## LIST OF ACRONYMS

Acronym	Definition
AOC	Area of Concern
CAMP	Community Air Monitoring Plan
COC	Contaminant of Concern
CPP	Citizen Participation Plan
CSM	Conceptual Site Model
DER-10	New York State Department of Environmental Conservation Technical Guide 10
FID	Flame Ionization Detector
GPS	Global Positioning System
HASP	Health and Safety Plan
HAZWOPER	Hazardous Waste Operations and Emergency Response
IRM	Interim Remedial Measure
NAPL	Non-aqueous Phase Liquid
NYC VCP	New York City Voluntary Cleanup Program
NYC DOHMH	New York City Department of Health and Mental Hygiene
NYC OER	New York City Office of Environmental Remediation
NYS DOH ELAP	New York State Department of Health Environmental Laboratory Accreditation Program
OSHA	Occupational Safety and Health Administration
PID	Photoionization Detector
QEP	Qualified Environmental Professional
RI	Remedial Investigation
RIR	Remedial Investigation Report
SCO	Soil Cleanup Objective
SPEED	Searchable Property Environmental Electronic Database

# CERTIFICATION

I, Kevin Brussee, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the Redevelopment Project located at 235-237 Kent Avenue, Brooklyn, NY, (NYC VCP Site No. 14CVCP231K and OER Project No. 14EHAZ314K). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

KEVIN BRUSSEE      21.10 / 14      

Qualified Environmental Professional      Date      Signature

## EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

### Site Location and Current Usage

The Site is located at 235-237 Kent Avenue in the Williamsburg section of Brooklyn, New York, and is identified as Block 2378 and Lots 1 and 2 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 4,856.6-square feet and is bounded by a new 4-story apartment building (Block 2378, Lot 3 - 233 Kent Avenue) to the north, a four story apartment building with 1st floor commercial space (Block 2378, Lot 44 - 245 Kent Avenue) to the south, Kent Avenue to the west, and a new 7-story apartment building (Block 2378 Lot 11 - 52 North 1st Street) and a three story multi-family walk up (Block 2378, Lot 38 - 45 Grand Street) to the east. A map of the site boundary is shown in Figure 2.

Lot 1 (237 Kent Avenue) is a slightly irregular shaped lot consisting of 25 feet of street frontage on Kent Avenue, a rear width of approximately 27.62 feet in the rear, and a length of approximately 101.5 feet on its longest side.

Lot 2 (235 Kent Avenue) is also slightly irregular, and consists of 25 feet of street frontage on Kent Avenue, a rear width of approximately 22.5 feet in the rear, and a length of approximately 95.5 feet.

Currently, the Site lots are developed with two one-story manufacturing buildings that were recently converted to and utilized as residential space.

### Summary of Proposed Redevelopment Plan

The proposed future use of the Site will consist of a 4-story mixed use building (Lot 1) with a full cellar and a concrete capped rear yard, and 4-story mixed use building with a penthouse level, a cellar, and a concrete capped rear yard.

The frame of the existing one-story manufacturing buildings will remain, but the rear 25 feet of each building will be removed to create at-grade rear court yards. Three additional levels (and penthouse) will be constructed above, and excavation below the building will be conducted to expand the existing small cellars in the front of the lots to the rear of the buildings.

Lot 1 (237 Kent Avenue) will have 954.57 ft<sup>2</sup> of retail space on the first floor, and an additional 694.55 ft<sup>2</sup> of retail storage space in the cellar. The cellar will also consist of the utility/meter room, and open cellar space which will be connected to a small apartment space on the first floor by a spiral stair case. Two window wells on the rear facade of the building will provide light to the cellar level residential space. The second, third and fourth floors will each consist of two one-bedroom apartments.

Lot 2 (235 Kent Avenue) will have 640.29 ft<sup>2</sup> of residential space and 951.04 ft<sup>2</sup> of retail space on the first floor, and an additional 694.55 ft<sup>2</sup> of retail storage space in the cellar. The cellar will also consist of the utility/meter room, and open cellar space which will be connected to a small apartment space on the first floor by a spiral stair case. Two window wells on the rear facade of the building will provide light to the cellar level residential space. The second, third and fourth floors will each consist of two one-bedroom apartments, and the penthouse will provide additional space to one of the 4th floor apartments.

The slab of the new cellars will be installed at a depth of approximately 9 feet below grade, with maximum excavations to approximately 10.5 feet for footings. Assuming an average excavation depth of approximately 9 feet across the front 75% of the Lot (2,750-square feet, taking into account the existing cellars), a total of approximately 925 cubic yards (1,375 tons) of soil will require removal for the cellar expansions. Layout of the proposed site development is presented in Figure 3. The current zoning designation of Lot 1 is M1-2/R6B, and the current zoning designation of Lot 2 is M1-2/R6AM1-2/R6B. The proposed use is consistent with existing zoning for the property.

### **Summary of Past Uses of Site and Areas of Concern**

A Phase I was completed by Alpha-Hydro Environmental Services (AHES) in April of 2013. AHES established a history for both Lot 1 and Lot 2 dating back to 1888. From 1888 to at least

1918, both lots were used as retail stores. 235 Kent Avenue (Lot 2) continued to be used as a retail store through 1935, but 237 Kent Avenue (Lot 1) was vacant on the Sanborn Map. By 1965, 235 Kent Avenue (Lot 2) operated as a waste company and printing press under the name “Jay Wool Waste Co.” and 237 Kent Avenue (Lot 1) operated as a trucking company. The use of 235 Kent Avenue (Lot 2) changed by 1970 into a 55-gallon drum (plastic, steel, and fiber glass) recycling company and was listed in the City Directory as recently as 2012. 237 Kent Avenue (Lot 1) changed to an auto repair service company (“King Collision”) by 1995 and continued until 2000. In the 2000's, the interior of both buildings were converted into use as apartments.

The AOCs identified for this Site include:

1. Historic fill layer is present at the Site from grade to depths at least 8 feet below grade.

### **Summary of the Work Performed under the Remedial Investigation**

EBC performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed six soil borings across the entire project Site, and collected ten soil samples and one duplicate for chemical analysis from the soil borings to evaluate soil quality; and
3. Installed two groundwater monitoring wells and collected two groundwater samples and a duplicate to evaluate groundwater quality. Third groundwater well was not installed; and
4. Installed five soil vapor probes across the Site and collected five samples for chemical analysis.

### **Summary of Environmental Findings**

1. Elevation of the property is approximately 21 feet.
2. Depth to groundwater at the Site is approximately 20 feet.
3. Depth to bedrock is at the Site is greater than 100 feet.
4. The stratigraphy of the Site, from the surface down, consists of 8 to 10 feet of historic fill in front portion of property and 3 to 4 feet in rear portion of property, underlain by a native fine brown sand.

5. Analytical results were compared to NYSDEC 6NYCRR Part 375-6.8 Unrestricted Use Soil Cleanup Objectives (SCOs) and Restricted Residential Use SCOs. The RI showed no pesticides or PCBs at a detectable concentration. VOCs, including acetone (110 µg/Kg), naphthalene (400 µg/Kg), tetrachloroethylene (820 µg/Kg), and trichloroethylene (1,400 µg/Kg) were detected in one or more soil samples. Of these, acetone and trichloroethylene exceeded Unrestricted Use SCOs in one soil sample each. No VOCs exceeded Restricted Residential Use SCOs. Several SVOCs were detected in soil and nine SVOCs including benz(a)anthracene (maximum of 55,000 µg/Kg), benzo(a)pyrene (maximum of 49,000 µg/Kg), benzo(b)-fluoranthene (maximum of 63,000 µg/Kg), benzo(k)fluoranthene (maximum of 14,000 µg/Kg), chrysene (maximum of 53,000 µg/Kg), dibenz(a,h)-anthracene (maximum of 10,000 µg/Kg), fluoranthene (maximum of 140,000 µg/Kg), indeno(1,2,3-cd)pyrene (maximum of 27,000 µg/Kg), phenanthrene (maximum of 140,000 µg/Kg), and pyrene (maximum of 120,000 µg/Kg) were detected above Restricted Residential Use SCOs within the soil samples collected from the urban fill layer. Six metals, including arsenic (maximum of 21.5 mg/Kg), barium (maximum of 2,830 mg/Kg), cadmium (maximum 30 mg/Kg), copper (maximum of 514 mg/Kg), lead (maximum of 4,430 mg/Kg, detected at 8 feet depths), and mercury (maximum of 1.99 mg/Kg) were detected above Restricted Residential Use SCOs within the soil samples collected from the urban fill layer. An additional two metals (chromium and zinc) were also detected above Unrestricted Use SCOs within soil samples collected from the urban fill layer. The maximum SVOC concentrations listed above were detected in the shallow soil samples collected at soil boring locations B3 and B6, and the highest lead concentration was identified in soil boring location B2, indicating hot-spot locations.
5. Groundwater samples were compared to the New York State 6NYCRR Part 703.5 Class GA Groundwater Quality Standards (GQS). Groundwater samples collected during the RI found no detectable concentrations of pesticides or PCBs. VOCs, including acetone (maximum of 2.8 µg/L), chloromethane (maximum of 1.2 µg/L), trichloroethylene (maximum of 0.76 µg/L), and tetrachloroethylene (maximum of 0.33 µg/L) were detected in both groundwater samples, well below their respective GQS. Two SVOCs were detected above GQS and include benzo(a)anthracene (maximum of 0.04 µg/L) and

chrysene (0.02 µg/L). No other SVOCs were detected in the groundwater samples. Dissolved (filtered) metals present in groundwater at levels above GQS include iron and sodium.

6. Soil vapor samples collected during the RI indicated petroleum related compounds at low concentrations and chlorinated VOCs at relatively moderate concentrations. Most compounds were detected at concentrations less than 20 µg/m<sup>3</sup>. Overall the highest reported concentrations were for ethanol (maximum of 86 µg/m<sup>3</sup>). Petroleum-related VOCs (BTEX) were detected at a maximum concentration of 85 µg/m<sup>3</sup>. Chlorinated VOCs, including trichloroethylene was detected at a concentration ranging from 5.96 to 213 µg/m<sup>3</sup>, tetrachloroethylene ranged from 5.62 to 36.2 µg/m<sup>3</sup>, carbon tetrachloride was detected at a maximum concentration of 1.36 µg/m<sup>3</sup>, and 1,1,1-trichloroethylene (TCA) was detected at a maximum concentration of 19.4 µg/m<sup>3</sup> in both sub-slab soil gas and two of the three soil vapor samples. The TCE concentrations were above the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion and recommend mitigation. The PCE, carbon tetrachloride and TCA concentrations were below the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion.

# REMEDIAL INVESTIGATION REPORT

## 1.0 SITE BACKGROUND

112 Manhattan LLC has applied to enroll in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a 0.11-acre Site located at 235-237 Kent Avenue in the Williamsburg section of Brooklyn, New York. Residential use is proposed for the property. The RI work was performed between November 2013, and January 2014. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

### 1.1 Site Location and Current Usage

The Site is located at 235-237 Kent Avenue in the Williamsburg section of Brooklyn, New York, and is identified as Block 2378 and Lots 1 and 2 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 4,856.6-square feet and is bounded by a new 4-story apartment building (Block 2378, Lot 3 - 233 Kent Avenue) to the north, a four story apartment building with 1st floor commercial space (Block 2378, Lot 44 - 245 Kent Avenue) to the south, Kent Avenue to the west, and a new 7-story apartment building (Block 2378 Lot 11 - 52 North 1st Street) and a three story multi-family walk up (Block 2378, Lot 38 - 45 Grand Street) to the east. A map of the site boundary is shown in Figure 2.

Lot 1 (237 Kent Avenue) is a slightly irregular shaped lot consisting of 25 feet of street frontage on Kent Avenue, a rear width of approximately 27.62 feet in the rear, and a length of approximately 101.5 feet on its longest side.

Lot 2 (235 Kent Avenue) is also slightly irregular, and consists of 25 feet of street frontage on Kent Avenue, a rear width of approximately 22.5 feet in the rear, and a length of approximately 95.5 feet.

Currently, the Site lots are developed with two one-story manufacturing buildings that were recently converted to and utilized as residential space.

## 1.2 Proposed Redevelopment Plan

The proposed future use of the Site will consist of a 4-story mixed use building (Lot 1) with a full cellar and a concrete capped rear yard, and 4-story mixed use building with a penthouse level, a cellar, and a concrete capped rear yard.

The frame of the existing one-story manufacturing buildings will remain, but the rear 25 feet of each building will be removed to create at-grade rear court yards. Three additional levels (and penthouse) will be constructed above, and excavation below the building will be conducted to expand the existing small cellars in the front of the lots to the rear of the buildings.

Lot 1 (237 Kent Avenue) will have 954.57 ft<sup>2</sup> of retail space on the first floor, and an additional 694.55 ft<sup>2</sup> of retail storage space in the cellar. The cellar will also consist of the utility/meter room, and open cellar space which will be connected to a small apartment space on the first floor by a spiral stair case. Two window wells on the rear facade of the building will provide light to the cellar level residential space. The second, third and fourth floors will each consist of two one-bedroom apartments.

