Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

This is a new spill report to a site with a long term problem. Check Spill # 9803858 for site history. 03/29/06-Vought-Spill transferred from AJWhite to Vought due to Vought involvement with spill #0512733 and agreed to by DEC Central Office Woodward. For further information see spill #0512733. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Piper as per DEC Austin. 12/7/06- DEC Piper received addendum report. The well has been resampled and results show slight exceedances of Benzene 16ppb, Isopropyl benzene 16.5ppb and n-propylbenzene 8.3 ppb. This is a significant decrease. Source area has been remediated through excavation, vapor barrier installed and active SSDS is ongoing. This case is closed as well as 0514548, 9803858, 0503781, 0503229. See E-docs if warranted. For further information on spill see spill #512733 at same location.

**Remarks:**

WERE DRILLING AND FOUND AN OLD SPILL. THE OLD TANKS WERE FILLED WITH CONCRETE BEFORE. WANTS A CASE MANAGER OF ANOTHER SPILL # 0503229.

**S103572304**

11590.DEC has given a deadline of Feb 25, 2004 to submit a delineation, remediation plan for the soil contamination found at this building.1/5/2004 First letter came back with a "non deliverable" note Called the contact number and found a new address in Suffolk County. New letter sent to:David Kohart, Hasko Utilities Co, Inc. 14 Industrial Blvd, Medford, NY 11763. New Deadline of March 15, 2004 1/12/2004 Sangesland spoke with David Kohart regarding this property. He explained the following history on the building.1977 Hasko buys the building from a Taxi Garage company1982 Closes tanks by NYCFD Standards - Slag fill tanks.1998 Hasko Mortgages building, Bank requires Phase I & II report to be done. "Trace" contamination found, spill report filed.To comply with Bank, Tanks were opened, refilled with cement and a Tank Closure Report submitted (to who?).Sangesland requested copy of Phase I & II and Tank Closure Report. Hopefully this is enough info to show the contamination levels are low and the spill can be closed out.1/20/2004 Sangesland received a report from David Kohart, VPHasko Utilities Co Inc. 14 Industrial Blvd, Medford NY 11763(631-924-6900 / 631-765-6924)6/1/2004 Based on submitted report, site is primarily a gasoline site (12 - 550 gal tanks) abandoned in 1996. Contaminated soil found on site. Project transferred from Sangesland to Rommel.6/4/04Stip mailed to David Kohart with deadline of 6/25/04. Rommel7/11/05 Case has been transferred to Albany Remediation Group - Attn: Mike Komoroske8/2/05- temporary transferred lead to Woodward -review of file revealed that a Christopher DiCarlo (212-675-3225)from Fleming Shea called 7/20/05 requesting to combine investigation of this spill with Spill #0503781. A second call from him said he wished to combine this site with spill #0503229 not the one previously mentioned. Returned call and left message to call me back to discuss issue.11/21/05 Never recieved a return call to my messages. Still need to contact Mr. DiCarlo.3/29/06-Vought-Called Valerie Woodward and spill transferred to Vought. Valerie will scan file and email to Vought ASAP. For further information on spill see spill #512733 at same location.05/17/06-Vought-Spill transferred from DEC Vought to DEC Piper as per DEC Austin.12/7/06- DEC Piper received addendum report. The well has been resampled and results show slight exceedances of Benzene 16ppb, Isopropyl benzene 16.5ppb and n-propylbenzene 8.3 ppb. This is a significant decrease. Source area has been remediated through excavation, vapor barrier installed and active SSDS is ongoing. This case is closed as well as 0514548, 9803858, 0503781, 0503229. See E-docs if warranted. For further information on spill see spill #512733 at same location.  
Remarks: caller told by local region to call spill in of found chemicals in soil under bld from 20 years ago.

of excavation is approximately 30' with no groundwater visible. Vought noted gasoline contaminated soil under southwestern portion of site. Vought met with site construction manager(Kenneth Faulds-Plaza Construction 917-578-6620), environmental consultant(Ilkay Cam-Langan Engineering 212-479-5410, Eric Muller-Langan Engineering-646-285-4853), owner representative(Ramona Allegrini-Element West LLC 646-529-7982). As per Muller, site is an E-designated site and DEP approved workplan which include Community Air Monitoring Program (CAMP). At time of odor complaint, contaminated soil was being excavated and stockpiled onsite. Tarps were ordered to cover soil stockpile. Vought, Faulds, Muller and Allegrini visited the Heschel School located at 20 West End Avenue(Principal-Ahuva Halberstam 212-246-7717, super Gino Bebinsta 917-843-3504) which was across street from site. Periodic odors were noted but no reports made due to low concern. Halberstam also noted that students were not allowed to leave the school during the day and windows were going to be kept closed as per DEC. Vought inspected basement of school and no visible leaks or source of odors noted. The Heschel school keeps all windows closed and is running on HVAC system (hence no odors in school). Vought provided contact information to school including contact information for site management so that if odors were noticed then management could be contacted directly. Vought, Faulds, Muller and Allegrini visited the Beacon School located at 227 West 61st Street (Principal-Ruth Lacey 212-245-2807, super-Dimitri-347-865-0760) which was source of odor complaint. Odors were noted for past two weeks but were very strong yesterday afternoon (coinciding with excavation of contaminated soil). Lacey contacted Schools Chancellor who contacted Bd. of Ed, NYCDEP. NYCDEP (John Wilson 646-879-7329) performed site visit on 3/20/06. Partial evacuation of school occurred on 3/20/06 as per Board of Education ATC was hired by Board of Education and performed air monitoring at school on 3/21/06. Patel to require via phone: 1)submission of reports that were sent to DEP and all previous reports onsite(Patel to contact DEP, Langan(Ilkay Cam)and owner for reports 2)Contact address for site owner(Patel to contact Allegrini for information) 3)contact information for ATC(Patel to contact Dimitri for ATC contact)DEC to send Stipulation Agreement (as per DEC Austin) requiring: 1)collection of endpoint samples 2)delineation of soil and possible groundwater contamination 3)installation of vapor barrier and possibly passive ventilation system 4)submission of CAMP and addition of hourly monitoring of both schools to CAMP 5)submission of all previous reports onsite 6)covering of all contaminated soil stockpiles 7)excavation of contaminated soil to be performed during non-school hours.03/21/06-Hiralkumar Patel. Spoke with Ramona Allegrini. she told me that there are four partners and somebody will call back with name and number whom going to get letter from the Department. she also told me that she received call from school principal complaining odor again in building. Spoke with Muller at Langan. he is at school right now. he hasn't found any odor in school building. little odor out side of building. all soil work is stopped at location. Spoke with Dimitri and he told me that he will call back, with ATC person's name and number, after some time. received call from Kenneth Faulds. he gave me following information about owner:Lee SamiulBrach RealtyElement West11th Floor400 Broome StreetNew York, NY 10013and as this is an organization there are so many people involved. Kenneth will call back with owner's number.03/22/06-Hiralkumar Patel. REceived message from Kenneth. he

gave me number for owner is (212) 775-1111, FAX: (212) 925-4412. Left message on this number.03/22/06-Vought-Received call and spoke to Michael Kumrev (212-775-1111) who is partial owner of site. Vought explained requirements to Kumrev including requirements of Stipulation Agreement.ATC person who was on site for air monitoring:Michael DonovanPh. (212) 353-8280Tarek Khoury from Langan(212) 479-545003/22/06-Hiralkumar Patel. Spoke with Collista Nazire (ph. 718-595-4401) at DEP. she gave me name and number of project manager at DEP who is handling this site. project manager is Amy Ma (amyma@dep.nyc.gov ph. 718-595-6658, FAX: 718-595-4479).Spoke with Eric Muller (Fax: 212-479-5444) and asked him to send all the previous reports to DEC that he send to DEP and owner.Spoke with Mike (Ph. 212-353-8280, FAX: 212-353-8306) at ATC. they took air readings with instrument and found maximum of 1 ppm inside the school building. they measure for CO also but haven't found anything. Mike has submitted report to board of Education and denied my request to send copy of result report he has. but he gave me person's name and number in Board of Education who has this report and we can ask him. person's name is Mohamad Hemida (Office: 718-361-3807, Cell: 347-386-4417). Spoke with Mr. Hemida and as he was out of office, he asked me to call back tomorrow. ATC went on site again and Mr. Hemida will get result from second visit tomorrow. once he review that he will fax me the reports.03/23/06-Hiralkumar Patel. Soil contamination letter with STIP sent out to Michael Kumrev atBrach Realty requesting delineation of soil and groundwater contamination, endpoint samples, installation of vapor barrier, Adherence to the New York State Department of Health Generic Community Air Monitoring Program and submission of all previous reports. also sent copy of CAMP. letter faxed to Amy Ma in DEP, Eric Muller at Langan, Ruth Lacey at Beacon School and Mr. Kumrev at Brach REalty.Received call from Mr. Muller. He told me that some other company did initial investigation and they had submitted report to DEP. Langan hasn't submit any report. they only submitted some letters. i have asked Mr. Muller to send copy of all the reports/letters they have sent to owner/DEP. he told me that he need permission from owner and will call me if he can send those documents to me or not. the previous consultant was RA Consultant. Muller doesn't have their phone number.Received copy of air monitoring results from Mr. Dimitris. reports shows 0-1 ppm PID readings inside and outside of building.03/27/06-Vought-Received two messages from Principal Lacy that odors were persisting at school. DEC Rahman visited site and spoke to Lacy. No odors in school at time of Lacey visit. As per Rahman work was being performed onsite and as soon as PID indicating hits work stopped. Vought called Kumrev and left message to return call to DEC immediately. Vought called NYCDEP Ma and left message to return call regarding assistance with site and enforcement of Health and Safety Plan. Vought called Cabbagestalk and left message to return call to DEC. Vought called Parek Khoury and left message inform them of additional odor complaint and request copy of Health and Safety Plan. Vought called Ramona Allegrini and left message to return call. Vought called Kenneth Faulds and excavating and contaminated soil was excavated from and area that was not known to him as Langan did not tell him what areas will be contaminated. Vought received call from Khoury and left message to return call.03/27/06 Sharif Rahman- Performed a site visit after receiving odor complain from the school principla Ruth Lacey. I met Ruth Lacey at the school but could not detect smellable petroleum odor inside the school building.In front of the school entrance PID

EPA ID Number

VACANT LOT (Continued)

