2 (0.494 mi.)	164	534
EQUITY WORKS	MASPETH AND VANDERVORTNE	1/2 - 1 (0.616 mi.)	168	539
GREENPOINT	287 MASPETH AVENUE	NE 1/2 - 1 (0.860 mi.)	AK175	603
WYTHE AVE. (BERRY ST.) STATION	WYTHE AVE., BERRY ST.,	NW 1/2 - 1 (0.996 mi.)	177	612

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 12 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 9 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DER Facility ID: 238486
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "BREEN"NYCHA is no longer using this UST, but has yet to permanently close it (remove it from the ground). The tank was installed in 1978. It tested OK in 1991. It failed testing on 5/20/98. A second, identical tank was installed alongside this tank in 1978. The second tank consistently tests OK and is still in service. George Breen12/07/05: This spill transferred from J.Kolleeny to S.Kraszewski.02/06/06: This spill transferred from S.Kraszewski to Q.Abidi.04/04/06: This spill transferred from Q. Abidi to Koon Tang.06/19/06: SK received Email from Mohan Sharma from UTB consultants. As part of Schedule C of the NYCHA Order on Consent the tanks at this site are to be removed and replaced by the end of the

S102149362

month. Two 20K tanks, currently TOS will begin prep work on 06/22: cleaning, asbestos removal, piping. Once the prep work is finished, UTB will notify when the tanks will be pulled. I mentioned to Mohan that I wish to be on-site when they perform the tank removal. Waiting for second notice. Also, two tanks at 211 Stagg Walk, which are adjacent to this site are also being removed as part of Schedule C. No open spills for 211 Stagg Walk. - SK06/27/06: Received call from Frank Inoa, NYCHA Fuel Oil Remediation Unit. Oil recovery from the tanks is delaying the prep work. He expects to start uncovering the tanks next week and pull them the following week. Both he and Mohan Sharma from UTB will keep me updated. - SK07/07/06: Received an Email from UTB to notify of work to expose piping on July 12, 2006 in preparation for tank replacement. - SK09/08/06: Received email from Mohan Sharma at UTB informing me that the tanks will be pulled on 9/11 and 9/12 as part of Schedule C. - SK09/11/06: SK visited site to witness tank excavation. Two 20K USTs will be removed and replaced by one 20K UST. No soil or GW contamination was evident. Ivy Olberding (516-671-8440) from Gannett Fleming called asking about end-point sampling locations. I told her that I would like to be on-site when they perform the sampling. A Dorian Howard will be calling me to inform me when they will start sampling. - SK09/18/06: SK visited excavation site to instruct Gannett Fleming personnel where to collect end-point samples. UTB staff was finishing pumping out rainwater that collected into the pit. A single tank pad that supported both tanks was present. SK instructed that soil sidewall samples be collected at two points along the length of the pit and one at each end. Also, since a bottom sample cannot be obtained two samples along the length of the pad and one at each end would suffice. Staff asked about the fill port and sampling, GF said once the site has been restored they will remove fill port piping and excavate. - SK02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann8/14/08: JK - site assessment received on 6/07.01/28/2010: Remediation and other associated clean-up activities linked to this spill number is now under the oversight of Moses Ajoku, all correspondence related to this case should be addressed to me. (MA) 02/12/10: Spill number linked to this release is hereby closed following the review of Closure Assessment Report. Report document is in eDocs. (MA) GROSS FAILURE OF TANK TEST. See Spill No. 9413630 also for this site.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Registry ID: 110004417596

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "BREEN"11/09/05: Joel Rogers, P.E. from Gannett Fleming sent request letter dated June 23, 2005 for elvaluation of Site Investigation Work Plan dated Jan. 13, 2004. Jon sent approval for Site Investigation Work Plan on Feb. 4 2005 to NYCHA. I spoke with Joel, he never recieved approval letter possibly because Steve Saccacio from NYCHA transferred from his position around the time Jon submitted his approval. I spoke with Ralph Trocchio at NYCHA, he said he would look into it. - SKThis spill transferred from J.Kolleeny to S.Kraszewski.11/22/05: Message from Joel Rogers, says he still hasn't recieved approval for work plan. Faxed him copy of approval. - SK02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann.
Remarks: CALLER DID TANK REMOVAL AND SOIL SAMPLE TAKEN SHOWED CONTAMINATION. See 9811727, 9810261, 9810259 and 9415279.

Environmental Interest/Information System

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"DEMEO"5/12/2003 - Zhao/DO: Some material discovered with petroluem vapor during excavation (3' deep 10' wide and 600' long) at this location. About 300 yard this dark soil/material stock piled. Demeo responded to scene.5/29/2003 - Mr. Janice Lalli (attorney for athletic field contractor) (212-644-1010). He called to find out what work needs to be done to close the site out. He says that lab results have come back and he would like to know what these results say and what work will be needed.6/2/03 TJDDemeo spoke with Ram (YU associates) regarding site. Analytical data reveals contamination above TAGM. Contractor has been directed to excavate and properly dispose of contaminated soils. Upon completion of excavation contractor is directed to collect end-point samples and provide laboratory data when analysis has been completed. Disposal manifests are required prior to spill closure.11/17/03 TJDTotal of 450 cu yds of contaminated soils excavated for off-site treatment and disposal. Endpoint samples taken revealing elevated concentrations of SVOC's and metals. Elevated chemical concentrations are attributed to historical urban fill. Health and safety plan submitted with closure documents to manage soils during future excavation. Site does not meet standards. Spill closed.

Remarks: CALLERS CLIENT WAS DOING WORK IN THE ATHLETIC FIELD AT THE SCHOOLHE CAME ACROSS SOME STAINED PETROLEUM SMELLING DIRT - HE TOLD THECONTRACTOR WHO WAS SUPPOSED TO FIX IT - THEN HE WAS LET GO FROM THE JOB

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"10/28/2005: Project reassigned from Sun to Andersen. Reviewed the triannual report dated 8/19/2005, there is local contamination around MW-4. A stip needs to be sent out to begin remediation.12/6/05: Reviewed the tri-annual report dated 11/29/05. Three MW's sampled on October 11, 2005. Max BTEX is 2,318ppb (MW4) and max MTBE is 91 (MW2). Fluctuating concentrations. Sent RAP required letter.1/3/06: Spoke with Gail Russo of Quantum. I gave verbal approval for the RAP received. Installation for SVES/AS system scheduled for January 4-5, 2006.1/4/06: Letter with RAP approval mailed. SVE/AS data sheets are required to be submitted.1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and ET. SVE/AS wells have been installed. Three short term SVE/AS events will be performed.5/19/06: Sent Gail Russo an email to followup on overdue update report.6/8/06: Received update report dated June 2, 2006. Three extended-period SVE/AS events performed in first third 2006. ORM socks installed in wells MW-2 and MW-4. Wells sampled on 2/24/2006. MAX BTEX 1,662 ppb (Mw4), max MTBE 447ppb (MW-2). Decreasing BTEX trend and slight increase in MTBE. Three additional extended-period SVE/AS events will be performed in the second third 2006, and new ORM socks installed. 7/5/06: Meeting on 6/28/06 with Hess, Quantum, NYSDEC, EnviroTrac and GSC. Short term SVE/AS is effective.8/29/06: Received update report dated 8/21/06. Short term SVE/AS on wells MW4, SVE1, AS1, AS2 on June 16 and June 22 2006. Groundwater sampled on June 29 2006. Max BTEX 16