Lot 2 (235 Kent Avenue) will have 640.29 ft<sup>2</sup> of residential space and 951.04 ft<sup>2</sup> of retail space on the first floor, and an additional 694.55 ft<sup>2</sup> of retail storage space in the cellar. The cellar will also consist of the utility/meter room, and open cellar space which will be connected to a small apartment space on the first floor by a spiral stair case. Two window wells on the rear facade of the building will provide light to the cellar level residential space. The second, third and fourth floors will each consist of two one-bedroom apartments, and the penthouse will provide additional space to one of the 4th floor apartments.

The slab of the new cellars will be installed at a depth of approximately 9 feet below grade, with maximum excavations to approximately 10.5 feet for footings. Assuming an average excavation depth of approximately 9 feet across the front 75% of the Lot (2,750-square feet, taking into account the existing cellars), a total of approximately 925 cubic yards (1,375 tons) of soil will require removal for the cellar expansions. Layout of the proposed site development is presented in Figure 3. The current zoning designation of Lot 1 is M1-2/R6B, and the current zoning

designation of Lot 2 is M1-2/R6AM1-2/R6B. The proposed use is consistent with existing zoning for the property.

### 1.3 Description of Surrounding Property

The area surrounding the Site consists of a mix of residential, commercial and manufacturing buildings. Figure 4 shows the surrounding land usage of the adjacent properties listed below as well as additional properties located up to 500 feet away from the Site. No hospitals, schools or daycare facilities are located within a 250 ft radius of the Site.

#### Surrounding Property Usage

Direction	Property Description
<b>North</b> – Adjacent Property	<u>Block 2378, Lot 3</u> 233 Kent Avenue – Developed with a new four story condo building.
<b>South</b> – Adjacent Property	<u>Block 2378, Lot 44</u> 245 Kent Avenue – Developed with a 4-story mixed use building (1st floor commercial space and apartments above).
<b>East</b> – Adjacent Properties	<u>Block 2378, Lot 11</u> 52 North 1st Street – Developed with a 7-story apartment building.  <u>Block 2378, Lot 38</u> 45 Grand Street – Developed with a 3-story multi-family walk-up.
<b>West</b> – Opposite side of Kent Ave	<u>Block 2377, Lot 12</u> 234 Kent Avenue – Recently renovated 4-story industrial manufacturing building.

## **2.0 SITE HISTORY**

### **2.1 Past Uses and Ownership**

EBC reviewed Sanborn maps and City Directory Listings, and established a history for both Lot 1 and Lot 2 dating back to 1888. From 1888 to at least 1918, both lots were used as retail stores. 235 Kent Avenue (Lot 2) continued to be used as a retail store through 1935, but 237 Kent Avenue (Lot 1) was vacant on the Sanborn Map. By 1965, 235 Kent Avenue (Lot 2) operated as a waste company and printing press under the name “Jay Wool Waste Co.” and 237 Kent Avenue (Lot 1) operated as a trucking company. The use of 235 Kent Avenue (Lot 2) changed by 1970 into a 55-gallon drum (plastic, steel, and fiber glass) recycling company and was listed in the City Directory as recently as 2012. 237 Kent Avenue (Lot 1) changed to an auto repair service company (“King Collision”) by 1995 and continued until 2000. In the 2000's, the interior of both buildings were converted into use as apartments.

### **2.2 Previous Investigations**

EBC was provided digital copies of previous investigations performed at the Site. A summary of each is provided below.

#### *2.2.1 Phase I Environmental Site Assessment*

A Phase I was completed by Alpha-Hydro Environmental Services (AHES) in April of 2013. AHES identified the following recognized environmental conditions:

- Historical site operation as a waste and printing press facility (235 Kent Avenue) and as an auto repair shop (237 Kent Avenue).
- The presence of NYSDEC VCP Site 150 feet northeast (230 Kent Avenue) of the Site. The NYSDEC VCP site was investigated and the results indicate that soil and groundwater contamination is present beneath the site and has migrated to adjoining properties.

### **2.3 Site Inspection**

Mr. Kevin Waters of EBC performed the site inspection on Monday, November 25, 2013, beginning at approximately 7:00 am. The reconnaissance included a visual inspection of the Site,

the sidewalk surrounding the Site, and the exterior of adjacent properties. At the time of the inspection, the entire footprint of both lots was developed with two one-story manufacturing buildings that had been converted into residential space. No storm drains, floor drains, aboveground storage tanks or evidence of an underground storage tank was observed during the Site inspection.

## **2.4 Areas of Concern**

The AOCs identified for this Site include:

1. Historic fill layer is present at the Site from grade to depths at least 8 feet below grade.

A copy of the Phase 1 Report is presented in Attachment A.

### **3.0 PROJECT MANAGEMENT**

#### **3.1 Project Organization**

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Kevin Brussee.

#### **3.2 Health and Safety**

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

#### **3.3 Materials Management**

All material encountered during the RI was managed in accordance with applicable laws and regulations.

## **4.0 REMEDIAL INVESTIGATION ACTIVITIES**

EBC performed the following scope of work from November of 2013, to January of 2014:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed six soil borings across the entire project Site, and collected ten soil samples and one duplicate for chemical analysis from the soil borings to evaluate soil quality;
3. Installed two groundwater monitoring wells and collected two groundwater samples and one duplicate to evaluate groundwater quality; and
4. Installed five soil vapor probes across the Site and collected five samples for chemical analysis.

### **4.1 Geophysical Investigation**

A geophysical investigation was not performed as a part of this assessment.

### **4.2 Borings and Monitoring Wells**

#### **Drilling and Soil Logging**

On November 25, of 2013, December 29, 2013, and January 6, 2014, six soil borings (B1 through B6) were performed in the approximate locations shown on Figure 5. The six soil boring locations were chosen to gain representative soil quality information across the Site. For each of the six soil borings, soil samples were collected continuously from grade to a final depth ranging from 2 feet below the basement slab to 12 feet below the concrete slab of the at grade portions of the buildings. Soil borings B2, B4 and B6 were performed in the at grade portions of the building at Lot 2 using a five-foot steel macro-core sampler with acetate liners and Geoprobe direct-push equipment. Soil borings B1 and B5 were performed in the basements to a depth of approximately 2 feet below the basement slab using an AMS dual purpose soil recovery probe with disposable plastic liners and/or stainless steel hand augers. Soil boring B3 (center of Lot 1) also required the use of the AMS dual purpose soil recovery probe with disposable plastic liners because the ceiling height did not permit access with the Geoprobe. Soil boring B3 was performed to a depth of approximately 4 feet.

Soil recovered from each of the soil borings was field screened for the presence of VOCs with a photo-ionization detector (PID) and visually inspected for evidence of contamination. No PID readings above background concentrations were obtained from any of the soil borings.

One soil sample was retained from each boring representing the interval 0 to 2 feet below grade. An additional soil sample was retained from soil borings B2 and B4 from the interval 8 to 10 feet below grade, and an additional soil sample was retained from soil borings B3 and B6 from the interval 2 to 4 feet below grade.

Soil boring details are provided in Table 1. Boring logs were prepared by a Qualified Environmental Professional and are attached in Attachment B.

#### **4.3 Sample Collection and Chemical Analysis**

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

#### **Soil Sampling**

Ten soil samples and one duplicate soil sample were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths, is reported in Tables 2 through 5. Figure 5 shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

The ten soil samples and one duplicate soil sample were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted for analysis to Phoenix Environmental Laboratories (Phoenix) of 587 East Middle Turnpike, Manchester, CT 06040, a New York State ELAP certified environmental laboratory (ELAP Certification No. 11301). All

soil samples were analyzed for the presence of volatile organic compounds (VOCs) by EPA Method 8260, semi-volatile organic compounds (SVOCs) by EPA Method 8270, pesticides/PCBs by EPA Methods 8081/8082 and target analyte list (TAL) metals.

### **Groundwater Sampling**

Two groundwater samples and one duplicate groundwater sample were collected for chemical analysis during this RI. The two groundwater samples were collected by installing a one-inch diameter PVC well, 5-feet below the water table interface (set at approximately 25 feet below grade). Groundwater samples were collected from the monitoring wells utilizing dedicated polyethylene tubing and a peristaltic pump. Groundwater samples were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted to Phoenix for analysis of VOCs by EPA Method 8260, SVOCs by EPA Method 8270, pesticides/PCBs by EPA Methods 8081/8082 and TAL metals. A trip blank, which accompanied the samples in the cooler, was analyzed for VOCs. Groundwater sample collection data is reported in Tables 6 through 10. Sampling logs with information on purging and sampling of groundwater monitor wells is included in Attachment C. Figure 5 shows the location of groundwater sampling. Laboratories and analytical methods are shown below.

### **Soil Vapor Sampling**

Two sub-slab soil gas implants were installed within the small basements located in the front of the buildings, and two sub-slab soil gas samples (SG1 and SG3) were collected for chemical analysis during this RI. In addition, three soil vapor probes were installed in the at-grade portions of the building and three soil vapor samples (SG2, SG4 and SG5) were collected for chemical analysis during this RI. Sub-slab soil gas and soil vapor sampling locations are shown in Figure 5. Sub-slab soil gas and soil vapor sample collection data is reported in Table 6. Sub-slab soil gas and soil vapor sampling logs are included in Attachment C. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006*.

The three soil vapor probes were installed using Geoprobe™ equipment and tooling. The vapor probes that were installed were the Geoprobe™ Model AT86 series, which are constructed of a 6-inch length of double woven stainless steel wire. The probes were installed to a depth of approximately 10 feet below grade at all three locations. Each probe was attached to ¼ inch

polyethylene tubing which extended approximately 18 inches beyond that needed to reach the surface. The tubing was capped with a ¼ inch plastic end to prevent the infiltration of foreign particles into the tube. Coarse sand was placed around the vapor probe to a height of approximately 1 foot above the bottom of the implant. The remainder of the borehole was sealed with a bentonite slurry to the surface.

The two sub-slab soil vapor implants were installed by drilling a ½ inch hole through the basement concrete slab with a handheld drill and then inserting a ¼ inch polyethylene to no more than 2 inches below the base of the slab. The tubing was then sealed at the surface with hydrated granular bentonite.

Soil vapor sampling for the two sub-slab soil gas implants (SG1 and SG3) and one soil vapor probe (SG2) installed on November 25, 2013, was conducted on November 27, 2013. Soil vapor sampling for the two additional soil vapor probes (SG4 and SG5) installed on December 30, 2013, was conducted on January 6, 2014. Prior to sampling, each sampling location was tested to ensure a proper surface seal had been obtained. In accordance with NYSDOH guidance (NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York, February 2005), a tracer gas (helium) was used as a quality assurance/quality control device to verify the integrity of the sampling point seal prior to collecting the samples. Prior to testing and collecting samples, the surface immediately surrounding the polyethylene tubing of the vapor implant/probe was sealed using a 1 foot ft by 1 ft square sheet of 2 mil HDPE plastic firmly adhered to a wetted layer of granular bentonite. The seal was then tested by enriching the air space above the seal with a tracer gas (helium) while continuously monitoring air drawn from the implant with a helium detector (Dielectric Model MGD-2002, Multi-Gas Detector) for a minimum of 15 minutes. The tracer gas test procedure was employed at both sub-slab soil gas sampling locations and the three soil vapor sampling locations. No surface seal leaks were observed at any of the locations.

Following verification that the surface seal was tight, one to three volumes (i.e., the volume of the sample probe and tube) of air was purged from the implant using a calibrated vacuum pump. After purging, a 6-liter Summa® canister, fitted with a 2-hour flow regulator, was attached to the surface tube of each of the three vapor implants. Prior to initiating sample collection, sample

identification, canister number, date and start time were recorded on tags attached to each canister and in a bound field note book. Sampling then proceeded by fully opening the flow control valve on each canister in turn. Immediately after opening the flow control valve on a canister, the initial vacuum (inches of mercury) was recorded in the field book and on the sample tag. When the vacuum level in the canister was between 5 and 8 inches of mercury (approx 2 hours), the flow controller valve was closed, and the final vacuum recorded in the field notebook and on the sample tag.

The soil gas Sample identification, date, start time, start vacuum, end time and end vacuum were recorded on tags attached to each canister and on a sample log sheet (Attachment D). Samples were submitted to Phoenix for laboratory analysis of VOCs EPA Method TO-15.

### Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

Factor	Description
Quality Assurance Officer	The chemical analytical quality assurance is directed by Phoenix Environmental Laboratories
Chemical Analytical Laboratory	Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and was Phoenix Environmental Laboratories
Chemical Analytical Methods	Soil and groundwater analytical methods: <ul style="list-style-type: none"> <li>• TAL Metals by EPA Method 6010C (rev. 2007);</li> <li>• VOCs by EPA Method 8260C (rev. 2006);</li> <li>• SVOCs by EPA Method 8270D (rev. 2007);</li> <li>• Pesticides by EPA Method 8081B (rev. 2000);</li> <li>• PCBs by EPA Method 8082A (rev. 2000);</li> </ul> Soil vapor analytical methods: <ul style="list-style-type: none"> <li>• VOCs by TO-15 VOC parameters.</li> </ul>

### Results of Chemical Analyses

Laboratory data for soil, groundwater, and soil vapor are summarized in Tables 2 through 11. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Attachment E.