S107522646

reading was 2.5- 2.7 ppm. The principal told me the odor comes on and off, and the time we were in the building the odor disappeared. I inspected the construction site at 599 W59th street and met site safety manager Timothy Searvant(347-723-6387) along with Supervisor Mr. Kenneth. I smelt strong petroleum odor inside the lot, and PID reading was fluctuating between 5.00 - 7.70 ppm. Timothy Searvant indicated that they were removing contaminated soil from north western side and as they noticed elevated PID readings, the excavation work was stopped. I suggested them to contact DEC case manager Jeff Vought before proceeding with further excavation work. 03/27/06-Vought-Teleconference with DEC Urda, DEC Patel, DEC Vought, Steve Russo (212-421-2150 fax: 212-421-2035). Agreed on minor change to CAP and discussed possible stop work order. Russo requested that he and Langan (Khoury) be sole contacts for further requirements. 03/28/06-Vought-Received message from NYCDEP Ma that she can call Langan for NYSDEC to get report. Vought called Ma and she will be sending DEC copies of all DEP letters and she will contact DEC Cabbagestalk regarding teleconference today regarding site. Vought called Principal Lacy and left message with Lacy to return call to DEC. Vought called Parek Khoury and per Khoury: previous Phase I was performed by Fleming Lee Shue. Site had 15-20 USTs on western portion and north of site. Soil and groundwater sampling with VOC exceedences around tank area. Groundwater data showed no impact but groundwater hard to reach. Soil will be removed to bedrock with installation of vapor barrier. Approximately 1.5 months ago Langan was hired as new consultant. Bedrock has serpentine with possible asbestos (being handled as haz waste) and hence dust suppression. Soil will be excavated to bedrock. No bedrock remediation is required due to potential ACM. During excavation additional tanks were found and PBS forms were updated. Khoury will be willing to staff someone full time at school. Vought received via FedEx: Remedial Investigation Report(Langan), Remedial Action Plan (Langan). Vought had teleconference with DEC Austin, DEC Urda, DEC Nagi, DEP Cabbagestalk and DEP Ma. DEP will seek stop work order and will contact DEP Licata to stop work and return call to DEC. DEC Rahman performed site visit to Beacon School and no odors were detected and no work was going on eastern portion of site. As per DEC Rahman, he was told by Ilkay Langan they also detected 5-7ppm at side of excavation. Vought called Lacy and left message of progress and to inform DEC if any odors are detected. DEC requires: 1) submission of figures 1-3 of Remedial Investigation 2) full time staffing of someone at school 3) collection of endpoint samples 4) delineation of soil and possible groundwater contamination especially at former soil contamination locations 5) possibly passive ventilation system and submission of a letter certifying that the vapor barrier will be sufficient to withstand the concentrations of contamination present on the site after the installation is complete 6) addition of monitoring of both schools to CAMP 7) submission of all previous reports onsite 8) covering of all contaminated soil stockpiles 9) excavation of contaminated soil to be performed during non-school hours 10) notification to NYCDOH and NYSDOH 11) addition of residential construction letter to STIP cover letter 12) Updating of PBS registration to reflect removed status and not closed-in-place status 13) copies of previous reports 555 West 59th Street Phase II ESA, Impact Environmental(3/23/94), 555 West 59th Street Soil Screening and Tank Investigation Work, Tanks Closure Report, Don Carlo(11/4/03) for other spill numbers for site 14) Groundwater samples or vertical

delineation in areas of highest soil contamination

3/29/06-Vought-File Review by Vought:See also closed spill #0514548 for odor complaint at adjacent Beacon School, open spill #9803858(soil contamination, STIP sent on 6/4/04), open spill #0503781(discovery of old tanks), open spill #0503229(soil contamination found during borings).PBS Registration #02603010. PBS registration up to date as per DEC Krimgold.Letter from Hasko Utilities (Kohart) to NYFD-4/10/89. "This is to inform you that we abandoned our gasoline storage tanks in our building at 555 West 59th Street in Manhattan. The tanks were in good order and without leaks but we no longer had use for them so they've been filled with concrete".Invoice from Alvin Petroleum-4/13/89. Invoice for tank abandonment.Letter from DEC Sangesland to Hasco Utilities-12/23/03. Letter sent for spill #9803858. Letter sent requiring delineation and submission of a remedial action plan. "This report is required to be submitted to DEC by February 25, 2004".Stipulation Agreement from DEC Rommel to Hasko (Kohart)-6/4/04. Stipulation Agreement sent and mailed certified mail on 6/4/04. "If the signed Stipulation has not been received by June 25, 2004 the Department will hire a contractor to perform the work. No signed Stipulation in file.Letter from Casey & Hibner (John Hibner)-6/24/04. "Please be advised that I am the attorney for Hasko..." "Hasko Utilities Company transferred all its right title and interest to the subject premises on January 30, 2004 to 55559 West Realty, LLC. Their attorney is Arthur Israel, 800 Third Avenue, 30th Floor, New York, New York 10022 and his phone number is 212-355-5353. The property was taken subject to any and all existing environmental conditions. Please contact the new owners with respect to any of the requirements contained in your correspondence".Letter from Hasko(Kohart) to DEC Sangesland-1/16/04. "I am writing pursuant to our phone conversation". Enclosed is MTS EnviroSurv report.Soil Screening Study and Tank Investigation Work (MTS EnviroSurv)-5/6/98. Report for 555 West 59th Street. Former use of site was a taxi garage. NYCDOB records indicate gasoline tanks were installed onsite dating back to 1940's. Lab results showed elevated VOCs in the soil. Groundwater not encountered in any of the borings. Remedial Investigation Report (Fleming Lee Shue) August 2005 submitted to NYCDEP and prepared for Sive, Paget and Riesel. Soil and groundwater sampling activities were approved by NYCDEP. Site will be redeveloped for 35-story residential tower with cellar and sub-cellar extending to a total depth of 28" below grade. Sub cellar will be used for parking and cellar will be used for athletic facilities, theatres and a social space etc. Previous reports include 555 West 59th Street Phase II ESA, Impact Environmental(3/23/94), 555 West 59th Street Soil Screening and Tank Investigation Work, MTS EnviroSurv(5/6/98), Tanks Closure Report, Don Carlo(11/4/03). For investigation, site was divided into three sections. SECTION 1 included addresses of 543, 545, 547 West 59th St and was formerly utilized as a junkyard until 1976. SECTION 2 included addresses of 549, 551, 553 and 555 West 59th St and 248, 250, 252, 254 West 60th Street and was formerly utilized as a automobile repair shop and historic maps indicate three (550-gallon) gasoline USTs in the north central portion of the structures. Previous Phase II performed on section 2 by Impact Environmental. Soil analyticals from Phase II show TAGm 4046 VOC exceedences to a depth of 11'-14'bg. MTS EnviroSurv found 12 USTs in section 2 and performed seven borings inside building in 5/96. SECTION 3 included 238, 240, 242, 244 West 60th Street and was

EPA ID Number

VACANT LOT (Continued)

S107522646

formerly utilized as tenement housing and a warehouse. Warehouse had two USTs and one AST which were closed by Don Carlo (two 550-gallon) gasoline USTs and one 1080 fuel oil AST in basement. Five soil samples collected by Don Carlo during gasoline UST excavation and during fuel oil AST with no VOC detections. "there is a ridge of shallow bedrock running through the central portion of the section one from the northwest corner extending southwest into section two". Groundwater flow to the west generally. Remedial Investigation included installation of 32 soil borings. Two monitoring wells were installed and rest of borings performed via Geoprobe. Two other monitoring wells were discovered (on the eastern portion of section 2 and in the sidewalk at the southwest corner of section 3. Soil analyticals from deep samples show: 5600ppb toluene(SB17 11-12'bg), 22000ppb ethylbenzene(SB17 11-12'bg), 110000ppb xylene(SB17 11-12'bg), 21000ppb naphthalene(SB17 11-12'bg), 7700ppb ethylbenzene(SB18 9-10'bg), 14000ppb xylene(SB18 9-10'bg), 23000ppb naphthalene(SB18 9-10'bg), 60000ppb ethylbenzene(SB21 17-18'bg), 250000ppb xylene(SB21 17-18'bg), 31000ppb naphthalene(SB21 17-18'bg), 22000ppb toluene(SB24 11-12'bg), 31000ppb ethylbenzene(SB24 11-12'bg), 158000ppb xylene(SB24 11-12'bg), 23000ppb naphthalene(SB24 11-12'bg). Groundwater samples show no detections of VOCs (note that wells are not located in areas of soil contamination). Boring logs indicate: for SB17 at depth of 16'bg indicate "product in soil" and groundwater, for SB18 PID of 250ppm w/ gw at 14'bg and EOB at 14'bg, for SB22 PID of 1550ppm at 12'bg with EOB at 15' on bedrock, for SB21 1200ppb at 18'bg w/ gw at 17'bg and bedrock at 19'bg, for SB22 PID of 1550ppm at 12'bg and bedrock at 15'bg. Letter from NYCDEP Cabbagestalk to Steve Russo (Sive, Paget & Riesel)-6/2/05. DEP reviewed the Remedial Investigation Workplan for construction of residential apartment building. Phase II acceptable to DEP pending inclusion of: 1)detailed survey of asbestos containing materials 2)dust control measures due to Pb based paint 3)survey for fluorescent ballasts and any other PCB lighting fixtures 4)soil disturbance not take place until aforementioned conditions/recommendations are incorporated into a final workplan 5)submission of how applicant plans to satisfy the noise E requirement. Remedial Action Workplan (Fleming Lee Shue)-September 2005 "The proposed building plan calls for the construction of a basement that will cover the entire property footprint. Soil in the area of the proposed basement will be excavated to the depth of 28 feet." Plan also includes UST removal and collection of endpoint samples. "During the soil excavation and removal, a Construction Health and Safety Plan (Construction HASP) will be implemented to protect workers from exposure to SVOCs, pesticides, and heavy metals. Dust suppression will be maintained by the contractor during excavation and grading activities as described in the construction HASP. A copy of the construction HASP is included in Appendix B". HASP section 23.3.2 calls for monitoring with a PID and "measurements will be taken prior to commencement of work and for at least 1 minute every 60 minutes during the work". Community Air Monitoring provides that "air quality will be continuously monitored at the downwind perimeter of the contaminated work area while soil disturbing activities are occurring." Action levels are as follows: <5ppm above background:continue work, 5<x<10ppm above background: implement vapor emission response plan, x>10ppm above background:stop work and perform downwind monitoring in accordance with vapor emission response plan. Vapor Emission Response Plan includes contact of local police authorities if levels measured within 20 feet of the

nearest downwind residential or commercial structure exceed 10ppm above background or exceed 5ppm over background for a period greater than 30 minutes. "...pre-applied waterproofing membranes that bond integrally to poured concrete will be installed under the basement slab and along the foundation wall. Dewatering activities will occur as basement will be below groundwater level and DEP discharge permit will be obtained. Remediation Action Workplan Addendum (Fleming Lee Shue) to DEP Ma-10/17/05. "Due to the exclusion of Lot 12 and the inclusion of Lot 51, the Development plans have been altered (see attachment A). The development will still consist of a residential tower that will occupy the entire site; however, the basement plan has been altered. The basement will be located underneath the entire development, while the sub-basement will be located on the western portion of the site, only. The basement will be used for parking, mechanical space, staff areas, common space and retail space. The sub-basement will be used for common space, retail storage and mechanical areas." "The manufacturer will supply a letter certifying that the vapor barrier will be sufficient to withstand the concentrations of contamination present on the site after the installation is complete". Letter from NYCDEP Cabbagestalk to Russo-9/22/05. Review of Remedial Investigation and requirement of: 1) submission of a RAP to DEP for approval and "RAP shall delineate that all excavated soils and fill materials will be removed from the site 2) site should have a site specific health and safety plan 3) installation of a vapor barrier 4) coverage of all stockpiles with polyethylene sheeting 4) maintenance of dust suppression 5) coverage of all non concrete areas with 2' of clean fill 6) removal of ASTs in accordance with DEC regulations. "Note that the New York State Department of Environmental Conservation has regulatory authority for protection of groundwater, and may have further requirements". Letter from NYCDEP Cabbagestalk to Russo-11/29/05. NYCDEP reviewed Workplan Addendum. "We find the RAP, HASP and vapor barrier acceptable". NYCDEP has one requirement with respect to noise designation. Letter from NYCDEP Cabbagestalk to NYCDOB Osorio-12/7/05. "DEP has concluded that the applicant may proceed with the construction...". 03/31/06-Vought-File review continued by Vought: Mail to DEC Rahman from Fleming Lee Shue (DeCarlo) for spill #0503229-2/24/06. "Please find enclosed a CD with a PDF copy of the Remedial Investigation Report and Remedial Action Workplan approved by the New York City Department of Environmental Protection for the 60th Street Site. This includes data for the 244 West 60th Street Spill." Contaminated Soil Letter from DEC Feroz to Lincoln Engineering-3/9/06. "...a letter report asserting a cause of release and summarizing cleanup activities..... must be submitted to this office no later than one month from the date of this letter..." Fax from Dimitrios Stefanopoulos (Beacon) to DEC Patel-3/23/06. Report from ATC Associates-3/22/06. Report of "limited indoor air quality assessment conducted on March 31, 2006 in the morning" at the Beacon School. "Later that same day in the late afternoon ATC was requested again to return and check for the diesel fuel odor". Survey performed using PID. "TVOCs were detected in the school and ranged from 0.0 to 0.6ppm inside and were 0.0 ppm outside the building. The highest readings were on the 2nd floor in the vicinity of the science rooms". Classrooms and corridors were again tested in the afternoon and "TVOCs were detected in the school and ranged from <.01 to 2.0ppm inside and were 0.0ppm outside. The highest readings were from the chemicals in the chemistry room and the storage room of chemicals.