(MW4), max MTBE 1,420 (MW2). ORM socks installed in MW2 and MW4 following the SVE/AS event on June 16 2006. Large decrease in BTEX in MW4. MW2 still shows significant MTBE contamination. Report states "concentrations in MW2 will continue to be evaluated to determine if these concentrations attenuate naturally or require remedial action". This site is on a triannual sampling plan. 1/17/07: Meeting on 1/16/07 with Hess, Delta, NYSDEC. 1/23/07: Received update report. Wells sampled on 10/7/06. Max BTEX 156 ppb (MW4), max MTBE 523 ppb (MW2). ORC socks in MW 2 and 4. 4/26/07: Received update report. Wells sampled on 2/23/07. Max BTEX 175 ppb (MW4), max MTBE 690 ppb (MW2). ORC socks in use. 8/17/07: Reviewed update report. Wells sampled on 6/11/07. Max BTEX 295 ppb (MW4), max MTBE 110 ppb (MW2). Two extended period portable sve/as events were conducted in June around MW4. ORC socks were installed in MW2 and MW4. Sent email requesting that air flow rate and effluent PID be measured when conducting portable SVE/AS events, and that the total petroleum recovered then be calculated. 2/11/08: Reviewed August 2007 - November 2007 Site Status Report. Wells sampled on October 5, 2007. Max BTEX 350 ppb (MW4), max MTBE 100 ppb (MW2), benzene ND in all wells. No further action requested. 5/6/08 - Carlson: Reviewed first triannual 2008 update report dated April 28, 2008. Wells sampled on 2/12/08. Maximum BTEX concentration 96 ppb in MW4. Maximum MTBE concentration 2 ppb (MW2). ORC socks in use in MW2 and MW4. Meeting scheduled for 5/7/08. 9/8/08 - Carlson: Reviewed August 2008 Update Report. Wells sampled on June 13, 2008. Low dissolved concentrations. Sent email to Hess/Envirotrac - remove ORC socks from MW-2 and MW-4. 9/15/08 - Carlson: Received email notification that ORC socks removed on 9/11/08. 10/22/08 - Carlson: Meeting with Hess/Envirotrac. They have recent soil data from SVE/AS well installation. They will submit a petition for closure. 1/8/09 - Carlson: Reviewed closure request dated 12/12/08. Three soil borings were completed. Impacted soil present in SB3. Delineation workplan required for soil borings/monitoring wells on Bushwick Avenue. (Wolf Bushwick Avenue site is directly downgradient). Workplan due 2/8/09. 1/9/09 - Carlson: Reviewed update report. Low level groundwater impact remains. 1/22/09 - Carlson: Approved workplan for the installation of two sidewalk wells. 2/27/09 - Carlson: Received email request from Ed Russo to delay quarterly sampling by one month in order to include new wells. Report will be submitted in April as planned. Request approved. 3/18/09 - Carlson: Meeting with Hess and Envirotrac. Delineation not possible due to subway. RAP will be submitted in April 2009. Quarterly gauging requested. 5/7/09 - Carlson: Reviewed April 2009 update report. RAP overdue. Emailed John Schenkewitz about overdue report. 5/11/09 - Carlson: Received email from Ed Russo, RAP will be submitted in August 2009. 8/7/09 - Carlson: Reviewed update report. Low dissolved concentrations. Workplan to address residual soil impact will be submitted by end of the month. 8/10/09 - Carlson: Received work plan for installation of four on-site wells. 8/19/09 - Carlson: Meeting with Hess and Envirotrac. 8/27/09 - Carlson: Issued approval letter for installation of four on-site monitoring wells. 11/17/09 - Carlson: Reviewed update report. Low dissolved concentrations. New wells were not installed yet. 12/10/09 - Carlson: Reviewed second closure petition. Four additional confirmatory borings were installed. 1/27/2010 - Carlson: Meeting with Hess. NYSDEC to review case file internally. 5/20/2010 - Carlson: Meeting with Hess. NYSDEC still requires additional borings around SB3. 5/28/2010 - Carlson: Reviewed update report. Low dissolved concentrations. 8/15/2010 - Carlson:

Reviewed July 2010 update report. Low dissolved concentrations. Report states Hess to delineate after receipt of NYCTA permits. Delineation work plan was not submitted. 8/31/11 - Obligado - I reviewed the 2Q11 report. BTEX is ND. They are still trying to get permit to do the soil delineation work. 11/14/11 - Carlson: Reviewed October 2011 update report. Hess still waiting for permit approval from NYCTA for delineation. 4/24/2012 - email from Joe Rennie of EnviroTrac "Please be advised that we are tentatively scheduled to conduct drilling at the above referenced location on Tuesday May 1, 2012 as per the attached NYSDEC approval letter. Please note that this project has been delayed due to New York City Transit Authority permitting requirements as this location is in close proximity to the New York City subway system. As discussed previously with NYSDEC case managers Mark Tibbe and Sarah Carlson, Hess expects that if soil and groundwater sampling data from this drilling is favorable, that closure of NYSDEC spill # 95-02757 will be granted by NYSDEC. If you have any questions, please do not hesitate to contact me at (631) 924-3001." 6/19/2012 - reviewed 1Q2012, 4/30/2012, by EnviroTrac. DTW 9.88' to 22.24' bg. Flows to southwest. 5 wells were sampled. MW-4, 4.4 ug/L BTEX, 8.3 ug/L MTBE. others are ND. Proposes to abandon monitoring wells MW-1, MW-2, MW-3 and MW-5. Next sampling event will be in 5/2012. 6/20/2012 - comments to Hess/EnviroTrac. 1) need to have the newly installed wells data in order to make the call whether or not to abandon the wells; 2) the requirement on the petition for closure: site use history; show all the investigation; show all the remediation; show all the remediation results; and the sensitive receptors information. reply form Edward Russo "thanks for getting back to us. The data from the newly completed soil borings/wells indicated positive results, so we are working on the request for closure now. The request for closure will incorporate your comments/requests below. You can disregard the request to abandon MWs 1, 2, 3, and 5. The closure request will be submitted to you within the next couple of weeks." 7/18/2012 - reviewed the Request for Spill Closure Letter (the Letter) dated June 29, 2012, prepared by EnviroTrac Environmental Services (EnviroTrac) on behalf of Hess Corporation (Hess). The Letter summarizes the Site's history and requests site closure. Denies the spill closure request due to the uninvestigated and unremediated residual contamination at the Site. see the letter for details on the required additional work to be done. Response by 8/20/2012. 10/4/2012 - Reviewed the response letter dated 8/20/2012 from Hess/EnviroTrac. Basically, they responded on DEC comments. The soil contamination is either infeasible to treat and the previous investigation has delineated the extent of the mentioned soil contamination location. Hess/EnviroTrac request for spill closure. 10/15/2012 - presented the case to the Section committee. Spill closure is denied based on: see the memo in eDoc for more details. 1) Residual contaminated soil was present in the former remote fills area at depth of 2 feet below ground surface. Confirmatory soil samples are required. As-built drawing and utilities mark out map shall be provided to prove infeasibility to remediate the area. 2) The confirmatory soil boring SB-3 exhibits soil contamination exceeds CP-51 SCOs at depth of 29-30 feet. Additional remediation and confirmatory sampling shall be required. email to Hess/EnviroTrac requiring a work plan to address the above concerns/requirement by November 2012.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:
 Program: BCP
 Site Code: 468207
 Site Description: Location: The site is located on Grand Street in the Williamsburg section of Brooklyn, NY. The site is known as 871 Grand Street and is comprised of a single tax parcel. Site Features: The lot is currently developed with a one-story brick building which occupies the entire lot. The building was constructed in 1981 according to the NYC Department of Buildings. Current Uses: The current use is commercial but property is currently vacant. The intended use of the site is for residential. Historical Use: The site was previously occupied by Scientific Fire Prevention Company which operated a commercial exhaust hood cleaning and fabrication business for about 15 years. Site Geology and Hydrogeology: Groundwater at the site is present under water table conditions at a depth of approximately 35 feet below grade. Groundwater flow is expected to be east toward the English Kills channel. Subsurface soils at the site consist of a silty non-native fill with bricks, wood and other rubble to approximately 2 feet below grade. A native fine brown silty-sand is present immediately below the fill material to a depth of approximately 15 feet below grade.
 Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.
 Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Jeff Vought visited the site03/12/08-Vought-Daytime runner and site visit by Vought. Onsite were Petroleum Tank Cleaners(718-624-4842) and also Mr. Munendre Sharma(Bd. of Ed 718-349-5752). Spill caused by overfill which caused #2 fuel to run across sidewalk, down curb and into catch basin. PTC onsite with vacuum truck washing sidewalk and will also recover fuel from catch basin. Small five gallon spill also inside tank room from top of tanks and PTC will also place down speedy dry and wash affected area. Tank room floor composed of poured concrete with good epoxy seal. No odor complaints from faculty or

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"SEE SPILL NUMBER 8908532.4/12/04-Vought-Spill transferred from Sullivan to Rommel as per Rommel.2/2/07 - Haggerty - Alphonse Milo (718-388-7575) brought the property shortly after the tank test failures and is still owner today. He states he is will be building a parking lot on the subject property and all soil will be excavated for the foundation. I instructed Mr. Milo to contact the DEC as soon as possible because there is a good chance contamination is present. Spill to remain open10/4/07 - Haggerty - received Phase II subsurface Investigation report from Al Milo. Phase II completed to satisfy the bank requirement. Report states that all soil samples and groundwater samples are below standards. MW's in the area surrounding the former tank field. No groundwater contamination was detected. PM stated that all tanks must be properly closed out in PBS wether tanks are registered or previously unknown and this spill will remain open until this is resolved.07/21/08 - Haggerty: Spoke with Mrs. Milo. She stated that the PBS issue has been resovled. I checked the PBS records to confirm. PBS# 2-478075. Spill closed
Remarks: THREE 550 GALLON TANKS FAIL HORNER-EZY CHEK - LR = -0.11982 GPH. NO DECISION ON ACTION TO BE TAKEN..