## 5.0 ENVIRONMENTAL EVALUATION

### 5.1 Geological and Hydrogeological Conditions

#### Stratigraphy

Subsurface soil at the Site consisted of historic fill, which was primarily comprised of brick, concrete, gravel, wood and other debris in a brown silty-sand matrix. The layer of historic fill extended to a depth ranging from 8 to 10 feet below grade in the front portion of the Site and 3 to 4 feet in the rear of the Site. Native soil consisting of a brown fine sand is present below the historic fill layer.

#### Hydrogeology

A table of water level data for all monitoring wells is included in Table 1. The average depth to groundwater is 19 feet and the range in depth is 18.93 feet to 19.85 feet. Regional groundwater flow is assumed to flow east to west towards the East River located approximately 600 feet to the west.

### 5.2 Soil Chemistry

Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site. A summary table of data for chemical analyses performed on soil samples is included in Tables 2 through 5. Laboratory results were compared to NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCOs) and Restricted Residential Soil Cleanup Objectives (RRSCOs) as presented in 6NYCRR Part 375-6.8 and CP51. A copy of each laboratory report is provided in Attachment E. Figure 5 shows the location and posts the values for soil/fill that exceeds UUSCOs and RRSCOs.

Soil/fill samples collected during the RI showed no pesticides or PCBs at a detectable concentration. VOCs, including acetone (110 µg/Kg), naphthalene (400 µg/Kg), tetrachloroethylene (820 µg/Kg), and trichloroethylene (1,400 µg/Kg) were detected in one or more soil samples. Of these, acetone and trichloroethylene exceeded Unrestricted Use SCOs in one soil sample each. No VOCs exceeded Restricted Residential Use SCOs. Several SVOCs were detected in soil and nine SVOCs including benz(a)anthracene (maximum of 55,000 µg/Kg), benzo(a)pyrene (maximum of 49,000 µg/Kg), benzo(b)-fluoranthene (maximum of 63,000 µg/Kg), benzo(k)fluoranthene (maximum of 14,000 µg/Kg), chrysene (maximum of 53,000

µg/Kg), dibenz(a,h)-anthracene (maximum of 10,000 µg/Kg), fluoranthene (maximum of 140,000 µg/Kg), indeno(1,2,3-cd)pyrene (maximum of 27,000 µg/Kg), phenanthrene (maximum of 140,000 µg/Kg), and pyrene (maximum of 120,000 µg/Kg) were detected above Restricted Residential Use SCOs within the soil samples collected from the urban fill layer. Six metals, including arsenic (maximum of 21.5 mg/Kg), barium (maximum of 2,830 mg/Kg), cadmium (maximum 30 mg/Kg), copper (maximum of 514 mg/Kg), lead (maximum of 4,430 mg/Kg, detected at 8 feet depths), and mercury (maximum of 1.99 mg/Kg) were detected above Restricted Residential Use SCOs within the soil samples collected from the urban fill layer. An additional two metals (chromium and zinc) were also detected above Unrestricted Use SCOs within soil samples collected from the urban fill layer. The maximum SVOC concentrations listed above were detected in the shallow soil samples collected at soil boring locations B3 and B6, and the highest lead concentration was identified in soil boring location B2, indicating hot-spot locations.

### 5.3 Groundwater Chemistry

Data collected during the RI is sufficient to delineate the distribution of contaminants in groundwater at the Site. A summary table of data for chemical analyses performed on groundwater samples collected during the RI is included in Tables 6 through 10. Figure 7 shows the location and posts the values for groundwater that exceed the New York State 6NYCRR Part 703.5 Class GA Groundwater Quality Standards (GQS). A copy of the laboratory report for the groundwater samples is provided in Attachment E.

Groundwater samples collected during the RI found no detectable concentrations of pesticides or PCBs. VOCs, including acetone (maximum of 2.8 µg/L), chloromethane (maximum of 1.2 µg/L), trichloroethylene (maximum of 0.76 µg/L), and tetrachloroethylene (maximum of 0.33 µg/L) were detected in both groundwater samples, well below their respective GQS. Two SVOCs were detected above GQS and include benzo(a)anthracene (maximum of 0.04 µg/L) and chrysene (0.02 µg/L). No other SVOCs were detected in the groundwater samples. Dissolved (filtered) metals present in groundwater at levels above GQS include iron and sodium..

#### **5.4 Soil Vapor Chemistry**

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in Table 11. Figure 8 shows the location and posts the values for soil vapor samples with detected concentrations.

The sub-slab and soil vapor samples collected during the RI indicated petroleum related compounds at low concentrations and chlorinated VOCs at relatively moderate concentrations. Most compounds were detected at concentrations less than 20  $\mu\text{g}/\text{m}^3$ . Overall the highest reported concentrations were for ethanol (maximum of 86  $\mu\text{g}/\text{m}^3$ ). Petroleum-related VOCs (BTEX) were detected at a maximum concentration of 85  $\mu\text{g}/\text{m}^3$ . Chlorinated VOCs, including trichloroethylene was detected at a concentration ranging from 5.96 to 213  $\mu\text{g}/\text{m}^3$ , tetrachloroethylene ranged from 5.62 to 36.2  $\mu\text{g}/\text{m}^3$ , carbon tetrachloride was detected at a maximum concentration of 1.36  $\mu\text{g}/\text{m}^3$ , and 1,1,1-trichloroethylene (TCA) was detected at a maximum concentration of 19.4  $\mu\text{g}/\text{m}^3$  in both sub-slab soil gas and two of the three soil vapor samples. The TCE concentrations were above the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion and recommend mitigation. The PCE, carbon tetrachloride and TCA concentrations were below the monitoring level ranges established within the NYSDOH Final Guidance on Soil Vapor Intrusion.

#### **5.5 Prior Activity**

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected at this Site.

#### **5.6 Impediments to Remedial Action**

There are no known impediments to remedial action at this property.

## **EXECUTIVE SUMMARY**

This report presents the results of a Phase I Environmental Site Assessment (ESA) for the Site (subject property), located at 235-237 Kent Avenue Brooklyn, New York. Alpha-Hydro Environmental (AHE) performed the Phase I ESA on behalf of AAA Group. This Phase I ESA was completed in accordance with ASTM Standard E 1527-05 (ASTM International 2005). ASTM E 1527-05 complies with the U.S. Environmental Protection Agency (USEPA) All Appropriate Inquiries (AAI) Final Rule (40 CFR 312). To complete the Phase I ESA, AHE reviewed historical documents, photos, maps, and government records; interviewed those with knowledge of the site; obtained a regulatory database search report; and conducted a site visit and visual survey of the subject property.

The subject property consists of two lots (1 & 2) located at 235-237 Kent Avenue, in Brooklyn NY. Both lots are rectangular shaped parcel of land, each developed with a one story red brick building, built in 1954. Based on information gathered from the New York City Department of City Planning, Lot number 1 is addressed as 237 Kent Avenue and is approximately 2,625 square feet (sf) in area. Lot number 2 is addressed as 235 Kent Avenue and is approximately 2,225sf in area. The site ground surface elevation is approximately 19 feet above mean sea level (USGS topographic map Brooklyn NY, revised 1995). The general vicinity of the subject property is zoned as M1-2/R6B which permits a mixture of residential and non-residential (commercial, community facility, light manufacturing) uses in the same zoning district, block or building. The land surface on the subject property is relatively flat.

An E-Designation for Hazardous Materials (E-138) was placed on the Site by the New York City Department of City Planning (NYC DCP) as part of a 05/11/2005 zoning map amendment action (City Environmental Quality Review (CEQR) Number 04DCP003K).

A summary of the Federal and State Government Environmental Records contained in the EDR regulatory database report indicates that the subject property (237 Kent Avenue) was listed on the environmental database reports under waste manifest with records for 1997, 1998 and the year 2000. The waste manifest records for 1997 according to the database reports had a generator EPA ID number NYR 00004237 under the mailing name King Collision. A total of 70 gallons of hazardous waste was generated and shipped on 11/19/1997 by a transporter with EPA ID number NJD080631369 to a treatment storage disposal facility (TSDF) with ID number MAD053452637. Similarly in 1998 and the year 2000, a total of 55 gallons and 220 gallons of waste was transported to a TSDF with EPA ID numbers P20706 IL and 50160 respectively.

According to the database report, the surrounding property to the north (240 Kent Avenue) was listed under historical UST (PBS no. 2-321478). The site was also assigned a spill number 8802124 which was closed on 6/9/88. A tank location identified as no. 5 was reportedly closed on 4/1/05.

A Voluntary Cleanup Program (VCP) site (V00380) according to the database report is located approximately 0.04NE of the site and is addressed as 230 Kent Avenue, Brooklyn NY. The owner of the site entered into a voluntary cleanup agreement in April 2001. The site was historically utilized as a paint and lacquer manufacturing facility. The site according to the database report is impacted and contains volatile organic compounds in the soil and groundwater. Studies indicated that contamination from the site has migrated off site on the neighboring sidewalk. An interim groundwater pump and treat system was installed at the site and a soil vapor and dual extraction system pilot test has been conducted onsite. This site may have impacted upon the environmental integrity of the subject property.

A review of the EDR regulatory database report indicates that the subject property was not listed on the CERCLIS Site. One (1) CERCLIS Site (Fyn Paint & Lacquer Co. Inc., located at 230 Kent Avenue) was identified within a quarter-mile radius of the subject property. This site according to the database report is known to be a suspect, abandoned, inactive or uncontrolled hazardous waste site and may have impacted upon the environmental integrity of the subject property.

A review of the EDR regulatory database report indicates that the subject property was not listed on the RCRA Generators/Transporters & Treatment Site. One (1) RCRA Generator/Transporters & Treatment Site (Fyn Paint & Lacquer Co. Inc., located at 230 Kent Avenue) was identified within a quarter-mile radius of the subject property. This site according to the database report has impacted soil and groundwater which has migrated offside and may have impacted upon the environmental integrity of the subject property.

A review of the EDR regulatory database report indicates that the subject property is not an active NYSDEC spill site. The spills database identified thirty-three (33) spill sites approximately 0.25 miles from the subject property. All thirty-three (33) spill sites have been closed and may not have caused a significant impact to the environmental integrity of the subject property.

A review of the City Directory for 235 Kent Avenue, Brooklyn NY indicates that the subject property was occupied by Menna & Sons Inc which historically was a facility utilized for recycling of 55-gallon steel, plastic and fiberglass drums. During 1965, the subject property was operated as a waste company and a printing press in 1960. It was utilized as a residential property in 1934. The previous uses of the subject property may have impacted on the environmental integrity of the subject property.

A review of the City Directory for 237 Kent Avenue, Brooklyn NY indicates that the subject property was historically utilized as a commercial property from the 1960s to the early 2000s. It was occupied by a trucking company in 1965 and by an auto body shop in the mid to late 1990s. In 2005, it was utilized as a residential property and still is to this present time. The previous uses of the subject property may have impacted on the environmental integrity of the subject property.

Based on the site reconnaissance, interviews with appropriate personnel, a review of the database and available regulatory information, the findings of this assessment has revealed the presence of recognized environmental condition due to historical usage as a waste and printing press facility (235 Kent Avenue) and as an auto body repair shop (237 Kent Avenue). The soil and groundwater beneath the VCP site located approximately 150 feet northeast was reportedly contaminated and may have impacted upon the environmental integrity of the subject property. Additionally, the presence of little “E” restriction assigned by the New York City Department of Planning and Zoning for “HAZMAT”.

Accordingly, this report should be submitted to the New York City Office of Environmental Remediation for their review and comment in order to determine the scope of work for further site investigation activities.

No effort has been made to perform any investigation beyond what is included in this report. The observations included herein summarize the apparent environmental integrity of the subject property up to the date of the visual inspection of the property and the date of this report.

## 1.0 INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) for the site located at 235-237 Kent Avenue, in Brooklyn New York (see Figure I). This Phase I ESA was conducted in accordance with the ASTM International (ASTM) E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard, 2005). ASTM E 1527-05 complies with U.S. Environmental Protection Agency (EPA) All Appropriate Inquiries (AAI) Final Rule (40 CFR 312), which was promulgated November 1, 2005 and took effect November 1, 2006.

### 1.1 Purpose

The purpose of the Phase I ESA is to compile and review available information about the site and immediate vicinity to identify *recognized environmental conditions* (RECs) to the extent feasible pursuant to ASTM E 1527-05. According to the ASTM Standard, a REC is defined as:

"the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies."<sup>1</sup>

### 1.2 Reason for Performing the ESA

This Phase I ESA is performed in conjunction with a business transaction. This Phase I ESA also satisfies one of the requirements to potentially qualify future purchasers for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability (referred to as the *landowner liability protections* or LLPs). This Phase I ESA has been prepared using the ASTM Standard and constitutes "*all appropriate inquiry* into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined by 42 United States Code (U.S.C.) §9601(35)(B).