S107522646

All other representative readings taken were <0.1ppm." "No odors were detected in the assessed locations at the time of ATC's visits". Report concludes that "Based on our observations and measurements of (TVOCs) and CO, ATC concludes that the assessed locations were suitable for occupancy at the time of ATC's assessment". Construction Safety and Health Guidelines (Plaza Construction), Site Specific Health And Safety Plan(HASP) and Mayrich Construction Project Safety Program including MSDS Information-3/23/06. No mention of vapor monitoring or soil contamination. Stipulation Agreement from DEC Patel-3/23/06. Stipulation Agreement sent to Micheal Kumrev requiring delineation of soil contamination collection of endpoint samples, installation of vapor barrier, adherence to DER-10 CAMP, submission of all previous reports. CC to NYCDEP Ma, Langan Muller and Lacy(Beacon). CAMP attached to Stipulation. Phone call with DEC Urda, DEC Vought, DEC Patel, Tarek Khoury and Steve Russo-3/24/06. Russo requested following change to Stipulation CAP that "Respondent shall immediately submit and Investigation Summary Report that was previously submitted to NYCDEP" be included in CAP language. Letter from Langan (Ilkay Cam-Spanos)-3/27/06. Attached are Remedial Action Workplan, Remedial Action Workplan Addendum and Remedial Investigation Report from Fleming Lee Shue. Email from Langan (Khoury)-3/28/05. "Attached are PID readings from last week and today as well. As you can tell the readings are within acceptable levels. The highest PID reading today was at 1:22 PM and was 4ppm. This reading is still minimal reading and does not trigger safety or health risk issues". Email from Langan Khoury-3/28/06. "In response to the odor complaint from the Beacon School and to efficiently and promptly respond to your concerns the following is being implemented immediately": 1)work at the impacted contaminated soil along 60th Street side of the project was halted for the day 2)"all commitment made to DEP in the RAP and CHSP are being followed to the letter" 3)PID readings will be taken all day along west 60th street and west 61st street by Beacon School. All PID readings were 0 on 3/28/06 4)The area with impacted material "is clearly defined and is covered with plastic sheeting" 5)Site visit to school was conducted with DEC and no complaints were noted 6)ASR will deploy foam suppressant at the site as of 7:30am tomorrow using L-10 bioenzyme product. Letter from NYCDEP Cabbagestalk to NYCDOB Osorio-3/28/06. "The New York City Department of Environmental Protection, Bureau of Environmental Planning and Assessment(DEP) is rescinding its December 7, 2005 Notice to Proceed and requests that New York City Department of Buildings issue a notice of intent to revoke permits for work currently proceeding at 555 West 59th Street...". "Current work at the site must stop immediately until we are assured that remedial/construction activity will proceed in a manner protective to public health and the environment". Email from Steve Russo to NYCDEP and NYCDOB-3/28/06. "I am a little surprised that this action is being taken unilaterally without giving us an opportunity to address any concerns". "...we respectfully request that that DEP rescind its recission..." Request to meet onsite on 3/29/06. "There will be no disturbance in the affected area." Email also mentioned mitigation techniques. Later email from Russo that he was "advised that contaminated area was sprayed with foam.." and no work was going to occur in affected areas during the day. Russo and Khoury will be onsite at 1pm to observe conditions and requested for meeting with DEC and DEP. Meeting at Site with DEC Vought, DEC Urda, Ramonal Allegrini(Element West 646-529-7982), Eric Johnson(Plaza Construction

212-849-4800), Rich Connor(Plaza Construction 212-849-4800), James Furey(Mayrich 718-378-2600), Steven Muller(ASR 212-809-1110), John Rhodes(Naley & Aldrich 212-785-8200), Steven Russo (Sive Paget and Riesel 212-421-2150), Jane Gol(Element West 646-202-9674), Lee Samuels(Element West 973-477-6448), Mohammed Khaja-Moinuddin(NYCDEP 718-595-4445), Joel Laudes(Langan 212-479-5404), Erick Muller(Langan 646-285-4853), Richard Levato(ASR 212-809-1110)-3/30/06. DEC required and Element West agreed to staffing one Langan employee at school at all times. Mitigation measures include VOC and dust monitoring, placement of foam on excavation, immediate removal from site of contaminated soil, loading of trucks at bottom of excavation, application of L-10 enzyme, use of vapor barrier. As per Plaza concrete scheduled to be poured in 5 days. DEC noted that vapor barrier had not been demonstrated as of yet to be compatible with petroleum contamination. NYCDEP discharge permit was applied for despite no groundwater in excavation. DEC requires: 1)collection of endpoint samples 2)soil investigation of contaminated area including collection of groundwater samples at highest areas of contamination. Vought received call from Khoury(Langan) later on 3/30/06 that three bedrock wells were going to be installed and proposal will be submitted to DEC.Letter from Langan(Khoury) to NYCDEP Cabbagestalk-3/30/06. Langan commits to the following: 1)community dust, odor and Vapor Monitoring. Real time continuous monitoring being implemented. Additional commitments include excavation during non work hours, deploying of foam suppressant, application of L-10 bacteria, full time monitoring at Beacon School, "all petroleum impacted material will be excavated for offsite disposal", collection of endpoint samples, "the foundation slabs will not be poured until the remaining soil under the proposed slab is tested, the results transmitted to the NYCDEP and NYSDEC and approval by either or both agencies is granted", installation of three groundwater rock wells, designing a sub-slab depressurization system if soil and groundwater data show subsurface contamination, prepare a remedial workplan for NYSDEC and NYCDEP for review. Phone Conference with DEC Urda, DEC Austin, DEC Vought and DEP Cabbagestalk-3/31/06. NYCDEP Cabbagestalk will contact DOB for stop work order as RAP submitted to DEP was not accurate. NYCDEP also required submission of a workplan.Email from Ilkay Cam-Spanos to DEC, DEP and Khoury-3/31/06. "The following items have been implemented and on-going": 1)excavation being performed from 4:30-7:30am 2)continuous PID monitoring at the Beacon School and onsite 3)collection of two endpoint soil samples on 3/13/06 and 15 endpoint soil samples on 3/31/06 4)installation of three bedrock wells.4/1/06-Vought-Called Khoury for submission of boring location plan and left message to return call to DEC. Vought spoke to Khoury and endpoint samples will be collected and three were collected one month ago and ten samples were collected from site. Samples were collected from hand augres one foot below surface. Plan will show bedrock depth and contaminated soil. Six or seven samples will be collected from further excavation of contaminated soil. Driller will install rock wells along 60th street level inside excavation and will be installed as temporary wells and will be closed once concrete is poured. Khoury will submit site plan and soil and groundwater data, designing vapor intursion system (which will not be used if soil results are clean). DEC required collection of endpoint samples at areas of highest historical contamination with no vertical delineation(SB17, SB18, SB21, SB22 and SB24) and collection of groundwater sample in center of all five borings. Khoury stated that

S107522646

temporary wells were also going to be installed at northwest corner of excavation and at former boring location SB8. No odors detected today at school. As per Khoury no workplan was going to be submitted as samples were already collected and submitted for analysis. 4/1/06-Vought-DEC requires: 1) immediate recovery of free phase product if present. 2) submission of all previous reports including reports for Spill Numbers #9803858, #0503781 and #0503229 3) Immediate implementation and submittal of a (CAMP) including continuous indoor and outdoor monitoring at the Beacon School while school is in session and contaminated soil and/or groundwater is exposed, vapor mitigation efforts used during construction including, but not limited to, covering all contaminated soil stockpiles, use of vapor suppressant foam, immediate removal of contaminated soil from site and restriction of contaminated soil operations during non-school hours 4) Prior to pouring of concrete for the foundation, immediate submission of an (ISR) that completely delineates soil and groundwater contamination on-site. 5) Within 60 days submission of an ISR Addendum that includes off-site delineation of soil and/or groundwater contamination 5) Prior to pouring of concrete for the foundation, submission of a RAP detailing the work proposed to remediate all contaminated media on-site. The RAP shall include endpoint sample analyticals from the final depth of excavation to characterize soils directly underlying the building foundation. The RAP shall also detail vapor mitigation efforts used in the construction of the building including at a minimum, installation of a vapor barrier. The vapor barrier must also be demonstrated to be compatible with petroleum contamination. If contamination remains on-site in soil and/or groundwater, a sub-slab depressurization system will be installed. 6) Within 90 days submission of a RAP Addendum that includes off-site remediation of soil and/or groundwater contamination, if applicable. Vought drafted Stipulation and CAP with above requirements and submitted to DEC Urda and DEC Austin for review. 04/06/06-Vought-Received call from Langan (Khoury) and Steve Russo that they received stop work order from DOB and asking why order was given. Russo requested that DEC Vought contact NYCDEP Cabbagestalk to inform him that DEC was content with progress. Vought informed him that DEC had received no legally binding commitment that development would not proceed, no data had been submitted to date to DEC and hence Vought could not make the requested call to NYCDEP. Vought informed him that Stipulation was being reviewed by DEC Austin and since DEC Vought will be out on training from 4/10-4/14, DEC Austin should be contacted during that period. 04/07/06-Vought-Spoke to Rich Lavado and he had copy of file. Work at site included application of L-10 on contamination of sidewall and floor and hot zone by MW4. Area has strong odor possibly of petroleum. PID read up to 70ppm before application and 0 after. ASR not involved in soil sampling. Vought called Langan (Khoury) regarding hotzone excavation and delineation and left message that hotzone must be excavated and endpoint samples collected. Vought received second call from Lavado and they were also hired for soil and groundwater remediation. ASR will install bio-irrigation system of 4" manifolded PVC covered with bluestone topped by a vapor barrier. Lavado will submit RAP to DEC and NYCDEP. 04/07/06-Vought-Stipulation Agreement with above requirements from 4/1/06 sent after approval by DEC Austin and DEC Urda. Stipulation Deadline of May 7, 2006. 04/17/06-Vought-Received call and spoke to Khoury. Endpoint samples were collected from site (approximately 27