DEC Region: 2
DER Facility ID: 17030
DEC Memo: 08/25/06 - ZielinskiThe drawing has been received and photos indicating filling lines and vent lines. They run in the basement above a concrete floor. The case is closed.8/17/06 - ZielinskiSteven Tsevdos called and said that they have only two 257-gallon tanks on the site. The drawing depicting the location of the closed tank and pipe lines would be sent to DEC. 8/17/06 - ZielinskiReceived soil samples' analyses taken 3 feet below the tank bottom--no indication of soil contamination (eDOCs). Jim Donelan of Protest faxed a tank test report-- it had been a dry leak. Left a message for Steven Tsevdos, Caring Communities manager, asking for a layout of the failed tank and a number of tanks in service since the subject tank had been closed, and no records of registered tanks at the site.7/17/06 - ZielinskiSent a letter requesting that within three weeks of receipt of this letter, Caring Communities would submit a report, required by the department's letter of September 24, 2003. This letter provides that the Caring Communities must submit soil sample analyses, an explanation of tank failure, and remove contaminated soil. 7/13/06 - ZielinskiTook photos of at the site. No indication of soil boring. Talked to Mr. Perez- superintendent. Left a note to Mr. Alonso requesting soil sampling results.7/6/06 - ZielinskiSpoke with Gustavo Alonso, the manager of Caring Communities. Asked him to sent all documents related to the spill. That same day, he faxed a DEC letter of 09/24/03 requesting a report and an affidavit; a proposal of work to be done, submitted by Petroleum Tank Cleaners, dated 11/21/03; an affidavit from Mercury Tank & Pump Inc., dated 4/9/04. Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO"9/24/03 DDO Sawyer sent tank test failure letter to: Juan Perez157 Graham Ave. Brooklyn, NY 1120610/3/05: CBNCalled Juan Perez and was told that the spill has been taken care of. Requested documentation/report for spill closure. Manager will get back to DEC on that.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"Cross Ref Spill #0311991CALLED BRUCE FEFFER, WHO CONFIRMED TANK TEST FAILURE. REQUEST TANK TEST FAILURE LETTER BE ADDRESSED TO HIM, AT 61 BROADWAY SUITE # 1050 NEW YORK, NY 10006Called Marc Ricciardi, who confirm tank test failure. However could not say whether tank is registered. Did give on- site contact person as Steffen, # (516) 790-5535.Tank Test failure letter was sent to BRUCE FEFFER, ON 4/3/2003.PSThis tank is UNREGISTERED,Application Form was sent, so that tank can be REGISTERED. E.R.10/15/2003 Charlie Schmidgall of Aggressive Envir.5,000 gal Tank will be pulled within 60 days and DEC asked for 4 sidewall and 2 bottom samples.3/24/2004 Sangesland spoke to Carla Weinpahl of ERM (212-447-1900) She said the client dropped Aggressive Environmental and switched over to ERM in late January 2004. Ms. Weinpahl stated that Aggressive had pulled the tank, did one round of samples, pulled more soil and did another round of samples. Results show some exceedences of PAH (SVOCs), but the argument is made that this is consistant with industrial fill in this part of Brooklyn. The DEC reviewed these numbers and compared them to the RSCO values on TAGM 4046. Based on this information and the present site use, the spill number 0300112 associated with the petroleum spill from the tank is closed out.Spill number 0311991 was associated with contamination found in another portion of the property. Organic Compounds identified as Chlorinated Solvents and Pesticides were found in sample R3656.Based on DEC Policy, the property owner and/or their consultant is directed to the state Brownfield Program."Not a spill report - property owner and/or consultant is referred to the Brownfield Cleanup Program website for futher information in having the DEC review the results from this site investigation"See www.dec.state.ny.us/website/der/bcp/

"SANGESLAND"1/26/2004 Sangesland spoke to Charlie Schmidgall of Aggressive Environmental. There was a tank on one side of the property that failed a tank test (see spill #0300112). This tank was registered and then pulled. After tank pull, minor oil contamination was found and removed. New problem appears to be heavy pesticides & solvents found in endpoints. 253 tons of soil have been pulled. PERC is present along with a hit for Dichlorobenzene (28,000ppb) There is no history of dry cleaners at/near the site, also no history of solvents. Sangesland spoke to Austin who said that there may have been a lab mixup. He suggested that another round of samples may be appropriate. This message was left on Aggressive Environmental's answering machine. 3/24/2004 Sangesland spoke to Carla Weinpahl of ERM (212-447-1900) She said the client dropped Aggressive Environmental and switched over to ERM in late January 2004. Ms. Weinpahl stated that Aggressive had pulled the tank, did one round of samples, pulled more soil and did another round of samples. Results show some exceedences of PAH (SVOCs), but the argument is made that this is consistent with industrial fill in this part of Brooklyn. The DEC reviewed these numbers and compared them to the RSCO values on TAGM 4046. Based on this information and the present site use, the spill number 0300112 associated with the petroleum spill from the tank is closed out. Spill number 0311991 was associated with contamination found in another portion of the property. Organic Compounds identified as Chlorinated Solvents and Pesticides were found in sample R3656. Based on DEC Policy, the property owner and/or their consultant is directed to the state Brownfield Program: "Not a spill report - property owner and/or consultant is referred to the Brownfield Cleanup Program website for further information in having the DEC review the results from this site investigation" See: www.dec.state.ny.us/website/der/bcp/
Remarks: an unknow amount of pseticides and solents spilled. none of it has been cleaned up. it was detected in the stars soil sample labrotory narrative.

Ave, but no success. 3:03 PM:- spoke with Albert Long, owner of 243 Jackson Street. he owns 243 Jackson street (property at the northwest corner of Jackson Street and Kingsland Ave). he mentioned that oil found in basement of his building. he has gas heating system, but building at 31 Kingsland Ave has oil heating system. Albert Long **owner of building 243** 1417 Jefferson Avenue Brooklyn, NY 11237 Ph. (347) 247-9543 email: cienlada@aol.com Mellys Long Ph. (347) 987-9541 as per DOB application approved on 12/28/04, oil burner was replaced with gas burner at Mr. Long's property. <-----alternate address for 243 Jackson Street: 243-251 Jackson Street, 31A Kingsland Aveno PBS record found for 243 Jackson Street. old spill # 0409577 found for 243 Jackson Street. the spill was reported on 11/26/04 due to a petroleum release from a 275 gal tank located closer to the wall. the case was closed based on property owner's statement, but no cleanup report submitted. alternate address for 31 Kingsland Ave: noneno PBS or spill record found for 31 Kingsland Ave. 4:00 PM:- visited site. met Teresa, building super for 243 Jackson St. its four story buiding with basement. building 243 runs east-west along the north side of Jackson Street. ground floor of the buiding 243 is occupied by: a grocery store (Neighborhood Grocery) at the eastern end of the property (at the northwest corner of the intersection of Jackson St and Kingsland Ave), apartment building entrance in middle and a restaurant (718-349-2400) on the western end of the property. inspected basements under the apartment building and grocery store. found oil on water in the northwest corner of the grocery store basement. oil/water mix also found in the northeast corner of the apartment basement, at the end of the basement stairs. the boiler room is located in the eastern part of the apartment basement. there is a small open area behind the boiler room, between the subject site and the adjacent building at 31 Kingsland Ave. found oil/water in this open area. during inspection, minor odors noticed in basements. inspected basement at building 31 Kingsland Ave. suspected site has two 275 gal ASTs on legs. no sign of oil spill found under the tanks. fill and vent lines runs aboveground. the two tanks are located along the southern foundation wall in the eastern part of the basement. tank location is along the grocery store basement at building 243. boiler at building 31 is located in the northwestern corner of the basement and supply line between the tank and boiler runs underground. basement at building 31 is about 4 ft higher than basement at building 243. based on location of tanks at building 31 and most impact in the grocery basement at building 243, oil may have spilled from an underground supply line at building 31. 03/12/12-Hiralkumar Patel. 12:54 PM:- left message for Mr. Long. 1:15 PM:- visited site. met Mr. Long. inspected basement under the restaurant, the apartment and the grocery store. its a finished basement under the restaurant. no sign of any water or oil seepage found in the basement. during site inspection, Mr. Long showed location of his old tanks. the tanks at building 243 were located along the southern foundation wall in center of the basement and just right of the basement entrance (which is left of the restaurant entrance) from sidewalk. Mr. Long mentioned that fill port and a vent line for old tanks in his building were located just left of the apartment building entrance (in area between the apartment entrance and restaurant entrance). no sign of oil/water seepage found where the old tanks were located. inspected other parts of basement where oily water observed during site visit on 03/09/12. no oil found at the end of the basement stairs or boiler room or an open area behind