### 1.3 Scope of Services

The scope of services for this Phase I ESA includes the following tasks:

- A visual observation of site conditions, and of adjoining property uses for releases or threats of releases of hazardous substances or petroleum products;
- Review of federal and state environmental database information concerning hazardous chemical storage and use and environmental liens;
- Review of sources of historical site use information, including topographic maps;
- Correspondence and interviews with individuals with site knowledge; and
- Preparation of a Phase I Site Assessment Report
- Although investigation for asbestos-containing building materials and lead-based paint (LBP) are not required under the ASTM standard, a visual inspection was performed for the subject property

<sup>1</sup> The AAI Final Rule applies to "...conditions indicative of releases and threatened releases of hazardous substances... (and) petroleum or petroleum products which are excluded from the definition of hazardous substance..." (40 CFR 312.1).

## 1.4 Exclusions

The following were not completed as part of the Phase I ESA:

- Preliminary Title Search to identify all previous tenants, easements, or encumbrances
- Collection and analysis of soil, air (including radon), water, or building material samples
- Reconnaissance of PCB- transformer ballasts located within light fixtures.
- Mold surveys
- Wetland delineations of the properties
- Threatened and endangered species surveys, or
- Cultural or historic surveys of the properties

## 1.5 Significant Assumptions

It is the responsibility of the user of this assessment to provide certain information utilized in the report. This includes the reporting of any environmental liens encumbering the property or specialized knowledge or experience that would assist the environmental professional in identifying RECs of either current or historical site or ownership. Prior to the environmental professional performing the site reconnaissance, the user should disclose all information pertaining to the property.

## 1.6 Limitations

This report does not constitute legal advice. In addition, AHE makes no determination or recommendations regarding the decision to purchase, sell, or provide financing for the subject property.

### **Time Constraint**

The opinions and conclusions presented in this report are based on the site conditions observed and information reviewed at the time of this assessment. Information pertaining to site conditions or changes may exist that AHE is not aware of or which we have not had the opportunity to evaluate within the time available for this Phase I ESA.

### **Uncertainty Not Eliminated**

Per the ASTM Standard, no Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The use of the ASTM Standard is intended to reduce, but not eliminate, this uncertainty. Within the limitations of the agreed-upon scope of work and the ASTM Standard, AHE has conducted this Phase I ESA in a professional manner in accordance with generally accepted practices, using the degree of skill and care ordinarily exercised by environmental consultants under similar circumstances. Due to physical limitations inherent to this or any environmental assessment, AHE does not warrant that the site is free of pollutants or that all pollutants have been identified. As such, no absolute determination of environmental risks can be made. No other warranties, expressed or implied, are made.

### **Reliance on Information Provided by Others**

AHE has relied upon information provided by others in the evaluation of the environmental site conditions reported herein. AHE did not attempt to independently verify the accuracy or completeness of that information. To the extent that the opinion and conclusions in this report are based in whole or in part on such information, those conclusions are contingent on its accuracy and validity. AHE assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented, or otherwise not fully disclosed or available to AHE.

## **1.7 User Reliance**

This Phase I ESA report has been prepared by AHE for the express use by the prospective purchaser. No other parties shall rely on this report without the written consent from AHE and the prospective purchaser. The prospective purchaser may release this report to third parties; however, such third party in using this report agrees that it shall have no legal recourse against AHE, its parent, or subsidiaries.

## **2.0 SITE DESCRIPTION**

The characteristics and uses of the property and vicinity are described in the following sections.

### **2.1 Location and Legal Description**

The subject property consists of two lots (1 & 2) located at 235-237 Kent Avenue, in Brooklyn NY (see Fig. 1 – Site Location Map). Both lots are rectangular shaped parcel of land, each developed with a one story red brick building, built in 1954. Based on information gathered from the New York City Department of City Planning, Lot number 1 is addressed as 237 Kent Avenue and is approximately 2,625 square feet (sf) in area. Lot number 2 is addressed as 235 Kent Avenue and is approximately 2,225sf in area. The site ground surface elevation is approximately 19 feet above mean sea level (USGS topographic map Brooklyn NY, revised 1995). The latitude and longitude are 40.716700 degrees north and 73.965600 degrees west respectively.

### **2.2 Site and Vicinity General Characteristics**

The general site setting, geology, hydrogeology, and soil characteristics are summarized in the following paragraphs.

#### **2.2.1 General Site Setting**

The general vicinity of the subject property is zoned as M1-2/R6B which permits a mixture of residential and non-residential (commercial, community facility, light manufacturing) uses in the same zoning district, block or building. The land surface on the subject property is relatively flat.

#### **2.2.2 Regional Geology, Hydrogeology, and Soils**

In the Boroughs of Brooklyn and Queens, a generalized expression of ice agencies is found in the drift. The whole region expresses the tumultuous transportation from the north of material furnished by the multiplied agencies of frost, denudation, weathering, and mechanical stress. Clays, sand, gravel, and great hills of conglomerate, packed from top to bottom with cobblestones.

The physical features of Brooklyn and Queens are the simplest aspects of the subject. The whole region is a section of the Terminal Moraine—that chain of hills, hillocks, mounds, and detrital ridges which, in a broken and angulated succession, stretches from Cape Cod or, the Fishing Banks on the east to the State of Washington on the west.

The basement rock, identical with the schists of Manhattan, upon which the drift rests, appears in Astoria, Long Island City, and under Blackwell's Island. The latter was thoroughly established upon the completion of the East River Tunnel of the East River Gas Company, which, beginning in New York from the bottom of a shaft 135 feet deep, penetrated rock through its entire course,

except in the east and west channels of the East River on either side of Blackwell's Island, and emerged in rock under Long Island City through a shaft 147 feet deep. And recent borings for water, conducted by the Arbuckle Brothers at Jay Street and in the block bounded by Pearl, John, Plymouth, and Adams Streets, have still further conclusively shown this. Over 2,000 feet of solid rock was penetrated in this unavailing search, which resulted in an impoverished supply of saline water. It has further been demonstrated that generally under Long Island this supporting arch is reached at varying depths: at Wood-side, for instance, the rock is 500 feet below the surface, at Greenport it is 650 feet deep, and at the northern point of Great Neck 325 feet, and on the west from Bay Ridge to Bath Beach it is 200, 300, 400, 500 feet, progressively.

The entire superstructure of the land over these basal beds is not, however, entirely drift. Conclusions previously held by inference have in late years rapidly culminated into proof that a widely extended group of clay beds referable to the Cretaceous, and possibly Tertiary formations, underlies Brooklyn and Queens or, indeed, all Long Island, and on these rise the great morainal piles which are yet well characterized in undisturbed perfection within the limits of Brooklyn city. These latter are reviewed in the following section on glacial geology.

In 1838, Mather of the New York State Survey, observed the resemblance of clay beds on the north of Long Island to the clays of the Raritan beds of New Jersey which has been traced eastward into Martha's Vineyard.

Groundwater depths and flow gradients are best evaluated by a subsurface investigation involving the installation of at least three groundwater monitoring wells and precise measurements of hydrostatic pressure. However, the regional groundwater flow direction may be in the northwesterly direction towards the East River located approximately 600 ft from the subject property. Monitoring wells were observed approximately 150 ft northeast of the subject property in the vicinity of a VCP Site.

### **2.3 Current Use of the Site and Adjoining Parcels**

The subject property is currently unoccupied. Apartment buildings were observed to the north, east, west and south of the subject property. The following properties adjacent to the subject property were noted (See Figure 2 – Site Plan).

North	Commercial/Office buildings
South	Commercial buildings
East	Residential building
West	Residential building

## **3.0 INFORMATION PROVIDED BY USER**

### **3.1 Title Records and Environmental Liens or Activity and Use Limitations**

No title company or professional was engaged by the client to review recorded land title records. An environmental lien is a charge, security or encumbrances upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out a response actions, cleanup or other remediation of hazardous substances or petroleum products upon a property, including, but not limited to, liens imposed pursuant to CERCLA42 USC §9607(1).

The client is not aware of any environmental cleanup liens against the subject property. The client is not aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded in a registry.

### **3.2 Specialized Knowledge**

An E-Designation for Hazardous Materials (E-138) was placed on the Site by the New York City Department of City Planning (NYC DCP) as part of a 05/11/2005 zoning map amendment action (City Environmental Quality Review (CEQR) Number 04DCP003K).

### **3.3 Commonly Known or Reasonably Ascertainable Information**

The owner did not provide any documents relating to ownership history, contamination, or environmental assessment.

### **3.4 Valuation Reduction for Environmental Issues**

The fair market value of the property was not discussed during the site inspection.

### **3.5 Owner, Property Manager, and Occupant Information**

Information gather from the Automated City Register Information of the New York City Department of Finance of the Office of the City Register indicates that the owner of the subject property is GM Realty Company, a New York Partnership with its principal place of business at 119 North 1<sup>st</sup> Street, Brooklyn, New York 11211. The occupant at 235 Kent Avenue was identified as Karl Franck.

### **3.6 Other**

No other information was provided to AHE

## **4.0 SITE VISIT**

### **4.1 Methodology & Limiting Conditions**

Mr. David Oloke, a Senior Geologist at AHE, visited the site on Friday, March 15, 2013. The Site reconnaissance consisted of visual and/or physical observations of the subject property and improvements, adjoining properties as viewed from the subject property boundaries and the surrounding area based on visual observations made from adjacent public thoroughfares. A summary of the site visit is presented in the table below:

**SITE INSPECTION SUMMARY**  
**235-237 Kent Avenue, Brooklyn NY**

Topic	Condition Known/Present	ASTM 1527.05 REC®
Industrial Processes	No	No
Chemicals	No	No
Storage Tanks	No	No
Subsurface Drainage Structures	No	No
Hazardous Spills	No	No
Petroleum Spills	No	No
PCBs	No	No
Monitoring Wells	No	No

AHE conducted a site-walk through of the site by recording observations. The site photographs obtained during the site reconnaissance are included (See Appendix A – Photo log)

#### **4.2 On-Site Observations**

The subject property consists of two (2) one story brick buildings. The one story building to the east is addressed as 235 Kent Avenue and is approximately 2,225 sf in area. The other one story building is to the west and is addressed as 237 Kent Avenue with a total square footage of 2,625 sf. Above the rollup door is a signage that reads “King Collision” (Drive in Claims, Insurance Claims, Expert Color Match, Theft and Recovery and Body & Fender Repair). Access to the interior portion of each building is via metal door that leads to an elongate hallway which opens to a living room like space. Both buildings consist of an upper level and a basement. The upper levels are utilized as bedrooms/living quarters. Recording and musical instruments were identified in both buildings. The basements at both buildings were fitted with a natural gas meter and piping. Sewer traps and pipe connections leading to the sidewalk were observed in both basements.

Both buildings consist of a garage utilized for storage purposes. The garage at 235 Kent Avenue is approximately 20 feet long, 10 feet wide and 7feet high. The garage at 237 Kent Avenue could not be accessed during the site inspection. Information gather from the site contact indicates that the garages are similar in space except that the head room is approximately 14 feet high at 237 Kent Avenue.

There are no asbestos containing material and/or lead based paint identified the interior portions of the subject properties. There are no floor drains or monitoring wells present at the subject property. There are no electrical transformers with PCBs identified on the subject property.

### 4.2.1 Storage Tank

Historically, underground storage tanks (USTs) and aboveground storage tanks (ASTs) have been documented as being potential point source for surface and subsurface contamination. Corrosion of tank materials and improper filling procedures are factors known to contribute to soil and possible groundwater contamination. Determining the presence and locations of USTs and ASTs as part of this inspection is considered essential in assessing this potential contamination source. Visual inspection of the subject property included the inspection of the site to identify possible indicators associated with USTs and ASTs such as leakage and vegetative distress. Review of tank registration records and visual inspection of the subject property are conducted to determine the possible existence of USTs and ASTs in the vicinity of the subject property. It must be noted, however, that a lack of registration records and the absence of certain physical site conditions or characteristics may restrict or prevent the definite determination regarding the presence, number of and content of USTs and ASTs possibly located at the subject property.

There is no evidence of the presence of USTs or ASTs at the subject property. There are no fill or vent pipes associated with any USTs and/or ASTs identified at the subject property.

### 4.3 Surrounding Properties

The surrounding properties consist of apartment buildings and office/commercial properties (See Figure 3 – Surrounding Property Map). To the northeast, is a NYSDEC VCP Site located approximately 150 feet down gradient from the subject property. Groundwater monitoring wells were observed on the sidewalk in the vicinity of the NYSDEC VCP site. These monitoring wells are indicative of the presence of groundwater impacts beneath the NYSDEC VCP site which may have migrated to the adjoining properties.

## 5.0 RECORDS REVIEW

The records reviewed for this Phase I ESA included standard environmental databases and readily available historical information. The information from the review of these documents is described in the following sections.

### 5.1 Standard Environmental Record Sources

AHE retained EDR<sup>®</sup> Environmental Data Resources, Inc. to search federal, state, and tribal environmental regulatory databases to identify properties located within I mile of the Site (ASTM, 2005) with documented environmental releases and/or those that use, store, or dispose of regulated chemicals. The radii of the database searches corresponded to the recommended radii in the ASTM Standard (ASTM, 2005). A list of the regulatory databases searched and the results are presented in the EDR<sup>®</sup> report, dated March 15, 2013 (See Appendix B – Environmental Database Search). Further description of the ASTM databases that were searched is included in the EDR<sup>®</sup> report. The information provided by EDR<sup>®</sup> is limited to what has been reported or registered in each database.