S107522646

samples) and data showed slight methyls and PAH exceedences. One VOC exceedence in sample. Data was submitted to DEC. Three groundwater samples were collected and groundwater was 7-11' into bedrock. Some VOC exceedences in groundwater. 04/18/06-Vought-New file review by Vought:Letter from NYCDOB to Moshe Azougi (owner) of 555 West 59th Stree Holdings LLC-4/3/06. "The Department of Buildings (the Department) intends to revoke the approval(s) and permit(s) used in connection with the application referenced above". "The Department hereby intends to revoke the permit based upon DEP's rescission of it's approval.." "In addition the conditions described above present and imminent peril to life or property at the premises. Thereby you are required to STOP ALL WORK IMMEDIATELY".Clean Backfill Material Report to DEP Cabbagestalk (Langan)-4/5/06. Documentation related to source of backfill material. "The material tested presented no TAGM 4046 exceedences and we request and approval for the use of 5,000-yard of this material as backfill at the 555 West 59th Street..." Enclosed is NYSS Beneficial Use Determination from NYSDEC dated 6/6/05, NYSS fill material laboratory test results for TAGM criteria and NYSS laboratory test results for chloride dated 11/4/05. Laboratory analyticals included show no TAGM exceedences in backfill material. Also included is letter from DEC Lynch to Nicolas Mann (Quay Consulting) dated 6/6/05 "The New York State Department of Environmental Conservation (NYSDEC) had reviewed your petition dated May5, 2005 for a beneficial use determination (BUD) for sand dredged by Amboy Aggregates, Inc., of South Amboy, New Jersey from the Ambrose Channel as unrestricted-use aggregate in New York State". "The BUD No. 846-2-24 is granted to New York Sand and Stone LLC...". Vought called and spoke to Kathleen Prather (DEC) as she was listed as contact on letter and she stated that material could be used as backfill (after Vought explained current issues on site).Remediation Work Progress Report-March 22 through April 5, 2006 (Langan)-4/6/06. COMMUNITY DUST AND VAPOR MONITORING: Monitoring in accordance with NYCDEP approved Remedial Action Workplan dated September 2005 including fixed monitoring points on the northeast and southeast corners of the site, applying water on haul road, wetting excavation faces and streets, tarping trucks, limiting of excavation during non-school hours, application of L-10 bioenzyme, ambient air monitoring including full time Langan staff at Beacon School. ENDPOINT SOIL SAMPLING: Collection of nineteen soil samples show exceedences for TAGM VOCs only is sample obtained from northwest corner of excavation below the West 60th Street sidewalk and slight exceedences of SVOCs. Additional endpoint sampling will be performed in areas once proposed excavation depth is reached. GROUNDWATER SAMPLING: Installation of four rock wells and collection of groundwater samples. Due to potential ACM in bedrock, a dust suppresion pla nwill be implimented. SOIL GAS MITIGATION: "A sub-slab depressurization system is being designed as a parallel effort..." "Based on the soil data and the field observations it appears that the exceedences in remaining soil at the site are minimal and are characteristics of historical fill and are not related to the petroleum or gasoline spill. Langan recommends no further action with respect to the subsurface conditions at the grids:A1, B1, A2, A3, B3, B4, A5, B5, C1, D2, E3, E4, E5, F5, G5 and G6. We respectfully request your approval and clearance so that the construction and foundation work can continue in these grids."Letter from Sive Paget and Riesel(Russo) to NYCDOB Osorio-4/11/06. "...we believe that there is no reason to revoke the work permits. Furthermore we request that

S107522646

following approval by the New York City Department of Environmental Protection of an amended Remedial Action Plan that will be submitted no later than April 19, 2006, that the Department revoke its stop work order." Letter summarizes remedial and vapor mitigation techniques. Letter also states that "owner committed in writing that the concrete slab for the building would not be constructed until DEP and DEC had reviewed all end point sampling and well sampling results and the parties had agreed that all required remedial measures were implemented.04/21/06-Vought-Continued file review by Vought:Remedial Work Progress Report Addendum -Bedrock Well Installation Sampling and Laboratory Results (Langan)-4/11/06. Installation of four rock wells (RW01 thru RW04).04/25/06-Vought-Continued file review by Vought:Remedial Work Progress Report Addendum -Bedrock Well Installation Sampling and Laboratory Results (Langan)-4/11/06. Installation of four rock wells (RW01 thru RW04). Wells installed to a depth of approximately 16' below bottom of excavation. "Groundwater was encountered at depths 3-ft bgs, 14.5-ft bgs, and 0.5-ft bgs in wells RW01, RW02 and RW04 respectively." No groundwater encountered in RW03. "It is our opinion that the groundwater encountered at the Site is perched (unconfined) water. The exceedences in the groundwater samples are most likely characteristics of the groundwater encountered in this general area of Manhattan and are not specifically related to site conditions." "However, and in abundance of caution, mitigation measures will be implemented to address potential vapor generation from the groundwater." Mitigation measure to include installation of vapor barrier. Groundwater analyticals show: 33ppb benzene(RW01), 26ppb xylene(RW01), 20ppb 1,2,4-trimethylbenzene(RW01), 22ppb 1,3,5-trimethylbenzene(RW01), 28ppb benzene(RW02), 51ppb toluene(RW02), 29ppb ethylbenzene(RW02), 166ppb xylene(RW02), 30ppb naphthalene(RW02).Endpoint Sample Results (Lagan)-4/13/06. Collection of endpoint samples (approximately 28 soil samples) from site. SVOC exceedences in PAHs (attributable to fill material) were found. "Based on the soil data and field observations it appears that the exceedences in remaining soil at the Site are minimal and are characteristic of historic fill, and are not related to petroleum or gasoline spill. Langan recommends no further action with respect to the subsurface conditions at the entire Site". Soil analyticals show: 71ppb benzene(C5), 67pp benzene(B5), 64ppb benzene(A6), 66ppb benzene(D5), 134ppb benzene(B6), 1347ppb xylene(B6), 92ppb benzene(Off site Pre-01), 1586ppb xylene(Off site Pre-01), 4170ppb n-propylbenzene(Off-site Pre-01).Community Air Monitoring Plan for Remedial Action (Langan)-4/13/06. "The proposed Remedial Action (RA) consists of mass excavation and off-site disposal of impacted soil within the boundary of the Site". CAMP developed in conformance with NYSDOH Generic Community Air Monitoring Plan. CAMP includes: monitoring at site since 2/6/02 and at Beacon School since 3/31/06, monitoring via PID and dust monitor, continuous VOC monitoring during all remedial activities including excavation and soil and groundwater handling, continuous monitoring at Beacon School "while school is in session and while contaminated soil and/or groundwater are exposed.", ambient air monitoring, limiting of excavation to non-school hours, covering of stockpiles, use of foam suppressant, response actions for associated PID readings.Faxed Letter from Sive, Paget and Riesel (Russo) to DEC Urda-4/17/06. "As discussed I attach and execution stipulation and corrective action plan regarding the above referenced project...". Fax included copy of Stipulation signed by Steven Russo.Email from Langan (Khouri) to DEC

**S107522646**

Vought-4/18/06. "Attached is the NY Sand and Stone BUD and lab results for the material we intend to import to the site". Request to review and approve use of fill material. See notes above regarding Clean Backfill Material Report. Investigation Summary Report (Langan)-4/18/06. "Impacted soil was encountered in the vicinity of closed-in-place underground storage tanks (USTs)". Adjacent property use includes vacant land to the north, construction site to the west, and commercial properties to the south and east. Former uses of the property include residential, commissary, junkyard, automobile repair shops, warehouse, stables. Report includes information submitted previously including: waste characterization, soil management, UST removals, post excavation endpoint sampling, rockwell installation, groundwater sampling, air monitoring, dust suppression, odor suppression, clean fill material, vapor membrane, sub-slab depressurization system. "A SSDS has been designed and will be implemented as part of remedial actions at the Site. The SSDS system will create a low vacuum zone beneath the building slab by extracting the sub-slab air using a vacuum blower mounted onto the building roof." Draft SSDS design included in Appendix E of report. Remedial Action Work Plan Addendum II (Langan)-4/18/06. Proposed construction includes parking garages on eastern portion of site and apartments in western portion of the site. Soil will be excavated to bedrock in areas of shallow bedrock. "Remaining areas of the Site will be excavated to the depth of the building basement and/or until all impacted soil is removed". "Final excavations will be based on laboratory analysis of endpoint samples in the areas where bedrock is not encountered". RAP also included air monitoring, load out/transport and off-site disposal, importation of clean fill, installation of a vapor membrane, installation of SSDS. Addendum also included new Health and Safety Plan, CAMP and OM&M Plan. "Intermittent progress reports will be provide to the NYSDEC and NYDEP until the onsite remediation is completed". A final engineering report will also be submitted to the DEC and DEP. DEC Vought to: 1)approve use of backfill material as per DEC Prather 2)investigation of soil and groundwater under sidewalk of West 60th Street due to TAGM VOC exceedences (4/6/06 report) 3)Additional excavation of B6 (also agreed to by DEC Austin)"Final excavations will be based on laboratory analysis of endpoint samples in the areas where bedrock is not encountered". 04/27/06-Vought-Spoke to Langan (Khoury) and informed him of above requirements and drafted letter with above requirements. Vought received email from Langan(Cam-Spanos) that B6 grid area was excavated to bedrock and after endpoint samples were collected. Letter was sent summarizing excavation. Further Excavation and Additional Endpoint Sampling Request at B6 (Langan Cam-Spanos)-4/26/06. "As discussed during the phone conversation you had requested further excavation and additional end-point sampling at Grid B-6. Langan's and the contractors records indicate that due to a change in the construction plans, this area was excavated to bedrock after the initial end-point sampling and the entire grid was backfilled with clean gravel". "We respectfully request your approval on this matter and contact with the NYCDEP so that the construction and foundation work may continue...". Vought sent letter approving of ISR and RAP Addendum II, approve use of backfill material as per DEC Prather and requiring: 1)investigation of soil and groundwater under sidewalk of West 60th Street due to TAGM VOC exceedences (4/6/06 report). Vought called DEP Cabbagestalk to discuss letter and left message to check fax machine. New file review by Vought: Notice to

Proceed (NYCDEP Cabbagestalk)-4/27/06. "Based on our review of the aforementioned documentation, DEP had concluded that the applicant may proceed with construction, provided that a closure report concerning the hazardous materials "E" related activities....ares submitted by the applicant to DEP for review and approval at the conclusion of the construction related activities".05/17/06-Vought-Spill transferred from DEC Vought to DEC Piper as per DEC Austin.05/30/06-Vought-Received message from Ilkay Cam (Langan 917-822-3637) that sidewalk well will be installed tomorrow and confirming that well will be bedrock well. Vought returned call and informed her of new project manager and left message confirming DEC requirements of installation of rock well.06/01/06-Vought-Received message from Ilkay and returned call and spoke to Cam. Extension requested for another 30 days. Extension granted by Vought for another 30 days till report is due for sidewalk well installation as per CAP. July 17th.8/29/06- DEC Piper reviewed ISR Addendum dated 6/14/06- AS per report, during installation of gw well on W. 60th St., contaminated soil w. bewnzene exceedances was discovered 71 ppb at 10-12' in RW-05. and n-Propylbenzene 6420 ppb in same location. GW exceedances are as follows, 27.2 ppb 1,2,4 Trimethylbenzene, 7.4 ppb- 1,3,5 Trimethylbenzene, 114 ppb- benzene, 16.2 Ethyl benzene, 28 ppb Isopropylbenzene, 31.4 MtBE, 20.1 n-Propylbenzene. DEC Piper spoke w/ DEC Vought and DEC austin regarding exceedances. Though source area was removed, DEC instructed Langan to purge well of approx 200 gallons and resample.12/6/06- DEC Piper received addendum report. The well has been resampled and results show slight exceedances of Benzene 16ppb, Isopropyl benzene 16.5ppb and n-propylbenzene 8.3 ppb. This is a significant decrease. Source area has been remediated through excavation, vapor barrier installed and active SSDS is ongoing. This case is closed as well as 0514548, 9803858, 0503781, 0503229. See E-docs if warranted. This is a historical spill. No tanks were found in the ground but soil samples show contamination. Excavation has already begun to clean up the contaminated soil.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Unkonwn Quantity Spilled: False  
Units: Gallons  
Quantity Recovered: 0  
Unkonwn Quantity Recovered: True  
Material: #6 FUEL OIL  
Class Type: #6 FUEL OIL  
Times Material Entry In File: 2190  
CAS Number: Not reported  
Last Date: 19940728