the boiler room. during today's inspection, found a drain in the open area and a drain pipe going towards the grocery basement. its looks like whatever oil found in open area and in the northeast corner of the apartment basement, might have came through the drain pipe from the grocery basement. during inspection of the grocery basement, found a sump like structure in the northwest corner and oil/water in the corner. asked Mr. Long to remove oily water and seal the corner which will prevent further seepage. Mr. Long mentioned that they had changed a main sewer line about 8 months ago, but they never so oil seepage before. oil spill found by grocery store person when they noticed petroleum odors in grocery basement about two weeks ago. during inspection, met Lorenzo Ayala, president of co-op board for building 31. there are six co-op units in the building. discussed about possible leak from an underground supply line at building 31. asked him to perform a tightness test of the line and submit result by the end of 03/14/12. 31 Kingsland Ave Housing Development Fund Corporation **owner of building 31** c/o Lorenzo Ayala **co-op president** 31 Kingsland Avenue, Unit 1R Brooklyn, NY 11211 Ph. (347) 251-4123 Erica Erazo **co-op unit owner at building 31** 31 Kingsland Avenue, Apt. 2R Brooklyn, NY 11211 Diana Hodge **co-op unit owner at building 31** 31 Kingsland Avenue, Apt. 2L Brooklyn, NY 11211 3:28 PM:- spoke with Dennis at Ferrentino Fuel and requested a copy of delivery record for building 31 from Jan. 2011 to Mar. 2012. he asked to send email. Dennis Gooldstein Ferrentino Fuel **oil delivery company for building 31** Ph. (718) 832-6700 email: dennis@ffcenergy.com 3:30 PM:- sent email to Dennis and asked to send delivery record from Jan. 2011 to Mar. 2012. based on available information, chagned following information in the original spill report (see copy on e-docs):- spill name: "intersection" to "apartment building"- site address: "Jackson St & Kingsland Ave" to " 243 Jackson Street" 3:54 PM:- left message from Mr. Long. 03/13/12-Hiralkumar Patel. 10:16 AM:- spoke with Mr. Long. they are going to pump out oil/water today. asked him to call for inspection after pump out and prior to sealing the sump. 10:32 AM:- received call from Mr. Ayala. he mentioned that about two weeks ago, building 39 Kingsland Ave changed from oil to gas heating system and Mr. Ayala suspects that owner of building 39 has dumped excess oil into sewer system. he asked to meet at the site and will provide evidence. informed him that regardless of findings at building 39, the department still requires tightness test of the supply line in his building. informed him about possible site visit tomorrow morning. he will try to have line test done during the site inspection tomorrow morning. 10:40 AM:- received email from Ferrantino Fuel including delivery record for bldg 31 from Oct. 2011 to Mar. 2012. based on delivery record, occupants of bldg 31 used average of about 17-19 gal per day since Oct. 2011 and there is no sudden increase in oil use. 03/15/12-Hiralkumar Patel. 10:00 AM:- visited site. inspected grocery store basement. oily water was removed from basement, but some more oil came into sump. asked cleanup guy to remove the product from sump. spoke with Mr. Ayala. he mentioned that a technician from his own company checked the system and confirms no leak. informed him that a tightness test of the supply line must be performed and a certified result must be submitted to the Department. Mr. Ayala mentioned that his sister lives in building 39 and will call back with landlord's number for building 39. 10:32 AM:- received message from Mr. Ayala with contact info for property owner for building 39. Zev Zafir Inc. **owner of 39 Kingsland Ave** Shloma Stuhl President 543 Bedford Avenue #239 Brooklyn, NY 11211 Ph. (718)

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"4/12/04-Vought-Spill transferred from Tomasello to Rommel as per Rommel.3/28/05 - also see spill # 0103036 (found contaminated soil). KSTJuly 2005 - Spill assigned to Maloney as part of the Spills Initiative7/28/05 - Spoke with Peter Reimann of Miron Lumber. He faxed over report of soil sampling (referenced in spill # 0103036) that was sent to EPA. Report indicated a clay/silt layer (above the water table) that had high levels of BTEX. -Maloney8/1/05 - Spoke with Paul Sherwood of Phoenix Environmental Tech, Inc (author of the previously cited report). He stated that as far as he knew, no further work was done on the site. -Maloney10/05 - Site was sent back to the Region for follow-up. - MaloneyAlbany review (above) - kamalone1/29/07 - Austin - Transferred from Albany assignment to Patel in R-2 office for further work - end03/02/07-Hiralkumar Patel. found soil investigation report. Phoenix Envinronmental submitted soil investigation report on 06/22/01. abstract:- did four borings around abandoned underground gasoline tank- borings B1 through B3 were advanced to 12 ft bg and B4 was advanced to approx. 16 ft bg- in borings B1, B2 and B3, the soil sample from 8 to 10 ft bg was collected for analysis- in boring B4, the sample exhibiting highest PID reading (7-8 ft, 1185 ppm) and the deepest sample (14-16 ft) were collected for analysis.- based on regional groundwater elevation and topographics maps, depth to groundwater is estimated to be approx. 25 ft- result for sample B4 (7-8 ft):
-----B4benzene-----400toluen
e-----19,000ethylbenzene-----17,000total
xylene-----94,0001,2,4 trimethylbenzene---23,0001,3,5
trimethylbenzene---73,000naphthalene-----17,00003/09/
07-Hiralkumar Patel. visited site on 03/08/07. met Manny at site.
site occupied by Miron Lumber. currently site has following tanks at

gal lube oil AST in contact of soil 200 gal other oil AST on leg Owner of property: Darek Messing Miron Lumber Co. Inc. 268 Johnson Avenue Brooklyn, NY 11206-9028 PH. (718) 497-1111 Ext. 201 Fax (718) 366-0357 spoke with Manny today. he mentioned that current owner bought this property in 2003 and as per his knowledge they are using only one 2000 gal diesel tank. he doesn't know anything about 4000 gal gasoline UST. asked Manny to send scaled site plan for entire site including each tank location. also asked him to change PBS record information. sent subsurface investigation report to Manny (mannymiron2000@aol.com) which was submitted by PEI on 06/22/01. 03/13/07-Hiralkumar Patel. sent letter to Mr. Messing requiring soil/groundwater delineation, tank registration and surrounding area site plan with locations of all former/current USTs and associated pipings. letter faxed to Mr. Messing. 03/19/07-Hiralkumar Patel. received message from John Servider, owner's attorney. left message for John. John Servider Ph. (718) 894-6300 (O) (914) 879-5857 (C) Fax (718) 894-441703/23/07-Hiralkumar Patel. received call from John. he told that they have done phase II investigation before current owner bought this property. he will check record and will submit copy of that report. if no report found, owner will hire contractor for required work. 04/05/07-Hiralkumar Patel. received letter from John with copy of Phase II report, which was originally submitted by Phoenix environmental. John requesting closure of spill based on findings in report (groundwater at about 25 ft, no contamination found in sample B4 at 14-16 ft, which found contaminated at depth 7-8 ft). left message for John requiring further work as per letter sent on 03/13/07. 04/19/07-Hiralkumar Patel. received message from John. spoke with John. explained him that DEC requires soil/groundwater delineation based on phase II report. he mentioned that they have done another Phase I recently, which he will send copy to DEC. 06/14/07-Hiralkumar Patel. left message for Mr. Messing to submit investigation report. 06/22/07-Hiralkumar Patel. received message from John Servinder, owner's attorney. left message for John. 07/25/07-Hiralkumar Patel. left message for John and Mr. Messing. 10/11/07-Hiralkumar Patel. left message for John and Mr. Messing. 11/02/07-Hiralkumar Patel. found PBS expired. <-----sent CSL with STIP to Mr. Messing, after discussing with DEC Austin and DEC Urda. STIP faxed to Mr. Messing. 11/13/07-Hiralkumar Patel. received fax from John including signed STIP and cathodic protection survey result. 11/19/07-Hiralkumar Patel. sent copy of fully executed STIP to Mr. Messing. faxed copy to Mr. Messing and Mr. Servider. 01/22/08-Hiralkumar Patel. received call from Ted Yen (631-321-4670) from Protest asking regarding work required. explained Ted to find number of tanks at site and register any unregistered tank. second has to test each tank system for any leak. if testing not possible or finds leak, then requires soil and/or groundwater delineation and based on investigation report, may require RAP. asked Ted to talk to owner and ask to submit work plan for approval, prior to any work. 02/20/08-Hiralkumar Patel. left message for Mr. Messing. spoke with Bob at Protest. they sent proposal yesterday and waiting to hear back. 03/20/08-Hiralkumar Patel. spoke with Bob at Protest. they just got proposal signed. during conversation, Bob mentioned that Phoenix environmental called two spill reports for same problem; one after subsurface investigation and one after soil excavation. as per Bob, second spill number, which was reported during excavation, was closed out based on