The primary environmental regulatory agencies responsible for the development and enforcement of environmental laws and programs in the State of New York include the United States Environmental Protection Agency (USEPA) and the New York State Department of Environmental Conservation (NYSDEC). Databases maintained by these agencies were reviewed with respect to the subject property and surrounding properties. The table below provides a summary of the database records.

In addition, local municipal sources were also searched for environmental records to supplement the Federal and State database information.

### 5.1.1 Federal Government Environmental Records

Database	Subject Property	Number of Surrounding Properties	Approximate Minimum Search Distance (miles)	Recognized Environmental Condition?
NPL	No	0	<b>1.0</b>	No
CERCLIS	No	1	<b>0.5</b>	Yes
CERCLIS-NFRAP	No	0	<b>Property &amp; Adjoining Properties</b>	No
ERNS	No	0	<b>Property only</b>	No
RCRA Generators/	No	12	<b>0.25</b>	Yes
CORRACTS	No	1	<b>1.0</b>	No

### 5.1.2 State Government Environmental Records

Database	Subject Property	Number of Surrounding Properties	Approximate Minimum Search Distance (miles)	Recognized Environmental Condition?
SHWS	No	2	<b>1.0</b>	No
PBS/CBS/MOSF	No	1	<b>Property &amp; adjoining properties</b>	No
Spills	No	33	<b>0.25</b>	No
LTANKS	No	42	<b>0.5</b>	No
SWF/LF	No	9	<b>0.5</b>	No
VCP	No	1	<b>0.5</b>	Yes
Manifest	Yes	44	<b>0.5</b>	No

A summary of the Federal and State Government Environmental Records contained in the EDR regulatory database report indicates that the subject property is listed on the environmental database reports under waste manifest with records for 1997, 1998 and the year 2000. The waste manifest records for 1997 according to the database reports had a generator EPA ID number NYR 00004237 under the mailing name King Collision. A total of 70 gallons of hazardous waste was generated and shipped on 11/19/1997 by a transporter with EPA ID number NJD080631369 to a treatment storage disposal facility (TSDF) with ID number MAD053452637. Similarly in 1998 and the year 2000, a total of 55 gallons and 220 gallons of waste was transported to a TSDF with EPA ID numbers P20706 IL and 50160 respectively.

According to the database report, the surrounding property to the north (240 Kent Avenue) was listed under historical UST (PBS no. 2-321478). The site was also assigned a spill number 8802124 which was closed on 6/9/88. A tank location identified as no. 5 was reportedly closed on 4/1/05.

The NYSDEC VCP site (V00380) according to the database report is located approximately 0.04NE of the site and is addressed as 230 Kent Avenue, Brooklyn NY. The owner of the site entered into a voluntary cleanup agreement in April 2001. The site was historically utilized as a paint and lacquer manufacturing facility. The site according to the database report is impacted and contains volatile organic compounds in the soil and groundwater. Studies indicated that contamination from the site has migrated off site on the neighboring sidewalk. An interim groundwater pump and treat system was installed at the site and a soil vapor and dual extraction system pilot test has been conducted onsite. This site may have impacted upon the environmental integrity of the subject property.

A review of the EDR regulatory database report indicates that the subject property was not listed on the CERCLIS Site. One (1) CERCLIS Site (Fyn Paint & Lacquer Co. Inc., located at 230 Kent Avenue) was identified within a quarter-mile radius of the subject property. This site according to the database report is known to be a suspect, abandoned, inactive or uncontrolled hazardous waste site and may have impacted upon the environmental integrity of the subject property.

A review of the EDR regulatory database report indicates that the subject property was not listed on the RCRA Generators/Transporters & Treatment Site. One (1) RCRA Generator/Transporters & Treatment Site (Fyn Paint & Lacquer Co. Inc., located at 230 Kent Avenue) was identified within a quarter-mile radius of the subject property. This site according to the database report has impacted soil and groundwater which has migrated offsite and may have impacted upon the environmental integrity of the subject property.

A review of the EDR regulatory database report indicates that the subject property is not an active NYSDEC spill site. The spills database identified thirty-three (33) spill sites approximately 0.25 miles from the subject property. All thirty-three (33) spill sites have been closed and may not have caused a significant impact to the environmental integrity of the subject property.

A request was sent to the NYSDEC Case Manager for additional information on the property located at 230 Kent Avenue, Brooklyn NY (see Appendix C – FOIL Request From to NYSDEC). All pertinent information will be forwarded as soon as received and reviewed.

## **5.2 Additional Records Review**

### **5.2.1 County/Borough Government**

The subject property is located in the borough of Brooklyn - Kings County. The New York City Building Department records were accessed and it indicated that both buildings were assigned the little “E” HAZMAT designation (See Appendix D – NYC Building Department Records).

### 5.3 Historical Information

#### 5.3.1 Objective of Historical Use Information

The Objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the property. Historical use information describing the subject property was obtained from the City Directory as discussed. This information is summarized in the table below:

PERIOD/DATE	LAND USE/LISTING 235 Kent Avenue	SOURCE(S) OF INFORMATION
2012	Menna & Sons Inc	Cole Information Service
1992	Menna & Sons Inc	NYNEX Information Resource Co.
1985	Menna & Sons Inc	NYNEX Information Resource Co.
1976	Menna & Sons Inc	New York Telephone
1973	Menna & Sons Inc	New York Telephone
1970	Menna & Sons Inc	New York Telephone
1965	Jay Wool Waste Co.	New York Telephone
1960	Litho Grain for Offset Inc	New York Telephone
1934	Residential	R.L. Polk & Co.

A review of the City Directory for 235 Kent Avenue, Brooklyn NY indicates that the subject property was occupied by Menna & Sons Inc which historically utilized the facility for the recycling of 55-gallon steel, plastic and fiberglass drums. During 1965, the subject property was operated as a waste company and a printing press in 1960. It was utilized as a residential property in 1934. The previous uses of the subject property may have impacted on the environmental integrity of the subject property.

PERIOD/DATE	LAND USE/LISTING 237 Kent Avenue	SOURCE(S) OF INFORMATION
2005	Residential	Hill-Donnelly Corporation
2000	King Collision Inc	Cole Information Service
1997	King Collision Inc	NYNEX
1965	Langdon Truck Lines Inc	New York Telephone
1960	Store Products Corp	New York Telephone

A review of the City Directory for 237 Kent Avenue, Brooklyn NY indicates that the subject property was historically utilized as a commercial property from the 1960s to the early 2000s. It was occupied by a trucking company in 1965 and by an auto body shop in the mid to late 1990s. In 2005, it was utilized as a residential property and still is to this present time. The previous uses of the subject property may have impacted on the environmental integrity of the subject property.

### **5.3.2 Standard Historical Sources**

#### **5.3.2.1 Fire Insurance Maps**

Fire Insurance Maps are historical documents produced for private insurance companies since the 1800s and indicate uses of properties at specified dates and that encompasses the Subject property. Sanborn is the producers of the fire maps, which encompass the property. Sanborn maps have been made available for the years, 1888, 1904, 1918, 1928, 1935, 1965, 1979, 1980, 1982, 1989, 1991, 1995, 2001, 2005 & 2007 (See Appendix E - Sanborn Maps).

Sanborn Map (1888): Subject property at 235 and 237 Kent Avenue were utilized as a bakery and retail store respectively. Properties to the north and east were designated as stores while residential dwellings were identified to the west and a vacant parcel of land was identified to the south of the subject properties.

Sanborn Map (1904): Subject properties were utilized as retail stores. Retail stores were identified to the east and west of the subject property. A candy manufacturing company was identified to the north and residential properties to the south of the subject property.

Sanborn Map (1918): Subject properties were utilized as retail stores. Retail stores were identified to the west and a pool room to the east of the subject property. Residential properties were identified to the north and south of the subject property.

Sanborn Map (1928): Map appears devoid of residential and commercial structures that appeared in prior years.

Sanborn Map (1935): Subject property at 237 Kent Avenue was open and vacant while subject property at 235 Kent Avenue is utilized as a retail store. A trucking company was identified to the north and a residential property was identified to the south. A storage facility was identified to the west and a retail store to the east of the subject property.

Sanborn Map (1965 - 1982): Both subject properties are utilized as a garage. A bottling company was identified to the north and a food warehouse was identified to the west of the subject property. To the east is a property constructed with cement and brick and was likely utilized for delivery service. Commercial buildings were identified to the south of the subject property.

Sanborn Map (1989): The subject property located at 235 Kent Avenue was likely utilized as a delivery and manufacturing facility while the subject property at 237 Kent Avenue is utilized as a garage. A parking garage was identified to the north and a food warehouse was identified to the west of the subject property. To the east is a property constructed with cement and brick and was likely utilized for delivery service. Commercial buildings were

identified to the south of the subject property. Further to the northeast of the property at corner of Kent Avenue and North 1<sup>st</sup> Street is a paint and lacquer manufacturing facility.

Sanborn Map (1995 - 2007): The subject property located at 235 Kent Avenue was likely utilized as a delivery and manufacturing facility while the subject property at 237 Kent Avenue was utilized as an auto body repair shop. A parking garage was identified to the north and a food warehouse was identified to the west of the subject property. To the east is a property constructed with cement and brick and was likely utilized for delivery service. Commercial buildings were identified to the south of the subject property. Further to the northeast of the property at corner of Kent Avenue and North 1<sup>st</sup> Street is a paint and lacquer manufacturing facility.

## **6.0 INTERVIEWS**

The purpose of the interview is to obtain information indicating recognized environmental conditions in connection with the property. A Phase I site assessment questionnaire was completed by the prospective owner Mr. Mendel Gold. A review of the questionnaire did not identify the presence or evidence of a recognized environmental condition (See Appendix F – Phase I Questionnaire).

### **6.1 Interview with Owner**

The owner could not be contacted for an interview.

### **6.2 Local Government Official Interviews**

No local government personnel were interviewed as at the time of this report. A correspondence was sent to the NYSDEC requesting additional information regarding the VCP site located approximately 150 feet northeast of the subject property.

### **6.3 Interview with Others**

Local Fire, Police, Emergency Services were not contacted as part of this Phase I site assessment. These local departments were not anticipated to have any additional pertinent knowledge about issues on the subject property.

### **6.4 Other Data Sources**

No other data sources were researched for additional information regarding the subject property.

## 7.0 SUMMARY OF FINDINGS

Based on the site reconnaissance, interviews with appropriate personnel, a review of the database and available regulatory information, the findings of this assessment has revealed the presence of recognized environmental condition due to historical usage as a waste and printing press facility (235 Kent Avenue) and as an auto body repair shop (237 Kent Avenue). The soil and groundwater beneath the VCP site located approximately 150 feet northeast was reportedly contaminated and may have impacted upon the environmental integrity of the subject property. Additionally the presence of little “E” restriction issued by the NYC DCP for “HAZMAT”

## 8.0 DATA GAPS

No data gaps (as defined in 40 CFR Part 312.10) have been identified in the information developed as part of the all appropriate inquiry that affects our ability as environmental professionals to identify conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in or to the subject property.

## 9.0 CONCLUSIONS

AHE has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of 235-237 Kent Avenue, Brooklyn NY, the subject property. Any exceptions to, or deletions from, this practice are described in Section 10.0 of this report.

This assessment has revealed the presence of the following recognized environmental condition that falls under the scope of a Phase I ESA (ASTM 2005).

- Historical site operation as a waste and printing press facility (235 Kent Avenue) and as an auto body repair shop (237 Kent Avenue) may have impacted upon the environmental integrity of the subject properties
- The presence of little “E” restriction issued by the NYC DCP for “HAZMAT” (hazardous material).
- The presence of the NYSDEC VCP Site (230 Kent Avenue) located approximately 150 feet northeast of the subject property. The NYSDEC VCP site was investigated and the results indicate that soil and ground contamination is present beneath the site and has migrated to adjoining properties.

Accordingly, this report should be submitted to the New York City Office of Environmental Remediation for their review and comment in order to determine the scope of work for further site investigation activities.

### 9.1 Other Considerations

No other considerations were identified.

## 10.0 DEVIATIONS

No deviations or deletions from ASTM Standard E 1527-05 were made during preparation of this Phase I ESA.

## 11.0 ADDITIONAL SERVICES

No additional services beyond the scope of the ASTM Standard 1527-05 were conducted as part of this Phase I ESA.