DEC Remarks: e2mis notes: Vendor transient barge E15 was within boom at pier with steam supply attached for fuel oil heating. Station fuel transfer hose was not attached yet. Barge captain requested steam line hook up at 0230 hrs since the oil temp was 130 deg. While making his rounds an hour after steam was flowing through the heater coils he discovered oil in the steam condensate discharge from 2 starboard tank. The discharge pipe for this tank discharges outside the deck spill plate directly overboard to the river. Plant was notified to cut steam supply to E15. Quick check found all spill contained within boom. Made notifications to USCG, NRC and Clean Harbors. USCG arrived at 0545 hrs. Clean up began at 0420 hrs by S D and Clean Harbors arrived at 0452 hrs for joint clean up. At 0635 the USCG approved the clean up of the scene and authorized pumping of 6 oil from the E15 to the CE3 captive barge. Estimated volume of spill into water is 2 gallons.

Remark: E15 BARGE. LEAK FROM COIL ON A STEAM LINE. SPILLED INTO THE HUDSON RIVER. BOOMS PUT IN PLACE. NRG CONTACTED FOR CLEAN UP. CON EDISON REFERENCE NUMBER NOT AVAILABLE AT THIS TIME.

DEC Remarks: 7/19/95: Lou Terri - On corner of 59th St 12th Ave. Heavy rain - sewer plugged. Water flooded building, basement and West Side Highway tunnel. Sump pumps in tunnel were not working. mechanic fixed pumps - pumped water to settling tanks before oil/water separator - could not handle flow and sludge overflowed. About 2 feet of water in the basement - some of sludge went into discharge tunnel - 10 gallons. Had hard boom outside, and deployed two more. MEG cleaned sludge out from insode boom. Sampled water inside boom - 2.5 ppm oil grease. Building was cleaned, and o/w separator was put back in service. To clean the sludge tank. Must check capacity of tunnel pumps vs. capacity of oil water separator.

Remark: OILY WATER SEPARATOR COULD HANDLE FLOW.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006

DEC Memo: 10/23/06 - See e-docs for Con Ed report detailing cleanup and closure. On 12/7/04 OMA M. Bland and T. Dancy found film of oil in #1 and #2 sumps. SS T. Benjamin was notified. #1 and #2 sump pumps were shut down. Pads were placed on top of the oil film. Upon further investigation it appears that there is an oil film in the trenches around 115 ID Fan pedestal and in the #3 sump. SS. A. Rodney inspected the OWS and it appears that there might be a sheen of oil in one of the compartments. #3 sump pump and the OWS were shut down. Envr. Engr. J. Lamalfa was requested to investigate the OWS. Dock PIC C. Webster inspected the SPDES outfalls and there was no evidence of any sheen at any outfall. All-State PowerVac was called for a clean up response. It appears that the source of the oil is the 115 ID Fan lube oil system. Exact cause is unknown but it appears that residual oil leaked into the trench system. J. Lamalfa reports that there is a sheen in the collection compartments but there is NO sheen or evidence of oil in the discharge compartment.

Remarks: NO TO 5 QUESTIONS: CONED # 156480

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

injured. The four lube oil drums were received shrink wrapped on a pallet. During the transfer from the 34' level to the basement the drums broke free of the shrink-wrap and landed on the basement floor. 15 gallons of lube oil leaked from multiple drum leaks. The oil was contained and the damaged drums placed in over pack drums. To prevent a reoccurrence of this type of spill, oil drums will be individually moved with the uses of a barrel lifter.

DEC Region: 2  
DER Facility ID: 232366  
DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "RODRIGUEZ"E2MIS 15123822-NOV-2003 12:16Operator M. Bland (I.D.# 50412) while attempting to lubricate 114 Boiler feed pump could not correctly determine the level of oil in the resevoir and as a result overfilled the oil resevoir. the oil drained out of the top of the resevoir and on to the floor where it entered the floor drain. The oil was noticed streaming into the drain collection pit as an oil and water mixture. The drain was blocked off and spill pads were placed in the pit. No oil, or oil sheen was observed draining into the sump pit where there is a pump that sends water to an oily water separator. Cleanup is continuing and is expected to be completed within the 2 hour constraint. Notified CIG operator S. Mckeever at 11:56 and received ERT contact at 12:11 A. Fiore.Sewer/Waterway: NOFire/Smoke: NOSubstance: Lube oilSource: 114 BFP LO ReseviorCause: Over fillPrivate Property: NOClean up completed at approximately 14:00. There was NO entry in to waterways or sewers. The spill was contained within the station.After investigation it was determined that initial report of 12 gallons spill was incorrect. It appeas the correct amount is approximately 4 gallons. Operator onlyuse four buckets (12 gallons total) to filled reservoir and oil leaked durting last bucket fill. Operator was filling reservoir with buckets through funnel. After filling with four buckets, the oil leaked because of overfilling. There is a level indication on the reservoir but it is not readable.ROOT CAUSE: Inattention to detail and unreadable level indication.CORRECTIVE ACTION: Operator was instructed regarding attention to detail and work order was entered to repair of replace level indicator.Update: 01-MAR-2005 by J. BurkeLevel sight glass on 114 BFP reservoir was replaced and the level can be easily seen in sight glass at present time. This incident is being submitted to theNYSDEC for review and closure.

Remarks: overfilled resevoir tank - clean up in progress - spill went into floor drain that leads to sump pit - spill has been contained

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "FOLEY"-----Con Ed e2mis #149200:At 00:53 it was observed by operator L. Tucker that oil was pouring out of #1 and #2 fuel oil tanks which is located inside of a moat in the fuel oil tank room. At this time fuel was being transferred from a barge on pier 98. The fuel transfer was stopped immedietly. The approx. amount of the spill is estimated to be about 200 gallons. The spill is contained in the moat in the fuel oil room. Operations personnel placed spill pillows around the spill on the floor, and also covered it with spill pads. Notification was made to CIG,EHS Manager, and Operations Manager. It was noticed by Shift Supervisor A. Rodney that 3 of the 4 tank level indicators in the control room were defective with a zero tank level indication, while the fourth tank (tank #4) was indicating 99.4%. Ops. Manager locating cleanup vendor to report to site to assist ops. personnel.Clean Harbors on site at 0530 to start setup for cleanup. All gross oil removed from top of tank; sides and floor of fuel oil room. Cleanup operations suspended for weekend. Cleanup of cosmetic residual oil to continue Monday, July 14th.Clean up completed 15-JUL-2003. Repairs to Magnetrol for High-High Alarm and Trip completed on 23-JUL-2003. Operation personnel conduct Trip testing of #6 fuel oil tanks and 500 valve. #1 tank was filled to 90%, the pump suction supply valve was closed ... the recirc valve to #1 tank open ... the recirc. valves to the other tank were closed. At 90% the Hi-level alarm went off. This practice was conducted on the remaining tanks, #2, #3 and #4. Below is the sequence:-#1 tank -- Trips 500 vlv. at 96.1%#2 tank -- Trips 500 vlv.

DEC Remarks: CON ED E2MIS NOTES 4-21-99 4-12-99 00:30 Preparing Annex 114 Boiler fro service, cut into valving to 4 Deaerator. Feed water regulator to 4 Deaerator leaked causing a high level condition. The overboard valve failed to open on automatic andDeaerator level continued to rise, the operation manually closed stop valves adn operated the overboard valve. During this time some water had gotten into the exhaust header of 115 Boiler Feed pumps turbine and flowed from the turbine seals and gotinto the lube oil reservoir flushing oil seperators. Approximately 20 gals. was spilled, none into the waterway.  
Remark: EQUIPMENT FAILURE CAUSED SPILL ONTO CONCRETE FLOOR AND OIL SEPARATOR. CON SPILL NUMBER 124157. NO CALL BACK NEEDED.

DEC Remarks: Assigned to Rodrigue for follow-up. e2MIS Notes: While inspecting trench system and sumps in HP basement, discovered oily substance atop surface water in retired CWS Saltwater pump vertical intake pipes. Retired SW circulating intake pumps, that take river water suction from these pits, had recently been removed by vendor. Inspection by EI and station EHS revealed about a 2 thick floating coating in each of two vertical pipe inlets. These circulators have not been used in many years but do lead to the 58th St intake tunnel. Estimate two gallons each pipe for a total of 4 gal. Samples taken for PCB analysis. Existing design drawings show that this pit is rectangular and drops vertically to take suction from the 58th St intake canal. This vertical section is separate from the large circulator pit, where the retired condenser sits. Feed to this pit from the intake is more than 20ft below basement level. Tidal action will raise and lower level in this pit no more than 6ft, effectively isolating the top layer from the river. Results received 6/6/00 <1ppm and characterized as similar to lube oil. Clean Harbors conducted cleanup from surface on 6/6 and 6/7. Cleaning of walls and slabs completed. Opening of intake permanently closed and sealed.

Remark: ABOVE MATERIAL DISCOVERED AT ABOVE LOCATION IN THE SALT WATER INTAKE SYSTEM TO RETIRED HP PLANT. OIL CANNOT ENTER HUDSON RIVER. CLEANUP VENDOR HAS BEEN CONTACTED AND SAMPLE HAS BEEN TAKEN. CON ED 131729. NO CALL BACK REQUESTED.

DEC Remarks: 6/26/96, Martinkat notes: Spoke to Mr. Soldner, Con Ed - yellow/orange color, consistency of olive oil, smells like gasoline. They have 6 oil on the site so they don t know where it is coming from. It is contained inside their boom (nothing is outside). They picked up what they could. Con Ed contacted a 1-hr. response company with a small boat to go in and clean up the rest. Con Ed took a sample for analysis. Called USCG, confirmed information. Team was out. Con Ed not the spiller but taking responsibility for clean up.  
Remark: UNKNOWN YELLOWISH SUBSTANCE IN RIVER OUTSIDE CON ED S CONTAINMENT BOOMS

DEC Remarks: Sigona called DEP communications - they indicated that Mustafa Faw a had a report on this incident. Called Con Edison Mr. Brennen) - he said Fire Dept. was on-scene. Tank is 1400 gallons, contains 98 solution sulfuric acid. Station chemist is making arrangements with a chemical cleanup company to respond. Minor leak is going to concrete moat - some went through moat. Soda ash was applied to neutralize. Advanced Environmental to pump out remaining acid in tank and do clean up. USCG arrived on site and then left. 4/29/95 - Sigona follow up call - Mr. Soldman, Con Ed supervisor. All waste acid was neutralized at Astoria Wastewater Treatment Facility. Tank was cleaned along with all waste.