U001839163

submitted documents. asked Bob to provide spill number. found following spill cases reported to subject site: 1. 8904846: reported on 08/15/1989 after tank test failure for 2000 gal diesel tank. case closed in lack of sufficient information. 2. 0103036: reported on 06/19/2001 after findings of contaminated soil. case closed and referred to this open case. there are no reports submitted to above both cases and no proper cleanup/remediation performed after cases reported. during earlier site visit, owner's representative (Manny) mentioned that they are currently using one 2000 gal diesel tank only. now based on earlier cases, requires complete delienation around diesel tank also (as reported leaking before). spoke with Bob again. mentioned him that old closed cases were closed administratively and doesn't mean they satisfied state's requirements. Bob mentioned that all the tanks that are registered under 268 Johnson ave site, are actually spread in multiple parcels with different addresses. asked Bob to submit site map with all building and locations of tank, dispenser island and fill ports, before drafting work plan. alternate addresses: 264-266 Johnson Ave 268 Johnson Ave 270-272 Johnson Ave 274-278 Johnson Ave 300 Johnson Ave 04/08/08-Hiralkumar Patel. received fax from Bob from Protest including site map showing tank locations in reference to building addresses. as per fax from protest, site has total of five tanks as follow:- one 4000 gal diesel UST at 272 Johnson Ave, which is in service as per PBS record (PBS record shows it is gasoline tank) <----- one 2000 gal diesel UST at 256 Johnson Ave, which is in service as per PBS record- one 200 gal hydraulic oil AST at 256 Johnson Ave, which is in service as per PBS record- one 300 gal motor oil AST at 256 Johnson Ave, which is in service as per PBS record (PBS record shows 275 gal AST)- one 1000 gal UST at 256 Johnson Ave, which is not in PBS listsite map shows one 1000 gal UST at 256 Johnson ave, which is not listed in PBS record and PBS record shows one 550 gasoline UST which was closed-in place in 2000 and is not included on map. left message for Bob at Protest. PBS registration hasn't renewed yet (04/08/08). received call from Bob. he mentioned that tank size information on map is what he got from owner. he hasn't measure any tank. so the tank which is abandoned in place could be 550 gal, which is recorded on PBS file. Bob mentioned that 2000 gal diesel tank at 256 Johnson ave is not in service, but not closed out properly. asked Bob for following work:- tightness test for 2000 gal diesel tank (as tank test failure reported earlier). if tank fails, he will pump out any product from tank. - regardless of tank test result, soil investigation around 2000 gal diesel UST- soil investigation along underground lines for 2000 gal diesel UST- soil investigation at remote fill port and dispenser island for 2000 gal diesel UST- soil investigation around 1000 (could be 550) gal abandoned tank also asked Bob to check whether 1000 gal tank was abandoned properly or not. and asked to find dispenser island and fill port for abandoned gasoline tank and if finds, then soil investigation at those locations also. Bob will submit proposal for required work. asked Bob to inform about proposal approval by April 18, 2008. 05/15/08-Hiralkumar Patel. received fax from Bob from Protest. they will do tank test for existing in-use tank and will investigate soil around tanks, lines, remote fill port and dispenser islands. will inspect previously abandoned tank also. work will start from May 30, 2008. 06/16/08-Hiralkumar Patel. received fax from Protest. they tested 2000 gal diesel tank and found wet leak. they also found oil/water separator while digging up the 1000 gal UST.

found contaminated soil and liquid oil inside oil/water separator. couldn't inspect bottom of separator. found 1000 gal UST abandoned properly with concrete. spoke with Bob at protest. as per him, 2000 gal diesel tank doesn't have any product, but only contains sludge at bottom. will do isolation test once gets authorization. spoke with Anthony at Miron Lumber, who is handling site. asked Anthony to finish isolation test. Anthony Montalbano General Manager Miron Lumber Ph. (718) 497-1111 Ext. 202 (347) 219-0606 (C) fax (718) 418-4088 email: amontalbano@mironsupply.com 07/08/08-Hiralkumar Patel. spoke with Anthony. he mentioned that RAM did test. Anthony will call back with contact info at RAM. asked Anthony about soil investigation around tanks. he mentioned that they have signed contract with Protest and waiting for them. spoke with Bob at Protest. asked him about status of soil investigation. they were waiting for response from owner regarding isolation test and removal of oil/water separator and other work, but hasn't heard yet. asked Bob to call back by end of tomorrow (07/09/08) to confirm about further work. 07/10/08-Hiralkumar Patel. received call from Bob from Protest. he tried to contact Anthony, but no success. 07/11/08-Hiralkumar Patel. spoke with Tom at Protest and Anthony at Miron Lumber. they had some miscommunication regarding signing contract and payment. Tom will submit work plan for soil delineation and schedule for such work, including isolation test, by end of 07/18/08. 07/21/08-Hiralkumar Patel. received email from DEC Urda with copy of Commissioner's order to Miron Lumber. the order was drafted on July 15, 2008 and as per the order, respondent must submit soil/groundwater delineation report within 30 days after service of this order. DEC Jacob mentioned that current gasoline tank at the site is totally illegal if single wall tank installed in 1989. he mentioned that if PBS record is accurate then tank must be pulled out immediately. he asked for meeting with responsible party. spoke with DEC Urda. he mentioned that responsible party has 30 days to respond and if no response within 30 days, then legal will work on this case. he also mentioned that this is final order from Commissioner and doesn't need to send any further letter. 07/28/08-Hiralkumar Patel. received message from Bob from Protest. spoke with Bob. they tested 2000 gal diesel tank only and it passed. they also found vent and dispenser lines tight. found leak in remote fill line. will do soil investigation along fill line and also around tank. suggest Bob to go through Commissioner's order that responsible party might have by now. received fax from Bob with 2000 gal diesel tank isolation test record updates. 08/12/08-Hiralkumar Patel. spoke with Bob at Protest. they did soil delineation and will submit report by tomorrow. Bob spoke with owner regarding commissioner's order and owner mentioned to Bob that owner's attorney will work on it. Bob will ask owner to call the department regarding commissioner's order. 08/18/08-Hiralkumar Patel. spoke with Mr. Montalbano regarding commissioner's order. Mr. Montalbano mentioned that he didn't receive any documents. got Mr. Montalbano's email address. spoke with DEC John. asked him if it is ok to send email to Mr. Montalbano with copy of commissioner's order. John asked to hold any action and he will talk to person in Albany. John will call back. 08/19/08-Hiralkumar Patel. received call from DEC Urda. he spoke with person in Albany and found that commissioner's order was served to site owner as well as their attorney and as they didn't respond within 30 days, they are in violation. Urda asked to send copy of Commissioner's order to Anthony via email and asked them to contact

MIRON LUMBER (Continued)

U001839163

the department regarding payment of penalties and submission of investigation report. sent email to Anthony with copy of commissioner's order. asked him to contact me regarding investigation of spill incident and storage tank and to DEC Urda regarding violations. 08/22/08-Hiralkumar Patel. received call from DEC Urda. he asked to hand deliver commissioner's order to Anthony. visited site. hand delivered commissioner's order to Anthony. also asked him to contact DEC Jacob regarding tank registration information. 08/29/08-Hiralkumar Patel. received report from Protest. abstract:- did isolation test on 2000 gal diesel UST system: tank only, vent line and dispenser line passed- found removed fill line corroded at the connection to the tank and fill line failed test- tank was pumped and cleaned and the excavation was back filled in anticipation of legally abandoning the tank- performed soil delineation around 2000 gal diesel UST and 1000 gal previously abandoned UST, along length of the remote fill line every 5 ft- samples along fill line were collected from depth of 5 to 6 ft bg- samples around two tanks were collected from depth of 10 to 12 ft bg- tested 4000 gal diesel UST at 272 Johnson ave and system passed- no contamination found in any samples report missing following:- boring logs- sampling between tanks and remote fill for diesel tank- scaled site map with north arrow summary:- Bob from Protest mentioned on 06/16/08 that there was wet leak found in 2000 gal diesel UST. they also found oil/water separator while digging up the 1000 gal UST and found contaminated soil and liquid inside this oil/water separator. no information available regarding condition of oil/water separator bottom- according to subsurface investigation report from Phoenix, contamination was found in soil at boring B-4 in northwest corner of 1000 gal abandoned UST, at depth of 7-8 ft bg, but clean soil was found at 14-16 ft depth 09/05/08-Hiralkumar Patel. spoke with Bob at Protest regarding wet leak in 2000 gal tank, oil/water separator and sampling between tank and fill line location. Bob mentioned that they found wet leak when they tested entire system for 2000 gal diesel tank, but during isolation test, they found that tank had about 8 inches of sludge and fill line was running to depth 6 inches above tank bottom (means fill line end was inside sludge) and as fill line had holes in it, it resulted into wet leak. regarding sampling between tank and remote fill line location, Bob told that remote fill line runs inside concrete conduit and there is no room for sampling between this concrete conduit and tank location. regarding oil/water separator, after removing oily water, Bob found concrete box in good condition with no cracks. Bob mentioned that oil/water separator is still open and they have proposed to abandon it properly with concrete slurry. asked Bob to submit boring logs and scaled site map (with location of oil/water separator and distance between tanks and remote fill line). 09/09/08-Hiralkumar Patel. signed affidavit of service (for delivery of commissioner's order), prepared by DEC Urda. 09/18/08-Hiralkumar Patel. left message for Bob to submit missing documents. 10/09/08-Hiralkumar Patel. received boring logs and site map (including oil/water separator). boring log missing PID readings. spoke with Bob at Protest. asked him to submit boring log with PID values during borings. 10/14/08-Hiralkumar Patel. received borings logs from Bob. no high PID values found during borings. previous report from 2001 showed contamination in sample B-4 at 7-8 ft bg and that sample was taken between 1000 gal UST and oil/water separator. during recent investigation, Protest did soil boring B-17 in same area to depth of 13 ft, but no contamination