### 13.0 ENVIRONMENTAL PROFESSIONAL SIGNATURE AND STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in section 312.10 of 40 Code of Federal Regulations (CFR) 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared by:

*David B. Oloke*

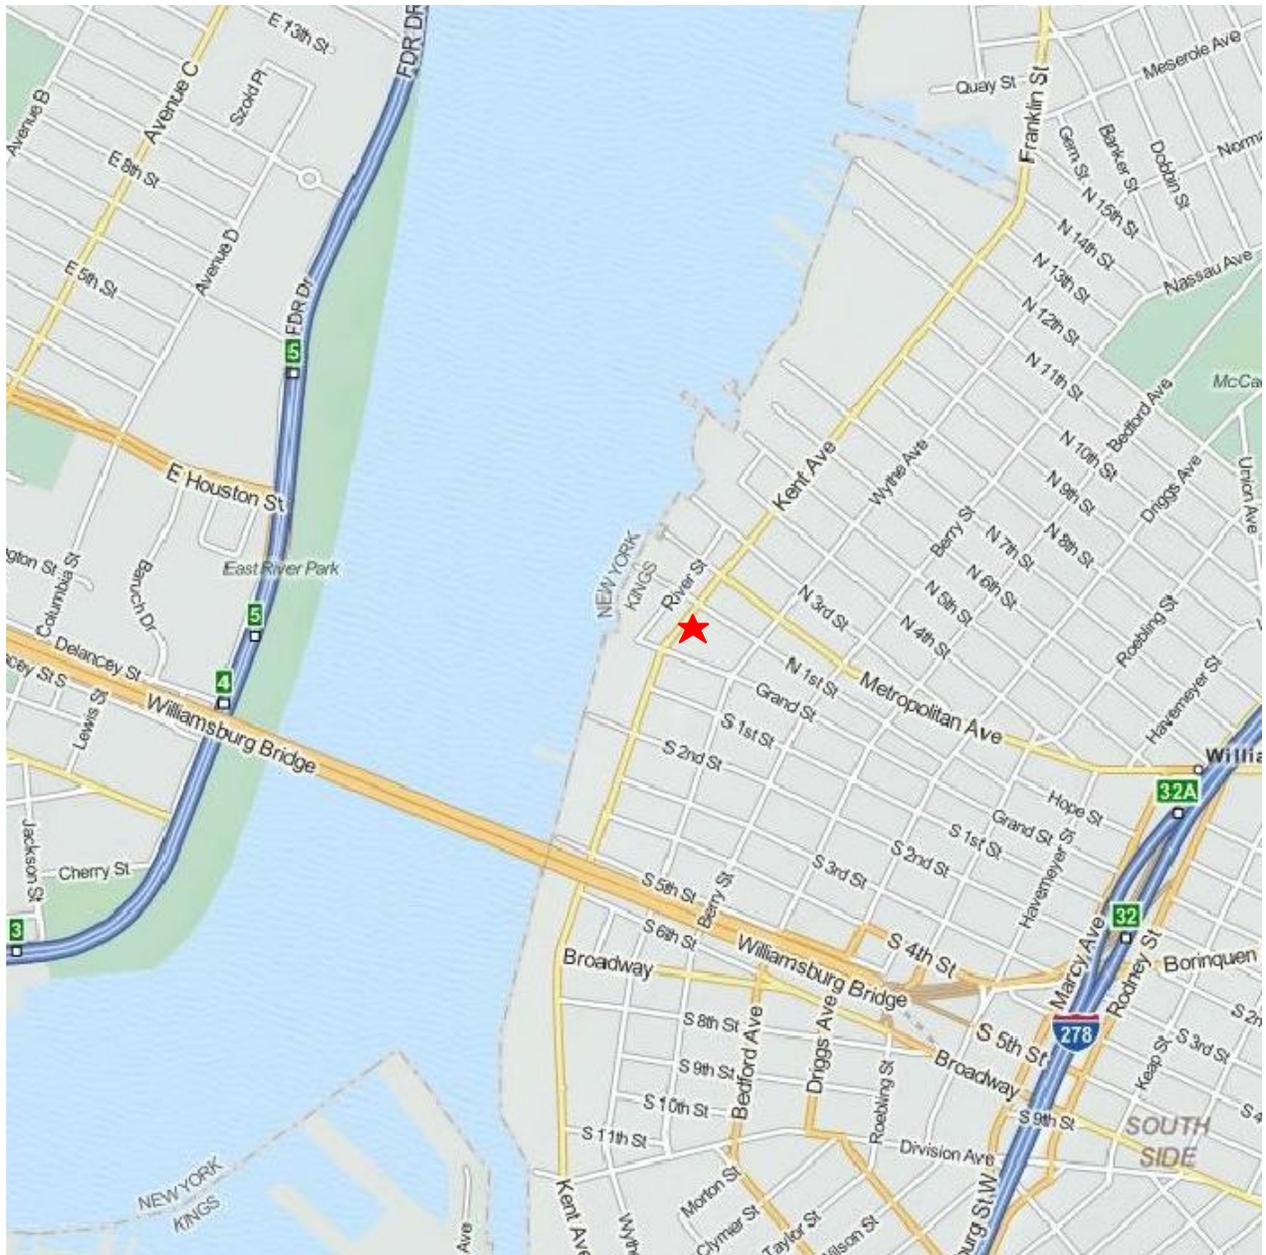

Sr. Geologist

## 14.0 DISCLAIMER

Alpha-Hydro Environmental is engaged in the environmental assessment of real estate. AHE has expertise and experience in conducting such investigations in accordance with the accepted practices and standards of the environmental consulting industry. No effort has been made to perform any investigation beyond what is included in this report. The observations included herein summarize the apparent environmental integrity of the subject property up to the date of the visual inspection of the subject property. Any incidents occurring subsequent to that date have not been included or accounted for. This report is intended to be utilized solely by the client unless otherwise indicated.

### Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

### Historical Generators:

Date form received by agency: 12/06/2007  
Facility name: 58 METROPOLITAN AVENUE  
Classification: Small Quantity Generator

### Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Program Type: VCP  
Site Code: 56974  
HW Code: V00380  
Site Class: A  
SWIS: 2401  
Region: 2  
Town: New York City  
Acres: .135  
Date Record Added: 11/30/2000  
Date Record Updated: 09/12/2011  
Updated By: JHOCONNE

**Site Description:** Location: The 0.135 acre site is located in an urban area of Brooklyn at 230 Kent Avenue, Brooklyn, NY 11211 (Block 2362, Lot 1). It is bordered by Kent Avenue to the east, by River Street to the west, by North First Street to the south, and by Con Edison's former North First Street Oil Storage Terminal to the north. **Site Features:** On site it is a two story wood frame building with a partial basement. The building was used for paint and lacquer manufacturing. The site is an active RCRA facility (EPA # 001270867). **Current Zoning:** The current zoning is M3-1, heavy manufacturing. The site is located approximately 500 ft from the East River. The surrounding neighborhood consisted of warehouses, other manufacturing facilities, and residential buildings. In the last ten years, the neighborhood has transformed into a predominantly residential area. **Historical Use:** The site was a paint and lacquer manufacturing facility. The owner of the site entered into a Voluntary Cleanup Agreement (VCA) with the Department in April 2001. **Geology and Hydrogeology:** The site is located in the Atlantic Coastal Plain. The geology of this province is comprised of interbedded of sand clay and marl. The shallow soil beneath the site consists of 75 feet of medium and course sand, gravel and silt layers. The groundwater is 7 to 15 feet below grade. The groundwater flow direction is west towards East River.

**Env Problem:** Nature and Extent of Contamination: a) contamination: based on the investigations performed at the site it was revealed that the soil, soil vapor and groundwater are contaminated with volatile organic compounds (VOCs). The main VOCs are acetone, ethylbenzene, toluene, and mixed xylenes. b) areal/depth extent: the VOC plume from 14 closed-in-place underground storage tanks (USTs), and from spills which occurred during the manufacture of paint and lacquer, extends across the foot print of the Fyn Paint building into the adjacent sidewalks and Con Ed parking lot. c) concentrations: Groundwater monitoring conducted in 2006 revealed non-aqueous phase liquid (NAPL)

and dissolved-phase contamination in three of the on-site and off-site monitoring wells. In March 2007, an Interim Remedial Measure (IRM) consisting of a groundwater pump and treatment system with an activated carbon filtration stage was installed and operated. The Remedial Investigation (RI) was completed in January 2008. A Remedial Action Work Plan (RAWP) to address on-site and off-site contamination was approved by the Department in October 2009. In 2010, a pilot test for soil vapor extraction and dual phase extraction system was performed for additional remedial system design. In July 2011, the RCRA closure work plan was approved.

**Health Problem:** It is unlikely that people will drink contaminated groundwater since the area is provided with public water. It is also unlikely that area residents will come in contact with contaminated soil and subsurface material since the site and the surrounding area are covered with buildings and pavement. If the site is redeveloped, construction workers or future site occupants may come in contact with site related contamination in soil if it is not handled properly. The potential for nearby residents and building occupants to breathe site-related contaminants that may migrate into nearby buildings via soil vapor intrusion will be evaluated.

Tank Size: Not reported  
Test Method: Not reported  
Leak Rate Failed Tank: Not reported  
Gross Leak Rate: Not reported

Material:  
Material Class Type: Petroleum  
Quantity Spilled: 0  
Unkonwn Quantity Spilled: True  
Units: Gallons  
Quantity Recovered: 0  
Unkonwn Quantity Recovered: False  
Material: DIESEL  
Class Type: DIESEL  
Times Material Entry In File: 10625  
CAS Number: Not reported  
Last Date: 19940728  
Material Class Type: Nonpetroleum/Nonhazardous  
Quantity Spilled: 0  
Unkonwn Quantity Spilled: True  
Units: Gallons  
Quantity Recovered: 0  
Unkonwn Quantity Recovered: False  
Material: SULFURIC ACID  
Class Type: SULFURIC ACID  
Times Material Entry In File: 0  
CAS Number: 07664939  
Last Date: Not reported

DEC Remarks: ECO SHOULD BE NOTIFIED. CALL NYCPD TO FIND OUT IF TANKS REGISTERED AND IF IT  
LINED WITH ASBESTOS. CHECK THE CORRECT ADDRESS.  
Remark: dep recieved call that an unk company is removing tanks from the above  
location - caller stated the tanks contain diesel and sulfuric acid and are  
lined with aesbestos -

DEC Remarks: Con Ed e2mis notes: approx 15 gallons of oil on 6' of dirt, in TM 851, unable to see any defects at this time, unable to pressure test due to conditions.

1-sample taken, records show 410PPM dated 12/10/98. pressure tested unit, unit not holding pressure, leak appears to be coming from ground switch handle shaft, unit is 15 gallons low on oil. No records to show any sewer connections. We have to deenergize feeder which should be between 7 and 8pm, and will remove transformer Monday 10-11-99. DEP is issuing a commissioner's order requiring a complete cleanup of the vault by 8:00pm 10-10-99. Also they are issuing a notice of violation for the transformer not having a PCB label. E S crew arrived at 14:50 hrs to begin excavation. 16:30 ERT reports, chem lab gave ERT a verbal that oil sample is over 50ppm, lab seq 99-10651 370 ppm. SPACE 49874 Dep Nancy Barsoum is back on location and is very satisfied, she will be back tomorrow afternoon approx 5:00pm, also transformer is in the process of being drained. removed 460 gallons from transformer, draining is completed. EPA NYP004044467. transformer in tm851 removed. 9 barrels of solids removed. found clogged drain in nwc of structure--no discharge--sealed drain perm. with garton plug, steamed and double washed with bg-760 and slix, cannot replace transformer at this time due to structural damage to walls. DEC

Inspector notes: Duplicate of spill 9908351

Remark: transformer in vault leaking material due to faulty equipment clean up unknown sample taken coned 128344 pcb test done on 12/10/98 test results 410 ppm no callback necessary