Remark: IN CONTAINMENT MOOT. WILL REMOVE TO ANOTHER TANK BY TRUCK (TANK HAS PINHOLE LEAK)

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ZHAO/SIGONA"06/06/01 4:30pm: Zhao talked to Marcus Simons: The owner is Hudson River Park Trust (the State or City agency). Its address is 267-295 Greenwich Street, Manhattan, NY 10017. Tel# is (212)791-2530. There is no more drilling for the site. The project AKRF works on is Rt 9A DOT project. Vadim Brevdo, DEC HAZ Waste Section, worked on this project a few years ago with AKRF. AKRF geussed that the pollution came out from adjacent Con Edision Power Plant. Report will be sent to the Department.06/06/2001 Reference to spill number 0102942 (closed due to duplicate calls)which reported on the same day.11/21/05 Spoke to Marcus Simons of AKRF (646)388-9527. He said nothing has been done in this area since the contamination was discovered. He doesn't see anything happening here for quite awhile. - Rutland9/7/06 - Austin - Assigned from Albany to Region 2 staff (Ketani) for review and closure - end9/28/06 - Raphael Ketani. An engineering firm was doing a geotechnical boring and discovered oil in the boring. They drummed the soil and cleaned up the oil. The oil was at 4' to 6' below grade. Nothing has happened since.I tried calling Mr. Simons of AKRF (646) 388-9527, but could only leave a voice mail. His e-mail is msimons@akrf.com. I tried calling Mark Gallagher of Langan Engineering at (212) 479-5400, but could only leave a voice mail. I contacted the Hudson River Park Trust at (212) 627-2020 and spoke to Laurie Silberfeld, Chief Counsel for the park.Ms. Silberfeld said that there is a former Con Ed manufactured gas plant (MGP) site nearby. She said that someone from Albany DER was handling the case, but she didn't know who off-hand. She said to talk to Jane O'Connell, EG2 at Region 2 of DER.I talked to Ms. O'Connell. She said that the MGP site is being handled by Albany DER, but 57th Street and 12th Avenue is 2 blocks south. She doesn't believe the oil there made its way from the MGP site. She said there is a facility that stored #6 oil at this location.I received the following e-mail from Mr. Simons:This northernmost part of Hudson River Park has not yet been built sonothing has happened yet in the vicinity of 57th St. There is a "permanent"Con Ed fuel oil barge with a bulkhead underground/aboveground pumpingfacility (connected to the power plant on the other side of the highway).It would be my strong suspicion that this is the source of the oil release.Some subsurface disturbance in the vicinity of this pumping facility willeventually be required, but that will be 2007 at the earliest.AKRF is still involved in the project and will work with the Hudson RiverPark Trust once the design details are finalized to make sure constructionin the vicinity addresses this release. Feel free to call me if you

MAP FINDINGS

HUDSON RIVER PARK (Continued)

S105057911

have additional questions. Marcus \_\_\_\_\_ Marcus Simons Senior Vice President AKRF, Inc. 440 Park Avenue South, 7th Floor New York, NY 10016 (P) 646 388-9527 | (F) 212 726-09429/29/06 - Raphael Ketani. I spoke to Mr. Simons. He said that AKRF is still involved, but the Hudson River Park Trust hasn't finished its designs for this part of the park and so no progress has been made on investigating the area further. However, he said there is a large fuel barge permanently moored at the pier at 57th Street. He said it serves as a large floating tank and pipes go from there through the ground to a Con Ed power plant. He said that the power plant serves the subway system. Mr. Simons added that many investigations and borings have been done at the site. He said that nothing will happen until, maybe, sometime in 2007. I asked him for a report concerning the borings that found oil and any other data he can give me. He said he will put something together. Mr. Gallagher called me back and said that his company is not involved in the project. 1/11/07 - Raphael Ketani. I spoke to Mr. Simons. He said he had forgotten that I had requested documentation regarding the site. He said that nothing is happening and that things are still in the planning stage. He said that he will send me documentation in the next several days. 6/22/07 - Raphael Ketani. I tried to call Mr. Simons, but could only leave a message. Axel Schwendt, assistant to Mr. Simons, called me back. He said that he didn't know what DEC was looking for in a report. He said that nothing is happening at the site as the Hudson River Park is still work on finishing park property that is south of the site. I told him to have Mr. Simons keep me posted as regards events at the site. He said he will. 10/23/07 - Raphael Ketani. I tried to contact Mr. Simons, but could only leave a voice message requesting an update regarding investigative activity at the site. Mr. Schwendt returned my call. He said that nothing has happened at the site. He added that there are no plans to do construction at the site and dig up the area for at least 2 years. I told him that DEC is not going to wait even 1 year for the investigation to begin. I added that something has to start very soon. I told him to talk to Ms. Silberfeld and tell her that an investigation plan has to be submitted to DEC now. He said that he will talk to her. 10/24/07 - Raphael Ketani. I tried to contact Ms. Silberfeld, but could only leave a message. Ms. Silberfeld called me. She said that the site is a Con Ed facility. She said that Con Ed has a barge and fueling facility at Pier 98 at 57th Street. She added that DOS stores its trucks at Pier 97, which is just south. She said that Pier 98 is about 6 blocks south of the MGP site, not 2 blocks. Ms. Silberfeld mentioned that once DOS moves its trucks to the other side of 12th Avenue during the coming spring and Hudson River Park is ready to construct, then both piers 97 and 98 will be demolished. Hudson River Park has a lease with Con Ed that expires in 2009 and the ending of the lease and the need to investigate the spill and construct the park will serve as leverage against Con Ed. The top 2 feet of the soil along 12th Avenue will be removed and the contamination investigation will take place in sync with the park construction. 10/29/07 - Raphael Ketani. I made an unannounced site visit. I took pictures of pier 97 and pier 98 (pictures are in E-docs). Pier 97 is a parking and maintenance facility for DOS garbage trucks. Pier 98 is a pumping facility for Con Ed. Beyond this is another pier which is possibly pier 99. It is a DEP facility. Beyond this pier is a construction site. 8/18/08 - Raphael Ketani. The case is being prepared for transfer due to a case realignment within the unit. As no work is scheduled until 2009, the

 DEC Memo: 09/18/09- Zhune visited the site spoke to john Johnson building manager from Potamkin (212)708-3180. He said for financial reason Eastmond has been hired as subcontractor by Potamkin to locate and removed abandoned tanks that were left in place for General Motor many years ago. Contracor is Jade Environmental. There are about six (6) 700 gallons tank found filled with water and sand. They removed two tanks and piping already. Soil samples were taken. The building have two UST #2 fuel oil (10000 gallons and 5000 galloons) The 5000 gallons is located in the basement. The 10000 gallons is located under the sidewalk. As per john this tanks have no problem. Zhune met Lisette Hernandez from Eastmond at the site. She said the worker Ernest William who got hurt while cutting a pipe with a torch is in the hospital in stable condition. Neal from Eastmond said the line that caused the problem has 1 1/2 foot that is visible the rest is underground heading towards 56th st. the line is still conected to the tank and the tank is still in the ground. The radiology company is going to do the investigation to the line.

Remarks: CALLER STATES THAT A WORKER WAS REMOVING A TANK AND CUT A LINE WITH A BLOW TORCH WHICH IGNITED THE VAPORS. UNK IF ANY PRODUCT SPILLED.

DEC Remarks: Saccacio - Responded to spill. The FD was washing out the floor drains with water but the water was going to a sump and the injector pump was pumping the oil into the sewer. Notified the DEP and Sagar responded. Liam Kananagh, Acting Chief of Operations 16 West 61st St., 6th floor 10023) was on scene. I told him that the boiler room and tank vault needed to be cleaned as well as the sump. I told him he may need to repair the tank vault. Called him on 2/15/00 - No answer. Tank vault should be repaired.  
Remark: caller reports line break causing spill to boiler room and is now seeping out doors. en route for cleanup.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

11, 12, 13, part of 43, 52, 53, and 55 (current Lot 8 and part of Lot 13) on the New York City Tax Map. The street address of this Site is 229-251 West 60th Street and 218-240 West 61st Street, New York, NY 10023. The results of the remedial investigation, conducted at the Site during 2005, indicated several areas of concern within the Site, associated with past on-site uses. Former Site uses included a gasoline station, an automobile repair shop, an iron works, and automobile parking areas. Several aboveground storage tanks (ASTs) and the likelihood of several USTs were noted during the Phase I ESA. A commercial-industrial facility located east of former Lot 13, which produced buttons and fabric, was noted in the report. Records indicated that the facility utilized two petroleum storage tanks during its operation from 1926 to 2003. Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood. The proposed development on the Site includes the construction of a mixed-use residential and office complex with a parking garage. The proposed project will contain a total of 384,000 gross square feet of residential space (buildings would be a 27 story tower with two lower and mid-rise components of 9 and 14 stories), totaling approximately 505 units; 31,000 gross square feet of medical office space; court yard area with tennis court and an underground garage for 282 parking spaces. The remedial program was conducted in accordance with the March 2006 Remedial Work Plan and included excavation, removal of all soil within the Site boundary to the bedrock (8-22 feet deep) and transportation and disposal at off-site approved facilities. A total of twenty-six (26) tanks, including ASTs and USTs, were encountered during demolition, excavation, and remediation activities on the Site. All twenty-six tanks encountered on-site were removed for off-site disposal/recycling. Contaminated groundwater was removed for off-site disposal. A waterproofing layer has been installed beneath the new construction. The Remedial construction was completed in November 2007. A Final Engineering Report was approved on December 21, 2007 for a Track 1 cleanup for unrestricted Site usage. Redevelopment of the Site is on-going. A Certification of Completion was issued on December 21, 2007.

