[www.nyc.gov/oer](http://www.nyc.gov/oer)**NYC VCP Cleanup Plan  
Available for Review and Comment**

The New York City Office of Environmental Remediation (OER) provides this Fact Sheet pursuant to New York City's Voluntary Cleanup Program (VCP). An application has been submitted by BCRE Services, LLC for enrollment of the property located at 627 Greenwich Street in the West Village section of Manhattan, New York and identified as Block 602, Lot 58 into the VCP. The Remedial Investigation Report (RIR) details the results of an environmental investigation at the site including the nature and extent of contamination. The draft Remedial Action Work Plan (RAWP) proposes remedial actions to address contamination delineated in the RIR.

**Public Comments on the RAWP**

OER is accepting public comments on the draft RAWP for 30 days until December 16, 2015. The RIR and draft RAWP are available for review at the document repositories identified in the box on the left including a public library branch and through a link to OER's website. Comments should be sent to Mr. Shaminder Chawla via mail or e-mail (see contact information at left).

**Site Description**

The Site is 10,800 square feet and is currently a vacant 12-story building. The proposed future use of the Site will be redeveloping the existing 12-story structure into a mixed-use residential/commercial building with the existing cellar used for storage, commercial retail, and recreational space.

**Summary of RIR**

The environmental investigation identified several Semi-Volatile Organic Compounds (SVOCs), metals, and pesticides above cleanup guidelines. Groundwater samples detected three metals and one Volatile Organic Compound (VOC) above Groundwater Quality Standards. Soil vapor samples showed high levels of petroleum-related VOCs and chlorinated VOCs above the monitoring/mitigation level ranges established by the New York State Department of Health.

**Summary of the Remedy**

The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP Citizen Participation activities according to an approved Citizen Participation Plan;
- Implementation of a Community Air Monitoring Plan for particulates and volatile organic carbon (VOCs) compounds;
- Establishment of Site-Specific (Track 4) Soil Cleanup Objectives (SCOs);
- Excavation and removal of soil/fill exceeding Track 4 Site-Specific SCOs. For development purposes, 20% of the existing cellar will be excavated an additional 3.5 feet. Less than 3,000 tons of soil will be excavated and removed from Site;
- Transportation and off-Site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and this plan. Sampling and analysis of excavated media as required by disposal facilities and appropriate segregation of excavated media onsite;
- Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs;
- Installation of a vapor barrier below the concrete slab in areas of excavation and application of a barrier coating in areas of the existing slab that will remain untouched;
- Installation of an active sub-slab depressurization system (SSDS);
- Submission of a Remedial Action Report (RAR) that describes the remedial activities and certifies that the remedial requirements have been achieved and lists any changes from this RAWP;
- Submission of an approved Site Management Plan (SMP) in the RAR for long-term management of residual contamination, including plans for maintenance, inspection and certification of Engineering and Institutional Controls and reporting at a specified frequency; and
- Continued registration with Restrictive Declaration for the property.

**Next Steps**

OER will review the draft RAWP and consider all public comments submitted during the comment period before it approves a final RAWP. The approved RAWP will be placed on OER’s website and a second fact sheet will be issued before remedial work begins.

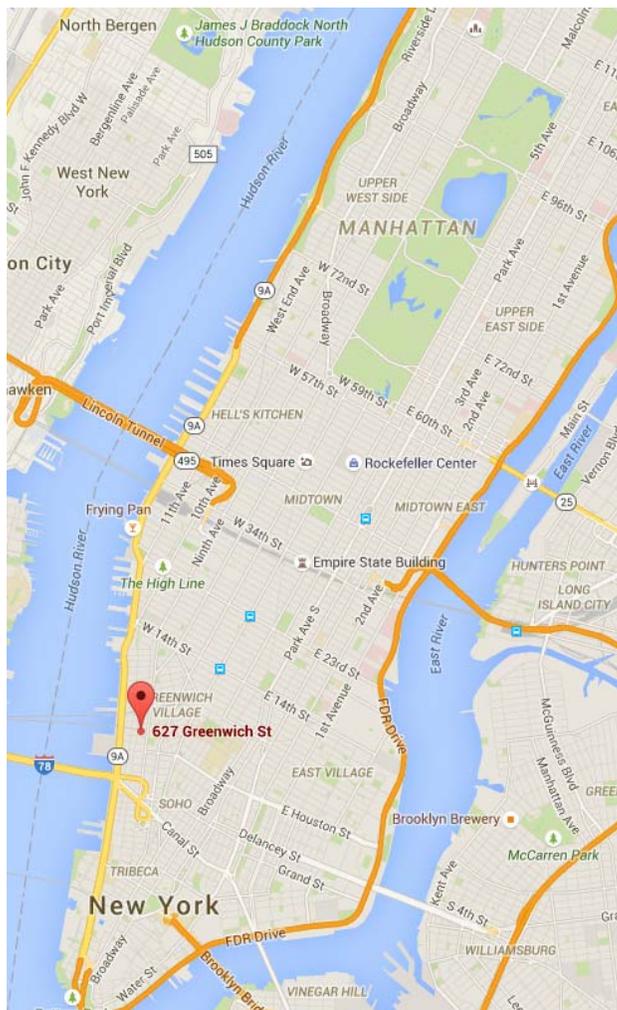

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building.