Investigative work Plan received.6/10/08: Spill 9515837 closed and consolidated with this spill.8/18/09: J.Kann - Site Assessment report submitted in June 2009. Report indicates sheen of product in one well (MW-1). Two other groundwater monitoring wells sampled and results indicate no exceedances. Follow up observations performed by the consultant indicate that the sheen was no longer present in August 2009. A site visit is planned for August 21 to observe groundwater sampling of the well.9/14/09: J.Kann - Site visit made on 8/21. No oil sheen present in the well (MW-1). Malcolm Pirnie sampled well. Summary of analysis submitted on 9/11. Information provided indicated all concentrations below guidance. Based on information received, spill closed.

DEC Memo: 12/16/05: This spill transferred from J.Kolleeny to
S.Kraszewski.07/28/06: NYCHA update summary states that two 20K USTs
installed in 1953 and store #2 oil are currently in service. Both
spills due to TTFs caused by leaking man way gasket. Both repaired
and retested. The tanks are rescheduled for testing in 2007. No site
assessment available. NYCHA recommends a site assessment be performed
during tank replacement. - SK09/26/06:Site status summary provided to
DEC by NYCHA indicates that two monitoring wells are on site and that
water/oil mixture is being bailed. Site was therefore identified as a
high priority. Site transferred from S. Kraszewski to J. Kann -
JK6/10/08: J.Kann - spill closed and consolidated with 9515713.

APT BUILDING TANK (Continued)

S106972250

DER Facility ID: 296031
 DEC Memo: Sangesland spoke to Vicky at Island Tank. This is a heating oil tank in the garage area of an apartment building. Island Tank is already doing the dig out and knows to take the end point samples. No Tank Test Failure or Contaminated Soil letter was sent. 09.22.05 SR// Sharif spoke with Mr. Friedman . He informed me Island Tank took care of the problem. I tried to hold Vicky but not able. 12/09/05-Sharif// I rec'd report prepared by Island Tank. The UST was 3000 gallons and was removed from the property as clean scrap metal. Six end point samples were taken from the UST cavity. Approx. 26 yards of contaminated soil was removed from the hole. Soil analytical result came back almost clean with no significant contaminants left at the site. Disposal manifests are provided. NFA action required.
 Remarks: LINES ON 3000 GALLON TANK ARE ROTTED AND THEY NEED TO REMOVE SOME CONTAMINATED SOIL

Site Description: This site lies underneath the elevated Brooklyn - Queens Expressway (I-278) along Meeker Avenue between Metropolitan and Union Avenues in the Williamsburg Section of Brooklyn. It is believed that during the construction of the BQE, waste material and debris from the former Ansbacher Color & Dye Factory may have been used as fill material in the project area. A Phase II - type investigation was conducted by the New York State Department of Transportation in 1988. The investigation found hazardous levels of arsenic and lead in the soil and elevated levels of arsenic, lead and cyanide in the groundwater. During the reconstruction of the BQE in the early 1990s, the NYSDOT completed an IRM (soil removal) within the project's right-of way. The remaining contaminated soil is located beneath asphalt and

BQE/ANSBACHER COLOR & DYE FACTORY (Continued)

S106780917

concrete. A Preliminary Site Assessment was completed during the summer of 1999 to evaluate the areas outside the BQE footprint. The sampling results indicate that the subsurface soils within the footprint of the former Ansbacher Plant contain elevated levels of arsenic, lead, and mercury. The groundwater in this area is also contaminated with these metals, but the contaminated groundwater has not migrated significantly beyond the footprint of the former factory.

Env Problem: Not reported
The primary contaminants of concern at this site are arsenic, lead, mercury and cyanide. Investigations indicate that the subsurface soils within the footprint of the former Ansbacher Plant contain elevated levels of arsenic, lead, and mercury. The groundwater in this area is also contaminated with these metals. The site does not constitute a significant threat to the environment as the contaminated soil is covered by existing layers of asphalt and concrete, and the contaminated groundwater has not migrated significantly beyond the footprint of the former factory.

Health Problem: Residual arsenic and lead contamination remain under the BQE and is covered with several layers of concrete and asphalt, thereby preventing direct contact. Contaminated soil also underlies several on-site buildings formerly used by Ansbacher. Groundwater in the area is not used, since public water is available. Off-site sampling of surface soils from residential yards adjacent to the site indicated the presence of metals (particularly arsenic and lead) at concentrations above the range of concentrations typically encountered in urban neighborhoods. However, the exact source of the metals in the soils could not be determined from the data collected. The NYSDOH gave the residents advice on how to minimize their exposure to these surface soil contaminants.

 Updated By: JAMORAS

Site Description: Location: The site is located in the Greenpoint/East Williamsburg Industrial Area section of Kings County (Borough of Brooklyn, New York City). The site is located on the southwest corner of the intersection of Vandervoort Avenue and Richardson Street. Site Features: The site is completely covered by a one-story brick building. Numerous other commercial and industrial properties are located to the north, south, and west of the site. The Greenpoint Little League fields and a National Grid energy facility are east of the site across Vandervoort Avenue. A small residential area is located 1-2 blocks north of the site. An eastbound on-ramp to the Brooklyn-Queens Expressway (I-278) is located 4 blocks to the north. Current Zoning/Use(s): The site is zoned for manufacturing. The site is currently used for sheet metal fabrication. Historical Use(s): The Department began a Site Characterization in this area during the Spring of 2007 as part of a plume trackdown investigation (Meeker Avenue Plume Trackdown, DEC Site ID No. 224121). This particular location was specifically targeted for investigation based on interviews with multiple residents indicating the sites former usage as a commercial dry cleaner from the 1950's to the mid 1990's (including one former employee), and a Department database which lists the cleaners as a generator of F002 waste (spent halogenated solvents). This investigation was conducted in several phases, and was completed in the Summer of 2009. Site Geology and Hydrogeology: The site is underlain by a fill unit (0.5-8' thick), a sand/silty sand unit (~100' thick), a discontinuous clay/silt unit (~1-10' thick) within the sand/silty sand unit, a sand and gravel unit (~1-3' thick), and the Raritan Formation (located 108-113' below ground surface). Groundwater is approximately 24-50' below ground surface in the vicinity of the site. Groundwater flows north to northeast toward Newtown Creek, which lies approximately 3,000' northeast of the site. Nature and Extent of Contamination: - Groundwater The primary contaminant of concern at the site is tetrachloroethene (PCE). PCE has been found in shallow groundwater at concentrations up to 46,000 ppb, which is well above the Part 703.5 class GA standard of 5 ppb. PCE has also been found in very deep groundwater (atop the Raritan clay) at 4,500 ppb. The plume of PCE-contaminated groundwater has migrated at least 1,200' downgradient of the site. - Soil Vapor PCE has been found in soil vapor beneath the site at concentrations up to 48,200,000 ug/m³. TCE has been found at concentrations up to 230,000 ug/m³. Significant Threat: The site poses a significant environmental threat due to ongoing releases of PCE from source areas into soil and groundwater.