Env Problem:

June 2003 Phase I Environmental Assessment Report identified environmental conditions for the site and indicated evidence of up to 16 storage tanks (UST/ASTs) were present. These tanks were used for storing gasoline, fuel oils, lubricants, waste oils and other materials. These operations have resulted in environmental contamination. Remedial Investigation commenced in late summer of 2005 and was completed by January 2006. The Remedial Investigation Report (RIR) indicated the presence of seven on-site areas of concern. These areas include (1) three locations where underground storage tanks were discovered, (2) one location of elevated lead in the soil (Lot 43), (3) one location where acetone-contaminated soil (Lot 5) was detected, (4) one location of a suspected vaulted tank in a former basement, and (5) one location of petroleum-contaminated soil and groundwater. Groundwater contained benzene, two pesticides and several metals above groundwater standards. The primary contaminants and impacted media at the site include an area of petroleum-contaminated soil; historical fill containing atypical concentrations of contaminants (e.g. metals and SVOCs); and limited VOCs, pesticides and metals in groundwater. An Interim Remedial Measure (IRM) work plan was prepared in February 2006 to investigate and remove some of the areas of concerns identified in RI report. Exceedances of standards, criteria and guidance primarily include

total VOCs (max: 8,900 ug/ kg), total SVOCs (max: 243,260 ug/ kg) and some metals (including lead (max: 2980 mg/kg), chromium (max: 278 mg/Kg), mercury (max: 2.5 mg/kg) and arsenic (max: 16.8 mg/ kg)) for soil and VOCs in groundwater (benzene at 20 ppb; toluene at 5.8 ppb, ethylbenzene at 8.3 ppb and xylene at 33 ppb) and one SVOC (naphthalene at 13 ppb), low levels of metals and low levels of two pesticides (4,4&quot;-DDD and heptachlor epoxide). A Remedial Action Work Plan (RAWP) was prepared in April 2005 to address all contamination from this property including underground tanks and associated contaminated soils, petroleum-contaminated soils, historic fill and C & D debris. Remediation proceeded for Track 1 Cleanup standards for unrestricted usage. A total of 36,617 tons of petroleum-contaminated soil, 77 tons of characteristic hazardous waste (lead) soil, 43,961 tons of soil containing low-level contaminants, and 1,892 tons of soil containing rock and/or concrete pieces greater than 8 inches were excavated and disposed of off-site. Twenty-six (26) tanks, including ASTs and USTs, were encountered during demolition, excavation, and remediation activities on the Site. All 26 tanks were removed for off-site disposal/ recycling. Approximately 533,490 gallons of groundwater were pumped through the filter system and approximately 888,897 gallons were transported via tanker trucks for off-site disposal. All on-site sources of groundwater contamination were removed during remedial activities. The sub-grade slabs and foundation walls are waterproofed with a barrier and seal system, which also functions as a vapor barrier. All remediation is completed and a Final Engineering Report was approved on December 21, 2007. The site does not present a significant threat to the environment.

Health Problem: Volatile and semi-volatile compounds are present in soils at this site. Exposure to groundwater is not likely since the area is served by public water. The site is paved and is currently used as a parking lot, therefore current exposure to contaminated soils is unlikely. Soils will be removed and excavated to bedrock thereby removing all site-related contamination. Soil vapor intrusion into the proposed building will be unlikely since all contamination is being removed as part of the remedy. A soil vapor survey was conducted at the perimeter of the site to evaluate the potential for off-site receptors to be effected. Low levels of volatile organic compounds were detected, but the concentrations do not pose a health concern.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ENGELHARDT"12/22/92: Internal Con Ed memo: The dock PIC reported a discharge of a dark substance into the river in the vicinity of the 59th St. discharge tunnel and the adjacent Sanitation Pier @ 1120 hrs. Three fifths of the oil was contained by booms previously deployed. Station forces deployed assitional booms and oil soaking pads. At 1525 the sixe of the oil discharge being contained by the booms continued to grow. CIG was notified and Miller Environmental Group (MEG) was dispatched to assist in the clean up. MEG arrived at 1635 and deployed and additional 500 feet of oil absorbent boom with three boats and nine personnel. At this time the oily discharge ceased.An inspection was made with DEP (Tom Thomas) and USCG of all drain troughs and oil handling stations within the building. No source of oil could be found. A manhole to the 59th St discharge tunnel was opened and there was no visual indication of oil.10/10/95: This is additional information about material spilled from the translation of the old spill file: SHEEN.

Remarks: OILY SHEEN COMING OUT OF CON-ED OUTFALL AT STATION- BOOM APPLIED-CLEANUP TO COMMENCE SOON

DEC Memo: e2mis no. 147840: Approximately 3/4 gallon of alkyd based paint spilled into boomed area on Pier 98 when 5 gallon pail of paint that was being transported to dock fell off cart and spilled open. 2 gallons paint spilled most contained on dock surface and cleaned up but some (about 3/4 gallon) entered water. Contained in boomed area. Called Ken's Marine for water clean up at 07:42. Update 08:00 Paint on dock cleaned up 08:30 P.O. Jeff Carpenetti of USCG - Activities New York requests MSDS for paint (STEEL MASTER(TM) 9500 - 30% SILICONE ALKYD SAFETY RED). 08:39 Ken's Marine arrived with one response boat. Placed pads on globs of paint and sweep boom inside hard boom. 09:00 Ken's Marine work boat arrived. Assisting with pads. 09:15 ERT Mike Daughtrey arrived at station. 09:30 2nd Ken's Marine response boat arrived. Checked northside of dock, no visible sheen noted. 09:54 ERT Bill Capune reports that MSDS sent to USCG ACTNY via fax. 10:00 No visible globs of paint remain in water. Scatter sheen present. Work boat departs. 10:55 USCG ACTNY Environmental Response Team (ENS Breslin, MST2 Maglio & MST3 Trujillo) arrives at station to inspect clean up in progress. Team took "Pollution Witness Statement" from J. Burke. Team issued "Letter of Observations and Directives" and "Notice of Federal Interest for an Oil Pollution Incident". 11:30 USCG ACTNY Team and ERT Daughtrey leave station. 11:55 No visible sheen in water. Ken's Marine secured from clean up. Sweep and pads removed from water. Two bags of waste generated. Clean up complete.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V

of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
Used oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Historical Generators:

Date form received by agency: 01/01/2006  
Facility name: INTERNATIONAL FLAVORS & FRAGRANCES INC  
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 03/25/2003  
Facility name: INTERNATIONAL FLAVORS & FRAGRANCES INC  
Classification: Conditionally Exempt Small Quantity Generator

Facility Has Received Notices of Violations:

Regulation violated: Not reported  
Area of violation: Universal Waste - Small Quantity Handlers  
Date violation determined: 08/13/2008  
Date achieved compliance: 10/01/2008  
Violation lead agency: State  
Enforcement action: WRITTEN INFORMAL  
Enforcement action date: 08/21/2008

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011  
Waste name: SILVER

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 44035

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 9635

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS

NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Amount (Lbs): 700

Waste code: D007  
Waste name: CHROMIUM  
Amount (Lbs): 835

Waste code: D011  
Waste name: SILVER  
Amount (Lbs): 835

Waste code: F003  
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 43900

Waste code: U122  
Waste name: FORMALDEHYDE  
Amount (Lbs): 835

Waste code: U123  
Waste name: FORMIC ACID (C,T)  
Amount (Lbs): 700

Facility Has Received Notices of Violations:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 02

Classification: Non-Generator

Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Waste code: D009  
Waste name: MERCURY

Waste code: D011  
Waste name: SILVER

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Unverified

Date form received by agency: 03/01/1990  
Facility name: EMSIG MANUFACTURING CORP  
Site name: EMSIG MANUFACTURING CORPORATION  
Classification: Large Quantity Generator

Date form received by agency: 08/18/1980  
Facility name: EMSIG MANUFACTURING CORP  
Classification: Large Quantity Generator

Facility Has Received Notices of Violations:

Regulation violated: Not reported  
Area of violation: Generators - Manifest  
Date violation determined: 08/10/1989  
Date achieved compliance: 08/10/1989  
Violation lead agency: State  
Enforcement action: Not reported  
Enforcement action date: Not reported  
Enf. disposition status: Not reported  
Enf. disp. status date: Not reported  
Enforcement lead agency: Not reported  
Proposed penalty amount: Not reported  
Final penalty amount: Not reported  
Paid penalty amount: Not reported

Evaluation Action Summary:

Evaluation date: 08/10/1989  
Evaluation: NON-FINANCIAL RECORD REVIEW  
Area of violation: Generators - Manifest  
Date achieved compliance: 08/10/1989  
Evaluation lead agency: State

Evaluation date: 03/08/1988  
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE

**FINDS:**

Registry ID: 110001577990

**Environmental Interest/Information System**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

(718) 707-5725

Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "KOLLEENY" 11/07/05: This spill transferred from J.Kolleeny to S.Kraszewski. 11/30/05: Reviewed Post-Excavation Site Assessment Report prepared by Emipre Environmental Services, submitted December 2002. 650 tons of contaminated soil was removed and disposed of by Allied Waste. Six end point samples were taken from excavation area and analyzed. Two samples show 5 SVOCs above RSCO standards. Only one sample had a PID reading: 0.4ppm. No VOCs were detected. However, depth of the soil borings are not given for any samples taken. Nor is it mentioned if GW was encountered during borings or during tank excavation. Also, no fill port labeled on the diagram and no sample taken at fill port. Must call about fill port and samples. - SK01/04/06: Only contact number available is for Derek Martin, Heating Coordinator for NYCHA. Several unsuccessful attempts to contact him thus far. Will continue to try and reach him. - SK01/09/06: Frank Inoa from NYCHA called with additional information about the assessment report. The report contains information about the piping: the vent and fill lines were capped and the suction and return lines were removed. Soil excavated during removal of these lines was also disposed of properly. It is not likely that GW was encountered during the excavation. Frank called the consultant for more information and is waiting for their call. - SK01/13/06: Frank Inoa from NYCHA called with additional information for the site assessment. Soil along the fill lines and near the fill port was removed but samples were not taken. Talked with Jon about this situation and we decided that the site assessment was incomplete without the sampling of the fill port area and along the fill lines. I will email Frank a notification of remaining work to be done at the site: Sampling of the fill port area Sampling of the vent, fill, suction and return line area for every 20 feet of piping A Work Action Plan for review by the Department - SK03/17/06: Sent out Email to Chris Sawyer mentioning additional soil borings along the fuel lines and next to the fill port. - SK11/28/06 - JKann - report submitted on 11/14. DEC lead transferred from S.Kraszewski to J. Kann. 07/03/09 - J.Kann - work plan for investigation submitted in March 2009. Additional work proposed around the old fill port and lines. Email sent on July 3 include the following : "- The June 2006 report identifies an area of concern due to shallow contamination (SB-04). The focus of the 2009 work plan should be on this area. Based on the 2006 report, boring logs and the report indicate no petroleum odors or PID readings in the shallow samples of SB-6 and SB-5. Why are additional borings proposed in this area?" 09/15/09: J.Kann - GF's response was "As for Harborview Houses, the borings are in a very limited space. Since SB-04 was the boring area of concern, a couple of the new delineation borings surrounding the new boring proposed in the same area of SB-04 are at the same locations of SB-05 and SB-06. The analytical samples collected from SB-05 and SB-06 in 2006 were collected from 16-20 feet below ground surface. There is no shallow analytical to confirm that these areas around the fill lines and fill port are not impacted. Since that data is three years old and it was unclear where impacts were coming from the first time, borings in the area of SB-05 and SB-06 will help delineate the shallow impacts." WP was approved on 07/10/09. 07/22/10: J.Kann - spoke with Gordon of Clean Ventures (908)878-9043. He said that one boring included in the plan by the fill line was not able to be advanced because of a scaffold being present. He asked if it could be completed with hand

auger. I said that would be fine and to collect two samples one at 2 feet and one at 5 feet because previous reports showed some shallow exceedences.10/18/10: J.Kann - SAR received on 10/5/10.11/23/10: J.Kann - comments sent to NYCHA on SAR.3/22/11: Revised report sent on 11/30/10. Minor exceedences of SVOCs in fill area along fill pipe. Boring logs describe the area as "fill material: brown m.sand, trace brick, anthracite". A qualitative exposure assessment was included in the report. NFA.

Remarks: TANK REMOVAL FROM LOCATION AND GROUND CONTAMINATION FOUND. SOIL IS STOCKPILED AWAITING TEST RESULTS.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Sangesland played "phone tag" with Jeff Bohlen of Envirotrac. He said they removed a buried tank from the basement of the building and found contaminated soil. He said the contamination was confined by a historical subfloor/foundation structure from an old previous building on the site. Unknown if end point samples were taken (Sangesland did tell Mr. Bohlen that end points would be required). Sangesland asked Jeff Bohlen to contact Jeff Vought at the DEC directly for specific instructions to close out the case. A CSL Letter was NOT sent. 06/20/08-Hiralkumar Patel. duplicate spill. case closed. refer to spill #: 0706546.