THAT IS PRESENT HAS NO MOVEMENT . THERE IS NO SEWER CONNECTION, AND A SUMP IS PRESENT. ONE LIQUID SAMPLE WILL BE TAKEN FROM STRUCTURE. HISTORICAL RECORDS INDICATE 8PPM 11/10/99. UNABLE TO PRESSURE TEST VAULT BECAUSE FEEDER IS STILL ALIVE AND THE AMOUNT OF WATER. THIS JOB WILL BE TREATED AS A 50-499, ENV OPS CREW WAS SENT TO LOCATION ALONG WITH A SPILL VAN. ALSO OVER 50 TANKER WAS ORDERED. EPA # NYP 004 110 672.12:45HRS R. JAMES REPORTS, WHILE UNDER 50 TANKER WAS DRAINING V4048, THEY NOTICED LIQUID MOVEMENT IN V1433 THEREFORE WE WILL CONTINUE DRAINING THE STRUCTURE WITH THE TANKER ON LOCATION. CLEANUP OF TANKER AND DISPOSAL OF LIQUIDS WILL BE BASED ON OIL RESULTS THAT WERE TAKEN IN THE ADJACENT VAULTS. OIL WAS ALSO FOUND IN V2597 AND V1856.VAULT 4048 IS BEING DRAINED. THE LIQUID LEVEL IN ALL VAULTS IS GOING DOWN. THE ESTIMATED OIL IS CHANGED TO THE FOLLOWING, A TOTAL OF 65 GALLONS IN THE THREE VAULTS (V1856,V2597, V1433)Update - 5/5/03 1500hrsR. James Env. ops mgr reports dep inspector Eves St. Jean arrived on location 1300hrs. Was shown spill area and told of clean up plans. At 1430hrs <50 tanker pulled off location and will handle liquids removed as >50 a new > 50 tanker will be sent out.15:10HRS K. DAVIS (NET) REPORTS, THE TAG FROM VAULT 4048 FROM OLD INCIDENT 147277 WILL BE REMOVED AND A NEW TAG WILL BE PLACED WITH THE SAME TAG# 29637 AS THE THREE VAULTS FROM THIS INCIDENT (V2597,V433,V1856)5/6/03=0350HRS O.S. B.BROWN ENVIR OPPS REPORTS PARTIAL CLEANUPS OF ALL VAULTSARE DONE . NETWORKS TO REPLACE UNIT.ENVIR TAG#13474 REMAINS.Update on 5/6/03 by R.James: R. James called transportation at 1600 on 5/5/03 to inform the on duty Tanker supervisor that B/Q will be taking samples of the oilin the structures from which the <50 tanker drew oil. We will also take a sample from within any transformer that is found to be leaking. The transformer in vault1856 was found to be leaking. Transportation informed R. James that the oil would not be discharged from the tanker until they the next day. They took their own oil samples from the tanker. All results from the structure and the transformer returned less than 50 PPM pcbs (see results above and below).R. Jamesinformed Transportation Supervisor J. Poje of the sample results at 0700 on 5/6/03 and e-mailed him those results.Lab Sequence Number: 03-03680-001 Date Approved: 5/05/2003E2 Incident Number: 148227 Date Received: 5/05/2003Chain of Custody ID: CC16729 Date Sampled: 5/05/2003=====PCB Analysis by EPA 608/8082=====MATRIX: OIL GRABLOCATION: S/S METROPOLITAN AVE 30'E/O RIVERSTRUCTURE: VAULT 1856 FEEDER ID:QC ID: 08-200304210228TEST DESCRIPTION RESULT UNIT METHOD-----Aroclor 1242 < 1.0 ppm EPA 608/8082Aroclor 1254 < 1.0

site at 1600hrs. The cleanup was completed at 16:20 hours on 23-JUL-2003 by Vendor Allstate PowerVac. Oil containers were placed in drums and approximately 2/3's of a drum of contaminated soil was removed from the spill area. Drums were left at the marked and left at the site for sampling and disposal. Additionally, at the opposite end of the pile of tires was debris which appeared to be old 9x9 asbestos floor tile (Kentile?). At 10:30 hours 24-JUL-2003 called Department of Sanitation District 1 and reported the Dumping of tires, Autoparts and Tiles on River Street and Metropolitan Avenue. District Clerk Thatch stated that he will notify the responsible district for cleanup/ pickup.

Classification: Unverified

### Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

### Corrective Action Summary:

Event date: 11/29/1985

Event: RFA Completed

Event date: 02/10/1993

Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 12/28/2000

Event: RFA Determination Of Need For An RFI, RFI is Not Necessary;

Event date: 12/28/2000

Event: RFA Completed

Event date: 09/24/2009

Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/24/2009

Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be

Classification: Unverified

### Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

### Corrective Action Summary:

Event date: 11/29/1985

Event: RFA Completed

Event date: 02/10/1993

Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 12/28/2000

Event: RFA Determination Of Need For An RFI, RFI is Not Necessary;

Event date: 12/28/2000

Event: RFA Completed

Event date: 09/24/2009

Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 09/24/2009

Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be

DEC Remarks: On February 23rd, DEC Sigona responded to a tank overfill at 108 south 2nd Street, Brooklyn. Determined that approximately 25 gallons of No. 2 fuel spilled into basement from a leak in vent pipe. The spill occurred when the tank was overfilled by oil company earlir in the day. Tri state Environmental was hired by insurance company for Boro Fuel Oil Company. The petroleum vapors were vented to the street level by fans installed in the basement. The cleanup involved the removal of surface materials and wall coverings. There was no indications that the oil impacted soils underneath the basement floor which appeared to be in good condition, with an epoxy coating. The homeowner was satisfied with the effort by both DEC and the contractor. The homeowner mentioned that he was suprised that an agency actually responded to such spills. The homeowner thought the people who drive environmental trucks, just eat coffee and donuts, and open manhole covers, etc.

Spill Cause: DRIVER OVERFILLED THE TANK - SPILLED TO STAIRS AND BASEMENT - CLEAN UP COMPANY  
E/R

## BROWNFIELDS

**EDR ID:** 1011923119      **DIST/DIR:** 0.243 NE      **ELEVATION:** 16      **MAP ID:** Y128

**NAME:** 149 KENT AVENUE LLC      **Rev:** 11/19/2012  
**ADDRESS:** 149 KENT AVE  
BROOKLYN, NY 11211

**SOURCE:** NY Department of Environmental Conservation

### BROWNFIELDS:

Program: BCP

Site Code: 463657

**Site Description:** Site Location: The site is located at 149 Kent Avenue in the Williamsburg area of Brooklyn, Kings County. It is along the north side of 5th Street between Kent and Wythe Avenues and is 0.92 acres in size. **Site Features:** An existing warehouse encompasses the property, and the property is currently vacant. **Current Zoning/Uses:** The current use of the site is commercial, and it is located in an M1-2/R6A mixed use district. The subject property was assigned a NYC E-designation as part of the Greenpoint-Williamsburg Rezoning. **Historical Uses:** The site operated as a rail terminal for approximately 100 years prior to becoming a warehouse in 1988, with two to three tracks over time. The site has a recently listed large quantity generator ID NYR0001600242, which was related to the disposal of investigation-derived waste. **Site Geology/Hydrology:** United States Geological Survey reports indicate the depth of the bedrock is expected to be approximately 100 feet below ground surface. Based on local topography, groundwater most likely flows in the west-southwest direction toward the East River, located approximately 500 feet from the subject site.

**Env Problem: Nature and Extent of Contamination:**a) contaminants - Based upon investigations conducted to date, the primary contaminants of concerns for the site include tetrachloroethylene (PCE), trichloroethylene (TCE), polychlorinated biphenyls (PCBs), lead, and polycyclic aromatic hydrocarbons (PAH). b) areal/depth extent - from the limited investigations performed by AKRF (2008) and Roux (2009) the area and depth of the contamination has not been determined yet. c) concentrations - The PCE concentrations in soil ranged from non-detect to 78,000 ppm; lead ranged from non-detect to 12,000 ppm. The PCE concentration in groundwater ranged from non detect to 72,000 ppb; the PCE concentration in the slab soil gas was determined to be as high as 95,000 micrograms per cubic meter.

**Health Problem:** Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

### Hazardous Waste Summary:

Waste code: D008

Waste name: LEAD

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: D039

Waste name: TETRACHLOROETHYLENE

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

### Biennial Reports:

Last Biennial Reporting Year: 2011

Annual Waste Handled:

Waste code: D008

Waste name: LEAD

Amount (Lbs): 9200

Waste code: F002

Received call from J. Lebedowicz tank was closed. Athena Environmental sampled after tank was removed. bf6/18/08 Yesterday, recieved message from Spiro of (Name not clear) Environmental Services. He requested call back to (718)784-7490. I called the number today, but number is not in service at this time and no further informatuion is available. Review of PBS file shows tank was closed in 2008. They should have closure report. Called Jerry Lebedowicz and left message to call me back. His number (from PBS application) is (718)784-7490. Mr. lebedowicz hand-delivered sampling results from Athenica Environmental Services. One contaminant was above soil clean-up objectives to protect gw quality: chrysene (690 ppb) in sample B-3. Faxed nfa letter to Mr. Lebedowicz. Fax: (718)229-7111. Also mailed letter to him at address above. NFA. bf  
Remarks: 3K TANK FAILED PETRO TITE WITH A LEAK RATE OF -.161GPH.

DEC Memo: TTF sent to property manager: Mr. Martin Gurshon 233 Broadway - Suite 2704 New York, NY 10279 11/20/09. J. Krimgold reviewed the letter report submitted by Pro Test Enviro and dated 10/30/09. According to the letter the tank system failed the test due to a leak in the supply and/or return lines. The damaged portions of these line were replaced and the tank system retested and passed. During excavation of piping contaminated soil was encountered. This soil was excavated, drummed and properly disposed of. End point samples show no contaminant above TAGM limits. Case closed.

Site Description: Transition from V00704 and C224055. The Williamsburg Works Manufactured Gas Plant (MGP) site is composed of three parcels of land located on the east bank of the East River in Brooklyn New York in Kings County. The site is located between North 11th and North 12th Streets on the west side of Kent Avenue. A manufactured gas plant operated on the site from at least 1887 to 1916 according to Sanborn Fire Insurance(Sanborn) maps. Current land use includes a document storage warehouse, an inactive petroleum terminal, and one vacant lot which until recently housed a Sanitation Dep't garage. The City of NY has identified this site for construction of a proposed waterfront park, which would extend far beyond site boundaries to the north and south. One parcel (50 Kent Avenue) has already been acquired. An IRM is slated for this parcel in late 2012.

Env Problem: According to the USEPA, a preliminary assessment (PA) was prepared for the site dated September 24, 1986. A copy of the PA was not supplied with the application. The environmental assessment for this site has not yet been completed. The site is the confirmed location of a historic MGP. MGPs have known onsite by products of DNAPL and purifier waste. The materials are made up of BTEX, PAHs, and cyanide. The DNAPL causes contravention of both groundwater and soil SCGs. The site is also adjacent to the East River and several public and private buildings, including residences. DNAPL is known to migrate into surface water bodies, contaminating sediment. The BTEX components are also known to contribute to soil vapor issues. There are already reports of tar seeping into the East River and tar has been found on an adjacent property.

Health Problem: The NYSDOH will evaluate the potential for impacts to public health from exposure to site contaminants once sufficient information from the investigation of the site becomes available for review.

Updated By: JAAVERSA

Site Description: This site lies underneath the elevated Brooklyn - Queens Expressway (I-278) along Meeker Avenue between Metropolitan and Union Avenues in the Williamsburg Section of Brooklyn. It is believed that during the construction of the BQE, waste material and debris from the former Ansbacher Color & Dye Factory may have been used as fill material in the project area. A Phase II - type investigation was conducted by the New York State Department of Transportation in 1988. The investigation found hazardous levels of arsenic and lead in the soil and elevated levels of arsenic, lead and cyanide in the groundwater. During the reconstruction of the BQE in the early 1990s, the NYSDOT completed an IRM (soil removal) within the project's right-of way. The remaining contaminated soil is located beneath asphalt and concrete. A Preliminary Site Assessment was completed during the summer of 1999 to evaluate the areas outside the BQE footprint. The sampling results indicate that the subsurface soils within the footprint of the former Ansbacher Plant contain elevated levels of arsenic, lead, and mercury. The groundwater in this area is also contaminated with these metals, but the contaminated groundwater has not migrated significantly beyond the footprint of the former factory.  
Not reported

Env Problem: The primary contaminants of concern at this site are arsenic, lead, mercury and cyanide. Investigations indicate that the subsurface soils within the footprint of the former Ansbacher Plant contain elevated levels of arsenic, lead, and mercury. The groundwater in this area is also contaminated with these metals. The site does not constitute a significant threat to the environment as the contaminated soil is covered by existing layers of asphalt and concrete, and the contaminated groundwater has not migrated significantly beyond the footprint of the former factory.

Health Problem: Residual arsenic and lead contamination remain under the BQE and is covered with several layers of concrete and asphalt, thereby preventing direct contact. Contaminated soil also underlies several on-site buildings formerly used by Ansbacher. Groundwater in the area

is not used, since public water is available. Off-site sampling of surface soils from residential yards adjacent to the site indicated the presence of metals (particularly arsenic and lead) at concentrations above the range of concentrations typically encountered in urban neighborhoods. However, the exact source of the metals in the soils could not be determined from the data collected. The NYSDOH gave the residents advice on how to minimize their exposure to these surface soil contaminants.

## Database Descriptions

**NPL:** NPL National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices. NPL - National Priority List Proposed NPL - Proposed National Priority List Sites.

**NPL Delisted:** DELISTED NPL The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. DELISTED NPL - National Priority List Deletions

**CERCLIS:** CERCLIS CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL. CERCLIS - Comprehensive Environmental Response, Compensation, and Liability Information System

**NFRAP:** CERCLIS-NFRAP Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site. CERCLIS-NFRAP - CERCLIS No Further Remedial Action Planned

**RCRA COR ACT:** CORRACTS CORRACTS identifies hazardous waste handlers with RCRA corrective action activity. CORRACTS - Corrective Action Report

**RCRA TSD:** RCRA-TSDF RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. RCRA-TSDF - RCRA - Treatment, Storage and Disposal

**RCRA GEN:** RCRA-LQG RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. RCRA-LQG - RCRA - Large Quantity Generators RCRA-SQG - RCRA - Small Quantity Generators. RCRA-CESQG - RCRA - Conditionally Exempt Small Quantity Generators.

**Federal IC / EC:** US ENG CONTROLS A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health. US ENG CONTROLS - Engineering Controls Sites List US INST CONTROL - Sites with Institutional Controls.

**ERNS:** ERNS Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances. ERNS - Emergency Response Notification System

## Database Descriptions

State/Tribal CERCLIS: SHWS Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites SHWS - Inactive Hazardous Waste Disposal Sites in New York State

State/Tribal SWL: SWF/LF Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites. SWF/LF - Facility Register

State/Tribal LTANKS: LTANKS Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. LTANKS - Spills Information Database HIST LTANKS - Listing of Leaking Storage Tanks. INDIAN LUST R9 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R4 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R1 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R8 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R7 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R6 - Leaking Underground Storage Tanks on Indian Land. INDIAN LUST R10 - Leaking Underground Storage Tanks on Indian Land.