FORMER KLINK COSMO CLEANERS (Continued)

S109416412

Health Problem: Exposure to site-related contamination in drinking water and soil is unlikely since area homes and businesses are supplied with public water and contaminants are below the ground surface. Since the possibility exists for vapors from site-related chemicals to migrate into nearby homes and businesses, soil vapor intrusion sampling will continue in the area and data evaluated as they become available.

disrepair. The site has a development history dating back to the early 1900's; site uses have included an asphalt paving company and a lumber company. As a result of an environmental survey of this site conducted in 1988 and 1989, traces of 4-chloroaniline, pentachlorophenol, butylbenzylphthalate; di-N-butylphthalate and flouranthene were found. Metals and total petroleum hydrocarbons were also found in the soils, surface and groundwater. Contamination of soils by metals was found to include: silver, barium, cadmium, chromium, iron, lead and copper. Concentrations of metals in the groundwater exceeded groundwater quality standards for lead and iron. Rhino Trust has carried out a supplemental site assessment under a consent order in the summer of 1992. An interpretation of the analytical results from the previous investigation has been inconclusive due to data gaps in the reports. Rhino Trust performed a Supplemental Site Assessment, and the fieldwork was completed in 1994. The PRP has removed the contaminated soils. Hazardous waste is no longer present and significant threat no longer exists.

Env Assessment:	Not reported
HW Disposed/Quantity:	Not reported
Assess/Env Prog:	Contaminated soils have been removed but groundwater contamination evidently due to construction and demolition debris (non-hazardous), still exists.
Assess/Health Prob:	The environmental surveys report show that on-site soils are contaminated to various degrees by some metals, semi-volatile organic compounds and total petroleum hydrocarbons. Potential contamination of the English Kills (the adjacent surface waterbody) and adjacent properties, via soil migration and runoff, is a possibility. The site is located in an industrial neighborhood and is fenced with site access controlled by guards. The potential for contact and ingestion of on-site soils is minimal as the surface of the site is heavily compacted. Site access is limited to workers only and is of short duration. No public or private water supply wells are known to be present in the area although there exists the possibility of contaminant migration in groundwater via an apparent hydrological connection to the English Kills.

MAP FINDINGS

95 LOMBARDY ST./ACME ARCH. PRODS., INC. (Continued)

U003652054

Site Description: Location: The site is located in the Greenpoint/East Williamsburg Industrial Area section of Kings County (Borough of Brooklyn, New York City). The site is located on the east side of Vandervoort Avenue between Anthony and Lombardy Streets. **Site Features:** The site is completely covered by one (1) two-story and three (3) one-story brick buildings. The site is surrounded by other commercial and industrial properties. Sergeant William Dougherty Playground is located immediately north of the site across Anthony Street, and the eastbound on-ramp to the Brooklyn-Queens Expressway (I-278) is located one block to the north. A small residential area is located one block south of the site. **Current Zoning/Use(s):** The site is zoned for manufacturing. The site is currently used as a granite warehouse and showroom at 95 Lombardy Street, and a paper distribution office and a kitchen cabinet warehouse/showroom at 46 Anthony Street. **Historical Use(s):** The Department began a Site Characterization in this area during the Spring of 2007 as part of a plume trackdown investigation (Meeker Avenue Plume Trackdown, DEC Site ID No. 224121). This particular location was specifically targeted for investigation based on Sanborn fire insurance map data indicating that the site was utilized as a metal fabricator and painting facility from the 1930's to the late 2000's, and a Department database which lists the site as a generator of F001 waste (spent halogenated solvents used in de-greasing). This investigation was conducted in several phases, and was completed in the Summer of 2009. Based on an extensive records search and several inspections, it was determined that waste paint, waste oil, waste degreasers, and waste water precipitate were generated at the property during site operations. Numerous floor drains with unknown outfall locations existed within the property, and were identified as potential injection wells. In addition, an underground storage tank that was used as a dip tank and for storing degreasing products was located in the northwest corner of the site. Several pipes that originated from the dip tank discharged to a floor drain in the loading dock area. **Site Geology and Hydrogeology:** The site is underlain by a fill unit (0.5-9' thick), a sand/silty sand unit (~100' thick), a discontinuous clay/silt unit (~1-10' thick) within the sand/silty sand unit at various depths within the site area, a sand and gravel unit (~5' thick), and the Raritan Formation (~120-125' below ground surface). Groundwater is approximately 35-45' below ground surface in the vicinity of the site. Groundwater flows northeast toward Newtown Creek, which lies approximately 2,500' northeast of the site.

Env Problem: **Nature and Extent of Contamination:- Groundwater** The primary contaminant of concern at the site is trichloroethene (TCE). TCE has been found on-site in shallow groundwater at concentrations up to 66,000 ppb, and in deep groundwater at concentrations up to 70,000 ppb, well above Part 703.5 class GA standards (5 ppb). Concentrations of tetrachloroethene (up to 1,100 ppb) and 1,2-dichloroethene (3,200 ppb) have also been found above their respective Part 703.5 class GA standards (5 ppb each). The plume of TCE-contaminated groundwater has migrated at least 400' off-site. **- Soil Vapor and Indoor Air** Concentrations of TCE in soil vapor have been found up to 4,100 ug/m³, and in indoor air up to 13 ug/m³. **Significant Threat:** The site poses a significant environmental threat due to ongoing releases of TCE from source areas into soil and groundwater.

Health Problem: Exposure to site-related contamination in drinking water and soil is unlikely since area homes and businesses are supplied with public water and contaminants are below the ground surface. Since the

possibility exists for vapors from site-related chemicals to migrate into nearby homes and businesses, soil vapor intrusion sampling will continue in the area and data evaluated as they become available.

Site Description: Oil refinery containing approximately one half million gallons of PCB contaminated waste oil. The owner has been in negotiations with the NYSDEC, but has decided to walk away and have the government perform the cleanup. The site has been determined to be removal eligible. Richard Gardineer, from DEP informed EPA that DEP wants to wait for the removal action results before doing a PA at the site.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Assessment of Health: Persons who dig below the ground surface may come into contact with soil and groundwater contaminated with volatile organic compounds. People are not exposed to contaminants in drinking water since the area is served by a public water supply. Also, they are not coming into contact with the groundwater unless they dig greater than 10 feet below the ground surface. Organic compounds in the soil and groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings is referred to as soil vapor intrusion. The potential exists for the inhalation of site-related contaminants in indoor air due to soil vapor intrusion for any future on-site construction.

Description: The BCF Oil site is located within an urban, industrialized area of East Williamsburg, Brooklyn. Previously existing buildings and above ground storage tanks have been removed, and the property is being used as a Marshall's impound lot. A National Grid facility borders the site on the north, Newtown Creek on the south, a city automobile impound lot on the east and a scrap metal processing facility on the west. The total area is 1.9 acres, of which 0.3 acres is land under water. The property was used as a petroleum distribution facility for many years, starting in the early 1900 s. In 1980, the terminal was modified for use as a waste oil processing facility, and was used for waste oil recycling from 1980 to 1994. Routine sampling detected PCBs in the waste oil, and operations ceased in 1994. The property is zoned M3 (manufacturing/industrial), and it is currently used to store impounded automobiles. The site consists primarily of historic fill placed upon wetlands. Groundwater exists approximately 5 to 10 feet below grade and flows both to the north and south from the site. A remedial investigation of the site to determine the nature and extent of contamination has been completed. The site is currently being managed as a single operable unit. In addition, there is an open NYSDEC spill at this location; spill #9406807

Site Description: The Greenpoint Manufactured Gas Plant(MGP) site is a large parcel located along Newtown Creek at 287 Maspeth Avenue in Brooklyn, NY in Kings County. The site is currently known as the Greenpoint Energy Center, and houses a major liquefied natural gas storage facility and compressor station, an operations center for KeySpan's distribution and service units, and a warehouse facility. Surrounding land uses are mixed industrial, residential, and commercial. A large MGP and byproduct coking operation operated on the site from 1928 until 1952. Coal tar has been found in subsurface soils, but the full extent of contamination has not yet been established. The surrounding neighborhood also contains a large petroleum spill, apparently unrelated to the MGP. A VCA to address the northeast corner of the property was listed under V00631. This work was undertaken to allow expansion of the existing liquefied gas facility, and included a relatively small portion of the site. A site-wide RI began in the summer of 2012. The RI will be conducted in 3 phases and is scheduled to conclude in late 2014.

Env Problem: According to the USEPA a preliminary assessment (PA) was prepared for the site dated September 24, 1986. The PA was not submitted or reviewed. A draft preliminary site investigation report was submitted to the Department in June 2004 for the northeast corner of the site.

S104787368

This report noted MGP DNAPL found across the site in the shallow depths (0-5 feet bgs) This material caused most of the soil samples to fail standards for several SVOCs including naphthalene, benzo(a)pyrene, and benzo(a)anthracene. The area noted was addressed in an IRM, but should be representative of a best-case for the site as a whole as it was in an area which was not actually part of the MGP operations. These exceedances represent a significant threat to the environment, This material is also known to contribute to groundwater contamination and sediment contamination. The site's location, adjacent to Newtown creek, means there is a potential for DNAPL to be leaking into the creek, contaminating sediments and surface water. A RI is currently ongoing. The first phase, begun in July 2012 is focused on the eastern portion of the site, adjacent to Newtown Creek.