Remarks: FOUND CONTAMINATED SOIL UNDER DISPENSERS

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SANGESLAND" On June 13, 2001, DEC Sigona received a tank closure report from AKRF, dated June 13, 2001. Spill was reassigned to Steve Sangesland on Feb 7, 2002 as per request. 3/25/2002 - Sangesland reviewed the AKRF Closure Report dated June 2001. The report outlines the removal of a 550 tank and the excavation of contaminated soil down to a depth of 18 feet (ground water level). Four sidewall samples were taken. All were clean for VOC's, Three were clean for SVOC's. One side wall sample had SVOC levels over STARS, AKRF suggested that these levels were within "typical background fill" levels. The report was missing a scaled site plan showing the location of the former tank and the subject excavation. The report also did not identify if any groundwater sampling had been conducted. 3/28/2002 - Sangesland spoke with Arnold Fleming of AKRF (212- 696-0670) and requested a resubmittal with both a site plan and ground water

S104950706

VOC/SVOC test results. 4/10/2002 - Julie Foley of AKRF called to say more contaminated soil was found around two additional tanks on this site. A new spill number was called in (0110824) and assigned to Tim DeMeo. The site is a huge excavation site now and the new building going up on this site will be "500 West 56th St".  
\*\*\*\*\*Actions Taken\*\*\*\*\*1) Sangesland changes the listed address for this spill to 500 West 56th Street.2) Sangesland closed out the new spill number (0110824) and referenced that spill number back to this spill number.3) Sangesland directed AKRF to write a single closure report for the property referencing the new address (500 W 56th)and including both tank/spill locations.4) AKRF requested the DEC to return the copy of the June 2001 AKRF report sent in previously.\*\*\*\*\* Notes rolled over from Spill #0110824  
\*\*\*\*\*2/14/02 Plaza Construction and its subcontractors struck 2 abandoned UST's while excavating for a new building foundation at construction site. Tanks removed from site prior to DEC inspectin. Approximately 20 cu. yds. of contaminated soil was stockpiled on site for disposal.DEC Spills requested from AKRF Inc. (environmental consultant) copies of analytical data from stockpiled soils, disposal manifests and scaled site drawing depicting former tank locations.Ray Ranami - Plaza Construction  
917-577-4656\*\*\*\*\*  
\*7/2/2002 - Sangesland reviewed a "Closure Report" dated June 28, 2002 and submitted by AKRF (Sarah Lopas 646-459-3525). The report basically brings together the data for 3 seperate tank pulls from the property over a 1 year period. Two of the three locations had "End Point Soil Samples" which exceeded TAGM SVOC levels. AKRF states that this is common for background levels, but there is no "back up data" to prove the point.Sangesland spoke with Sarah Lopas at AKRF about the issue and she'll check it out and get back to the DEC soon.  
7/15/2002 - Sangesland spoke with Andy Rudko of AKRF concerning the high SVOC levels at two of the tank pull areas. Andy said the SVOC levels were from historical fill, he also said that at this point the site has been over excavated to clear for the new building. Instead of putting together an exposure report based on historical fill all around the area, Sangesland requested a letter and photographs to document the fact that the area had been excavated further and that AKRF believes the contaminated soil is gone.2/14/2003 - Sangesland reviewed an AKRF submittal dated January 16, 2003 which contains photographs of the site. These photos clearly show the over excavation of the site down to a "sub-basement" depth. Design drawings were also submitted which showed a deep basement area was to be dug out. Clearly the contaminated soil areas are gone from this site.Spill Closed

Remarks: caller removing old tank and found contamination.

 Site Description:

**Actual:**  
**71 ft.**

Location: This site was originally part West 61st Street site, which was approximately 62,500 square feet (1.44 acres). The larger site was subdivided into two separate sites: the West 61st Street Tennis Court Area Site (C231059), and the West 61st Street Site (C231043). The Tennis Court Area (the Site) consists of an approximately 100 by 150 foot parcel of tax Block 1152, Lot 43. The Site is bounded by West 61st Street to the north, a public school to the east, an apartment building to the south, and the West 61st Street site (C231043) to the west. Site Features: The site is a paved tennis court with landscaped areas. Current Zoning: The current zoning is residential. Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood. Historical Use: The Phase I Site Assessment identified that Lot 43 operated as a gasoline station and contained underground storage tanks (USTs). Site Geology and Hydrogeology: The topography of the site slopes gently to the west toward the Hudson River, which is situated approximately 1000 feet west of the site. The site geology is characterized by fill material overlying sand and till, weathered rock, and bedrock between 8 and 12 feet bg.

Env Problem:

Nature and Extent of the Contamination: Exceedances of the TAGM 4046

MAP FINDINGS

**WEST 61ST STREET TENNIS COURT AREA SITE (Continued)**

recommended soil cleanup objectives include SVOCs and metals (including lead at a concentration that exceeded the characteristic hazardous waste limit contained in Part 371-3). Exceedances of the groundwater standards included metals. During remediation activities, eight (8) 550-gallon USTs with associated piping were located near the former parking lot attendant guard house in the northeastern corner of Lot 43 and one (1) 1,500-gallon UST was located in the southwestern corner of the parking lot portion of Lot 43. These two areas were remediated through excavation, tank removal, and post-removal soil analysis. A third area containing SVOCs and metals was also excavated and removed. The excavations were backfilled with clean material. A composite cover system was installed consisting of a demarcation layer overlain by (a) 1 foot of clean fill and capped with asphalt or similar material to cover the tennis court area, or (b) 2 feet of clean fill in areas covered with landscaping elements. The composite cover system acts as a permanent engineering control on the site. The terms of the Brownfield Cleanup Agreement have been met. The remediation at the site has been completed. The site is now in Site Management Phase.

Health Problem: The top two feet of cover at the site consist of clean soil, concrete and/or asphalt. Proper maintenance of this cover material will prevent the public from coming in direct contact with residual soil contamination. Since the area is provided with public water it is unlikely that anyone will be exposed to site contaminants in drinking water.

DEC Memo: 10/11/07-Hiralkumar Patel. spoke with Eric (212-631-9000) at Emteque. site is under development. during demolition and initial soil excavation, found free product. after that Emteque did borings at site. Eric has results of sample analysis and will send it. Eric believes that there are about 8 gasoline USTs at site.left message for Bonnie Campbell (718-222-2500).alternate address: 131-139 E 60th Streetno PBS record found.10/12/07-Hiralkumar Patel. received sample analyticals from Eric. found few SVOCs in samples. visited site. spoke with Bernard McCaffrey, project manager. as per Bernard, they found five 275 gal tanks from site. but haven't observed any product on ground. as a part of construction, they will excavate entire lot to about 15 ft bg for foundation work. no sign of contaminated soil or vapor/odor noticed at site. asked Bernard to register tanks that have been removed from the site.Bernard McCaffreyTwo Trees45 Main StreetBrooklyn, NY 11201Ph. (718) 222-2500 (O) (347) 686-2143 (C)Fax (718) 222-2501email: bmcaffrey@twotrees-dumbo.combased on site observations, case closed.10/29/07-Hiralkumar Patel. received email from Eric. they found another 2000 gal waste oil tank at site. asked Eric to see any contaminated soil at site and if any, ask to take endpoint samples according to DER-10.06/20/08-Hiralkumar Patel. received closure report (on 04/01/08) from Emteque. they removed all soil from the site and currently construction company is blasting bedrock for foundation work. no endpoint samples taken as all soil removed as regulated material.spoke with Eric at Emteque. he mentioned that currently they are 40 ft bg and about 25 ft into bedrock. no soil left at entire site. Eric mentioned that no groundwater encountered yet.based on submitted report, case closed.06/30/09-Hiralkumar Patel. received email from Eric requesting NFA.07/14/09-Hiralkumar Patel.2:33 PM:- spoke with Eric regarding mailing address for NFA. he asked to send letter to:Two Trees Management LLC.45 Main Street, Suite 602Brooklyn, NY 11201Attn.: Amish PatelPH. (718) 222-2500email: amish@twotrees-dumbo.comsent NFA to Mr. Patel for spill #s: 0706546 & 0512738. letter emailed to Mr. Patel and Eric.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ROMMEL"3/9/00Left message for George at Miller to perform site assessment and submit report to my attention.3/16/00On site, met George and representatives from Gotham Construction.They demolished an old building that had two large bay areas, a total of 6 USTs - 4 gasoline in northeast corner of property and a fuel oil tanks in the northwest corner and in the southeast corner. There were also two floor drains that discharged directly in the ground. They are constructing a 6 story residential building. Miller performed preclass borings and contamination was encountered to a depth of 15 feet. Refusal was hit at 17'. '93 borings were performed by Soil Mechanics along 55th Street. Bedrock (schist) encountered at approximately 40 bg. Water was encountered above the bedrock at Miller will collect endpoint samples at the terminus of excavation. Miller will also submit the analytical from the borings and from the samples collected around the gas tanks for disposal.

Remarks: during tank removal caller found contaminared soil

DEC Region: 2  
DER Facility ID: 216404  
DEC Memo: 02/03/06: This spill transferred from J.Kolleeny to S.Kraszewski. -  
SK9/22/06: Spill transferred from Kraszewski to Kann.1/25/07 -  
1/25/07 - J.Kann - monitoring report submitted on 11/14. Some product  
remains in two wells. Will prepare a generic letter comenting on  
report format. A work plan is due end of January 2007.7/31/07 - Work  
Plan was approved on 4/13/07. Field work was performed and a  
investigative report is due by August 15.12/27/07: J.Kann - Report  
submitted on 11/8/07. Of the 14 wells on site, two contain free  
product. These two wells are located in teh former tank area. One  
well contained approximately 4 inches of product. An accurate reading  
for the second well could not be obtained because the product was too  
viscous. A fingerprint analysis indicates teh product in the wells is  
weathered number 6 fuel oil. Consultant recommends sampling of all  
wells to determine if dissolved phase contamination exists, and to  
continue running remedial system on site(consultant claims it has  
contained the plume). 07/16/08: J.kann - email received from NYCHA  
including a WP for Amsterdam Houses.04/20/10: J.Kann - Preferred is  
planning to mobilize to conduct field work (soil borings, well  
installation) on Monday - April 26, 2010 at the NYCHA-Amsterdam  
Houses (Contract No. 9017305) in accordance with the July-2008 work  
plan prepared by Gannett Fleming.08/2/10: J.kann - Site Investigation  
Report submitted on 7/30/10.9/21/10: J.Kann - Quarterly Report Rcvd  
9/1/10.3/17/11: J.Kann - Added comments for 7/16/08 and 04/20/10.  
Quarterly Report Rcvd 1/6/11.5/11/12: J.Kann - quarterly report  
recieved on 5/9/12.1/16/13: J.Kann - 10/18/12 quarterly report  
received on 1/16/13  
Remarks: 30K TANK FAILED AES BROCKMAN #2 WITH A LEAK RATE OF -.87GPH, SOME OIL  
COMING THROUGH BASEMENT WALL, WILL PUMP OUT & INSPECT TANK. REQUEST  
THE INSTALLATION OF AT LEAST (4) GROUNDWATER MONITORING WELL

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department

of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