State/Tribal Tanks: TANKS This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency. TANKS - Storage Tank Facility Listing UST - Petroleum Bulk Storage (PBS) Database. CBS UST - Chemical Bulk Storage Database. MOSF UST - Major Oil Storage Facilities Database. AST - Petroleum Bulk Storage. CBS AST - Chemical Bulk Storage Database. MOSF AST - Major Oil Storage Facilities Database. CBS - Chemical Bulk Storage Site Listing. MOSF - Major Oil Storage Facility Site Listing. INDIAN UST R7 - Underground Storage Tanks on Indian Land. INDIAN UST R1 - Underground Storage Tanks on Indian Land. INDIAN UST R9 - Underground Storage Tanks on Indian Land. INDIAN UST R5 - Underground Storage Tanks on Indian Land. INDIAN UST R4 - Underground Storage Tanks on Indian Land. INDIAN UST R10 - Underground Storage Tanks on Indian Land. INDIAN UST R6 - Underground Storage Tanks on Indian Land. INDIAN UST R8 - Underground Storage Tanks on Indian Land.

State/Tribal IC / EC: ENG CONTROLS Environmental Remediation sites that have engineering controls in place. ENG CONTROLS - Registry of Engineering Controls INST CONTROL - Registry of Institutional Controls. RES DECL - Restrictive Declarations Listing.

State/Tribal VCP: VCP New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites. VCP - Voluntary Cleanup Agreements

ST/Tribal Brownfields: ERP In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use. ERP - Environmental Restoration Program Listing BROWNFIELDS - Brownfields Site List.

US Brownfields: US BROWNFIELDS Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs. US BROWNFIELDS - A Listing of Brownfields Sites

## Database Descriptions

Other Haz Sites: US CDL A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. US CDL - Clandestine Drug Labs

Other Tanks: CORTLAND CO. UST A listing of underground storage tank sites located in Cortland County. CORTLAND CO. UST - Cortland County Storage Tank Listing WESTCHESTER CO. ## QUESTIONNAIRE

1a. Did you observe evidence or do you have any prior knowledge that the **subject property** is currently or has been previously used for an **industrial use**?

Yes  No  Unknown

1b. Did you observe evidence or do you have any prior knowledge that any **adjoining properties** are currently or has been previously used for an **industrial use**?

Yes  No  Unknown

2a. Did you observe evidence or do you have any knowledge that the **subject property** is currently or has been previously used for any of the following (circle all that apply):

- Gasoline station
- Motor repair facility
- Dry Cleaners
- Photo developing laboratory
- Junkyard or landfill
- Waste treatment, storage, disposal, processing or recycling facility

Yes  No  Unknown

2b. Did you observe evidence or do you have any knowledge that the **adjoining property** is currently or has been previously used for any of the following (circle all that apply):

- Gasoline station
- Motor repair facility
- Dry Cleaners
- Photo developing laboratory
- Junkyard or landfill
- Waste treatment, storage, disposal, processing or recycling facility

Yes  No  Unknown

3. Did you observe evidence or do you have any knowledge that there are currently or have been previously any damaged or discarded **automotive or industrial batteries, pesticides, paints** or **other chemicals** in individual containers >5 gallons (20L) in volume or 50 gallons (200 L) in aggregate, stored on or used at the **subject property**.

Yes  No  Unknown

4. Did you observe evidence or do you have any knowledge that there are currently or have been previously any **industrial drums** (typically 55 gal) or sacks of chemicals located on the subject property?

Yes  No  Unknown

5. Did you observe evidence or do you have any knowledge that **fill dirt** has been brought onto the subject property that originated from a **contaminated site or is of unknown origin**?

Yes  No  Unknown

6. Did you observe evidence or do you have any knowledge that there are currently or have been previously any **pits, ponds or lagoons** located on the subject property in connection with waste treatment or waste disposal?

Yes  No  Unknown

7. Did you observe evidence or do you have any knowledge that there are currently or have been previously any **stained soil** on the subject property?

Yes  No  Unknown

8. Did you observe evidence or do you have any knowledge that there are currently or have been previously any **registered or Unregistered storage tanks** (above or underground) located on the subject property?

Yes  No  Unknown

9. Did you observe evidence or do you have any knowledge that there are currently or have been previously any **vent pipes, fill pipes or access ways indicating a fill pipe** protruding from the ground on the subject property or adjacent to any structure on the subject property?

Yes  No  Unknown

10. Is there currently any evidence of **leaks, spills or staining** by substances other than water, or foul odors, associated with flooring, drains, walls, ceilings or exposed grounds on the subject property?

Yes  No  Unknown

11. If the subject property is served by **private well or non-public water system**, is there evidence or do you have any knowledge that **contaminants** have been identified in the well or system or that the well has been **designated as contaminated** by any government environmental health agency?

Yes  No  Unknown

12. Do you have any knowledge of **environmental liens** or government notification relating to **past or recurrent violations of environmental laws** with respect to the subject property?

Yes  No  Unknown

13. Have you been informed of the current or past existence of **hazardous substances or petroleum products** with respect to the subject property?

Yes  No  Unknown

14. Do you have any knowledge of any previous **environmental site assessment report** (Phase I) for the subject property that indicated the presence of **hazardous substances or petroleum products on or contamination** of the subject property or **recommended further assessment** of the subject property?

Yes  No  Unknown

15. Do you know of any past, threatened or pending **lawsuits** or **administrative proceedings** concerning a release or threatened release of any hazardous substances or petroleum products involving the subject property by any owners or occupant of the subject property?

Yes  No  Unknown

16. Does the subject property **discharge waste water** (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?

Yes  No  Unknown

17. Do you have any prior knowledge that **any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries** or any other waste materials have been dumped above grade, buried and/or burned on the subject property

Yes  No  Unknown

18. Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of **PCBs**?

Yes  No  Unknown

19. How long has the property been under the current owner: \_\_\_\_\_ (Yrs)

20. Indicate the past uses of the subject property: a) \_\_\_\_\_ b) \_\_\_\_\_ c) \_\_\_\_\_

Please provide details relating to any questions answered "Yes" in the space below. Attach additional sheets or informative documents if necessary.

## GROUNDWATER PURGE / SAMPLE LOGS

**ENVIRONMENTAL BUSINESS CONSULTANTS**

Well I.D.:     MW2    

Date: 11/27/2013

Well Depth (from TOC):     25    

Equipment: Peristaltic Pump

Static Water Level (from TOC):     19.85    

Field Personnel: Sunny Chen

Height of Water in Well:     5.15    

Gallons of Water per Well Volume:     0.206    

Flow Rate: 400ml/min.

Time	Time (24Hr)	Pump Rate	Gal. Removed	pH	Cond. (µS/cm)	Temp. (°F)	DO (mg/L)	Comments
0.00	12:52	400ml/min	0					turbid
2.00	12:54	400ml/min	0.22					turbid
4.00	12:56	400ml/min	0.44					turbid
6.00	12:58	400ml/min	0.66					turbid
8.00	13:00	400ml/min	0.88					clear

Note 400 ml = 0.11 gallons

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

\*\*\* No Data to Display \*\*\*

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Sample ID#s: BF93657 - BF93658

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

## SDG Comments

January 14, 2014

SDG I.D.: GBF93657

---

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

BF93657 - Client provided soil jar for volatile analysis. Phoenix prepared sample per method 5035.

BF93658 - Client provided soil jar for volatile analysis. Phoenix prepared sample per method 5035.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1O = This parameter is not certified by NY NELAC for this matrix.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

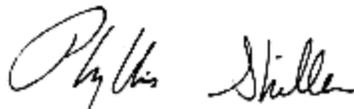

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the pesticide analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1O = This parameter is not certified by NY NELAC for this matrix.

3 = This parameter exceeds laboratory specified limits.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Project ID: 235 KENT AVE BROOKLYN  
Sample ID#s: BF95355 - BF95356

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
1O = This parameter is not certified by NY NELAC for this matrix.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

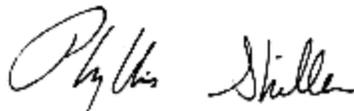

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.  
This report must not be reproduced except in full as defined by the attached chain of custody.

BRL=Below Reporting Level

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

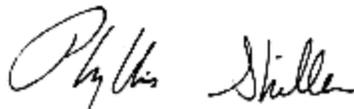

This sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
3 = This parameter exceeds laboratory specified limits.  
B = Present in blank, no bias suspected.

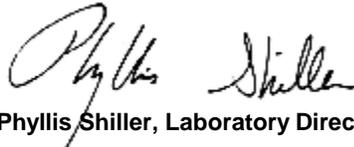

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

\*For semivolatiles, poor surrogate recovery was observed. Sample was re-extracted with similar results. The other surrogates associated with this sample were within QA/QC criteria.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

# Sample Criteria Exceedences Report

Requested Criteria: None

**GBF82924 - EBC**

State: NY

SampNo	Acode	Phoenix Analyte	Criteria	Result	RL	Criteria	RL Criteria	Analysis Units
--------	-------	-----------------	----------	--------	----	----------	----------------	-------------------

---

\*\*\* No Data to Display \*\*\*

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

I attest that all media released by Phoenix Environmental Laboratories, Inc. have been received in good working condition and agree to the terms and conditions as listed on the back of this document:

Friday, December 06, 2013

Attn: Mr. Charles B. Sosik, P.G.  
Environmental Business Consultants  
1808 Middle Country Rd  
Ridge NY 11961-2406

Project ID: 235 KENT AVE BROOKLYN  
Sample ID#s: BF81852 - BF81858, BF81860

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

## SDG Comments

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

## Methodology Summary

### **Metals**

ICP :

USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods 3rd Ed. Update IV, Method 6010C.

Mercury:

USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods Update III, 7471

### **Pesticides:**

USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods 3rd Ed. Update IV, Method 8081B.

### **Polychlorinated Biphenyls (PCBs):**

USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods 3rd Ed. Update IV, Method 8082A.

### **Semivolatile Organic Compounds**

USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods 3rd Ed. Update IV, Method 8270D.

### **Volatile Organics**

USEPA SW-846 Test Methods for Evaluating Solid Waste Physical/Chemical Methods 3rd Ed. Update III, Method 8260C.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
10 = This parameter is not certified by NY NELAC for this matrix.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

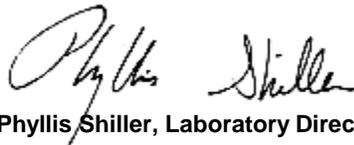

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the pesticide analysis.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
1O = This parameter is not certified by NY NELAC for this matrix.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

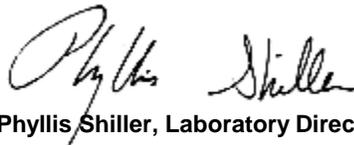

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the pesticide analysis.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
10 = This parameter is not certified by NY NELAC for this matrix.  
3 = This parameter exceeds laboratory specified limits.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

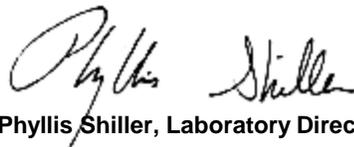

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the pesticide analysis.

\*\*Poor surrogate recovery was observed for volatiles due to matrix interference. Sample was analyzed twice with similar results.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

10 = This parameter is not certified by NY NELAC for this matrix.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

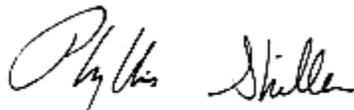

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.  
This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
10 = This parameter is not certified by NY NELAC for this matrix.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

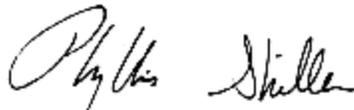

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the pesticide analysis.

**8260 Analysis:**

There was a suppression of the last internal standard in the low level analysis, all affected compounds are reported from the methanol preserved high level analysis which did not exhibit this interference.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.  
10 = This parameter is not certified by NY NELAC for this matrix.  
B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected  
BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

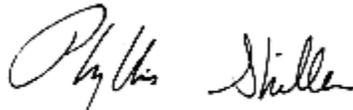

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.  
This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

10 = This parameter is not certified by NY NELAC for this matrix.

B = Present in blank, no bias suspected.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected

BRL=Below Reporting Level LOD=Limit of Detection MDL=Method Detection Limit

**Comments:**

Per 1.4.6 of EPA method 8270D, 1,2-Diphenylhydrazine is unstable and readily converts to Azobenzene. Azobenzene is used for the calibration of 1,2-Diphenylhydrazine.

Please be advised that the NY unrestricted soil criteria for chromium is based on hexavalent chromium and trivalent chromium.

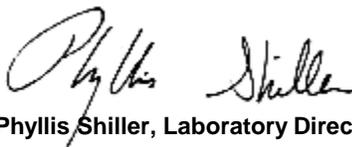

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the pesticide analysis.

\* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

**Comments:**

TRIP BLANK INCLUDED. %SOLIDS ASSUMED 100%

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.