Health Problem: Public exposures to wastes in soil and groundwater at the site are unlikely since access to the site is restricted. Potential impacts from soil vapors need to be evaluated. Potential exposures to seepage from the site in the adjacent Newtown Creek are unknown. Eating of fish and shellfish from Newtown Creek is restricted based on fish advisories for the East River, which apply to Newtown Creek as a tributary.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was

"ROMMEL" This spill case was reassigned from DEC (Sigona) to Rommel on 01/07/2004. Per Bart Polozzitti of Keyspan (516-545-5511), major renovations have occurred at the site. The tank may have been removed, he will forward relevant information when gathered. 01/02/07-Zhune got an e-mail from Bart Polozzitti requesting additional time to get the information. He said hopefully he will get it by 02/17/07. Bart Polozzitti cell # 646-235040301/09/07 Bart sent the information a tightness test report from Tanknology Corp. and a letter is included. The letter state the following: The subject underground storage tank (361A) located at 287 Maspeth Ave. Brooklyn, New York was tightness tested unsuccessfully on January 7, 1993. The other three fuel tanks on the same facility (Nos. 363, 364 & 365) were tested tight on the same day. After repairing the vent connections causing the ullage leak above the level of product, the tank was retested on January 25, 1993 and passed. There was no release at any time to the surrounding environment. Spill Closed

Date Record Updated: 06/30/2009
Updated By: GWCROSS
Site Description: The Greenpoint Energy Center is located in the Greenpoint section of Brooklyn, New York. The surrounding area is dominated by industrial and commercial uses with a limited residential area northwest of the the site.
Env Problem: The site is impacted by MGP residuals. Coal tar is present at the site. KeySpan has proposed to remediate the most accessible contamination and leave the remaining contamination in place. The proposed remedy is under review by the department.
Health Problem: Public exposures to wastes in soil and groundwater at the site are unlikely since access to the site is restricted. Potential impacts from soil vapors need to be evaluated. Potential exposures to seepage from the site in the adjacent Newtown Creek are unknown. Eating of

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

HW Code: 224132
Record Add: 10/28/2008
Record Upd: 03/20/2013
Updated By: JAMORAS

Site Description: Location: The site is located in the Greenpoint/East Williamsburg Industrial Area section of Kings County (Borough of Brooklyn, New York City). The site is located on the east side of Porter Avenue between Anthony and Lombardy Streets. Site Features: The site is covered by several two-story buildings and two (2) separate open lots. The site is surrounded by other commercial and industrial properties. A large National Grid energy facility is located one block south of the site across Lombardy Street. Sergeant William Dougherty Playground is located one block northwest of the site across Anthony Street, and the elevated Brooklyn-Queens Expressway (I-278) is located one block to the north. A small residential area is located one block southwest of the site. Current Zoning/Use(s): The site is zoned for manufacturing. The site is currently used as a marble and granite distribution warehouse and a fruit distribution warehouse at 72 Anthony Street, and a City-Wide truck maintenance shop at 498 Porter Avenue. Historical Use(s): The Department began a Site Characterization in this area during the Spring of 2007 as part of a plume trackdown investigation (Meeker Avenue Plume Trackdown, DEC Site ID No. 224121). This particular location was specifically targeted for investigation based on Sanborn fire insurance map data indicating that the site was utilized as a brass foundry from the 1960's to 1993, and a Department database which lists the site as a generator of F001 waste (spent halogenated solvents used in de-greasing). This investigation was conducted in several phases, and was completed in the Summer of 2009. Based on an extensive records search and several inspections, it was determined that waste paint, waste oil, waste degreasers, and waste water precipitate were generated at the property during site operations. Numerous floor drains with unknown outfall locations existed within the property, and were identified as potential injection wells. Several storage tanks that were used as dip tanks for degreasing products were located in the northeast corner of the site, where evidence of releases existed. In addition, the open lot adjacent to the 72 Anthony Street building was used as a drum storage area that held all chemical wastes from the surrounding ACME facilities. Site Geology and Hydrogeology: The site is underlain by a fill unit (0.5-9' thick), a sand/silty sand unit (~1-110' thick), a discontinuous clay/silt unit (~1-10' thick) within the sand/silty sand unit at various depths within the site area, a sand and gravel unit (~5' thick), and the Raritan Formation (~130-135' below ground surface). Groundwater is approximately 45-55' below ground surface in the vicinity of the site. Groundwater flows northeast toward Newtown Creek, which lies approximately 2,000' northeast of the site.

Env Problem: Nature and Extent of Contamination: - Groundwater The primary contaminants of concern at the site are tetrachloroethene (PCE) and trichloroethene (TCE). Both PCE (up to 6,900 ppb) and TCE (up to

12,000 ppb) have been found at concentrations well above the Part 703.5 class GA standard of 5 ppb. The plume of PCE and TCE-contaminated groundwater has migrated at least 400' off-site. Soil PCE has been found in on-site soils at concentrations up to 220 ppm, which is above the soil cleanup objective for unrestricted use (1.3 ppm). Significant Threat: The site poses a significant environmental threat due to ongoing releases of TCE from source areas into soil and groundwater.

Health Problem: Exposure to site-related contamination in drinking water and soil is unlikely since area homes and businesses are supplied with public water and contaminants are below the ground surface. Since the possibility exists for vapors from site-related chemicals to migrate into nearby homes and businesses, soil vapor intrusion sampling will continue in the area and data evaluated as they become available.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/12/2013

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 03/11/2013
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/18/2013
Date Data Arrived at EDR: 02/18/2013
Date Made Active in Reports: 03/21/2013
Number of Days to Update: 31

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

LABORATORY REPORTS IN DIGITAL
FORMAT

Wednesday, October 02, 2013

Attn: Mr. Charles B. Sosik, P.G.
Environmental Business Consultants
1808 Middle Country Rd
Ridge NY 11961-2406

Project ID: 738 GRAND ST
Sample ID#s: BF43389 - BF43397

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1O = This parameter is not certified by NY NELAC for this matrix.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
BRL=Below Reporting Level

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

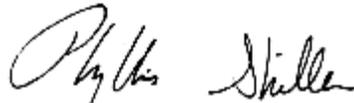

* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

Elevated reporting limits for volatiles due to the presence of non-target compounds.

* For Pesticides, due to matrix interference from non target compounds in the sample an elevated RL was reported.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1O = This parameter is not certified by NY NELAC for this matrix.

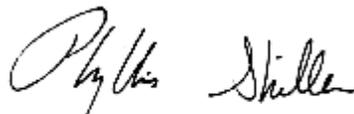

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
BRL=Below Reporting Level

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1O = This parameter is not certified by NY NELAC for this matrix.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level

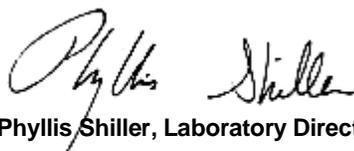

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1O = This parameter is not certified by NY NELAC for this matrix.

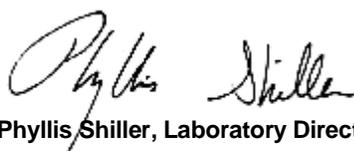

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
BRL=Below Reporting Level

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1O = This parameter is not certified by NY NELAC for this matrix.

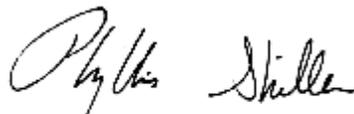

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
BRL=Below Reporting Level

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1O = This parameter is not certified by NY NELAC for this matrix.

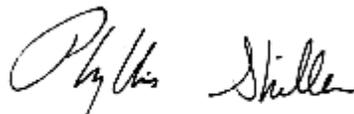

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
BRL=Below Reporting Level

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1O = This parameter is not certified by NY NELAC for this matrix.

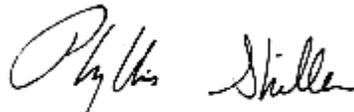

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected
BRL=Below Reporting Level

Comments:

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.
This report must not be reproduced except in full as defined by the attached chain of custody.

Comment:

Additional 8270 criteria: 20% of compounds can be outside of acceptance criteria as long as recovery is at least 10%. (Acid surrogates acceptance range for aqueous samples: 15-110%, for soils 30-130%)

- l = This parameter is outside laboratory lcs/lcsd specified recovery limits.
- m = This parameter is outside laboratory ms/msd specified recovery limits.
- r = This parameter is outside laboratory rpd specified recovery limits.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

- RPD - Relative Percent Difference
- LCS - Laboratory Control Sample
- LCSD - Laboratory Control Sample Duplicate
- MS - Matrix Spike
- MS Dup - Matrix Spike Duplicate
- NC - No Criteria
- Intf - Interference

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.
